(a) *Application for renewal* Applications for renewal must be made in writing, submitted at least 30 calendar days prior to the expiration date of the permit for which renewal is requested and, must certify that all statements and information made in the original application remain current and correct unless previously changed or corrected, or provide necessary corrections to the file including a certification concerning the validity of the information on file in the form as provided by § 13.12(a)(5).

(b) *Renewal criteria.* In order for renewal of a permit to be granted, all criteria applicable to the issuance of a permit must be met. The disqualifying factors set forth in § 13.21(c) of this part are also applicable to renewal of a permit.

(c) *Continuation of permitted activity.* Any person holding a valid renewable permit, who has complied with the provisions of this section, may continue such activities as were authorized by his expired permit until his renewal application is acted upon.

(d) *Denial.* The issuing office shall deny renewal of a permit to any permittee who fails to meet the issuance criteria set forth in § 13.21 of this part, or in any part(s) or section(s) specifically governing the activity for which renewal is requested.

§ 13.23 Amendment of permits.

(a) *Permittee's request.* Where circumstances have changed so that a permittee desires to have any term or condition of his permit modified, he must submit in writing full justification and supporting information in conformance with the provisions of this part and the part under which the permit has been issued or requested.

(b) *Service reservation.* The Service reserves the right to amend any permit for just cause at any time during its term.

(c) *Change of name or address.* A permittee is not required to obtain a new permit if there is a change in the legal individual or business name, or in the mailing address of the permittee, provided, that the permittee notifies the issuing office within 10 calendar days of the change. This provision does not authorize any change in location of the conduct of the permitted activity when approval of the location is a qualifying condition of the permit.

§ 13.24 Right of succession by certain persons

(a) Certain persons, other than the permittee, are granted the right to carry on a permitted activity for the remainder of the term of a current permit provided they comply with the provisions of paragraph (b) of this section. Such persons are the following:

(1) The surviving spouse, child, executor, administrator, or other legal representative of a deceased permittee; and

(2) A receiver or trustee in bankruptcy or a court designated assignee for the benefit of creditors.

(b) In order to secure the right provided in this section, the person or persons desiring to continue the activity shall furnish the permit to the issuing officer for endorsement within 90 days from the date the successor begins to carry on the activity.

(c) Any person granted authority to carry on a permitted activity under this section is limited to the activity specifically authorized by the permit.

§ 13.25 Permits not transferable; agents.

(a) Permits issued under this part are not transferable or assignable. Some permits authorize certain activities in connection with a business or commercial enterprise and in the event of any lease, sale, or transfer of such business entity, the successor must obtain a permit prior to continuing the permitted activity. However, certain limited rights of succession are provided in § 13.24.

(b) Except as otherwise stated on the face of a permit, any person who is under the direct control of the permittee, or who is employed by or under contract to the permittee for the purposes authorized by the permit, may carry out the activity authorized by the permit.

§ 13.26 Discontinuance of permit activity.

When a permittee, or any successor to a permittee as provided for by § 13.24, discontinues activities authorized by a permit, the permittee shall within 30 calendar days of the discontinuance return the permit to the issuing office together with a written statement surrendering the permit for cancellation. The permit shall be deemed void and cancelled upon its receipt by the issuing office. No refund of any fees paid for issuance of the permit or for any other fees or costs associated with a permitted activity shall be made when a permit is surrendered for cancellation for any reason prior to the expiration date stated on the permit face.

§ 13.27 Permit suspension or revocation.

The privilege of exercising some or all permit authority may be suspended, or a permit may be revoked at any time prior to expiration of the permit.

(a) *Criteria for suspension.* A permit may be suspended for any of the following reasons:

(1) Change in the statute or regulations authorizing the permit; or,

(2) Change in the population status of the wildlife or plants that are the subject of the permit; or,

(3) Violation of any permit condition by a permittee, or any person exercising the authority of the permit, including failure to pay in full all fees associated with the permit or the permitted activity; or

(4) Any violation by the permittee, or any person exercising the authority of the permit, of any Federal or State statute or regulation governing conduct of activities with respect to the wildlife or plants that are the subject of the permit.

(b) *Criteria for revocation.* A permit may be revoked for the following reasons:

(1) Change in the statute or regulation authorizing the permit; or

(2) Change in the population status of the wildlife or plant that are the subject of the permit; or

(3) Conviction, entry of a plea of guilty or nolo contendere, or assessment of a civil or criminal penalty for a violation of any Federal or State statute or regulation governing conduct of activities with respect to the wildlife or plants that are the subject of the permit; or

(4) The permittee becomes disqualified under § 13.21(c) of this part.

(c) *Procedure for suspension of revocation.* (1) When there are grounds for suspending or revoking a permit the issuing official shall serve the permittee with a written notice of proposed suspension or revocation by certified or registered mail. This notice shall identify the permit to be suspended or revoked, the reason(s) for such suspension or revocation, the proposed disposition of the wildlife, if any, and inform the permittee of the right to object to the proposed action. Such notice of proposed suspension or revocation may be amended at any time by the issuing official.

(2) Upon receipt of a notice of proposed revocation or suspension the permittee may file a written objection to the proposed action. Such objection must be in writing, must be filed within 30 calendar days of the date of the notice of proposal, must state the reasons why the permittee objects to the proposed action, and may include any supporting documentation.

(3) A decision on the revocation or suspension shall be made within 45 days after the end of the objection period, and issuing office shall notify the permittee in writing of its decision and the reasons therefor, together with the information concerning the right to request reconsideration and the procedures for requesting reconsideration.

§ 13.28 Review procedures.

(a) *Request for reconsiderotion.* Any person may request reconsideration of an action under this part if that person is one of the following:

(1) An applicant for a permit who has received written notice of denial;

(2) An applicant for renewal of a permit who has received written notice that a renewal is denied;

(3) A permittee who has had a permit amended, suspended, or revoked, except for those actions which are required by changes in statutes or regulations, or are emergency changes of limited applicability for which an expiration date is set within 90 days of the date of the permit change; or

(4) A permittee who has a permit issued or renewed but has not been granted authority by the permit to perform all activities requested in the application, except when the activity requested is one for which there is no lawful authority to issue a permit.

(b) *Method of requesting reconsideration.* Any person requesting reconsideration of an action under this part must comply with the following criteria:

(1) Any request for reconsideration shall be in writing, signed by the person requesting reconsideration or by the legal representative of that person, and shall be submitted to the issuing office.

(2) The request for reconsideration shall be submitted to the issuing office and must be received by that office within 45 calendar days of the date of notification of the decision for which reconsideration is being requested.

(3) The request for reconsideration shall state the decision for which reconsideration is being requested and shall state the reason(s) for the reconsideration, including presenting any new information or facts pertinent to the issue(s) raised by the request for reconsideration.

(4) The request for reconsideration shall contain a certification in substantially the same form as that provided by § 13.12(a)(5). If a request for reconsideration is received that does not contain such certification, but is

otherwise timely and appropriate, it shall be held and the person submitting the request shall be given written notice of the need to submit the certification within 15 calendar days of the date of such notification. Failure to submit certification shall result in the request being rejected as insufficient in form and content.

(c) *Inquiry by the Service.* The Service may institute a separate inquiry into the matter under consideration.

(d) *Determination to grant or deny a request for reconsideration.* A decision shall be made within 45 calendar days of receipt of the request for reconsideration, and the issuing office shall notify the permittee in writing of its decision and the reasons therefore, together with the information concerning the right to appeal and the procedures for making an appeal.

(e) *Appeal.* A person who has received an adverse decision following submission of a request for reconsideration, and who objects to that adverse decision, may submit a written appeal to the Regional Director for the region in which the issuing office is located, or to the Director for offices which report directly to the Director, within 15 calendar days of notification of the decision. The appeal shall state the reason(s) and issue(s) upon which the person bases the appeal and contain any additional evidence or arguments to support the appeal.

(f) *Decision on appeal.*

(1) Before a decision is made concerning the appeal the appellant may present oral arguments before the Regional Director or the Director, if appropriate, if such official judges oral arguments necessary to clarify issues raised in the written record.

(2) A written decision setting forth the decision and the reasons for the decision on the appeal shall be made within 60 calendar days of the date the appeal is received, unless extended for good cause and the appellant is notified in writing.

(3) The decision of the Regional Director or the Director shall constitute the final administrative decision of the Department to the Interior."

9. Revise § 13.41 to read as follows:

§ 13.41 Humane conditions.

Any live wildlife possessed under a permit must be maintained under humane conditions.

§ 13.46 [Amended]

10. Section 13.46 *Maintenance of records* is amended to remove the third and fourth sentences and substitute a sentence reading as follows: "Such records shall be legibly written or reproducible in English and shall be maintained for five years from the date of expiration of the permit."

11. Sections 13.48, 13.49, and 13.50 are added to read as follows:

§ 13.48 Compliance with conditions of permit

Any person holding a permit under Subchapter B and any person acting under the authority of such permit must comply with all conditions of the permit and with all applicable laws and regulations governing the permitted activity.

§ 13.49 Surrender of permit.

Any person holding a permit under Subchapter B shall surrender such permit to the issuing office upon notification that the permit has been suspended or revoked by the Service.

§ 13.50 Acceptance of liability.

Any person holding a permit under Subchapter B assumes all liability and responsibility for the conduct of any activity conducted under the authority of such permit.

Subpart E [Removed]

12. Subpart E—Violations of the permit, consisting of § 13.51, is removed.

PART 21—MIGRATORY BIRD PERMITS

1. The authority citation for Part 21 is revised to read as follows:

Authority: 16 U.S.C. 704; 16 U.S.C. 712.

2. Section 21.1 is revised to read as follows:

§ 21.1 Purpose of regulations.

The regulations contained in this Part supplement the general permit regulations of Part 13 of this subchapter with respect to permits for the taking, possession, transportation, sale, purchase, barter, importation, exportation, and banding or marking, of migratory birds. This part also provides certain exceptions to permit requirements for public, scientific, or educational institutions, and establishes depredation orders which provide limited exceptions to the Migratory Bird Treaty Act (16 U.S.C. 703–711).

3. Section 21.2 is amended by revising paragraph (a) as follows, and removing paragraph (d).

§ 21.2 Scope of regulations.

(a) Migratory birds, their parts, nests, or eggs, lawfully acquired prior to the effective date of Federal protection under the Migratory Bird Treaty Act (16 U.S.C. 703–711) may be possessed or transported without a permit, but may not be imported, exported, purchased, sold, bartered, or offered for purchase, sale, or barter, and all shipments of such birds must be marked as provided by Part 14 of this subchapter: *Provided,* No exemption from any statute or regulation shall accrue to any offspring of such migratory birds.

* * * * *

4. Section 21.3 is amended by adding, alphabetically, to its existing language the following definition of "sensitive raptor":

§ 21.3 Definitions.

* * * * *

"Sensitive raptor" means any migratory bird of the species *Falco peregrinus* (peregrine falcon), *Falco rusticolus* (gyrfalcon), *Parabuteo unicinctus* (Harris hawk), or *Falco mexicanus* (prairie falcon), or any individual of any interspecific hybridization when one or both parents is of any of the above species or is a hybrid or offspring of one or more of the above species."

5. Section 21.11 is revised to read as follows:

§ 21.11 General permit requirements.

No person shall take, possess, import, export, transport, sell, purchase, barter, or offer for sale, purchase or barter, any migratory bird, or the parts, nests, or eggs of such bird except as may be permitted under the terms of a valid permit issued pursuant to the provisions of this part and Part 13, or as permitted by regulations in this part or Part 20 (the hunting regulations).

6. Section 21.12 is amended by revising the last sentence of paragraph (b) to read as follows:

§ 21.12 General exceptions to permit requirements.

* * * * *

(b) * * * Records shall be maintained or reproducible in English on a calendar year basis and shall be retained for a period of five (5) years following the end of the calendar year covered by the records.

7. Add new § 21.21 to read as follows:

§ 21.21 Import and export permits.

(a) *Permit requirement.* (1) Except for migratory game birds imported in accordance with the provisions of Subpart G of Part 20 of this Subchapter B, an importation permit is required before any migratory birds, their parts, nests, or eggs may be imported.

(2) An exportation permit is required before any migratory birds, their parts, nests, or eggs may be exported: *Provided,* that captive-reared waterfowl that are marked in compliance with the provisions of § 21.13(b) may be exported without a permit.

(b) *Application procedures.* Applications for permits to import or export migratory birds shall be submitted to the appropriate issuing officer (see §§ 10.22 and 13.11(b) of this subchapter). Each such application must contain the general information and certification required by § 13.12(a) of this subchapter plus the following additional information:

(1) Whether importation or exportation is requested;

(2) Species and numbers of migratory birds or their parts, nests, or eggs to be imported or exported;

(3) Name and address of the person from whom such birds are being imported or to whom they are being exported;

(4) Purpose for which importation or exportation is being made;

(5) Estimated date of arrival or departure of shipment, and the port of entry or exit through which the shipment will be imported or exported; and

(6) Federal and State permit numbers and type of permits authorizing possession, acquisition, or disposition of such birds, their parts, nests, or eggs where such a permit is required.

(c) *Additional permit conditions.* In addition to the general conditions set forth in Part 13 of this Subchapter B, import and export permits shall be subject to any requirements set forth in the permit.

(d) *Term of permit.* The term of an import or export permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

8. Section 21.22 is amended as follows:

a. In paragraph (b) revise the zip code to read "20708."

b. In paragraph (c)(1) revise the reference to "Bureau" to read "Service".

c. In paragraph (c)(2) revise the zip code to read "20708."

d. Paragraph (d) is revised to read as set out below:

§ 21.22 Banding or marking permits.

* * * * *

(d) *Term of permit.* A banding or marking permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

9. Section 21.23 is amended as follows:

a. In paragraph (b) introductory text, review the reference to "Special Agent in Charge" to read "issuing office".

b. Paragraph (d) is revised to read as set out below:

§ 21.23 Scientific collecting permits

* * * * *

(d) *Term of permit.* A scientific collecting permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

10. Section 21.24 is amended as follows:

a. In paragraph (b) introductory text, revise the reference to "Special Agent in Charge" to read "issuing office".

b. Paragraph (e) is revised to read as set out below:

§ 21.24 Taxidermist permits.

* * * * *

(e) *Term of permit.* A taxidermist permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

11. Section 21.25 is amended as follows:

a. In paragraph (b) introductory text, revise the reference to "Special Agent in Charge" to read "issuing office".

b. Paragraph (d) is revised to read as set out below:

§ 21.25 Waterfowl sale and disposal permits.

* * * * *

(d) *Terms of permit.* A waterfowl sale and disposal permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

12. Section 21.27 is amended as follows:

a. Revise the introductory text and paragraph (a) as set out below.

b. In paragraph (b) introductory text, revise the reference to "Special Agent in Charge" to "issuing office".

c. Paragraphs (c) introductory text and (c)(1) are revised as set out below.

d. Paragraphs (c)(3), (4), (5) and (6) are added as set out below.

e. Paragraph (d) is revised as set out below.

§ 21.27 Special purpose permits.

Subject to the discretion of the issuing office and the policies of the Service, permits may be issued for special purpose activities related to migratory birds, their parts, nests or eggs, which are otherwise outside the scope of the standard form permits of this part. A special purpose permit for migratory bird related activities not otherwise provided for in this part may be issued to an applicant who submits a written application containing the general information and certification required by Part 13 and makes a sufficient showing of benefit to the migratory bird resource, important research reasons, reason for human concern for individual birds, or other compelling justification.

(a) *Permit requirement.* A special purpose permit is required before any person may lawfully take, salvage, otherwise acquire, transport, or possess migratory birds, their parts, nests or eggs for any purpose not covered by the standard form permits of this part. In addition, a special purpose permit is required before any person may sell, purchase, or barter captive-bred, migratory game birds, other than waterfowl, that are marked in compliance with paragraph (c)(3) of this section.

* * * * *

(c) *Additional permit conditions.* In addition to the general conditions set forth in Part 13 of this Subchapter B, special purpose permits shall be subject to the following conditions:

(1) Permittees shall maintain adequate records describing the conduct of the permitted activity, the numbers and species of migratory birds acquired and disposed of under the permit, and inventorying and identifying all migratory birds held on December 31 of each calendar year. Records shall be maintained at the address listed on the permit; shall be in, or reproducible in, English; and, shall be available for inspection by Service personnel during regular business hours. A permittee may be required by the terms of the permit to file with the issuing office an annual report of operation. Annual reports, if required, shall be filed no later than January 31 of the calendar year following the year for which the report is required. Reports, if required, shall describe permitted activities, numbers and species of migratory birds acquired and disposed of, and shall inventory and identify all migratory birds possessed under the special purpose permit on December 31 of the reporting year.

* * * * *

(3) All live, captive-bred, migratory game birds possessed under authority of a valid special purpose permit shall have been, prior to six (6) weeks of age, physically marked by banding of one metatarsus with a seamless metal band.

VOL 52 ISS 248 DEC 28 1987 UMI

(4) No captive-bred, migratory game bird may be sold or bartered unless marked in accordance with paragraph (c)(3) of this section.

(5) No permittee may take, purchase, receive or otherwise acquire, sell, barter, transfer, or otherwise dispose of any captive-bred, migratory game bird unless such permittee submits a Service form 3-186A (Migratory Bird Acquisition/Disposal Report), completed in accordance with the instructions on the form, to the issuing office within five (5) calendar days of such transaction.

(6) No permittee, who is authorized to sell or barter migratory game birds pursuant to a permit issued under this section, may sell or barter such birds to any person unless that person is authorized to purchase and possess such migratory birds under a permit issued pursuant to this part and Part 13 or as permitted by regulations in this part.

(d) *Term of permit.* A special purpose permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

13. Section 21.28 is revised to read as follows:

§ 21.28 Falconry Permits.

(a) *Permit requirements.* A falconry permit is required before any person may take, possess, transport, sell, purchase, barter, or offer to sell, purchase, or barter raptors for falconry purposes.

(b) *Application procedures.* A applicant who wishes to practice falconry in a State which meets Federal falconry standards as provided by § 21.29 must submit a written application for a falconry permit to the issuing office designated by § 13.11(b) of this subchapter. Each application must contain the general information and certification required by § 13.12(a) of this subchapter plus a copy of a valid State falconry permit issued to the applicant.

(c) *Issuance criteria.* Upon receiving an application completed in accordance with paragraph (b) of this section, the Director will decide whether a permit should be issued. In making a decision, the Director shall consider, in addition to the general criteria in § 13.21(b) of this subchapter, whether the applicant has a valid State falconry permit issued by a State in conformance with the Federal falconry standards set out in § 21.29.

(d) *Permit conditions.* In addition to the general conditions set forth in Part 13 of this subchapter, every permit issued under this section shall be subject to the following special conditions:

(1) A permittee may not take, transport or possess a golden eagle (*Aquila chrysaetos*) unless authorized in writing under § 22.24 of this subchapter.

(2) A permit issued under this section is not valid unless the permittee has a valid State falconry permit issued by a State which has laws or regulations that meet or exceed the Federal falconry standards set forth in § 21.29.

(3) A permittee may not take, possess, transport, sell, purchase, barter or transfer any raptor for falconry purposes except under authority of a Federal falconry permit issued under this section and in compliance with the Federal falconry standards set forth in § 21.29.

(4) No permittee may take, purchase, receive, or otherwise acquire, sell, barter, transfer, or otherwise dispose of any raptor unless such permittee submits a form 3-186A (Migratory Bird Acquisition/Disposal Report), completed in accordance with the instructions on the form, to the issuing office within five (5) calendar days of any such transaction.

(5) No raptor may be possessed under authority of a falconry permit unless the permittee has a properly completed form 3-186A for each bird possessed, except as provided in paragraph (d)(4) of this section.

(6) A raptor possessed under authority of a falconry permit may be temporarily held by a person who is otherwise authorized to possess raptors, other than the permittee, only if the raptor is accompanied at all times by the properly completed form 3-186A designating the permittee as the possessor of record and a signed, dated statement from the permittee authorizing the temporary possession.

(7) A permittee may not take, possess, or transport any sensitive raptor unless such bird is banded either by a seamless, numbered band or by a permanent, nonreuseable band provided by the Service:

(i) Any sensitive raptor taken from the wild must be reported to the issuing office within five (5) days of taking and must be banded by a permanent, nonreuseable band supplied by the Service. No raptor removed from the wild may be banded with a seamless, numbered band.

(ii) The loss or removal of any band must be reported to the issuing office within three (3) calendar days of the loss. The lost band must be replaced by a permanent, nonreuseable band supplied by the Service. A form 3-186A must be filed in accordance with paragraph (d)(4) of this section recording loss of the band and rebanding.

(8) A permittee may not sell, purchase, barter, or offer to sell, purchase, or barter any raptor unless the raptor is marked on the metatarsus by a seamless, numbered band supplied by the Service.

(9) A permittee may not receive or otherwise acquire from, may not transfer or otherwise dispose of to, and may not loan to or temporarily place with, another person, any raptor unless that person is authorized to acquire, possess, and dispose of such raptors under a valid permit issued pursuant to this part and Part 13 or as permitted by regulations in this part.

(10) A permittee may not propagate raptors without prior acquisition of a valid raptor propagation permit issued under § 21.30.

(e) *Term of permit.* A Federal falconry permit issued or renewed under this part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed (3) years from the date of issuance or renewal.

14. Section 21.29 is amended as follows.

a. Paragraph (a) is revised as set out below.

b. Paragraph (c) is removed and paragraph (d) is redesignated as paragraph (c) and revised as set out below.

c. Paragraph (e) is redesignated as paragraph (d).

d. A new paragraph (e) is added as set out below.

e. Paragraphs (f), (g) and (h) are removed.

f. Paragraphs (i) and (j) are redesignated as paragraphs (f) and (g).

g. Newly redesignated paragraph (g)(4) is revised as set out below.

h. Paragraph (k) is removed.

§ 21.29 Federal falconry standards.

(a) *General.* No person may take, possess, transport, sell, purchase, barter, or offer to sell, purchase, or barter any raptor for falconry purposes in any State which does not allow the practice of falconry by law or regulations which meet or exceed the Federal falconry standards set forth in this section: *Except,* a Federal falconry permittee may possess and transport for falconry purposes otherwise lawfully possessed raptors through States which do not meet Federal falconry standards so long as the raptors remain in transit and in interstate commerce.

* * * * *

(c) *Permit.* State laws or regulations shall provide that a valid State falconry permit from either that State or another State meeting or exceeding Federal falconry standards of this section is required before any person may take, possess, transport, sell, purchase, barter or offer to sell, purchase, or barter any raptor for falconry purposes or practice falconry in that State.

* * * * *

(e) *Marking.* All sensitive raptors possessed for purposes of falconry, must be marked in accordance with the following provisions:

(1) Any sensitive raptor, except a captive-bred raptor lawfully marked by a numbered, seamless band issued by the Service, must be banded by a permanent, nonreuseable, numbered band issued by the Service.

(2) Any sensitive raptor possessed for purposes of falconry must be banded at all times in accordance with these standards. Loss or removal of any band must be reported to the issuing office within three (3) calendar days of the loss and must be replaced with a permanent, nonreuseable, numbered band supplied by the Service.

* * * * *

(g) * * *

(4) A raptor possessed under authority of a falconry permit may be temporarily held by a person who is otherwise authorized to posses raptors, other than the permittee, only if the raptor is accompanied at all times by the properly completed form 3-186A designating the permittee as the possessor of record and a signed, dated statement from the permittee authorizing the temporary possession.

* * * * *

15. Section 21.30 is amended as follows:

a. Paragraph (a) is revised as set out below.

b. Paragraph (d)(1) is removed and paragraphs (d)(2) through (d)(5) are redesignated as paragraphs (d)(1) through (d)(4).

c. Newly redesignated paragraph (d)(2) is revised as set out below.

d. Paragraph (d)(3)(iii) is added.

e. A new paragraph (d)(5) is added.

f. Paragraph (d)(6) is revised.

g. Paragraphs (d)(7) through (d)(11) are redesignated as (d)(11) through (d)(15).

h. New paragraphs (d)(7) through (d)(10) are added.

i. Newly redesignated paragraph (d)(13)(i) is amended by adding, following the word "Director" in each place it appears, the phrase "and the director of the wildlife conservation department of the State in which release to the wild is proposed".

j. Paragraph (e) is revised as set out below.

§ 21.30 Raptor propagation permits.

(a) *Permit requirement.* A raptor propagation permit is required before any person may take, possess, transport, sell, purchase, barter, or offer to sell, purchase or barter any raptor, raptor egg, or raptor semen for propagation purposes.

* * * * *

(d) * * *

(2) *Marking requirement.* Unless otherwise specifically exempted, every raptor possessed for purposes of raptor propagation, including all progeny produced pursuant to the permitted activity, must be banded in accordance with the following provisions:

(i) Except for captive-bred raptors lawfully marked by a seamless, numbered band provided by the Service, any raptor possessed for purposes of raptor propagation, shall be banded with a permanent, nonreuseable, numbered band issued by the Service.

(ii) Unless specifically exempted by the terms of the raptor propagation permit, each captive-bred raptor produced under authority of a raptor propagation permit shall be banded within two (2) weeks of hatching with a numbered, seamless band provided by the Service, placed on the raptor's leg (metatarsus). In marking captive-bred raptors, permittees:

(A) Shall used a band with an opening (inside diameter) which is small enough to prevent its removal when the raptor is fully grown without causing serious injury to the raptor or damaging the band's integrity or one-piece construction;

(B) May band a raptor with more than one size band when the potential diameter of the raptor's leg at maturity cannot be determined at the time of banding; and,

(C) Shall remove all but one band from any raptor with more than one band before the raptor is five (5) weeks of age and return all bands removed to the issuing office.

(iii) No raptor taken from the wild, produced from an egg taken from the wild, or produced from an egg from any source other than bred in captivity under authority of a raptor propagation permit may be banded with a numbered, seamless band issued by the Service.

(iv) No permittee under this section may band any raptor with any band issued or authorized by the Service unless that raptor is lawfully possessed by the permittee.

(3)* * *

(iii) No raptor or raptor egg may be taken from the wild except in accordance with State law.

* * * * *

(5) *Use of Service form 3-186A.* No permittee may take, purchase, receive, or otherwise acquire, sell, trade, barter, transfer, or otherwise dispose of any raptor unless such permittee submits a form 3-186A (Migratory Bird Acquisition/Disposal Form), completed in accordance with the instructions on the form, to the issuing office within five (5) calendar days of any such transaction.

(6) *Documentation of lawful possession.* No raptor may be possessed under authority of a raptor propagation permit unless the permittee has in possession a properly signed and completed form 3-186A to demonstrate lawful acquisition of each raptor possessed, except as provided in paragraph (d)(5) of this section.

(7) *Temporary possession.* A raptor possessed under authority of a raptor propagation permit may be temporarily held by a person who is otherwise authorized to possess raptors, other than the permittee, only if the raptor is accompanied at all times by the properly completed form 3-186A designating the permittee as the possessor of record and a signed, dated statement from the permittee authorizing the temporary possession.

(8) *Sale, purchase, barter.* A permittee may not sell, purchase, barter, or offer to sell, purchase, or barter any raptor unless such raptor is lawfully marked on the metatarsus by a seamless, numbered band supplied by the Service.

(9) *Transfer to another.* A permittee may not receive or otherwise acquire from, may not transfer or otherwise dispose of to, and may not loan to or temporarily place with, another person, any raptor unless the person is authorized under this part to dispose of or receive raptors.

(10) *Use in falconry.* A permittee may use a raptor possessed for propagation in the sport of falconry only if such use is designated in both the propagation permit and the permittee's falconry permit.

* * * * *

(e) *Term of permit.* A raptor propagation permit issued or renewed under this Part expires on the date designated on the face of the permit unless amended or revoked, but the term of the permit shall not exceed three (3) years from the date of issuance or renewal.

Dated: September 29, 1987.

William P. Horn,

Assistant Secretary for Fish and Wildlife and Parks.

LIST OF PUBLIC LAWS

Last List December 24, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030)

H.R. 2325/Pub. L. 100-201

To authorize the acceptance of a donation of land for addition to Big Bend National Park, in the State of Texas. (Dec. 22, 1987; 101 Stat. 1328; 1 page) Price: $1.00

H.J. Res. 395/Pub. L. 100-202

Making further continuing appropriations for the fiscal year 1988, and for other purposes. (Dec. 22, 1987; 101 Stat. 1329)

H.R. 3545/Pub. L. 100-203

Omnibus Budget Reconciliation Act of 1987. (Dec. 22, 1987; 101 Stat. 1330)

H.R. 1777/Pub. L. 100-204

Foreign Relations Authorization Act, Fiscal Years 1988 and 1989. (Dec. 22, 1987; 101 Stat. 1331; 102 pages) Price: $3.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, CHOICE, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday-Friday (except holidays).

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Title 3—

The President

Proclamation 5754 of December 23, 1987

Amending the Generalized System of Preferences

By the President of the United States of America

A Proclamation

1. Pursuant to section 504(a)(1) of the Trade Act of 1974, as amended (the Trade Act) (19 U.S.C. 2464(a)(1)), the President may withdraw, suspend, or limit the application of the duty-free treatment afforded under the Generalized System of Preferences (GSP) with respect to any article or any country upon consideration of the factors set forth in sections 501 and 502(c) of the Trade Act (19 U.S.C. 2461 and 2462(c)). Accordingly, after taking into account the factors set forth in section 501 of the Trade Act, I have determined that it is appropriate to withdraw the duty-free treatment afforded under the GSP to imports from all designated beneficiary developing countries of molybdenum ore and metal-bearing materials in chief value of molybdenum, provided for in items 601.33 and 603.40, respectively, of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202).

2. Section 604 of the Trade Act authorizes the President to embody in the TSUS the substance of the relevant provisions of that Act, of other acts affecting import treatment, and of actions taken thereunder.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States of America, including but not limited to sections 501, 504(a)(1), and 604 of the Trade Act, do proclaim that:

(1) In order to withdraw the duty-free treatment afforded under the GSP to certain articles, TSUS items 601.33 and 603.40 are modified by deleting from each item the symbol "A," appearing in parentheses in the Rates of Duty Special column.

(2) The modifications to the TSUS made by paragraph (1) of this Proclamation shall be effective with respect to articles both: (i) imported on or after January 1, 1976, and (ii) entered, or withdrawn from warehouse for consumption, on or after the second day after the publication of this Proclamation in the **Federal Register.**

IN WITNESS WHEREOF, I have hereunto set my hand this 23rd day of December, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Proclamation 5755 of December 23, 1987

Year of New Sweden, 1988

By the President of the United States of America

A Proclamation

The year 1988 is the 350th anniversary of the arrival, in what is now Delaware, of two ships, the *Kalmar Nyckel* and the *Fogel Grip*, which were sent by the Kingdom of Sweden to establish New Sweden, the first permanent settlement of Swedes in North America. Celebration of this occasion gives every American the opportunity to pay tribute to those courageous colonists and to all who have followed them from Sweden to America.

Swedish Americans have won a place in the history and heritage of the United States, and they continue their tradition of notable achievements today. Two Swedish Americans associated prominently with the American Revolution were John Morton of Pennsylvania, a signer of the Declaration of Independence, and John Hanson of Maryland, who presided over the Continental Congress in 1781 and 1782. More than a million Swedes came to the United States between 1845 and 1910, and more than four million Americans today have Swedish ancestry.

We can all be truly proud of the contributions of Swedish Americans to our beloved land, of the close ties between the United States and Sweden over the years, and of the devotion to democracy that our peoples share.

The Congress, by Public Law 99–304, has designated 1988 as the "Year of New Sweden" and has authorized and requested the President to issue a proclamation in observance of this year.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim 1988 as the Year of New Sweden. I call upon the Governors of the several States, local officials, and the people of the United States to observe this year with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of December, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Proclamation 5756 of December 23, 1987

National Skiing Day, 1988

By the President of the United States of America

A Proclamation

National Skiing Day gives all Americans the opportunity to celebrate the continuing role of skiing in recreation, sports, and our economy, as well as its place in American life and lore.

Many Americans first discovered both the potential uses and the attractions of skiing from reports of the achievements of an early skier, pioneer mail carrier John A. "Snowshoe" Thompson, who transported letters and parcels in a backpack as he covered his 90-mile territory through the Sierra Nevada. During his two decades of devoted service, 1856–1876, he won a well-earned reputation for heroism and faithfulness as he traversed the mountains, first on his large, handmade skis and later by sleigh, to keep frontier communication open between Nevada and California.

Since then, other dedicated Americans have employed skiing in the defense of our country, in rescue operations, and in similar activities.

Through the years, skiing has experienced revolutions in equipment, technique, and participation. Wood skis were replaced by metal ones, which then gave way to fiberglass, and bindings have improved greatly. Today some 15 million Americans engage in Alpine or Nordic skiing, and highly skilled and dedicated skiers and biathletes vie for coveted positions on America's Winter Olympics squads.

Skiing, of course, offers many benefits. In the areas of health and fitness, Alpine skiing's courses improve strength and flexibility, and Nordic skiing's cross-country trails build endurance. Skiing helps people improve coordination as they attain or maintain good physical condition. Skiing provides enjoyment for spectators as well as participants, fosters appreciation for the outdoors, and affords the opportunity to enjoy winter and its splendors. Skiing also increases the recreational uses of national forests and provides winter employment and income for residents of rural communities.

In recognition of skiing and its benefits, the Congress, by Public Law 100–189, has designated January 8, 1988, as "National Skiing Day" and has authorized and requested the President to issue a proclamation in observance of that day.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim January 8, 1988, as National Skiing Day. I call upon the people of the United States to observe this day with appropriate ceremonies and activities.

Proclamation 5757 of December 23, 1987

National Day of Excellence, 1988

By the President of the United States of America

A Proclamation

Theodore Roosevelt once said: "The foundation stone of national life is and ever must be the individual character of the individual citizen." Nowhere has that fact been better demonstrated than in our national quest for excellence, which has spurred Americans to strive to live up to the highest ideals of our nature and our heritage.

For three decades, that quest has been best symbolized by the magnificent achievements of our space program. The program has proved beyond a doubt that, with will and resolve, Americans can draw upon the insights and inventions of generations past and accomplish great things. In striving for excellence in space, we have expanded the horizon of human potential, brought countless scientific and economic benefits back to Earth, and demonstrated to ourselves and to the world our national vitality, courage, and imagination.

Through the years, the space program has had brilliant successes—but also some disheartening setbacks. On January 28, 1988, the second anniversary of the Space Shuttle CHALLENGER accident, we remember CHALLENGER's courageous crew and other space pioneers who made the supreme sacrifice in the pursuit of excellence—in technology, in goals, in achievement, and in their personal lives.

Their sacrifice was not in vain. For they taught us, above all, that our national quest for excellence must never end if we are to remain a great nation.

When the space shuttle is launched again, the world will know that, once again, the United States is back in space—ready to accept its boundless challenges and eager to pursue its countless opportunities. With the shuttle, we will move toward our next logical step—building and operating a permanently manned space station.

To recognize the importance of space to our future and to honor our space pioneers, especially those who made the ultimate sacrifice in the cause of excellence, the Congress, by Public Law 100-190, has designated January 28, 1988, as a "National Day of Excellence" and authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim January 28, 1988, as a National Day of Excellence. I call upon the people of the United States to observe this day with appropriate ceremonies and activities and to pursue, in the course of their regular activities, the spirit of excellence represented by the crew of the CHALLENGER.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of December, in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 52, No. 249
Tuesday, December 29, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 226

Child Care Food Program; Key Element Reporting System

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule extends the data collection period for the Key Element Reporting System (KERS) in the Child Care Food Program (CCFP) until June 30, 1988. Extension of the data collection is necessary because of delays in the clearance and distribution of the KERS forms which reduced the originally established data collection period by six months. This extension will provide the Department with the 13-month data collection period which was originally envisioned as necessary to provide a comprehensive assessment of KERS in its current form.

EFFECTIVE DATE: January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Lou Pastura, Branch Chief, Policy and Program Development Branch, Child Nutrition Division, FNS, USDA, 3101 Park Center Drive, Room 509, Alexandria, Virginia 22302 or by phone at (703) 756-3620.

SUPPLEMENTARY INFORMATION:

Classification

This final rule is effective January 1, 1988. Implementation of this regulation on January 1 is necessary to ensure the continuity of the data collection which it governs. For this reason, the Administrator of the Food and Nutrition Service has determined in accordance with 5 U.S.C. 553(d) that good cause exists for making this rule effective less than 30 days after publication.

The action has been reviewed under Executive Order 12291 and has been classified as not major because it will have an annual effect on the economy of $100 million, will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, and will not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or foreign markets.

This regulation has also been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601-612). Pursuant to the review, the Administrator of the Food and Nutrition Service has certified that this final rule will not have a significant economic impact on a substantial number of small entities.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting and recordkeeping requirements that are included in this final rule have been approved by the Office of Management and Budget under clearance 0584-0055.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.558 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, and final rule related notice published at 48 FR 29114, June 24, 1983).

Background

On September 3, 1986, the Department published a final rule governing the implementation of the Key Element Reporting System (KERS) in the Child Care Food Program (CCFP) at 51 FR 31313. That final rule established a KERS date collection period which was to have begun on December 1, 1986 and continued through December 31, 1987. However, because the clearance and distribution of data collection forms took longer than expected, the collection period envisioned in the KERS rule was delayed and actual data collection did not begin until approximately June 1, 1987. Because the Department believed that a full 13-month data collection period was necessary to provide an accurate assessment of KERS, the Department issued a proposed rule on September 17, 1987 (52 FR 35105) to extend the data collection period by six months (until June 30, 1988) to compensate for the time lost.

During the official comment period on the proposed rule, the Department received nine comments, all of which were submitted by State agencies. Six of the nine comments were opposed to the extension, while three essentially supported it. Generally speaking, those comments which opposed the extension did so on the grounds that KERS was being implemented inconsistently from State to State. For the most part, they blamed this on the data collection form being used and the guidance provided. They suggested that this inconsistency could result in the reporting of invalid data. They further suggested that the development of program performance standards using invalid data could undermine the usefulness of those standards.

All of the substantive concerns expressed by these six commenters were reflected in comments provided to the Department on the proposed KERS rule published on January 29, 1986 (51 FR 3603). The preamble to the final KERS rule contained the Department's response to these concerns. Specifically, the Department acknowledged the possibility that some element of subjectivity could exist in KERS, as in all other review systems. However, the Department contended (and continues to contend) that most of the important aspects of the CCFP can be reasonably and consistently quantified. This would apply particularly to the most significant areas of program accountability such as compliance with meal pattern requirements, free and reduced price application procedures and recordkeeping requirements.

This final rule contains one minor change from the amendatory language continued in the proposed extension rule. In that rule, the Department proposed to extend the data collection period *until* June 30, 1988. This date was used incorrectly since it would limit the reporting of data to that collected prior to June 30. In order to collect the data for the entire six-month period envisioned in that rule, a July 1, 1988 date should have been used. Therefore, based on the foregoing, the Department is extending the KERS data collection to the period prior to July 1, 1988.

VOL 52 ISS 249 DEC 29 1987 UMI

List of Subjects in 7 CFR Part 226

Day care, Food assistance programs, Grant programs—Health, Infants and children, Reporting and recordkeeping requirements, Surplus agricultural commodities.

Accordingly, Part 226 is amended as follows:

PART 226—CHILD CARE FOOD PROGRAM

1. Authority citation for Part 226 is revised to read as follows:

Authority: Secs. 323, 326 and 361, Pub. L. 99-500 and 99-591, 100 Stat. 1783 and 3341 (42 U.S.C. 1758, 1760 and 1766); secs. 803, 810 and 820, Pub. L. 97-35, 95 Stat. 521-535 (42 U.S.C. 1758, 1766); sec. 2, Pub. L. 95-627, 92 Stat. 3603 (42 U.S.C. 1766); sec. 10, Pub. L. 89-642, 80 Stat. 889 (42 U.S.C. 1779), unless otherwise noted.

§ 226.6 [Amended]

2. In § 226.6, paragraph (o) is amended by removing the date "January 1, 1988" and adding in its place "July 1, 1988".

Dated: December 23, 1987.

George A. Braley,

Acting Administrator.

[FR Doc. 87-22794 Filed 12-28-87; 8:45 am]

BILLING CODE 3410-30-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 87-117]

Agreements With Owners of Privately Owned Commercial Bird Quarantine Stations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations on bird importations by requiring the signature of the Administrator of the Animal and Plant Health Inspection Service (APHIS) on Cooperative and Trust Fund Agreements between APHIS and privately owned commercial bird quarantine facilities. Before the publication of this document, the regulations required the Acting Administrator of APHIS to sign these agreements.

EFFECTIVE DATE: December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Dr. Harvey A. Kryder, Senior Staff Veterinarian, Import-Export and Emergency Planning Staff, VS, APHIS, USDA, Room 809, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8695.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR Part 92 (referred to below as the regulations) govern, among other things, the importation of birds into the United States. Section 92.11(f) sets forth quarantine requirements to prevent introduction of communicable poultry diseases into the United States; paragraph (f)(7) of this section requires the creation of a Cooperative and Trust Fund Agreement between APHIS and the operators of each approved quarantine facility for the importation of birds.

The responsibility for signing these agreements lies with the Acting Administrator of APHIS. Since there is no Acting Administrator, we are amending the regulations to authorize the Administrator of APHIS to sign the agreements.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Changing the signature authority on Cooperative and Trust Fund Agreements will have no effect on importers or quarantine facility operators.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Effective Date

Determining who in the Agency signs Cooperative and Trust Fund Agreements is the responsibility of the Agency. Because this matter deals with internal agency procedures, neither a general notice of proposed rulemaking nor a 30-day delay in effective date is required under the administrative procedure provisions of 5 U.S.C. 553. Accordingly, this regulation is effective upon publication.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

Accordingly, 9 CFR Part 92 is amended as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for Part 92 is revised to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306, 21 U.S.C. 102-105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

§ 92.11 [Amended]

2. Paragraph (f)(7)(iii)(C)(5) of § 92.11 is amended by removing "Acting Administrator, Animal and Plant Health Inspection Service, U.S. Department of Agriculture" and inserting "Administrator, Animal and Plant Health Inspection Service, United States Department of Agriculture".

Done in Washington, DC, this 22nd day of December, 1987.

Donald Houston,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 87-29716 Filed 12-28-87; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 234

[Docket No. 44827; Amdt. No. 234-4]

Airline Service Quality Performance; Editorial Amendment

AGENCY: Department of Transportation/ Office of the Secretary.

ACTION: Final rule; editorial amendment.

SUMMARY: Under a rule issued September 2, 1987, the Department of Transportation (DOT or Department) required 14 air carriers to submit certain flight data to the Department for public dissemination, and to vendors of computerized reservations systems (CRS) for incorporation into their CRS system displays. This amendment makes a minor editorial change to the rule.

EFFECTIVE DATE: December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Gwyneth Radloff, at 400 7th Street SW., Washington, DC 20590 or by phone at (202) 366-9307.

SUPPLEMENTARY INFORMATION: On September 2, 1987, the Department issued a final rule that required 14 air carriers to submit certain data to the Department and to CRS vendors. In addition, these carriers were required to provide on-time performance data to consumers, upon request to the carriers' ticketing agents.

This amendment adds a phrase found in earlier sections that was omitted from § 234.6, which requires participating carriers to report baggage statistics. The phrase clarifies the requirement that the participating carriers comply with Reporting Directives issued by the Department's Office of Aviation Information Management.

Because this is an editorial change, the Department finds, under sections 553 (b)(3)(B) and (d)(2) of the Administrative Procedure Act, that notice and comment are not necessary and that this amendment may be made effective immediately upon publication. This action is taken under authority delegated to the General Counsel under 14 CFR 1.57(1).

List of Subjects in 14 CFR Part 234

Advertising, Air carriers, Consumer protection, Reporting requirements, Travel agents.

Issued in Washington, DC on December 22, 1987.

B. Wayne Vance,

General Counsel.

For the reasons set forth in the preamble, the Department amends Title 14, Chapter II, Subchapter A of the Code of Federal Regulations as follows:

PART 234—AIRLINE SERVICE QUALITY PERFORMANCE REPORTS

1. The authority for Part 234 continues to read as follows:

Authority: 49 U.S.C. 1302, 1324, 1374, 1377 and 1381; 5 U.S.C. § 553(e) and 14 CFR § 302.38.

2. Section 234.6 is revised to read as follows:

§ 234.6 Baggage-handling statistics.

Each reporting carrier shall report monthly to the Department on a domestic system basis, excluding charter flights, the total number of passengers enplaned systemwide, and the total number of mishandled-baggage reports filed with that carrier. The information shall be submitted to the Department within 15 days of the end of the month to which it applies and must be submitted with the transmittal letter accompanying the data for on-time performance in the form and manner set forth in the reporting directives issued by the Director, OAIM.

[FR Doc. 87-29714 Filed 12-28-87; 8:45 am]

BILLING CODE 4910-62-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1000

Organization, Functions, and Authority Delegations; Program Management and Budget Office et al.

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Consumer Product Safety Commission is amending its statement of organization and functions to reflect organizational changes made since the changes published December 24, 1986, 50 FR 52440. The changes are the consolidation of the functions of the former Officer of Program Management and the former Office of Budget, Program Planning and Evaluation into a new Office of Program Management and Budget and a new Office of Planning and Evaluation; the consolidation of the Commission's downtown Washington, DC offices into its Bethesda, Maryland facilities; the reorganization of the former five Regional Offices into three Regional Centers; the elimination of the Commission's Toxicological Advisory Board; additional responsibilities in the Office of the Secretary with respect to the Flammable Fabrics Act; transfer of the Commission's human factors staff from the Directorate for Engineering Sciences to the Directorate for Epidemiology; and elimination of the Office of Administrative Law Judge. Editorial revisions have also been made in the descriptions of several organizations.

EFFECTIVE DATE: December 29, 1987.

ADDRESSES: Consumer Product Safety Commission, Office of the Secretary, Washington, DC 20207.

FOR FURTHER INFORMATION CONTACT: Joseph F. Rosenthal, Office of the General Counsel, Consumer Product Safety Commission, Washington, DC 20207, telephone 301-492-6980.

SUPPLEMENTARY INFORMATION: Since this rule relates solely to internal agency management, pursuant to 5 U.S.C. 553(b), notice and other public procedures are not required and it is effective immediately upon publication in the **Federal Register.** Further, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612, and, thus, is exempt from the provisions of the Act.

List of Subject for 16 CFR Part 1000

Organization and Functions (Government Agencies).

Dated: December 16, 1987.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

Accordingly, Part 1000 is revised to read as follows:

1000.24 Directorate for Epidemiology.
1000.25 Directorate for Economic Analysis.
1000.26 Directorate for Engineering Sciences.
1000.27 Directorate for Health Sciences.
1000.28 Directorate for Compliance and Administrative Litigation.
1000.29 Directorate for Administration.
1000.30 Directorate for Field Operations.

Authority: 5 U.S.C. 552(a).

§ 1000.1 The Commission.

(a) The Consumer Product Safety Commission is an independent regulatory agency which was formed on May 14, 1973, under the provisions of the Consumer Product Safety Act (Pub. L. 92–573, 86 Stat. 1207, as amended (15 U.S.C. 2051, *et seq.*)). The purposes of the Commission under the CPSA are:

(1) To protect the public against unreasonable risks of injury associated with consumer products;

(2) To assist consumers in evaluating the comparative safety of consumer products;

(3) To develop uniform safety standards for consumer products and to minimize conflicting State and local regulations; and

(4) To promote research and investigation into the causes and prevention of product-related deaths, illnesses and injuries.

(b) The Commission is composed of five members, appointed by the President, by and with the advice and consent of the Senate, for terms of seven years.

1000.2 Laws administered.

The Commission administers five acts: (a) The Consumer Product Safety Act (Pub. L. 92–573, 86 Stat. 1207, as amended (15 U.S.C. 2051, *et seq.*)).

(b) The Flammable Fabrics Act (Pub. L. 90–189, 67 State. 111, as amended (15 U.S.C. 1191, *et seq.*)).

(c) The Federal Hazardous Substances Act (Pub. L. 86–613, 74 Stat. 380, as amended (15 U.S.C 1261, *et seq.*)).

(d) The Poison Prevention Packaging Act of 1970 (Pub. L. 91–601, 84 Stat. 1670, as amended (15 U.S.C.1471, *et seq.*)).

(e) The Refrigerator Safety Act of 1956 (Pub. L. 84–930, 70 Stat. 953, 15 U.S.C. 1211, *et seq.*)).

§ 1000.3 Hotline.

(a) The Commission operates a toll-free telephone Hotline by which the public can communicate with the Commission. The number for use in all 50 states is 1–800–638–CPSC (1–800–638–2772).

(b) The Commission also operates a toll-free Hotline by which deaf or speech-impaired persons can communicate by teletypewriter with the Commission. The teletypewriter number for use in all states except Maryland is 1–800–638–8270. The teletypewriter number for use in Maryland is 1–800–492–8104.

§ 1000.4 Commission addresses.

(a) The principal offices of the Commission are at 5401 Westbard Avenue, Bethesda, Maryland. All written communications with the Commission should be addressed to the Consumer Product Safety Commission, Washington, DC 20207, unless otherwise specifically directed.

(b) The Commission has 3 Regional Centers which are located at the following addresses and which serve the sates indicated:

(1) Central Regional Center, 230 South Dearborn St., Room 2944, Chicago, Illinois 60604; Alabama, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Tennessee, and Wisconsin.

(2) Eastern Regional Center, 6 World Trade Center, Vesey Street, Room 301, New York, New York 10048; Connecticut, Delaware, District of Columbia, Florida, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Vermont, Virginia, West Virginia, and Virgin Islands.

(3) Western Regional Center, U.S. Customs House, 555 Battery St., Room 401, San Francisco, California 94111; Alaska, American Samoa, Arizona, Arkansas, California, Colorado, Guam, Hawaii, Idaho, Louisiana, Montana Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming.

§ 1000.5 Petitions.

Any interested person may petition the Commission to issue, amend, or revoke a rule or regulation by submitting a written request to the Secretary, Consumer Product Safety Commission, Washington, DC 20207.

§ 1000.6 Commission decisions and records.

(a) Each decision of the Commission, acting in an official capacity as a collegial body, is recorded in Minutes of Commission meetings or as a separate Record of Commission action. Copies of Minutes or of a Record of Commission action may be obtained upon written request from the Secretary, Consumer Product Safety Commission, Washington, DC 20207, or may be examined in the public reading room at Commission headquarters. Requests should identify the subject matter of the Commission action and the approximate date of the Commission action, if known.

(b) Other records in the custody of the Commission may be requested in writing from the Office of the Secretary pursuant to the Commission's Procedures for Disclosure or Production of Information under the Freedom of Information Act (16 CFR Part 1015).

§ 1000.7 Advisory opinions and interpretations of regulations.

(a) *Advisory opinions.* Upon written request, the General Counsel provides written advisory opinions interpreting the acts the Commission administers. Advisory opinions represent the legal opinions of the General Counsel and may be changed or superseded by the Commission. Requests for issuance of advisory opinions should be sent to the General Counsel, Consumer Product Safety Commission, Washington, DC 20207. Requests for copies of particular previously issued advisory opinions or a copy of an index of such opinions should be submitted to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207.

(b) *Interpretations of regulations.* Upon written request, the Associate Executive Director for Compliance and Administrative Litigation will issue written interpretations of Commission regulations pertaining to the safety standards and the enforcement of those standards. Requests for such interpretations should be sent to the Associate Executive director for Compliance and Enforcement, Consumer Product Safety Commission, Washington, DC 20207. Requests for interpretations of administrative regulations (e.g., Freedom of Information Act regulations) should be sent to the Secretary, Consumer Product Safety Commission, Washington, DC 20207.

§ 1000.8 Meetings and hearings; public notice.

(a) The Commission may meet and exercise all its powers in any place.

(b) Meetings of the Commission are held as ordered by the Commission and, unless otherwise ordered, are held at the principal office of the Commission at 5401 Westbard Avenue, Bethesda, Maryland. Meetings of the Commission for the purpose of jointly conducting the formal business of the agency, including the rendering of official decisions, are generally announced in advance and open to the public, as provided by the Government in the Sunshine Act (5 U.S.C. 552b) and the Commission's Meetings Policy (16 CFR Part 1012).

(c) The Commission may conduct any hearing or other inquiry necessary or appropriate to its functions anywhere in the United States. It will publish notice of any proposed hearing in the **Federal Register** and will afford a reasonable opportunity for interested persons to present relevant testimony and data.

(d) Notices of Commission meetings, Commission hearings, and other Commission activities are published in a Public Calendar, as provided in the Commission's Meetings Policy (16 CFR Part 1012).

§ 1000.9 Quorum.

Three members of the Commission constitute a quorum for the transaction of business.

§ 1000.10 The Chairman and Vice Chairman.

(a) The Chairman is the principal executive officer of the Commission and, subject to the general policies of the Commission and to such regulatory decisions, findings, and determinations as the Commission is by law authorized to make, he or she exercises all of the executive and administrative functions of the Commission.

(b) The Commission annually elects a Vice Chairman to act in the absence or disability of the Chairman or in case of a vacancy in the Office of the Chairman.

§ 1000.11 Delegation of functions.

Section 27(b)(9) of the Consumer Product Safety Act (15 U.S.C. 2076(b)(9)) authorizes the Commission to delegate any of its functions and powers, other than the power to issue subpoenas, to any officer or employee of the Commission. Delegations are published in the Commission's Directives System.

§ 1000.12 Organizational structure.

The Consumer Product Safety Commission is composed of the principal units listed in this section.

(a) The following units report directly to the Chairman of the Commission:

(1) Office of the General Counsel;
(2) Office of Congressional Relations;
(3) Office of Media Relations;
(4) Office of the Secretary;
(5) Office of Internal Audit;
(6) Office of Equal Employment Opportunity and Minority Enterprise;
(7) Office of the Executive Director.

(b) The following units report directly to the Executive Director of the Commission:

(1) Office of Program Management and Budget;
(2) Office of Planning and Evaluation;
(3) Office of Information and Public Affairs;
(4) Directorate for Epidemiology;
(5) Directorate for Economic Analysis;
(6) Directorate for Engineering Sciences;
(7) Directorate for Health Sciences;
(8) Directorate for Compliance and Administrative Litigation;
(9) Directorate for Field Operations.

§ 1000.13 Directives system.

The Commission maintains a Directives System which contains delegations of authority and descriptions of Commission programs, policies, and procedures. A complete set of directives is available for inspection in the public reading room at Commission headquarters.

§ 1000.14 Office of the General Counsel.

The Office of the General Counsel provides advice and counsel to the Commissioners and organizational components of the Commission on matters of law arising from operations of the Commission. It prepares the Commission's legislative program and comments on relevant legislative proposals originating elsewhere. The Office, in conjunction with the Department of Justice, is responsible for the conduct of all Federal court litigation to which the Commission is a party. The Office also advises the Commission on administrative litigation matters. The Office provides final legal review of and makes recommendations to the Commission on proposed product safety standards, rules, regulations, petition actions, and substantial hazard actions. It also provides legal review of certain procurement, personnel, and administrative actions and drafts documents for publication in the **Federal Register.**

§ 1000.15 Office of Congressional Relations.

The Office of Congressional Relations is the principal contact with the committees and members of Congress. It performs liaison duties for the Commission, provides information and assistance to Congress on matters of Commission policy, and coordinates testimony and appearances by Commissioners and agency personnel before Congress.

§ 1000.16 Office of Media Relations.

The Office of Media Relations is responsible for implementing the Commission's media relations program nationwide. The Office serves as the Commission's spokesperson to the national print and broadcast media, develops and disseminates the Commission's news releases, and organizes Commission news conferences.

§ 1000.17 Office of the Secretary.

The Office of the Secretary prepares the Commission's agenda, schedules and coordinates Commission business at offical meetings, and records, issues, and stores the official records of Commission actions. The Office prepares and publishes the Public Calendar under the Commission's Meetings Policy. The Office exercises joint responsibility with the Office of the General Counsel for the interpretation and application of the Privacy Act, Freedom of Information Act, and the Government in the Sunshine Act, and prepares reports required by these acts. It issues Commission decisions, orders, rules, and other offical documents, including **Federal Register** notices, for and on behalf of the Commission and controls the use of the Commission seal. The Office supervises and administers the dockets of adjudicative proceedings before the Commission. The Office maintains the records of continuing guaranties of compliance with applicable standards of flammability issued under the Flammable Fabrics Act (FFA) which are filed with the Commission in accordance with provisions of section 8(a) of the FFA (15 U.S.C. 1197(a)). Upon request, the Office of the Secretary provides appropriate forms to persons and firms desiring to execute continuing guaranties under the FFA. The Office also supervises and administers the public reading room.

§ 1000.18 Office of Internal Audit.

This Office reviews, analyzes, and reports on Commission programs and organization to assess compliance with relevant laws, regulations, and principles of efficency, effectiveness, and economy.

§ 1000.19 Office of Equal Employment Opportunity and Minority Enterprise.

The Office of Equal Employment Opportunity and Minority Enterprise assures the agency complies with all laws, regulations, rules and internal policies relating to equal employment opportunity. It assures compliance with the Small Business Act as it relates to small and disadvantaged business utilization. The Office also conducts the Upward Mobility Program.

§ 1000.20 Office of the Executive Director.

The Executive Director with the assistance of the Deputy Executive Director, under the broad direction of

VOL 52 ISS 249 DEC 29 1987 UMI

the Chairman and in accordance with Commission policy, acts as the chief operating manager of the agency, supporting the development of the agency's budget and operating plan before and after Commission approval, and managing the execution of those plans. The Executive Director has direct line authority over the following directorates and offices: Epidemiology, Economic Analysis, Engineering Sciences, Health Sciences, Compliance and Administrative Litigation, Administration, and Field Operations; the Office of Program Management and Budget; the Office of Planning and Evaluation; and the Office of Information and Public Affairs.

§ 1000.21 Office of Program Management and Budget.

(a) The Office of Program Management and Budget is responsible for overseeing the development of the Commission's budget, program goals and objectives, and hazard program plans. The Office, in consultation with other offices and directorates, prepares, for the Commission's approval, the annual budget requests to Congress and the Office of Management and Budget and the operating plan for each fiscal year. It manages the execution of the Commission's budget. The Office recommends to the Office of the Executive Director actions to enhance effectiveness of the Commission's programs and activities.

(b) The Office of Program Management and Budget is also responsible for managing the hazard-releated programs contained in the Commission's operating plan and carries out other tasks assigned by the Executive Director. The Office is responsible for Information Resources Management activities and for international standards coordination and liaison. As an extension of the Office of the Executive Director, it is responsible for assuring the implementation of Commission decisions. Program Managers assigned to the Office provide overall direction to all hazard program projects, including those involving voluntary standards, petitions, and emerging hazards. This is especially true where functional responsibility extends across the organizational lines of other offices and directorates. The Program Managers' authority complements the functional authority vested in the Associate Executive Directors and other Office Directors to assure that relevant legal, technical, environmental, economic, and social impacts of projects are comprehensively and objectively presented to the Commission for decision. The Office carries out regular program reviews assessing the progress of projects to reach goals established by the Commission. The Office consults with the other staff directorates and offices in developing strategies to meet these goals. It is responsible for resolving issues that arise among the directorates and other offices in carrying out hazard program goals.

§ 1000.22 Office of Planning and Evaluation.

The Office of Planning and Evaluation reports to the Executive Director and is responsible for the Commission's planning and evaluation activities. It develops integrated short and long range plans for achieving the Commission's goals and objectives. The office is responsible for the development and analysis of both major policy and operational issues. Evaluation studies are conducted to determine how well the Commission fulfills it mission. These studies include impact and process evaluations of Commission programs, projects, functions, and activities. Recommendations are made to the Executive Director for changes to improve their efficiency and effectiveness. Management analyses and special studies are also conducted. These cover, but are not limited to, internal controls, organizational performance, structure, and productivity measurement. Recommendations are made to the Executive Director for improving management efficiency and effectiveness.

§ 1000.23 Office of Information and Public Affairs.

The Office of Information and Public Affairs is responsible for the development, implementation, and evaluation of a comprehensive national information and public affairs program designed to promote product safety. This includes responsibility for developing and maintaining relations with a wide range of national groups such as consumer organizations; business groups; trade associations; state and local government entities; labor organizations; medical, legal, scientific and other professional associations; and other Federal health, safety and consumer agencies. The Office also manages the Commission's Hotline, described in § 1000.3 of this chapter.

§ 1000.24 Directorate for Epidemiology.

The Directorate for Epidemiology, which is managed by the Associate Executive Director for Epidemiology, is responsible for injury data analysis to identify hazards or hazard patterns. The Directorate collects data on consumer product-related hazards and potential hazards, determines the frequency, severity, and distribution of the various types of injuries, and investigates their causes. It assesses the effects of product safety standards and programs on consumer injuries and conducts epidemiological and human factors studies and research in the fields of consumer product-related injuries. It maintains an injury data clearinghouse and manages the National Electronic Injury Surveillance System (NEISS).

§ 1000.25 Directorate for Economic Analysis.

The Directorate for Economic Analysis, which is managed by the Associate Executive Director for Economic Analysis, is responsible for providing the Commission with advice and information on economic and environmental matters and on the economic, social and environmental effects of Commission actions. It analyzes the potential effects of CPSC actions on consumers and on industries, including effects on competitive structure and commercial practices. The Directorate acquires, compiles, and maintains economic data on movements and trends in the general economy and on the production, distribution, and sales of consumer products and their components to assist in the analysis of CPSC priorities, policies, actions, and rules. It plans and carries out economic surveys of consumers and industries. It studies the costs of accidents and injuries. It evaluates the economic, societal, and environmental impact of product safety rules and standards. It performs such regulatory analyses and such studies of costs and benefits of CPSC actions as are required by the Consumer Product Safety Act, the National Environmental Policy Act, the Regulatory Flexibility Act and other Acts, and by policies established by the Consumer Product Safety Commission.

§ 1000.26 Directorate for Engineering Sciences.

The Directorate for Engineering Sciences, which is managed by the Associate Executive Director for Engineering Sciences, is responsible for developing technical policy and implementing the Commission's engineering programs. The Directorate's functional responsibility includes development and evaluation of product safety standards and test methods based on engineering and other physical sciences and the conduct and relevant evaluation of specific product testing to support general agency regulatory activities. The Directorate develops and evaluates performance criteria, design specifications, and quality control standards for certain consumer products and provides scientific and technical expertise to the Commission. It conducts and evaluates engineering tests and test-methods, participates in the engineering development of product safety standards, and provides advice on proposed mandatory standards and industry voluntary standard efforts. It performs or monitors research in the engineering sciences and manages the Commission's engineering laboratory and engineering test facility and provides analytical services in support of the Commission's enforcement activities. The Directorate for Engineering Sciences conducts studies of the safety of consumer products. It coordinates engineering research testing and evaluation activities with the National Bureau of Standards and other Federal agencies, private industry, and consumer interest groups. The Directorate gives statistical support for the engineering aspects of standards development, certification programs, and sampling for field inspection programs. The Directorate provides technical supervision and direction of all engineering activities including tests and analyses conducted in the field. The Directorate provides engineering technical support to all Commission organizations, activities and programs. The Directorate analyzes accident data, develops accident scenarios, and recommends solutions. This information is applied to develop standards and corrective action plans. The Directorate provides appropriate analytical representation to the Office of Program Management and Budget.

§ 1000.27 Directorate for Health Sciences.

The Directorate for Health Sciences, which is managed by the Associate Executive Director for Health Sciences, is responsible for developing science policy and implementing the Commission's Health Sciences program. The Directorate's functional responsibilities include development and evaluation of the scientific content of product safety standards and test methods based on the chemical, biological and medical sciences, and the conduct and evaluation of specific product testing to support general agency regulatory activity. The Directorate also provides scientific and medical expertise to the Commission and it develops and evaluates performance criteria, design specifications, and quality control standards for certain consumer products. It conducts and evaluates scientific tests and test methods, participates in the scientific development of product safety standards, and provides advice on proposed standards. It collects scientific and medical data, reviews and evaluates toxicological, medical, and chemical hazards, and determines exposure, uptake and metabolism, including identification of the toxicological and physiological bases which cause some population segments to be at special risk. It performs risk assessments for chemical and physical hazards in consumer products. It performs or monitors research, and conducts studies of the safety of or of improving the safety of consumer products. It provides the Commission's primary source of technical expertise for implementation of the Poison Prevention Packaging Act. It provides the Commission's expertise on manufacturing practices and quality assurance for chemical consumer products and it provides scientific and laboratory support to the Commission's and other laboratories and other chemical or toxicological testing facilities. It provides scientific and medical support to all commission organizations, activities, and programs. The Directorate provides scientific liaison with the National Toxicological Program, the National Cancer Institute, the Environmental Protection Agency, other federal agencies and programs, and organizations concerned with reducing the risks to consumers from exposure to chemical hazards. It also manages activities of the Commission's advisory committees such as Chronic Hazard Advisory Panels.

§ 1000.28 Directorate for Compliance and Administrative Litigation.

The Directorate for Compliance and Administrative Litigation, which is managed by the Associate Executive Director for Compliance and Administrative Litigation, conducts or supervises the conduct of compliance and administrative enforcement activity under all administered acts, provides advice and guidance to regulated industries on complying with all administered acts and reviews proposed standards and rules with respect to their enforceability. The Directorate's responsibility also includes identifying and acting on safety hazards in consumer products already in distribution, promoting industry compliance with existing safety rules, and conducting litigation before an administrative law judge relative to administrative complaints. It provides advice and case guidance to field offices and participation in the development of standards before their promulgation to assure enforceability of the final product. It enforces the Consumer Product Safety Act requirement that firms identify and report product defects which could present possible substantial hazards. It reviews consumer complaints, in-depth investigations, and other data to identify those consumer products containing such hazards or which do not comply with existing safety requirements. The Directorate negotiates and subsequently monitors corrective action plans designed to recall defective or non-complying products and gives public warning to consumers where appropriate. It gathers information on generic product hazards which may lead to subsequent initiation of safety standard setting procedures. The Directorate develops surveillance strategies and programs designed to assure compliance with Commission standards and regulations. It originates instructions to field offices and provides subsequent interpretations or guidance for field surveillance and enforcement activities.

§ 1000.29 Directorate for Administration.

The Directorate of Administration, which is managed by the Associate Executive Director for Administration, is responsible for general administrative policy; maintenance of timeliness, quality, and efficiency of services; planning input, review; and administrative control within his or her functional area of responsibility. The Directorate's functional responsibility includes all general and delegated administrative functions supporting the Commission in the areas of financial management, management and organizational analysis, personnel, training, automated data systems, telecommunications, the reference library, and the physical plant. The Directorate is responsible for the execution of payment, financial control, accounting, and reporting of all expenditures within the Commission. It is responsible for all aspects of personnel management for the Commission, including recruitment and placement, classification standards and policies, and employee and labor-management relations. It evaluates the need for, develops, and implements all training programs for the Commission, including employee training, executive development, and training programs involving outside parties. The Directorate designs, implements, and operates all automated data systems and telecommunications. It provides support services for space management, supply and property management, security, printing and reproduction,

BEST COPY AVAILABLE

records management, transportation, warehousing, utilities, and mail. It is responsible for all CPSC contracts and procurement of services and supplies. It develops, implements, and maintains management information systems and distributes summary reports on data accumulated by those systems. The Directorate also maintains and updates the reference library, performs data and bibliographic research for the agency and its constituency, and administers the ordering, receiving, and distribution of all publications requested by or for CPSC personnel.

§ 1000.30 Directorate for Field Operations.

(a) The Directorate for Field Operations, which is managed by the Associate Executive Director for Field Operations, has direct line authority over all Commission field operations; develops, issues, approves, or clears proposals and instructions affecting the field activities; and provides a central point within the Commission from which Headquarters officials can obtain field support services. The Directorate provides direction and leadership to the Regional Center Directors and promulgates policies and operational guidelines which form the framework for management of Commission field operations. The Directorate works closely with the other Headquarters functional units, the Regional Centers, and other field offices to assure effective Headquarters-field relationships, proper allocation of resources to support Commission priorities in the field, and effective performance of field tasks. It represents the field and prepares field program documents. It coordinates direct contact procedures between Headquarter's offices and Regional Centers. The Directorate is also responsible for liaison with State, local, and other Federal agencies on product safety programs in the field.

(b) Regional Centers are responsible for carrying out investigative and compliance activities within their areas. They encourage voluntary industry compliance with the laws and regulations administered by the Commission and implement wide-ranging public information and education programs designed to reduce consumer product injuries. They also provide support and maintain liaison with components of the Commission, other Regional Centers, and appropriate Federal, State, and local government offices.

BILLING CODE 6355-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Activities of Self-Regulatory Organization Governing Members Who Possess Material, Non-Public Information

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") has adopted final Regulation 1.59(c), which requires self-regulatory organizations to adopt rules prohibiting, in accordance with the standards contained in the regulation, disclosure or other improper use of material, non-public information by members of self-regulatory organization governing boards and committees.

EFFECTIVE DATE: New Regulation 1.59(c) becomes effective March 28, 1988.

FOR FURTHER INFORMATION CONTACT: De'Ana Hamilton-Brown, Attorney/Advisor, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254-8955.

SUPPLEMENTARY INFORMATION:

I. Introduction

On June 11, 1985, the Commission published proposed Regulation 1.59 relating to the activities of self-regulatory organization ("SRO") employees and governing members who possess material, non-public information. 50 FR 24533. The Commission's proposal was designed to eliminate or minimize the potential misuse of material, non-public information by employees and governing members of SROs with possession of or access to material, non-public information, given that such conduct could undermine the concept of industry self-regulation and diminish public confidence in SROs. 50 FR 24533-34.

On November 25, 1986, the Commission adopted, as final, the provisions of Regulation 1.59 applicable to SRO employees. The rule prohibits the disclosure of material, non-public information obtained as a result of employment by an SRO. Furthermore, the rule requires SROs to adopt rules proscribing such disclosures and barring employees from trading in commodity interests on the employing contract market, in related commodity interests, or in commodity interests traded on other exchanges as to which the employee has access to material, non-public information.

Concurrently with the Commission's adoption of the final rules pertaining to SRO employees, the Commission deleted the portion of the rule pertaining to governing members. Generally, Regulation 1.59(c) would have prohibited governing members having knowledge of certain final or imminent decisions of a governing board or committee from trading the contract affected by such decisions or related contracts, and from disclosing information concerning the decisions, prior to publication. In addition, the proposed governing members provision would have required each contract market and clearing organization to adopt rules requiring that final decisions of governing boards or committees be announced publicly before the opening of the next trading session in the affected contract. These provisions were intended to prevent the misuse of information concerning decisions which could not be appealed to another body within the SRO and which, without further action, could alter materially the futures trading environment, such as decisions to revise margin levels substantially, limit trading to liquidation only, compel liquidation of positions held by major market participants, and other rule changes that could affect the prices of particular futures or option contracts. 51 FR at 44868 (December 12, 1986).

Objections to the proposal included concerns relating to the scope and operation of the proposed trading prohibition, which some commenters claimed would prohibit far more trading than necessary to preserve the integrity of contract markets and could impair the ability, or diminish the willingness, of knowledgeable SRO members who are also active traders to serve on an SRO board of directors or its major policy and disciplinary committees. Based upon its review of these and other comments, the Commission determined that the proposed restrictions upon the activities of governing members merited further consideration and possible amendment, deleted the governing members provision from Regulation 1.59, as adopted, and by **Federal Register** release of December 12, 1986, invited comment "on how best to revise the governing members provision" to address the concerns raised by the comments previously received.[1] 51 FR 44866, 44868.

[1] The Commission received nine comment letters in response to its December 12, 1986 request for

Continued

The commenters generally supported the view that governing members must maintain the confidentiality of sensitive information received in the performance of their official duties. However, some commenters questioned the necessity for Commission rulemaking to achieve that end, and a substantial number questioned the specific formulation of the previously proposed rule. In light of these and earlier comments, the Commission revised the proposed rule, and on August 28, 1987, the Commission published the new proposed governing members rule for comment. 52 FR 32568.

II. Activities of Self-Regulatory Organization Governing Members Who Possess Material Non-Public Information

The proposed Regulation 1.59(c), published in August, 1987, would have required SROs to adopt rules providing that no member of an SRO governing board or committee shall use or disclose, for any purpose other than the performance of such member's official duties as a governing member, material, non-public information obtained as a result of such member's participation on any committee or governing board of an SRO.[2] Proposed Regulation 1.59(c) also would have required contract markets and clearing organizations to adopt rules requiring the publication, except for good cause shown, of final decisions of contract market and clearing organization governing boards and committees prior to the opening of the next trading session in the affected contract on that contract market, and prior to the opening of the next trading session in a contract based on the same commodity as that contract traded on any linked exchange.

The recently proposed Regulation 1.59(c) differed significantly from the previous proposal. First, Regulation 1.59(c), as revised, would have encompassed the misuse of a potentially broader category of material, non-public information[3] than the original proposal, which would have addressed only those situations in which a governing member had knowledge of a final or imminent board or committee decision. Second, in contrast to the original proposal, which would have created a prohibition against trading by governing members who possessed or had access to material, non-public information, the revised proposal would have required case-by-case enforcement by the SROs. In this regard, the Commission anticipated that SROs would incorporate into their existing affirmative rule enforcement program, the surveillance of the trading activity of governing members where there was a potential nexus to knowledge of material, non-public information in their capacity as such, and other affirmative enforcement measures designed to detect and deter trading based upon such information and other misuse of such information. Finally, the proposed immediate publication provision, which previously would have included certain stringent procedural requirements, as revised, would have permitted delayed publication of a final decision for good cause shown, provided the Commission received prompt, written notification of such decision.

The Commission received six comment letters in response to its August 28, 1987 request for comments on revised Regulation 1.59(c).[4] Generally, the comments supported the provisions which would have required SROs to prohibit the disclosure or misuse of material, non-public information obtained by governing members as a result of their participation on SRO governing boards or committees, but opposed the immediate publication requirement with respect to final decisions of governing boards and committees.

The commenters agreed that the revised version of Regulation 1.59(c), excluding the immediate publication requirement, represented a significant improvement over the rule as previously proposed. One commenter acknowledged the need to maintain public confidence in the market and supported the Commission's proposal to adopt a performance standard. Another commenter stated that the "performance standard" approach would allow SROs to discipline members who abuse their trust and responsibilities by using or disclosing material, non-public information. The commenter stated further that the flexibility and focused restraint of the proposal, would avoid the loss of services on governing boards and committees by industry volunteers who might fear the restrictions on their trading activity contained in the 1985 proposal. Other commenters stated that the revised proposed regulation demonstrated the Commission's confidence in effective exchange rulemaking by leaving the responsibility for the specific terms to the exchanges, which are uniquely able to tailor their rules to fit their particular circumstance.

As noted, however, the commenters strongly opposed the immediate publication requirement as proposed in Regulation 1.59(c)(2). Most of the commenters agreed that certain board decisions should be announced promptly and publicly, but believed that mandating such disclosure by Commission rule is unnecessary and unduly burdensome. In this regard, several commenters stated that the immediate publication requirement is unnecessary in light of the provisions of proposed § 1.59(c)(1). Specifically, one commenter explained that governing members have a duty to disclose material, non-public information at the appropriate time, and if they breach that duty and make improper use of the information prior to public dissemination, they would be in violation of the exchange rules to be adopted pursuant to § 1.59(c)(1).

The commenters noted further that the immediate publication requirement, as proposed, often would be operationally impossible, particularly with the current

---

comment: (1) Chicago Board of Trade; (2) Coffee, Sugar & Cocoa Exchange, Inc.; (3) Comex Clearing Association; (4) Commodity Exchange, Inc.; (5) Minneapolis Grain Exchange; (6) National Futures Association; (7) National Grain Trade Council; (8) National Grain and Feed Association; and (9) New York Mercantile Exchange. For an in-depth discussion of the comments received and the Commission's response, *See* 52 FR 32568 (August 28, 1987).

[2] The initially proposed governing members rule would have applied only to contract markets and clearing organizations. As revised, proposed Regulation 1.59(c)(1) would have applied to SROs, as defined in § 1.59(a)(1), thereby including the National Futures Association ("NFA"). That change reflects reformulation of the rule to apply to the use of material, non-public information as opposed to trading activities in the context of knowledge of final or imminent decisions relevant to such trading. NFA commented that revised Regulation 1.59(c) should not apply to NFA because "the applicability of § 1.59(c) to information obtained and decisions made by NFA board or committee members is remote." The Commission disagrees. NFA governing members have access to information concerning the financial condition of its members which the Commission believes could provide an unfair trading advantage, if used for that purpose.

[3] "For purposes of this section: * * * 'Material information' means information which would be considered important by a reasonable person in deciding whether to trade a particular commodity interest on a contract market, including, but not limited to, information relating to present or anticipated cash, futures or option positions, trading strategies, the financial condition of members of [SROs] or their customers, or the regulatory actions or proposed regulatory actions of [SROs]. 'Nonpublic information' means information which has not been disseminated in a manner which makes it generally available to the trading public through recognized channels of distribution." Regulations 1.59(a) (3) and (4). The Commission expects SROs, under the revised rule, to determine the application of the material, non-public information standard in specific factual contexts, a process that will refine the definition of the information that may not be misused or disclosed.

[4] This request elicited formal comment from: (1) Chicago Mercantile Exchange; (2) Coffee, Sugar & Cocoa Exchange, Inc.; (3) Chicago Board of Trade; (4) National Grain and Feed Association; (5) National Futures Association; and (6) National Grain Trade Council.

VOL 52 ISS 249 DEC 29 1987 UMI

trend toward linkages between foreign and domestic exchanges, and most recently, the commencement of evening trading sessions. Several commenters opposed the inclusion of routine margin changes and member responsibility actions in the class of final decisions which would have been subject to the immediate publication requirement, because such decisions most often would not have a material impact on the market. Lastly, one exchange noted that some final decisions should not be published immediately to avoid possible market disruption, for example, a decision to order a firm to liquidate its positions within a specified period of time.

The Commission has considered the concerns raised by the commenters with respect to the immediate publication requirement, and agrees that the current proposal may not be the best approach. However, the Commission believes that the principle underlying the proposed immediate publication requirement should be preserved. Indeed, several commenters agreed that board and committee decisions which may have a material impact on the markets should be published promptly, and took issue only with the method proposed for accomplishing this end.

Accordingly, although the Commission has determined to delete the provisions which would have required exchanges to adopt rules requiring publication of final decisions before the next trading session, the Commission expects each SRO to review in its affirmative rule enforcement program the consistency with which final decisions are published promptly, as well as the justification provided when a potentially market-sensitive decision is not published promptly. In this regard, SRO boards and committees should document their reasons for delaying publication of a final decision which may constitute material, non-public information. If circumstances indicate an unjustified delay in publication of a final decision, the SRO should take that information into consideration in determining which members and decisions to focus upon in surveilling for possible violations of Regulation 1.59(c).

As the Commission stated in the previous **Federal Register** release concerning Regulation 1.59(c), "each [SRO] must develop and administer a program for detecting possible violations of its rule that is sufficient to deter and detect violations, so as to provide a meaningful foundation for public confidence in the fairness of the futures markets." 52 FR 32568, 32571. The Commission noted that such a program would entail, at a minimum, adequate access to governing members' trading records, review and investigation of complaints of improper trading, and review of trading by governing members and their affiliates.

While acknowledging the obligation of SROs to enforce the rules promulgated in accordance with Regulation 1.59(c), several commenters stated that a special affirmative compliance program aimed solely at the misuse and disclosure of material, non-public information by governing members would be an inefficient and unnecessary use of resources that would produce no meaningful result. Moreover, the commenters stated that their existing rules and procedures are sufficient to satisfy the rule enforcement obligations anticipated under Regulation 1.59(c).[5]

The Commission continues to believe that effective, affirmative SRO compliance programs designed to detect and deter violations of rules adopted in accordance with Regulation 1.59(c) are essential. However, the Commission is not proposing to require SROs to develop and implement a separate or unique affirmative compliance program aimed solely at detecting abuses of material, non-public information by governing members. Instead, the Commission expects SROs to expand their existing compliance programs to conduct surveillance in this area not unlike the manner in which they conduct surveillance programs to detect other rule violations. Such a program must be reasonably calculated to detect and deter abuses, but need not address the substantial portion of governing board and committee activities in which no material, non-public information is involved. For those instances where material, non-public information is involved, an SRO program, for example, could include surveillance of selected trading by governing members (including their affiliates) having access to material, non-public information. That surveillance could be limited to the commodities to which the information relates and the time period during which misuse of such information reasonably could be expected to occur. The Commission understands that the compliance programs used will vary among the SROs based upon, *inter alia*, the size of the market and the organizational structure of the governing boards and committees of each SRO.

The Commission is relying upon the individual SROs to define an effective program most suitable to their particular markets, and to devote the necessary resources to enforce their rules to be adopted pursuant to § 1.59(c). The Commission intends to review SRO activities in this area in the ordinary course of its oversight of the futures markets, most notably in the conduct of rule enforcement reviews.

[5] The Commission invited comment on whether effective enforcement of SRO rules implemented pursuant to proposed Regulation 1.59(c) would require that the Commission adopt rules designed to facilitate self-regulatory enforcement efforts. For example, the Commission suggested a requirement that SROs adopt rules permitting them to obtain documents related to trading in affected commodities or a requirement that specific disclosures be made by board or committee members of open positions in the contract market under discussion held by the governing member and such member's affiliated firm. All of the commenters who responded on this point stated emphatically that such rulemaking would be unnecessary, and reiterated that existing SRO rules and procedures are sufficient.

III. Implementation Time of Regulation 1.59(c)

Commission Regulation 1.59(c) will not become effective until ninety days after the date of publication of the final rule. The delayed effective date should provide ample time for SROs to adopt and submit to the Commission, pursuant to section 5a(12) of the Commodity Exchange Act, rules consistent with the requirements of Regulation 1.59(c), and to comply therewith. The Commission expects the SROs to act expeditiously in submitting appropriate rules.

Regulatory Flexibility Act

The Commission has determined previously that contract markets are not "small entities" for purposes of the Regulatory Flexibility Act (5 U.S.C. 605) and that the requirements of the Act do not, therefore, apply to contract markets. 47 FR 18618 (April 30, 1982). Furthermore, the Chairman of the Commission has certified previously on behalf of the Commission that comparable rule proposals, if adopted, would not have a significant economic impact on a substantial number of small entities. *See, e.g.*, 48 FR 32835, 32836 (July 19, 1983). For the reasons set forth above, and pursuant to Section 3(a) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Chairman hereby certifies, on behalf of the Commission, that the following § 1.59(c) will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The Paperwork Reduction Act ("PRA") of 1980, 44 U.S.C. 3501 *et. seq.*, imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. In compliance with the PRA, the Commission previously submitted this rule in proposed form and its associated information collection requirements to the Office of Management and Budget ("OMB"), stating that Rule 1.59 does not impose any additional paperwork on the public, but that SROs may be required to submit new or altered rules to the Commission pursuant to Regulation 1.41. Rule 1.41 was assigned previously OMB Control No. 3038-0022.

Copies of the OMB approved information collection package associated with this rule may be obtained from Bob Neal, Office of Management and Budget, Room 3220, NEOB, Washington, DC 20503, (202) 395-7340.

List of Subjects in 17 CFR Part 1

SROS, Contract markets, Clearing organizations, Registered futures associations, Contract market members, Exchange employees, Directors of contract markets and clearing organizations.

In consideration of the foregoing, and based on the authority contained in the Commodity Exchange Act and, in particular, sections 3, 4b, 5, 5a, 6, 6b, 8, 8a, 9, 17, and 23(b) thereof, 7 U.S.C. 5, 6b, 7, 7a, 8, 13a, 12, 12a, 13, 21 and 26(b) the Commission is proposing to amend Title 17, Chapter I, Part 1 of the Code of Federal Regulations by adopting new § 1.59(c) as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for Part 1 continues to read as follows:

Authority: 7 U.S.C. 2, 2a, 4, 4a, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 8, 9, 12, 12a, 12c, 13a, 13a-1, 16, 19, 21, 23, and 24, unless otherwise stated.

2. Section 1.59 is amended by revising the section heading and by adding paragraph (c) to read as follows:

§ 1.59 Activities of self-regulatory organization employees and governing members who possess material, non-public information.

* * * * *

(c) *Members of self-regulatory organization governing boards and committees.* Each self-regulatory organization must maintain in effect rules which have been submitted to the Commission pursuant to section 5a(12) of the Act and Commission Regulation 1.41 (or pursuant to section 17(j) of the Act in the case of a registered futures association) which provide that no member of such self-regulatory organization governing board or of a committee of such self-regulatory organization shall use or disclose, for any purpose other than the performance of such member's official duties as a governing board or committee member, material, non-public information obtained as a result of such member's participation on any committee or governing board of such self-regulatory organization.

Issued in Washington, DC on December 22, 1987, by the Commission.

Jean A. Webb,

Secretary of the Commission.

[Release Nos. 34-25217; IC-16181; File No. S7-19-87]

Proxy Rules; Amendments To Eliminate Filing Requirements for Certain Preliminary Proxy Material; Amendments With Regard to Rule 14a-8, Shareholder Proposals

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission today announced the adoption of amendments to the proxy rules to eliminate the filing of preliminary proxy and information statements under certain circumstances. To accommodate the changes in filing requirements, related amendments to Rules 14a-3, 14a-8, and 14c-3, Schedule 14C, the filing fee rules and Item 401 of Regulation S-K also are being adopted. In addition, the Commission is adopting an amendment to Rule 14a-8 to delete the limitation on inclusion of a shareholder proposal in the registrant's proxy material where the proponent delivers written proxy materials to holders of more than 25% of a class of the registrant's securities. Other amendments to Rule 14a-8 relating to requests for documentary support of a proponent's beneficial ownership claim require that a registrant make any request for documentary support within 14 calendar days, extend from 14 to 21 calendar days the time period in which such documentation must be furnished, and require that a registrant accept, under certain circumstances, a copy of certain Commission filings, together with a proponent's affidavit, as sufficient documentation of a proponent's beneficial ownership claim. Technical and clarifying amendments to Schedule 14A also are being adopted.

EFFECTIVE DATE: All amendments are effective February 1, 1988, except for the deletion of Rule 14a-8(a)(1)(ii), which is effective December 29, 1987. Refer to the supplementary information section below for a detailed explanation of how the effective date will affect the operation of Rules 14a-8(a), 14a-8(a)(1), 14a-8(d), 14a-8(e), 14c-5(a), and Schedule 14C.

FOR FURTHER INFORMATION CONTACT: Barbara J. Green or Elizabeth M. Murphy, (202) 272-2589, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. After the effective date, contact Cecilia D. Blye, (202) 272-2573, Office of Chief Counsel, Division of Corporation Finance. With respect to investment companies, contact Dorothy M. Donohue, (202) 272-2107, Ofice of Disclosure and Adviser Regulation, Division of Investment Management.

SUPPLEMENTARY INFORMATION: The Commission is adopting amendments to Regulation 14A [1] (Rules 14a-3 [2], 14a-8 [3] and 14a-8 [4] and Schedule 14A [5]) and to Regulation 14C [6] (Rules 14c-3 [7] and 14c-5 [8] and Schedule 14C [9]) under the Securities Exchange Act of 1934 ("Exchange Act").[10] The Commission also is adopting amendments to Rule 20a-1 [11] under the Investment Company Act of 1940 ("Investment Company Act") [12] and to Item 401 [13] of Regulation S-K. [14]

The deletion of Rule 14a-8(a)(1)(ii) [15] is effective upon publication in the **Federal Register**. The effective date for all other amendments is February 1, 1988. The following outline indicates how the effective dates will affect the operation of Rules 14a-8(a),[16] 14a-8(a)(1),[17] 14a-8(d),[18] 14a-8(e),[19] 14c-5(a),[20] and Schedule 14C:

A. Rule 14a–6(a)

Registrants filing proxy statements on or after February 1, 1988, should comply with Rule 14a–6(a), as amended.

B. Rule 14a–8(a)(1)

1. Registrants receiving security holder proposals on or after February 1, 1988, should comply with the time restrictions imposed by Rule 14a–8(a)(1), as amended, in requesting documentation of beneficial ownership.

2. Security holder proponents furnishing documentation of beneficial ownership to registrants on or after February 1, 1988, should provide documentation considered acceptable under Rule 14a–8(a)(1), as amended. Similarly, registrants should accept such documentation received from security holder proponents on or after February 1, 1988. Further, the staff will not grant no-action letter requests to registrants where a proponent furnishes such documentation prior to February 1, 1988.

3. Security holder proponents responding to requests for documentation received on or after February 1, 1988, should comply with the time restrictions imposed by Rule 14a–8(a)(1), as amended.

4. Effective upon publication in the **Federal Register**, Rule 14a–8(a)(1)(ii) will not restrict the distribution of written proxy materials by security holder proponents because it has been deleted from Rule 14a–8(a)(1), as amended.

C. Rule 14a–8(d)

Registrants asserting to the Commission, on or after February 1, 1988, that security holder proposals may be omitted from their proxy materials, should comply with Rule 14a–8(d), as amended.

D. Rule 14a–8(e)

Registrants forwarding proponents copies of their statements in opposition on or after February 1, 1988, should comply with Rule 14a–8(e), as amended. Proponents informing the Commission on or after February 1, 1988, that a registrant's statement in opposition is false and misleading should comply with Rule 14a–8(e), as amended.

E. Rule 14c–5(a)

Registrants filing information statements on or after February 1, 1988, should comply with Rule 14c–5(a), as amended.

F. Schedule 14C

Registrants advising the Commission of an intent to rule a security holder proposal out of order on or after February 1, 1988, should comply with Instruction 2 to Item 4 of Schedule 14C, as amended.

I. Executive Summary

A. Exclusion from Filing Preliminary Proxy Material and Related Amendments

On June 4, 1987, the Commission proposed for public comment amendments to the proxy rules [21] to eliminate the filing by registrants of preliminary proxy and information statements with the Commission under certain circumstances.[22] The proposal was intended to relieve registrants and the Commission of unnecessary administrative burdens and preparation and processing costs associated with the filing and processing of proxy material that is currently subject to selective review procedures, but ordinarily is not selected for review in preliminary form. The Commission today is adopting the proposal with some modifications.

The exclusion affects only filing requirements; the amendments will not affect disclosure requirements or change the likelihood of review. As under current practice, definitive material still will be subject to being selected for review. Currently, definitive material may be reviewed, for example, when full review of a Form 10–K [23] is undertaken, material deficiencies in definitive materials come to the staff's attention, or an opposing solicitation is commenced after definitive material is filed. The rule amendments are not intended to change the current practice.

Related amendments to Rule 14a–3, Rule 14a–8, Rule 14c–3, Schedule 14C, filing fee rules and Item 401 of Regulation S–K also are being adopted by the Commission. These amendments base certain timing and filing requirements on the filing of definitive, rather than preliminary, proxy material. In addition, technical and clarifying amendments to Schedule 14A are being adopted.

B. Amendments to the Shareholder Proposal Rule

Since 1983, Rule 14a–8(a)(1)(ii) has provided that a shareholder proposal may be omitted from the registrant's proxy material if the proponent delivers written proxy material to holders of more than 25% of a class of the registrant's securities. In the June Release, the Commission sought comment on eliminating this provision. The commentators were divided on the issue, with shareholder proponents generally favoring and registrants generally opposing the elimination. The Commission also solicited comment on alternative amendments to Rule 14a–8(a)(1)(ii), either to modify the 25% limitation to permit inclusion of shareholder proposals in the registrant's proxy material even when the proponent is conducting a solicitation more widespread than that permitted under the present rule, or to retain the 25% limitation and clarify its applicability to exclusion of the proposal from the registrant's material for the current meeting of shareholders as well as the meetings held in the following two years.

In view of the recent increase in shareholder activism on corporate governance issues, the Commission is amending Rule 14a–8 to delete the 25% limitation contained in Rule 14a–8(a)(1)(ii). Amendments to Rule 14a–8 relating to requests for documentary support of a proponent's beneficial ownership claim also are being adopted

II. Discussion of the Amendments

A. Exclusion From Filing Preliminary Proxy Material and Related Amendments

1. Scope

The exclusion from filing preliminary material [24] applied to a proxy or information statement distributed in connection with an annual meeting, or special meeting in lieu of an annual meeting, at which the only matters to be acted upon are the election of directors, the election, approval or ratification of auditors and/or shareholder proposals.[25] With respect to investment companies registered under the Investment Company Act and business development companies, the exclusion applies to any meeting (annual or special) at which the matters to be acted upon include those noted above as well as certain additional matters discussed in detail below. Where the exclusion applies, the Commission will not process preliminary proxy material.[26]

[21] 17 CFR 240.14a–1 through 240.14c–101.

[22] Release No. 34–24552 (June 4, 1987) [52 FR 22334] (the "June Release"). The June Release generated letters from 43 commentators. These letters, as well as the comment summary prepared by the staff, are available for public inspection and copying at the Commission's Public Reference Room (*see* File No. S7–19–87). Three additional comment letters received after completion of the comment summary are not discussed in the comment summary but are available in File No. S7–19–87

[23] 17 CFR 249.310.

[24] *See* Rules 14a–6(a) and 14c–5(a), as amended.

[25] The shareholder proposals referred to are those included in a proxy statement pursuant to Rule 14a–8 or identified in an information statement pursuant to Item 4 of Schedule 14C.

[26] Paragraph (b) of Rule 14a–8 [17 CFR 240.14a–6(b)], which requires copies of any additional

Continued

Neither submission nor inclusion of a shareholder proposal in a registrant's proxy material will make the exclusion inapplicable and require the filing of preliminary material. Rule 14a–8 provides procedures for the review of shareholder proposals separate from the review of preliminary proxy materials. Under the amendments, as in the past, the staff will handle questions and disputes about the inclusion and characterization of shareholder proposals, as well as objections to statements in opposition, independently of the preliminary filing process.

The exclusion does not apply if the registrant comments on or refers to a solicitation in opposition in connection with the forthcoming meeting in its proxy material.[27] A note defines "solicitation in opposition" as any solicitation opposing a proposal supported by the registrant and any solicitation supporting a proposal that the registrant does not expressly support, other than a shareholder proposal included in a registrant's proxy material.[28] The note also clarifies that the inclusion of a shareholder proposal in a registrant's proxy material does not constitute a "solicitation in opposition," even if the registrant opposes the proposal or includes a statement in opposition to the proposal.[29]

a. *Treatment of Investment Companies.* The amendments require that investment companies and business development companies file only definitive material where the matters to be acted upon at any meeting, in addition to any discussed above, are a proposal to continue, without change, an advisory or other contract or agreement that previously has been the subject of a proxy solicitation for which proxy material was filed with the Commission and/or, in the case of an open-end investment company, a proposal to increase the number of shares authorized to be issued. The exclusion from filing preliminary proxy material applies to any meeting of investment company shareholders, rather than only an annual or special meeting in lieu of an annual meeting as proposed, because state law does not always require investment companies to hold annual meetings. The exclusion has been expanded to include business development companies (although they are not afforded the same favorable treatment with respect to annual meetings that investment companies are afforded under state law), because they deserve comparable treatment for the routine proxy issues discussed above.

Investment companies will not file preliminary proxy material in connection with an advisory or other contract only where the contract or agreement that is the subject of the vote already has been voted upon (either when initially adopted or subsequently continued) by the public shareholders. The phrase "without change" nonetheless allows, for example, for changes in the date of the agreement, new signatures or correction of any typographical errors.

The exclusion from filing preliminary material dealing with an increase in shares is limited to open-end companies. Dilution of control (the primary issue that arises in connection with a proposal to authorize new shares) is rarely an important consideration for open-end investment company shareholders. Thus, such proposals tend to be routine and staff review ordinarily is not essential.

b. *Proposal Relating to Solicitations in Opposition and Notice.* The June proposal was designed to require the filing of preliminary material where a solicitation in opposition in connection with the forthcoming meeting had been or was about to be undertaken. At the same time, the proposal recognized that a registrant could have its printing, distribution and meeting schedule disrupted if it learned of a solicitation in opposition shortly before definitive material was to be filed. Accordingly, the proposal contained provisions that would have required the filing of preliminary material if a party had commenced a solicitation in opposition or if the registrant had received notice of the intention of a party to commence such a solicitation, unless the solicitation was commenced or notice was first received during the 45 calendar days prior to the registrant's scheduled meeting date, and the registrant did not comment on or refer to such solicitation in its proxy material.

After considering the feasibility of the proposed provisions, the Commission has decided not to adopt them as proposed. Even where a solicitation in opposition has been or is about to be commenced, there is no reason to preclude reliance upon the exclusion from filing in preliminary form where the proxy material addresses only those matters triggering the exclusion, and does not comment on or refer to the opposing solicitation.

The Commission therefore has determined that proxy material otherwise meeting the requirements for the exclusion needs to be filed in preliminary form only if the registrant comments on or refers to a solicitation in opposition. This modification is consistent generally with the current review practice and effectuates more fully the original objective of the proposed amendments, which was to decrease burdens on registrants associated with the filing of preliminary material that deals with ordinary matters and is unlikely to be selected for review by the staff. The modification also obviates the need to resolve practical problems with the proposed notice provisions, which were identified by commentators, including potential disputes over whether or when notice was given and the inadequacy of the proposed 45 calendar day period for the printing and distribution of proxy materials.

2. Related Amendments to Rule 14a–8, Shareholder Proposal Rule

To accommodate the changes in filing requirements, it is necessary to amend paragraphs (d) and (e) of Rule 14a–8. The time periods in these provisions now will be based on the filing of definitive, rather than preliminary material. Paragraph (d), as amended, requires that the registrant notify the Commission and the proponent of its assertion that a proposal may be omitted at least 80 calendar days prior to the date of filing the definitive proxy material, rather than 60 calendar days prior to the date of filing preliminary material. Similarly, Instruction 2 of Item 4 of Schedule 14C is amended to require that, if the registrant intends to rule a shareholder proposal out of order, it should so advise the Commission 20 calendar days prior to the date that definitive copies of the information statement are to be filed, rather than at the time it files the preliminary copies of its information statement.

soliciting material to be filed in preliminary form at least two business days prior to furnishing such material to shareholders, is not affected by the amendments. Rule 14a–11 [17 CFR 240.14a–11], which contains special provisions for election contests, and Rule 14a–12 [17 CFR 240.14a–12], which governs solicitations prior to furnishing required proxy statements, also are not affected by the amendments.

[27] A note has been added to Rule 14a–6(a) and 14c–5(a) stating that a registrant that is filing proxy material or an information statement in preliminary form only because it has commented on or referred to an opposing solicitation should so state in a transmittal letter when filing the preliminary material with the Commission.

[28] Accordingly, solicitations in opposition are not limited to those involving election contests and governed by Rule 14a–11.

[29] Where the registrant opposes a shareholder proposal included in the registrant's proxy material or comments on or refers to a solicitation in support of that shareholder proposal, the comments or references to the proposal or such solicitation will be considered a part of the registrant's statement in opposition and will be treated as such under Rule 14a–8, even if they appear elsewhere in the registrant's materials.

VOL 52 ISS 249 DE 29 1987 UMI

Paragraph (e) of Rule 14a–6 is amended to require that, not later than 30 calendar days prior to the filing of definitive proxy material with the Commission, the registrant forward to a shareholder proponent a copy of any statement in opposition to the proponent's resolution that the registrant intends to include in the proxy statement. Previously, this time period was 10 calendar days prior to the filing of preliminary material.

In addition, the Commission is amending the last paragraph of Rule 14a–8(e) to require that a proponent who believes that the registrant's statement in opposition is false and misleading, and so informs the Commission, provide a copy of the statement in opposition to the Commission along with his letter. The amendment will help prevent delays in review where the Commission has not been furnished with a copy of the statement in opposition.

3. Filing Fees and Other Related Amendments

To accommodate the change in filing requirements, the Commission is amending the filing fee requirements in Rules 14a–6(j) and 14c–5(g), [30] and in Rule 20a–1 under the Investment Company Act. The amendments require that where preliminary material is not required to be filed, a filing fee be paid when definitive material is filed.[31]

Additional technical revisions are being adopted to make Rule 14a–3(c),[32] Note 2 to Rule 14a–6(a), and Rules 14a–6(j) and 14c–3(b) [33] consistent with the elimination of the filing of certain preliminary proxy material. Rules 14a–3(c) and 14c–3(b) are being revised to add that, if preliminary filing is not required, copies of annual reports shall be mailed to the Commission not later than the date on which such reports are first sent or given to security holders or the date on which definitive material is filed. The word "proxy" is being substituted for the word "preliminary" in the first sentence of Note 2 to Rule 14a–6(a). Rule 14a–6(j) is being amended to eliminate a reference to "preliminary material" in introductory language and a reference to the solicitation of proxies for the "election of directors" with regard to preliminary material.[34]

B. Amendments to Rule 14a–8

1. Deletion of the 25% limitation in Rule 14a–8(a)(1)(ii)

Shareholder activism has increased in recent years. In the past proxy season, votes favoring shareholder proposals concerning corporate governance issues reached historically high levels.[35] In view of this increased shareholder interest in matters of corporate governance,[36] the Commission is adopting amendments to delete the 25% limitation in Rule 14a–8.[37] The deletion permits shareholder proposals that are included in registrant's proxy material to be accompanied by more widespread independent solicitations.[38] Such independent solicitations may increase shareholder participation and broaden the opportunities for shareholders to receive information on corporate governance issues, as well as foster debate on these issues. The Commission intends to monitor the practical effects of the deletion of the 25% limitation.

The deletion of the 25% limitation does not and is not intended to permit access to registrants' proxy materials for a party in an election contest. Shareholder proposals that relate to an election contest and/or are counter to a proposal to be submitted by the registrant at the meeting continue to be subject to exclusion from registrants' proxy materials under Rule 14a–8(c) (8) and (9).[39]

2. Requests for Documentary Support of Beneficial Ownership

Rules 14a–8(a) (1) and (2) set forth eligibility and other requirements for shareholder proposals. At the time of a proposal is submitted, the proponent must be a record holder or beneficial owner of at least 1% or $1,000 in market value of securities entitled to be voted on the proposal at the meeting and have held the securities for at least one year.[40] At that time, the proponent also must provide the registrant in writing with his or her name, address, the number of the registraint's voting securities held of record or beneficially, the dates on which the securities were acquired, and, in the case of beneficial ownership, documentary support for such a claim.[41] If the proponent fails initially to furnish documentary support for a claim of beneficial ownership, the registrant must request such support before the proposal is excludable under the Rule. Prior to these amendments, that request could have been made at any time.

In the June Release, the Commission proposed that a registrant be required to make any such request promptly. Alternatively, the Commission solicited comment on a fixed time period, such as 10, 14 or 21 calendar days. The Commission is amending Rule 14a–8(a)(1) to require that a registrant's request for documentation of a proponent's beneficial ownership be made within 14 calendar days after receipt of the shareholder proposal, where the proponent has failed to provide such documentation as required.[42] This amendment provides an early time period in the Rule for resolving issues of documentary support.[43] A fixed time period is being adopted to avoid any dispute or interpretive questions over the meaning of "promptly."

Further, the Commission is amending Rule 14a–8(a)(1) to change from 14 to 21 calendar days the time period within which a proponent must furnish appropriate documentation beneficial ownership after being requested to do so by a registrant. Since documentary support frequently is obtained from independent third parties, the Commission believes additional response time is warranted. Commentators noted difficulty in obtaining the necessary documentary support from record holders within the 14 calendar day period currently provided.

The Commission also is amending Rule 14a–8(a)(1) to codify its interpretive position that a written statement by a record owner or an independent third party, such as a depository or broker-dealer holding the securities in street name, of the proponent's holding of the registrant's securities for the relevant one year time period is appropriate documentation for a proponent's beneficial ownership claim. In addition, the Commission is amending the Rule to require that a registrant accept, as appropriate documentation of a proponent's beneficial ownership, a copy of ownership reports or amendments to such reports filed by the proponent with the Commission that indicate the proponent's beneficial ownership as of or prior to the date on which the relevant one year period commences, if supported by a copy of all subsequent amendments reporting a change in ownership level and the proponent's affidavit [44] attesting that the proponent has continued beneficial ownership of such securities throughout the required one year period and as of the date of the affidavit, the filings that a registrant is required to accept for these purposes are Schedule 13D,[45] Schedule 13G,[46] Form 13F,[47] Form 3 [48] and Form 4 [49] and any amendments thereto.

Regardless of the form of documentation utilized, the proponent is required to submit a written statement that he intends to continue beneficial ownership through the meeting date. Continuous beneficial ownership already is required by Rule 14a–8(a)(1); the Commission is amending the Rule to highlight this requirement.

As noted in the June Release, requests by registrants for documentation of ownership from record holders who submit shareholder proposals are neither appropriate nor consistent with Rule 14a–8. A record holder's proposal may not be omitted from the registrant's proxy material on the grounds that the record holder failed to provide documentation of ownership.

In addition, some registrants have conditioned the voting of proxies received with respect to a Rule 14a–8 shareholder proposal on the proposal being "seconded" at the meeting. Because Rule 14a–8(2)(2) does not require a "second," the voting of proxies received with respect to a shareholder proposal included in a registrant's proxy material pursuant to Rule 14a–8 may not be conditioned upon the proposal being seconded at the meeting, absent a second being required by state law or by the registrant's governing instruments.[50] If a second is required, it would be appropriate for the registrant to so advise the proponent a reasonable time before the meeting.

C. Other Technical and Clarifying Amendments

The Commission also is adopting technical and clarifying amendments to Schedule 14A. An amendment to Item 4, Persons Making the Solicitation, of Schedule 14A restores a sentence that was dropped inadvertently when Item 4 was revised in November 1986. The sentence clarifies that any person who would be a participant in a solicitation for purposes of Rule 14a–11, as defined in paragraphs (b)(3), (4), (5) and (6) of that Rule, is deemed to be a person on whose behalf the solicitation is made for purposes of paragraph (a) of Item 4.

Technical amendments to Item 10, Compensation Plans, of Schedule 14A are being adopted to provide, consistent with staff interpretation, that Item 10(a)(2)(iii), Item 10(a)(3)(iii) and Item 10(b)(2)(ii)(C) do not require separate disclosure with regard to current officers who are not executive officers. Rather, information regarding those officers will be included in the disclosure for "all employees as a group" in Item 10(a)(2)(iv), Item 10(a)(3)(iv) and Item 10(b)(2)(ii)(G).[51]

III. Cost-Benefit Analysis

In the June Release, the Commission requested commentators to provide views and data as to the costs and benefits associated with amending the filing requirements for proxy and information statements. The Commission noted that the elimination of the requirements to file preliminary proxy and information statements in certain circumstances should reduce some costs for those registrants who meet the requirements of the amendments.

Fourteen commentators expressed views and/or provided data as to the costs and benefits associated with the proposed amendments to the filing requirements. Eight commentators stated that elimination of the requirement to file proxy materials in preliminary form would result in time and cost savings to both the Commission and registrants. Seven commentators expressed concern that certain aspects of the proposed amendments potentially could increase costs to registrants. Four of these commentators expressed concerns about potential costs where definitive material is reviewed by the staff. Clarification of the Commission's intent with respect to review of definitive material has been included in this release. Three of the commentators expressed cost-related concerns regarding the brevity of the proposed 45 calendar day period. The Commission is not adopting the notice provisions related to the proposed 45 calendar day period.

The Commission also requested commentators to provide views and data concerning the costs and benefits of amending the shareholder proposal rule and filing fee requirements. In this regard, the Commission stated that the deletion or modification of Rule 14a–8(a)(1)(ii) might impose some costs on registrants and reduce some costs for

---

[30] 17 CFR 240.14a–6(j) and 17 CFR 240.14c–5(g).

[31] To facilitate processing by the Commission staff, a note has been added to Rules 14a–6(c) [17 CFR 240.14a–5(b)] and 14c–6(b) [17 CFR 240.14c–5(b)] stating that a registrant that is filing definitive proxy material or a definitive information statement without payment of a fee should state in the first paragraph of the transmittal letter that no fee is being paid because a fee was paid upon filing preliminary material.

[32] 17 CFR 240.14a–3(c).

[33] 17 CFR 240.14c–3(b).

[34] Minor conforming language revisions also have been made to Instruction 2 to Item 401(f) of Regulation S-K [17 CFR 229.401(f)]. Additional language has been added to the instruction to state that if any event specified in paragraph (f) has occurred and information in regard thereto is omitted on the grounds that it is not material, the registrant may furnish as supplemental information, ten days before definitive materials are filed (if preliminary filing is not required) materials to which the omission relates, a description of the event and a statement of the reasons for the omission of the information.

[35] For example, in the past proxy season of 32 votes on anti-poison pill shareholder proposals 14 drew more than 30% of the shares voted and at least three reached or surpassed 40%. Also, a shareholder proposal to require shareholder ratification of auditors received 61% of the vote, and at two companies shareholder proposals to reduce the supermajority required by fair price amendments received over 30% of the shares voted. *See* Investor Responsibility Research Center Inc. ("IRRC"). Voting by Institutional Investors on Corporate Governance Issues in the 1987 Proxy Season, October 1987, at 5–16; IRRC Corporate Governance Bulletin, Vol. IV, No. 4, July/August 1987, at 112–113; No. 3, May/June 1987, at 66–67, 90, 96.

[36] Bills are pending in Congress that address shareholder access to registrants' proxy machinery *See* H.R. 2172, 100th Cong., 1st Sess. (1987); H.R. 2668, 100th Cong., 1st Sess. (1987); S. 1323, 100th Cong., 1st Sess. (1987).

[37] In the June Release, the Commission proposed adding a note that would have stated that where a proponent requests to a copy of the registrant's shareholder list in order to be able to limit appropriately his delivery of written proxy materials to shareholders and the registrant refuses to provide the list, Rule 14a–8(a)(1)(ii) would not bar the shareholder proposal even if the proponent exceeded the limit contained in the Rule. The note is not being adopted because the 25% limitation is being deleted.

[38] Proponents that undertake independent solicitations must comply with the filing and disclosure requirements of the applicable proxy rules. *See, e.g.*, Rules 14a–3, 14a–6 and 14a–12.

[39] 17 CFR 240.14a–8(c) (8) and (9).

[40] Rule 14a–8(a)(1)(i) [17 CFR 240.14a–8(a)(1)(i)].

[41] Rule 14a–8(a)(2) [17 CFR 240.14a–8(a)(2)].

[42] A technical amendment is being made to the second sentence of Rule 14a–8(a)(1) to refer to documentation of beneficial ownership of at least 1% of the securities entitled to be voted on the proposal, as well as the alternative beneficial ownership requirement of at least $1,000 in market value.

[43] In light of the fact that registrants will need to review incoming proposals to address this issue shortly after receipt, registrants also might consider making objections to proposals believed to be excludable under Rule 14a–8 at the same time. In this regard, the staff has taken the position that Rule 14a–8(a)(4) [17 CFR 240.14a–8(a)(4)] would prohibit the submission by a proponent of a second proposal for a particular shareholder meeting if one proposal has already been submited and the staff has taken a no-action position permitting its exclusion in response to a request by the registrant pursuant to Rule 14a–8(d). This position would apply even thought the time for submission of proposals under Rule 14a–8(a)(3) [CFR 240.14a–8(a)(3)] had not expired. *See* No-Action Letter regarding *The Firestone Tire & Rubber Company* (available December 16, 1987).

[44] As an alternative to an affidavit, the Rule also would permit the use of a declaration, affirmation or similar document provided for by applicable state law.

[45] 17 CFR 240.13d–101.

[46] 17 CFR 240.13d–102.

[47] 17 CFR 249.325.

[48] 17 CFR 249.103.

[49] 17 CFR 249.104.

[50] *See* No-Action Letter regarding *Motorola, Inc. (available October 8, 1987).*

[51] The Item 10 amendments are consistent with changes made to the Item in the November 1986 comprehensive proxy amendments (*see* Release No. 33–6676 (November 10, 1986) [FI FR 42048]). The May 1987 modifications (*see* Release No. 33–6715 (May 27, 1987) [52 FR 21934]) created unintended logistical difficulties for registrants in tabulating the required information.

proponents of shareholder proposals, but that the other proposed amendments to the shareholder proposal rule should not increase or decrease significantly costs for registrants or proponents.

Twenty-two commentators expressed views and/or provided data concerning the costs and benefits of amending the shareholder proposal rule. Eleven of these commentators stated that the benefits to shareholder proponents of eliminating Rule 14a-8(a)(1)(ii) would outweigh the costs to registrants. These commentators asserted that the costs of conducting independent solicitations are prohibitively high and suggested that registrants would not incur appreciably greater costs due to the increase in the number of shareholder proposals that might result from elimination of the rule. Ten commentators stated that registrants should not be required to bear the additional expense of including shareholder proposals in their proxies were the proponent undertakes the costs of communicating with other shareholders. One commentator expressed concerns about the costs of amending the shareholder proposal rule during the 1988 proxy season. The Commission has included in the release detailed information regarding the effectiveness of the amendments.

Comments also were requested on the effects of the proposals on the costs to small entities. No comments on this subject were received.

IV. Final Regulatory Flexibility Analysis

A Final Regulatory Flexibility Analysis in accordance with 5 U.S.C. 604 has been prepared regarding the amendments to Exchange Act Rules 14a-3, 14a-6, 14a-8, 14c-3, 14c-5, Schedule 14A, Schedule 14C, to Investment Company Act Rule 20a-1 and to Item 401 of Regulation S-K. Members of the public who wish to obtain a copy of the Final Regulatory Flexibility Analysis should contact Barbara J. Green or Elizabeth M. Murphy, (202) 727-2589, Office of Disclosure Policy, Division of Corporation Finance, Securities and Exchange Commission , 450 Fifth Street NW., Washington, DC 20549. The corresponding Initial Regulatory Flexibility Analysis appears at 52 FR 22334 (Release No. 34-24552).

V. Statutory Basis

The amendments to the proxy rules are being adopted by the Commission pursuant to Sections 14 and 23(a) of the Securities Exchange Act of 1934. The Commission finds good cause under 5 U.S.C. 553(d) to make the deletion of paragraph (a)(1)(ii) from Rule 14a-8 effective immediately upon publication in the **Federal Register**. Before amendment, Rule 14a-8(a)(1)(ii) provided that proponents who delivered written proxy materials to holders of more than 25% of a class of the registrant's outstanding securities entitled to vote with respect to the same meeting of shareholders would be ineligible to use Rule 14a-8 for the inclusion of a proposal in the registrant's proxy materials. The Rule also set forth further restrictions to be imposed upon proponents who exceeded the 25% limit. The Commission is rescinding Rule 14a-8(a)(1)(ii) upon publication in the **Federal Register** in order to facilitate communications between shareholders, foster corporate democracy and alleviate the significant burdens it imposes upon shareholders proponents. Also, immediate effectiveness of the amendment will eliminate the need to draw an arbitrary line for effectiveness during the current proxy season, thus providing the benefit of the change to a greater number of shareholder proponents during this proxy season.

List of Subjects in CFR Parts 229, 240 and 270

Reporting and recordkeeping requirements, Securities.

VI. Text of the Amendments

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934 AND ENERGY POLICY AND CONSERVATION ACT OF 1975—REGULATION S-K

1. The authority citation for Part 229 continues to read, in part, as follows:

Authority: Secs. 6, 7, 8, 10, 19(a), 48 Stat. 78, 79, 81, 85; secs. 12, 13, 14, 15(d) 23(a), 48 Stat. 892, 894, 901; secs. 205, 209, 48 Stat. 906, 908; sec. 203(a), 49 Stat. 704; secs. 1, 3, 8, 49 Stat. 1375, 1377, 1379; sec. 301, 54 Stat. 857; secs. 8, 202, 68 Stat. 685, 686; secs. 3, 4, 5, 6, 78 Stat. 565-568, 569, 570-574; sec. 1, 79 Stat. 1051; secs. 1, 2, 3, 82 Stat. 454, 455; secs. 1, 2, 3-5, 28(c), 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 10, 11, 18, 89 Stat. 117, 118, 119, 155; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 78l, 78m, 78n, 78*(d), 78w(a) * * *

2. By amending § 229.401 by revising Instruction 2 to paragraph (f) to read as follows:

§ 229.401 (Item 401) Directors, executive officers, promoters and control persons.

* * * * *

Instructions to paragraph (f) of Item 401.

* ** * *

2. If any event specified in this paragraph (f) has occurred and information in regard thereto is omitted on the grounds that it is not material, the registrant may furnish to the Commission, at time of filing (or at the time preliminary materials are filed, or ten days before definitive materials are filed in preliminary filing is not required, pursuant to Rule 14a-6 or 14c-5 under the Exchange Act (§§ 240.14a-6 and 240-14c-5 of this chapter)), as supplemental information and not as part of the registration statement, report, or proxy or information statement, materials to which the omission relates, a description of the event and a statement of the reasons for the omission of information in regard thereto.

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

3. The authority citation for Part 240 continues to read, in part, as follows:

Authority: Sec. 23, 48 Stat. 901, as amended (15 U.S.C. 78w) * * *

4. By amending § 240.14a-3 by revising the first sentence of paragraph (c) to read as follows:

§ 240.14a-3 Information to be furnished to security holders.

* * * * *

(c) Seven copies of the report sent to security holders pursuant to this rule shall be mailed to the Commission, solely for its information, not later than the date on which such report is first sent or given to security holders or the date on which preliminary copies, or definitive copies, if preliminary filing was not required, of solicitation material are filed with the Commission pursuant to Rule 14a-6, whichever date is later. * * *

* * * * *

5. By amending § 240.14a-6 by adding two sentences at the end of paragraph (a), revising the first sentence of note 2 to paragraph (a), adding new notes 3 and 4 to the end of paragraph (a), adding a new note to the end of paragraph (c), revising the first phrase of the introductory text of paragraph (j), revising paragraphs (j)(1), (2) and (3) and redesignating them as paragraphs (j)(2), (3) and (4) and adding new paragraph (j)(1) to read as follows:

§ 240. 14a-6 Filing requirements.

* * * * *

(a) * * * A registrant, however, shall not file with the Commission a preliminary proxy statement, form of proxy or other soliciting material to be furnished to security holders concurrently therewith if the solicitation relate to an annual (or special meeting in lieu of the annual) meeting, or for an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) or a business development company, if the solicitation relates to any meeting or security holders at which the only matter to be acted upon are:

(1) The election of directors;

(2) The election, approval or ratification of accountant(s);

(3) A security holder proposal included pursuant to Rule 14a-8 (§ 240.14a-8 of this chapter);

(4) With respect to an investment company registered under the Investment Company Act of 1940 or a business development company, a proposal to continue, without change, any advisory or other contract or agreement that previously has been the subject of a proxy solicitation for which proxy material was filed with the Commission pursuant to this rule; and/or

(5) With respect to an open-end investment company registered under the Investment Company Act of 1940, a proposal to increase the number of shares authorized to be issued.

This exclusion from filing preliminary proxy material does not apply if the registrant comments upon or refers to a solicitation in opposition in connection with the meeting in its proxy material.

* * * * *

Note 2. The official responsible for the preparation of the proxy material should make every effort to verify the accuracy and completeness of the information required by the applicable rules.* * *

Note 3. Solicitation in Opposition. For purposes of the exclusion from filing preliminary proxy material, a "solicitation in opposition" includes: (a) Any solicitation opposing a proposal supported by the registrant; and (b) any solicitation supporting a proposal that the registrant does not expressly support, other than a security holder proposal included in the registrant's proxy material pursuant to Rule 14a-8 (§ 240.14a-8 of this chapter). The inclusion of a security holder proposal in the registrant's proxy material pursuant to Rule 14a-8 does not constitute a "solicitation in opposition," even if the registrant opposes the proposal and/or includes a statement in opposition to the proposal.

Note 4. A registrant that is filing proxy material in preliminary form only because the registrant has commented on or referred to a solicitation in opposition should indicate that fact in a transmittal letter when filing the preliminary material with the Commission.

* * * * *

(c) * * *

Note. A registrant that is filing definitive proxy material without payment of a fee should state in the first paragraph of the transmittal letter that no fee is being paid because a fee was paid upon filing of preliminary proxy material.

* * * * *

(j) *Fees.* At the time of filing the proxy solicitation material,* * *

(1) For definitive proxy material relating to a solicitation for which the registrant does not file preliminary proxy material, a fee of $125;

(2) For preliminary proxy material that solicits proxies for business for which a stockholder vote is necessary, but apparently no controversy is involved, a fee of $125;

(3) For preliminary proxy material where a contest as set forth in Rule 14a-11 is involved, a fee of $500 from each party to the controversy; and

(4) For preliminary proxy material involving acquisitions, mergers, spinoffs, consolidations or proposed sales or other dispositions of substantially all the assets of the company, a fee established in accordance with Rule 0-11 [§ 240.0-11 of this chapter] shall be paid.

No refund shall be given.

* * * * *

6. By amending § 240.14a-8 by removing paragraph (a)(1)(ii) and redesignating paragraph (a)(1)(i) as (a)(1), revising the second sentence of paragraph (a)(1), the introductory text of paragraph (d) and paragraph (e), and adding a new sentence including new (a)(1) (i) and (ii), to follow the second sentence of paragraph (a)(1).

§ 240.14a-8 Proposals of security holders.

(a) * * *

(1) *Eligibility.* * * * If the registrant requests documentary support for a proponent's claim that he is the beneficial owner of at least 1% or $1000 in market value of such voting securities of the registrant or that he has been a beneficial owner of the securities for one or more years, the registrant shall make such request within 14 calendar days after receiving the security holder proposal and the proponent shall furnish appropriate documentation within 21 calendar days after receiving the request. Appropriate documentation of the proponent's claim of beneficial ownership shall include:

(i) A written statement by a record owner or an independent third party, accompanied by the proponent's written statement that the proponent intends to continue ownership of such securities through the date on which the meeting is held; or

(ii) A copy of a Schedule 13D (§ 240.13d-101 of this chapter), Schedule 13G (§ 240.13d-102 of this chapter), Form 13F (§ 249.325 of this chapter), Form 3 (§ 249.103 of this chapter) and/or Form 4 (§ 249.104 of this chapter), or amendments thereto, filed with the Commission and furnished to the registrant by the proponent, provided that such filings indicate the proponent's beneficial ownership as of or prior to the date on which the relevant one year period commences, and are supported by

(A) A copy of all subsequent amendments reporting a change in ownership level,

(B) The proponent's affidavit, declaration, affirmation or other similar document provided for under applicable state law attesting that the proponent continued to be the beneficial owner of at least 1% or $1000 in market value of such voting securities of the registrant throughout the required one year period and as of the date of the affidavit, declaration, affirmation or other similar document provided for under applicable state law, and

(C) The proponent's written statement that the proponent intends to continue ownership of such securities through the date on which the meeting is held. * * *

* * * * *

(d) Whenever the registrant asserts, for any reason, that a proposal and any statement in support thereof received from a proponent may properly be omitted from its proxy statement and form of proxy, it shall file with the Commission, not later than 80 calendar days prior to the date the definitive copies of the proxy statement and form of proxy are filed pursuant to Rule 14a-6 (§ 240.14a-6 of this chapter), or such shorter period prior to such date as the Commission or its staff may permit, six copies of the following items:

* * * * *

(e) If the registrant intends to include in the proxy statement a statement in opposition to a proposal received from a proponent, it shall, not later than 30 calendar days prior to the date the definitive copies of the proxy statement and form of proxy are filed pursuant to Rule 14a-6, or, in the event that the proposal must be revised to be includable, not later than five calendar days after receipt by the registrant of the revised proposal, promptly forward to the proponent a copy of the statement in opposition to the proposal. In the event the proponent believes that the statement in opposition contains materially false or misleading statements within the meaning of Rule 14a-9 and the proponent wishes to bring this matter to the attention of the Commission, the proponent promptly should provide the staff with a letter setting forth the reasons for this view

VOL 52 ISS 249 DEC 29 1987 UMI

and a copy of the statement in opposition and at the same time promptly provide the registrant with a copy of his letter.

7. By amending § 240.14a–101 by adding a second sentence to paragraph (a)(2) of Item 4 and revising paragraphs (a)(2), (a)(3) and (b)(2)(ii) (C) and (G) of Item 10 as follows:

§ 240.14a–101 Schedule 14A. Information required in proxy statement.

* * * * *

Item 4. Persons Making the Solicitation—(a) * * *

(2) * * * Any person who would be a participant in a solicitation for purposes of Rule 14a–11 (§ 240.14a–11 of this chapter) as defined in paragraph (b) (3), (4), (5) and (6) thereof shall be deemed a person on whose behalf the solicitation is made for purposes of this paragraph (a).

* * * * *

Item 10. Compensation Plans. * * * (a) * * *

(2) State the benefits or amounts which will be received by or allocated to each of the following under the plan being acted upon, if such benefits or amounts are determinable: (i) Each person (stating name and position) specified in paragraph (a)(1)(i) of Item 402 of Regulation S–K (§ 229.402 of this chapter); (ii) all current executive officers as a group; (iii) all current directors who are not executive officers as a group; and (iv) all employees, including all current officers who are not executive officers, as a group. If such benefits or amounts are not determinable, state the benefits or amounts which would have been received by or allocated to each of the following for the last fiscal year if the plan had been in effect, if such benefits or amounts may be determined: (i) Each person (stating name and position) specified in paragraph (a)(1)(i) of Item 402 of Regulation S–K (§ 229.402 of this chapter); (ii) all current executive officers as a group; (iii) all current directors who are not executive officers as a group; and (iv) all employees, including all current officers who are not executive officers, as a group.

(3) Furnish the information called for by Item 402(b) of Regulation S–K (§ 229.402 of this chapter) with respect to all compensation plans now in effect or in effect during the last three years except that information called for in paragraphs (b)(1) (vi) and (vii) and (b)(4) of Item 402(b) of Regulation S–K (§ 229.402 of this chapter) should be furnished with respect to the last three fiscal years for the following: (i) Each person (stating name and position) specified in Item 402(a)(1)(i) of Regulation S–K (§ 229.402 of this chapter); (ii) all current executive officers as a group; (iii) all current directors who are not executive officers as a group, if such persons may participate in the plan; and (iv) all employees who may participate in the plan, including all current officers who are not executive officers, as a group.

(b) * * *

(2) * * *

(ii) * * *

(C) All current directors who are not executive officers as a group;

* * * * *

(G) All employees, including all current officers who are not executive officers, as a group.

* * * * *

8. By amending § 240.14c–3 by revising the first sentence of paragraph (b) to read as follows:

§ 240.14c–3 Annual report to be furnished security holders.

* * * * *

(b) Seven copies of the report sent to security holders pursuant to this rule shall be mailed to the Commission, solely for its information, not later than the date on which such report is first sent or given to security holders or the date on which preliminary copies, or definitive copies, if preliminary filing was not required, of the information statement are filed with the Commission pursuant to Rule 14c–5, whichever date is later. * * *

* * * * *

9. By amending § 240.14c-5 by adding two new sentences following the second sentence in paragraph (a), new notes 3 and 4 to the end of paragraph (a), a new note to the end of paragraph (b), and revising paragraph (g) to read as follows:

§ 240.14c-5 Filing requirements.

* * * * *

(a) * * * A registrant, however, shall not file with the Commission a preliminary information statement if it relates to an annual (or special meeting in lieu of the annual) meeting, of security holders at which the only matters to be acted upon are:

(1) The election of directors;

(2) The election, approval or ratification of accountant(s); and/or

(3) A security holder proposal identified in the registrant's information statement pursuant to Item 4 of Schedule 14C (§ 240.14c-101 of this chapter).

This exclusion from filing a preliminary information statement does not apply if the registrant comments upon or refers to a solicitation in opposition in connection with the meeting in its information statement.

* * * * *

Note 3.—Solicitation in Opposition—For purposes of the exclusion from filing a preliminary information statement, a "solicitation in opposition" includes: (a) Any solicitation opposing a proposal supported by the registrant; and (b) any solicitation supporting a proposal that the registrant does not expressly support, other than a security holder proposal identified in the registrant's information statement pursuant to Item 4 of Schedule 14C (§ 240.14c–101 of this chapter). The identification of a security holder proposal in the registrant's information statement does not constitute a "solicitation in opposition," even if the registrant opposes the proposal and/or includes a statement in opposition to the proposal.

Note 4.—A registrant that is filing an information statement in preliminary form only because the registrant has commented on or referred to an opposing solicitation should indicate that fact in a transmittal letter when filing the preliminary material with the Commission.

(b) * * *

Note.—A registrant that is filing a definitive information statement without payment of a fee should state in the first paragraph of the transmittal letter that no fee is being paid because a fee was paid upon filing of the preliminary information statement.

* * * * *

(g) *Fees.* At the time of filing the preliminary information statement, or the definitive information statement if no preliminary information statement is filed, the registrant shall pay to the Commission a fee, no part of which shall be refunded, of $125. However, when filing a preliminary information statement regarding an acquisition, merger, spinoff, consolidation or proposed sale or other disposition of substantially all the asserts of the company, the registrant shall pay the Commission a fee, no part of which shall be refunded, established in accordance with Rule 0–11 (§ 240.0–11 of this chapter). 10. By amending § 240.14c–101 by revising Instruction 2 to Item 4 as follows:

§ 240.14c–101 Schedule 14C. Information required in information statement.

* * * * *

Item 4. Proposals by security holders.

* * * *Instructions.* * * *

2. If the registrant intends to rule a proposal out of order, the Commission shall be so advised 20 calendar days prior to the date the definitive copies of the information statement are filed with the Commission, together with a statement of the reasons why the proposal is not deemed to be a proper subject for action by security holders.

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

11. The authority citation for Part 270 continues to read, in part, as follows:

Authority: Secs. 38, 40, 54 Stat. 841, 842; 15 U.S.C. 80a-37, 80c-89 * * *

12. By amending § 270.20a–1 by revising paragraph (c) to read as follows:

§ 270.20a–1 Solicitation of proxies, consents and authorizations.

* * * * *

(c) In lieu of the fees specified in Rule 14a-6 of the general rules and regulations under the Securities Exchange Act of 1934, at the time of filing the preliminary solicitation material or, if no preliminary solicitation material is filed, at the time of filing the definitive solicitation material, the person upon whose behalf the solicitation is made shall pay to the Commission a fee of $125, no part of which shall be refunded.

By the Commission.

Jonathan G. Katz,

Secretary.

17 CFR Part 250

[Release No. 35–24536; File No. S7–21–87]

Exemption From Requirement of a Declaration With Respect to Certain Agreements by Parent Companies in a Registered Holding Company System Concerning the Obligations of Their Subsidiary Companies

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of rule amendment.

SUMMARY: The Commission has amended an existing rule to exempt from the requirement of a declaration certain routine agreements in the nature of guarantees by parent companies in a registered holding company system of the obligations of their subsidiary companies.

EFFECTIVE DATE: December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Stanley B. Judd, Senior Special Counsel, Office of the Deputy Director (202–272–2079), or Martha Cathey Baker, Attorney (202–272–2073), Office of Public Utility Regulation, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today has amended Rule 45(b) (17 CFR 250.45) under the Public Utility Holding Company Act of 1935 ("Act") (15 U.S.C. 79 *et seq*). Rule 45(b) exempts certain transactions from the requirement of Rule 45(a) (17 CFR 250.45) that transactions subject to Section 12(b) (15 U.S.C. 791(b)) of the Act must be authorized by order of the Commission pursuant to a declaration. Section 12(b) prohibits registered holding companies and their subsidiaries from lending to, extending credit in any manner to, or indemnifying any company in the same holding company system, whether directly or indirectly, in contravention of the rules, regulations or orders which the Commission deems necessary or appropriate in the public interest to protect investors or consumers or to prevent the circumvention of the Act and rules, regulations and orders thereunder.

The amendment, which was proposed on June 16, 1987 (Holding Company Act Release No. 24406) ("Proposing Release") [1] exempts from the requirement of a declaration certain routine agreements whereby a parent company in a registered holding company system guarantees, assumes joint liability upon, or acts as surety or indemnitor for the obligations of its subsidiary. The purpose of the rule amendment is to eliminate the time and expense required to prepare and submit declarations with respect to the agreements, and to eliminate the administrative burden of reviewing such filings.

The background and reasons for the amendment are summarized in this release. The Proposing Release contains a more detailed discussion.

Background

Sections 12 and 13 of the Act were intended to provide complete regulation of intercompany transactions within holding company systems. The purpose of Section 12(b) was to regulate downstream loans, whether on an open book account or otherwise. The declaration requirement with respect to transactions subject to Section 12(b) is intended to ensure that such transactions are fair, that they benefit rather than harm the operating subsidiary companies, and that they are based upon sound financial policies.

On March 19, 1987, The Columbia Gas System, Inc. ("Columbia"), a registered holding company, filed a rulemaking petition concerning the agreements which are the subject of the proposed amendment. The rulemaking petition, as amended, was the basis for the Proposing Release.

Discussion

1. *Summary of Comments*

The Commission received three comment letters on the proposed amendment. All of the commentators supported the new exemption. They agreed that the rule contained well-defined limitations and safeguards and that it would result in significant time and cost savings.

One commentator suggested a revision to modify the valuation of par value securities for purposes of the amendment. As proposed, the amendment provides that the aggregate amount of contingent liability assumed by a parent company shall not exceed the greater of $50,000,000 or 5 percent of the aggregate principal amount and par value of securities previously issued by the parent company. For securities having no par value, the fair market value of such securities on the date of issuance is to be used. The commentator believes that this approach undervalues par value stock, and suggests that such stock should be valued instead at its fair market value as of the date of issuance. The commentator states that the cap on the aggregate amount of contingent liability will otherwise be fixed at too low a level for parent companies which have a large amount of par value securities outstanding.

2. *Response to the Comments*

The commentators' concern can be illustrated by a hypothetical. If two companies have issued securities of the same type and with the same market value, but one has issued par value stock and the other no par value stock, the amount of contingent liability which the former can assume pursuant to the 5 percent provision is likely to be less than that which the latter can assume. This is because the value assigned to par value stock upon initial sale is generally lower than market value at the date of issuance. Thus, the approach to the valuation of par value and no par value stock contained in the Proposing Release could produce a discriminatory effect among companies relying upon the 5 percent limitation.

Conclusion

The purpose of the amendment is to reduce the administrative burdens of the Act by allowing parent companies in registered holding companies to enter into the agreements encompassed by the exemptive rule without prior authorization by the Commission, as required by the existing rule. The 5 percent provision, along with the alternative $50,000,000 limitation, is intended to mark a boundary between transactions which should require prior authorization and those which should not.[2] It should not result in different

[1] 52 FR 23679 (June 24, 1987).

[2] A declaration pursuant to Rule 45(a) will continue to be required for agreements which do not come within the exemption.

VOL 52 ISS 249 DEC 29 1987 UMI

treatment on the basis of whether a company did or did not issue stock that happened to have a par value. The Commission believes that the commentator's proposed revision to the amendment should be adopted.

Costs and Benefits

The commentators identifed various costs and benefits which will result from the rule change, while stating that it is difficult or impossible to quantify such costs and benefits. First, the amendment will eliminate the time and expense required to prepare and submit such declarations and the administrative burden of reviewing them. Second, the amendment will eliminate the costs from delays caused by the present requirement of prior approval by the Commission. One commentator noted that it has been necessary on a number of occasions for a parent company to purchase surety and other bonds in the absence of a guarantee or indemnification. The rule change will allow required surety bonds and other evidences of indemnification and guarantee to issue as soon as needed on the most economical basis.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Chairman of the Commission certified that the proposed amendment of Rule 45 will not, if adopted, have a significant economic impact on a substantial number of small entities. The Commission did not receive any comments concerning the Chairman's certification.

Paperwork Reduction Act

The Office of Management and Budget approved the amendment to Rule 45(b) on July 17, 1987.

List of Subjects in 17 CFR Part 250

Public utilities, Registered holding companies and their subsidiaries, loans, extensions of credit, Guarantees, Indemnifications.

Text of Rule Amendment

Part 250 of Chapter II of Title 17 of the Code of Federal Regulations is amended as shown.

PART 250—RULES AND REGULATIONS, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

1. The authority citation for Part 250 continues to read, in part, as follows:

Authority: Secs. 3, 20, 49 Stat. 810, 833; 15 U.S.C. 79c, 79t * * * Sec. 250.45(b)(6) also issued under Sec. 12(b), 15 U.S.C. 791(b).

2. Add a new § 250.45(b)(6) to read as follows:

§ 250.45 Loans, extensions of credit, donations and capital contributions to associate companies.

* * * * *

(b) *Exceptions.* * * *

(6) An agreement by a registered holding company or subsidiary company of a registered holding company to guarantee, to assume joint liability, or to act as a surety or as an indemnitor with respect to contingent liabilities or other obligations of a subsidiary of such company, incurred in the ordinary course of such subsidiary's business, if said agreement is in the form of:

(i) A direct guarantee, assumption of liability, surety or indemnification of the subsidiary company's obligations which is required to meet the requirements of federal, state or local law; or

(ii) An indirect guarantee of a subsidiary through a surety or indemnification of one or more surety companies or agencies, which have agreed to provide bonds of the following kinds required by subsidiary companies in the holding-company system:

(A) Court and fiduciary bonds such as appeal bonds, supersedeas bonds, condemnation bonds, or bonds required to free property from attachment or to lift an injuction;

(B) License and permit bonds such as blasting and oversize load permit bonds;

(C) United States, state and local government bonds such as customs bonds, workers' compensation self-insurance bonds, bonds required by the Internal Revenue Services, mineral right-of-way or drilling lease bonds and notary public bonds;

(D) Lost instrument bonds or other bonds which may be necessary or desirable in connection with the processing of securities or any bonds which may be required by a stock exchange on which any security is listed;

(E) Admiralty bonds;

(F) Bonds required for engineering or construction purposes such as bid, performance or payment bonds;

(G) Any other bonds of a similar nature required for routine operational purposes;

Provided, however, that: (*1*) No payment, compensation or other consideration shall be paid or accrue to the parent company in consideration for such guarantee, assumption of liability, surety or indemnification; (*2*) this rule shall not be construed to apply to a direct or indirect guarantee, assumption of liability, surety or indemnification of a subsidiary company's indebtedness for borrowed money; and (*3*) the aggregate of all such direct and indirect guarantees, assumptions of liability, sureties or indemnifications by the parent company, shall not exceed the greater of $50,000,000, or 5 percent of the aggregate amount of the other securities of the company then outstanding, such securities to be valued at (*i*) original principal amount, if there is such a principal amount, and (*ii*) fair market value as of the date of issuance, if there is no such principal amount. Par value stock shall be treated in the same manner as no par value stock, *i.e.*, as stock issued without any principal amount.

* * * * *

By the Commission.

Jonathan G. Katz,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 284

[Docket Nos. RM87-34-000 Through RM87-34-054]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol

Issued December 23, 1987

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order on rehearing modifying prior orders and requesting comments.

SUMMARY: The Federal Energy Regulatory Commission is, in Order No. 500–C, amending on rehearing the interim regulations which it promulgated in Order Nos. 500 and 500–B in response to the decision of the United States Court of Appeals for the District of Columbia Circuit in *Associated Gas Distributors* v. *FERC*, 824 F.2d 981 (D.C. Cir. 1987). Order No. 500–C alters temporarily the treatment, under the Order No. 500 crediting mechanism, of: (1) Casinghead gas, (2) gas purchased by processing plants under percentage-of-proceeds operating agreements, (3) gas released from intrastate system supply, and (4) permanently alters the treatment of certain new gas. Order No. 500–C also permits persons other than the working interest owner to offer to act as guarantor for the working interest owner.

In addition, the Commission is denying requests that it stay

implementation of the Order No. 500 crediting mechanism. Finally, the Commission is requesting comments on a number of specific issues concerning the crediting mechanism.

DATES: The effective date for the changes in the regulatory text is December 23, 1987. Written comments must be filed with the Commission by January 22, 1988.

ADDRESS: Comments should be filed with: Federal Energy Regulatory Commission, Office of the Secretary, Room 3110, 825 North Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Richard Howe, Jr., Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357–8274.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

Order No. 500–C—Rehearing Modifying Prior Orders and Requesting Comments

Issued December 23, 1987

I. Introduction

Since the October 16, 1987 issuance of Order No. 500–B [1] and the Order Explaining Crediting Provisions of Order No. 500 (explanatory order),[2] eleven requests for rehearing of those orders have been filed. In addition, a number of requests for a stay or further clarification of the Order No. 500 take-or-pay crediting provisions have also been filed. Upon consideration of these filings and the formal comments on Order No. 500,[3] the Commission has determined to make certain changes in the Order No. 500 crediting mechanism before crediting is implemented on January 1, 1988, for transportation that was ongoing on September 15, 1987.[4] However, the Commission believes that, with these changes, crediting should be implemented on January 1, 1988, for ongoing transportation and, accordingly, the various stay requests are denied.

[1] 52 FR 39,630 (Oct. 23, 1987).

[2] 41 FERC ¶ 61,025 (1987).

[3] 52 FR 30,334 (Aug. 14, 1987).

[4] In Order No. 500–B, the Commission provided that transportation performed pursuant to a transportation agreement in effect on September 15, 1987 may continue until January 1, 1988, without the submission of an offer of credits. The Order No. 500 crediting mechanism became effective on September 15, 1987 for new transportation performed under agreements entered into after that date

II. Discussion

A. Casinghead Gas

Under Order Nos. 500 and 500–B, interstate pipelines may apply take-or-pay credits against their minimum take obligations under take-and-pay contracts. A number of producers request that the Commission eliminate this right.[5] The producers state that take-and-pay provisions are included in gas sales contracts in situations where the purchaser's failure to take the gas could have significant adverse effects. Thus, casinghead gas is generally sold pursuant to take-and-pay clauses, since a pipeline's failure to take the casinghead gas could require the producer either to flare the gas or shut in the oil production with which the casinghead gas is associated. The producers also state that take-and-pay provisions may be included in contracts where a pipeline's failure to take a minimum amount of gas could damage the well, trigger a lease forfeiture clause, or result in drainage of gas by other producers' wells.

The Commission has determined that pipelines should not apply credits against their minimum take obligations for casinghead gas until the Commission has had a further opportunity to consider the effect on the public interest. A pipeline's failure to comply with minimum take requirements for casinghead gas may seriously harm the public interest. As the producers state, casinghead gas cannot be shut in without also shutting in the accompanying oil production, since the casinghead gas is a necessary byproduct of the oil production. Thus, a pipeline's failure to take casinghead gas would likely require the producer either to shut in the oil production or flare the casinghead gas, unless the gas can be reinjected into the reservoir. Shutting in any domestic oil production increases U.S. dependence on foreign oil, with obvious adverse consequences for the trade deficit and national security. Alternatively, flaring the gas wastes a valuable natural resource. These adverse consequences may outweigh any amelioration of pipeline take-or-pay problems arising through application of the take-or-pay credits to casinghead gas.

In these circumstances, the Commission believes that, until it has an opportunity to make a more informed determination about the effect of permitting credits against minimum take obligations for casinghead gas, the wisest course is to postpone the pipeline's right to apply credits against this kind of contract. Therefore, the Commission is modifying its regulations to provide that no credits generated by transportation performed before April 1, 1988, may be applied against minimum take obligations for casinghead gas.[6] The Commission requests comment on whether pipelines should be permitted to apply credits arising from transportation performed after April 1, 1988, against minimum take obligations for casinghead gas. Specifically, the Commission requests comments on the extent to which the adverse consequences described above may be minimized through reinjection of casinghead gas into the reservoir or other means. The Commission also requests comment on whether a permanent elimination of the pipelines' right to apply credits against minimum take obligations for casinghead gas would significantly reduce the take-or-pay relief provided by Order No. 500. Based upon these comments and analysis of the responses to the Commission's take-or-pay data request, the Commission will determine whether the public interest would be served by permitting pipelines to apply credits, arising from transportation after April 1, 1988, to minimum take obligations for casinghead gas.

The Commission believes that the temporary limitation adopted here on the pipeline's right to apply credits against casinghead gas does not so seriously affect the take-or-pay relief afforded by Order No. 500 as to outweigh the concerns described above. In particular, the Commission emphasizes that the limitation does not in any way reduce the number of credits pipelines will receive under Order No. 500 for transporting gas. To the extent pipelines transport casinghead gas before April 1, 1988, that transportation will still generate credits under Order No. 500. Only the contractual obligations *against which* take-or-pay credits may be applied are affected.

The Commission is not eliminating the pipeline's right to apply credits against minimum take obligations for gas other than casinghead gas. While the Commission recognizes that application of credits against any minimum take

[5] *See, e.g.*, Motion for reconsideration and/or request for rehearing of Mobil Oil Corp. (filed Nov 17 1987) at 13–16. *See also* comments of Chevron U.S.A. Inc. (Chevron) at 33; Depco, Inc., at 8; Huffco Petroleum Corp. (Huffco) at 7; Marathon Oil Co. at 2; Indicated Producers at 13, 32; Natural Gas Supply Association (NGSA) at 28, 34, 44.

[6] *See* §§ 284.8(f)(4)(ii) and 284.9(f)(4)(ii), as modified by this order. For these purposes, only gas which was defined as casinghead gas under state law in effect on June 23, 1987 shall be considered casinghead gas.

obligation may seriously affect the individual producer involved, it has not been shown that the adverse effect on the public interest is potentially so severe when casinghead gas is not involved as to warrant the type of action taken with respect to casinghead gas. Nevertheless, certain persons have raised concerns about the effect on the public interest of allowing crediting against minimum take obligations for gas other than casinghead gas, particularly gas from the Outer Continental Shelf. Consequently, the Commission requests comment on how much gas, other than casinghead gas, is subject to take-and-pay provisions, what the impact on the public interest of allowing crediting against such gas would be, whether eliminating or limiting credit rights for that gas would significantly reduce the take-or-pay relief provided by Order No. 500, or whether and what alternative approaches are available to provide adequate take-or-pay relief.

B. New Gas

A number of applicants have expressed concern about the effect of the Order No. 500 crediting mechanism on exploration for, and production of, new gas supplies.[7] They state that a producer will have less incentive to engage in such activities if transportation of new gas it produces will generate credits against the pipeline's take-or-pay obligations to the producer for existing gas supplies. Applicants also observe that exploration for, and development of, new gas often involve the farm-out of undeveloped leases from one producer to another more willing to take the necessary risks. However, Order No. 500's requirement, that the assignor provide the pipeline take-or-pay credits in order for gas produced by the assignee to be transported, discourages such farm-outs. An assignor is unlikely to be willing to offer such credits, but the assignee will not enter into the farm-out in the absence of such an offer.

The Commission agrees that Order No. 500 may reduce exploration for, and development of, new gas supplies. Accordingly, the Commission is modifying the crediting provisions to provide that certain new gas will not generate credits when it is transported over an interstate pipeline. In addition, interstate pipelines may not apply credits arising from the transportation of other gas against their take-or-pay obligations for this new gas. *See* new §§ 284.8(f)(8) and 284.9(f)(8).

The new gas exempt from crediting is defined generally as gas produced from wells spudded after June 23, 1987, which are: (1) 2.5 miles or more from the nearest Order No. 500 marker well, (2) at least 1000 feet below the deepest completion location of each marker well within 2.5 miles, or (3) in a reservoir from which natural gas was not produced in commercial quantities before June 23, 1987. The rule thus defines credit-exempt new gas in a manner generally consistent with the definition of new gas in section 102(c)(1)(B) and (C) of the Natural Gas Policy Act of 1978 (NGPA).[8] This should assure that the gas exempt from crediting under the new gas exemption truly is new gas and avoid exempting from crediting gas from new wells producing from already discovered sources, such as infill wells.[9]

The Commission believes that the benefits of this exemption from crediting will outweigh any reduction in pipeline take-or-pay relief. During the near future the amount of gas exempted from crediting should be relatively small since only a very small proportion of production in the next several years is likely to be from wells spudded after June 23, 1987, and otherwise meeting the definition of new gas adopted here. By the time significant quantities of gas fall into the exemption, the need for credits is likely to be substantially reduced.

C. Intrastate Pipelines and Double Credits

Several applicants state that under Order No. 500 a producer may be required to provide double credits where both an intrastate and an interstate pipeline transport the producer's gas.[10] This possibility allegedly arises where an intrastate pipeline releases gas from a take-or-pay contract between it and the producer and the released gas is then transported over both the intrastate pipeline and an interstate pipeline to the new purchaser. While Order No. 500 does not provide for any credits to the intrastate pipeline, the intrastate pipeline ordinarily would require the producer to provide credits as part of the release agreement. In addition, the producer would have to provide the interstate pipeline Order No. 500 credits against the interstate pipeline's pre-June 23, 1987 take-or-pay obligations to the producer, if any. The Order No. 500 provision in §§ 284.8(f)(5) and 284.9(f)(5) limiting credits to a releasing pipeline where that pipeline and others transport the gas applies only where the releasing pipeline is an interstate pipeline. This is because only interstate pipelines performing open access transportation are eligible for Order No. 500 credits.

In Order No. 500, the Commission sought to minimize double crediting by providing that where an interstate pipeline releases gas, it may receive credits only under its release agreement or Order No. 500, but not both. In addition, as described above, the Commission stated that other pipelines that also transport the gas released by the interstate pipeline may not receive credits under Order No. 500. The Commission recognizes that the potential for double credits where an intrastate pipeline releases the gas may discourage the transportation of gas released by intrastate pipelines into the interstate market. As the applicants state, this would be contrary to the NGPA's goal of integrating the intrastate and interstate markets. Thus, the Commission is sympathetic with the request for relief from double crediting where the intrastate pipeline is the releasing pipeline.

The Commission is also concerned, however, that a modification to the regulations designed to minimize the double crediting problem described above should not provide an opportunity for circumvention of interstate pipelines' Order No. 500 crediting rights, or otherwise substantially reduce the take-or-pay relief afforded by Order No. 500. For example, if the Commission were to allow all gas sold to an intrastate pipeline, and then released, to be exempted from Order No. 500 crediting, it might be possible for gas to be exempted from crediting simply through sale to any intrastate pipeline which would then release the gas.

Accordingly, the Commission has determined to adopt a temporary exemption from crediting for gas released by intrastate pipelines which satisfies certain criteria designed to avoid the circumvention problems described above and to limit the exemption to situations where the producer actually would otherwise provide double credits. *See* new §§ 284.8(f)(9) and 284.9(f)(9). The exemption will apply to transportation performed before April 1, 1988. The Commission requests comments on whether a permanent exemption from crediting for gas released by intrastate pipelines would significantly reduce interstate pipeline take-or-pay relief and how to design such an exemption to minimize circumvention.

The temporary exemption from crediting adopted here will apply when an interstate pipeline transports gas which an intrastate pipeline has released from its system supply under a release agreement providing the intrastate pipeline with take-or-pay credits when it transports that gas. In addition, the intrastate and interstate pipelines must transport the gas in transactions commenced on or before November 15, 1987, and reported to the Commission by each pipeline pursuant to 18 CFR 284.126(a) and 284.106.[11] However, the exemption may in no case cover more than the average daily quantities transported by the interstate pipeline in November 1987 in its reported transaction.

D. Processing Plants

A number of applicants express concern about the effect of Order No. 500 on processing plants which purchase gas from behind-the-plant producers under percentage-of-proceeds contracts and then resell the gas at the tailgate of the plant.[12] Under Order No. 500, a pipeline may refuse to transport such gas, unless it has received offers of credit from the working interest owners of at least 85 percent of the gas tendered for transportation. Applicants state that there may be thousands of working interest owners behind the plant. Applicants state that processing plant operators do not currently keep track of, or even know, who all of those owners are, since the plant owner generally deals only with the lease operators. Thus, applicants maintain that plant owners must develop expensive new accounting systems to keep track of how much gas they purchase from each working interest owner in order to determine if they have obtained signatures representing 85 percent of the gas to be transported. In any event, applicants allege, it will be virtually impossible to obtain the necessary offers by January 1, 1988, and in many cases the working interest owners of 85 percent of the gas will be unwilling ever to offer credits. Applicants assert that plant operators cannot transport only the gas of those producers who offer credits without violating their contracts with other producers or violating state laws such as ratable take requirements. Thus, they state that such processing plants may have to shut down on January 1, 1988, or at least stop the interstate transportation of gas.

In order to avoid these problems, the Indicated Plant Operators propose that the Commission either: (1) Exempt from crediting entirely gas purchased and resold by processing plants or (2) provide that the pipeline may apply credits generated by the transportation of such gas only against the take-or-pay contract between the pipeline and the plant operator from which the gas has been released, if any. Under the second proposal, the processing plant operator, and not the behind-the-plant producers, would sign the offer of credits.

The Commission recognizes that, where a processing plant operator purchases gas from behind-the-plant producers and resells the gas, the offer of credit requirements in Order No. 500 impose an enormous administrative burden on the processing plant operator. There is a significant danger that the operations of such processing plants would be seriously disrupted if those requirements take effect, without modification, on January 1, 1988, for ongoing transportation, since it is unlikely that the necessary offers of credits can be obtained by January 1. Accordingly, the Commission is amending the Order No. 500 regulations, generally consistent with the Indicated Plant Operator's second proposal, in order to provide processing plants temporary relief from this problem. *See* new §§ 284.8(f)(10) and 284.9(f)(10). During the months of January through March, 1988, gas purchased by a processing plant operator under a percentage-of-proceeds contract entered into on or before June 23, 1987, and resold at the tailgate of the plant, will be made eligible for transportation under Part 284 by the submission to the pipeline of an offer of credits signed only by the processing plant operator. The transportation of that gas shall generate take-or-pay credits under Order No. 500 but the pipeline may apply those credits only against its take-or-pay obligations under the pre-June 23, 1987, contract with the plant operator from which the pipeline has released that gas. If the gas has not been released from such a contract, the pipeline will not receive any credits.

This temporary modification in the requirements for making gas purchased by processing plants under percentage-of-proceeds contracts eligible for transportation should minimize disruption of processing plant operations when the crediting provisions of Order No. 500 become effective for ongoing transportation on January 1, 1988, since the administrative burden of obtaining offers of credits from potentially thousands of behind-the-plant producers before January 1 is eliminated. The public interest in avoiding such disruption resulting from a change in regulation outweighs the possible temporary reduction in pipeline take-or-pay relief resulting from this change. The Commission observes, however, that this change in the Order No. 500 crediting mechanism does not apply to all processed gas but only to gas that is purchased by processing plants and subject to percentage-of-proceeds operating agreement.

The Commission requests comment on whether the modifications adopted here with respect to processing plants should be continued beyond March 31, 1988. In particular, the Commission requests comments on the effect of this change on the take-or-pay relief afforded pipelines by the crediting mechanism. The Commission is also interested in other methods of treating processing plants under Order No. 500 which avoid the administrative burdens described above without exacerbating pipeline take-or-pay problems

E. Guarantors

A number of applicants have pointed out other situations, apart from the processing plant problem discussed above, where satisfying the Order No. 500 offer of credit requirement causes significant administrative burdens.[13]

---

[7] *See, e.g.*, comments of Apache Corporation (Apache) at 14; Chevron at 28–30; Huffco at 4–5, 12; Indicated Producers at 51–55; McMoran Oil & Gas Co. (McMoran) at 9–15; and NGSA at 46.

[8] However, a new definition for a marker well is created in this order to avoid allowing gas from certain infill and other nonexploratory wells to obtain crediting exemptions. If the NGPA definition were used, an infill well in a reservoir discovered after April 20, 1977, and before June 23, 1987, could qualify for exemption. The new definitions for qualifying wells are intended to ensure that only gas from post-June 23, 1987, exploration is afforded exemptions.

[9] Although Order No. 500 new gas is exempt from crediting, the current producer/owner of such gas will still be required to submit offers of credits to the transporting pipeline, unless the pipeline agrees to transport the gas without an offer. Of course, since the gas is exempt from crediting the pipeline will not actually receive credits as a result of the offer of credits. In other words, where the new gas is produced from farmed-out acreage, the producer who gave the farm-out need not sign an offer of credits, if all the gas produced from the farmed-out acreage is exempt new gas. Accordingly, the requirements as to who signs offers of credits for new gas are the same as for any other exempt gas. *See* Explanatory Order, 41 FERC at 61,067–68.

[11] Since reports under §§ 284.126(a) and 284.106 are due within 30 days of the commencement of a transaction, the requirement that these transactions must have commenced on or before November 15, 1987, assures that the transactions have been reported to the Commission before the issuance of this order

[12] *See, e.g.*, Joint Emergency Motion for Clarification, Modification and Partial Stay of Indicated Plant Operators (filed Nov 12, 1987); Motion of Gas Processor's Association (filed Dec. 4, 1987); Comments of Pogo Producing Co. (filed Dec. 8, 1987); and Mobil rehearing request at 21–22.

[13] *See e.g.* ONG application for rehearing at 8–9; Motion of Hadson Gas Systems, Inc. (Hadson) for clarification (filed Nov. 30, 1987) at 5, 11–14; and comments of Gulf Energy Gathering and Processing Corp. at 2–3; and of Houston Pipe Line Co. at 3–5.

For example, in order for an intrastate or interstate pipeline's system supply to be transported over an open access interstate pipeline, offers of credits are required from the thousands of working interest owners of the leases from which that system supply comes. Similarly, marketers may aggregate gas from many working interests. The administrative burdens of obtaining offers of credits in these situations cannot be significantly mitigated by the type of change in the regulations adopted for processing plants. The gas in question in these other situations generally has not been released by the transporting pipeline from a take-or-pay contract.

However, in order to provide some relief in these other situations, the Commission will permit the shipper, or anyone else, to act as guarantor for nonsigning working interest owners. *See* new §§ 284.8(f)(11) and 284.9(f)(11). Thus, even where the working interest owners of 85 percent of the gas in question have not signed offers of credits, the Commission will nevertheless require the pipeline to transport the gas where another party [14] offers to make the pipeline whole for its loss of take-or-pay credits resulting from the lack of offers of credits for 85 percent of the gas. The person so offering to act as guarantor shall specify the producers whose gas is being transported. The pipeline will be required to transport gas once it has received, with respect to 85 percent of that gas, either offers of credits from the working interest owners of that gas, or offers to act as guarantor. The person acting as guarantor shall compensate the pipeline for any take-or-pay or take-and-pay payments the pipeline makes for gas which that person guaranteed and which the pipeline has transported without credits. The pipeline must inform the guarantor of this amount.

This amendment will enable shippers willing to act as guarantors to obtain transportation of any gas. For example, a shipper might want to offer to act as guarantor where the working interest owners of almost, but not quite, 85 percent of the gas tendered for transportation have offered credits or where producers are unwilling to sign offers of credits even though their gas is exempt from crediting. A shipper might be willing to make such a guarantee to get the gas transported where the shipper knows that the working interest owners that have not signed offers do not have take-or-pay contracts with the pipeline.

[14] That party may be the pipeline whose system supply is to be transported, the marketer, or anyone else.

The Commission emphasizes that the decision to act as guarantor is entirely at the discretion of the guarantor and is intended solely as a substitute for offers of credits from the working interest owners themselves. Where the necessary working interest owners have signed offers of credits, the pipeline must transport the gas and cannot, in addition, require the shipper to act as guarantor.

The Commission remains concerned about the administrative burdens imposed by Order No. 500 on intrastate and interstate pipelines seeking to have system supply gas transported on an interstate pipeline. The Commission requests comment on what other changes in the crediting regulations could be made to address this problem and what the effect of those changes would be on the take-or-pay relief afforded by Order No. 500.

F. Stay Requests

A number of producers, marketers, and end-users have requested that the Commission stay further implementation of the Order No. 500 crediting provisions, until after the winter heating season or the issuance of a final rule in this docket.[15] They state that, without a stay, significant quantities of gas may be removed from the spot market causing increases in the spot market price of gas. Applicants point to the administrative difficulty of obtaining offers of credits from all the necessary working interest owners in situations such as where processing plants resell residue gas. They also state that producers may be unwilling to incur the costs of providing credits against pipeline take-or-pay obligations. Applicants observe that prices have already increased significantly in the spot market and allege that this is largely because of the uncertainties created by Order No. 500.

The Commission denies the stay requests. The Commission believes that implementation of crediting is necessary in order that the Commission continue to address, on an interim basis, the concerns of the United States Court of Appeals for the District of Columbia regarding pipeline take-or-pay problems set forth in *Associated Gas Distributors v. FERC (AGD)*, 824 F.2d 981 (D.C. Cir. 1987). Addressing those concerns on an interim basis is necessary in order for the Commission to meet the standards set forth in *Mid-Tex Electric Cooperative, Inc. v. FERC (Mid-Tex)*, 822 F.2d 1123, 1131 (D.C. Cir. 1987), for issuing an interim rule without notice and comment while the Commission develops a final rule responding to the Court's concerns. The modifications to crediting adopted in this rule should mitigate any disruptions in the spot market resulting from the implementation of crediting. For example, the administrative burdens on processing plants operators have been substantially reduced. Also, the elimination of crediting against minimum take obligations for casinghead gas removes producers' concern about the effect of Order No. 500 on casinghead gas, at least for transportation through March 31, 1988.

This order is a further improvement of the original crediting mechanism in the Interim Rule adopted by Order No. 500 generally consistent with the Court's July 17, 1987 order in the *AGD* case, granting the Commission's Motions to Lodge Agency Order and to Allow Agency Order to Issue, and the standards for an Interim Rule set forth in the same Court's opinion in *Mid-Tex*. The Commission here, pursuant to the *Mid-Tex* standards, has sought to provide refined "interim procedures" for take-or-pay crediting, "that are adequate, as a temporary measure, to afford some protection" to interstate natural gas pipelines, and which "strike a reasonable balance, fairly accommodating the interests of all affected parties, while the Commission considers a permanent solution" to the take-or-pay issue. *Mid-Tex* at 1133. The Commission also is attempting, in accordance with the Court's July 17 Order, "to ensure that natural gas be kept flowing during the transition period and that uncertainty be minimized to the greatest extent possible." Memorandum Accompanying Order at 1.

The Commission has concluded that it has an obligation under *AGD* and related court orders to implement the interim procedures for take-or-pay crediting on January 1, 1988. But, it has attempted here to refine them in a manner that will further mitigate certain unnecessary and unintended effects of the crediting mechanism in the Interim Rule. Thus, the Commission intends that these refined interim procedures will strike a more reasonable balance and better accommodate the interests of all affected parties, as well as reduce uncertainty and better ensure that natural gas is kept flowing. Since the crediting mechanism must be effective on January 1, 1988, the refinements in this order are necessary and appropriate to achieve those objectives.

[15] *See, e.g.*, Motion for reconsideration and/or request for rehearing of Mobil at 19, Application for rehearing of Union Texas at 4–6; Motion of Krupp & Associates to Stay Implementation of Orders 500 & 500B to June 1, 1988 (filed December 2, 1987); and Hudson's motion for clarification at 3–10, 14.

G. Other Matters

There are several other matters on which the Commission is not taking action at this time, but as to which it requests comment. First, the Commission is considering requiring interstate pipelines to publish a list of producers with which the pipelines have significant take-or-pay obligations. Those producers would be required to offer the pipeline credits in order to obtain transportation. However, the pipeline would be required to transport the gas of other producers without offers of credits. The pipeline's publication of the list of the producers with whom it has significant take-or-pay obligations would enable purchasers of gas, including end-users and marketers, to know the gas which requires offers of credits in order to receive transportation. The Commission requests comment on this proposal. In addition, it requests that comments address what standards should be used to determine what constitutes a significant take-or-pay obligation.

The Commission is also considering publishing a list of pipelines without significant take-or-pay obligations to producers. Pipelines on this list would be required to transport without offers of credits. This would enable shippers to know which pipelines must transport all producers' gas without such offers and therefore facilitate the transportation of shipper-owned gas. The Commission requests comment on this proposal and its implementation.

Third, the Commission is considering limiting the pipelines which must be offered credits under Order No. 500 to interstate pipelines which have accepted blanket certificates to provide open access transportation under Order No. 500. This would mean that pipelines performing only NGPA section 311 transportation would not be eligible for Order No. 500 credits. The Commission is concerned that, without this limitation, a pipeline might perform NGPA section 311 transportation only in order to obtain Order No. 500 credits and once it no longer needed such credits, cease all open access transportation. This is not a danger where the pipeline accepts a blanket certificate, because in that situation a pipeline must continue open-access transportation until the Commission authorizes it to cease such transportation. The Commission requests comment on this proposal.

Fourth, some producers have expressed concern that they must present offers of credits to pipelines without knowing against which of their contracts with the pipeline the pipeline will apply the credits. The Commission is sympathetic with the problems this causes producers in making an informed business judgment as to whether to offer credits in order to obtain transportation. The Commission requests comment whether pipelines should be required to provide producers notice as to the contracts against which they will apply credits. The Commission also requests comment on the specific procedures which might be adopted to govern the giving of such notice and whether a notice requirement would in any way adversely affect the take-or-pay relief afforded pipelines by Order No. 500.

Additionally, applicants have expressed concern about the effect of the crediting mechanism on property assignments and transfers. The Commission is concerned about the effect of Order No. 500 on property transfers. However, the Commission also remains concerned that assignments may provide an opportunity for circumvention of the crediting mechanism. The actions taken in this order, including particularly those with regard to new gas and guarantors, and the actions taken in Order No. 500–B should mitigate to some extent the impediments to property transfers resulting from Order No. 500. The Commission requests comment on whether further action is necessary to reduce impediments to transfers and what effect those actions might have on the take-or-pay relief provided by Order No. 500.

The Commission has learned through communications to its Enforcement Task Force that some pipelines are seeking to require producers to sign offer of credit forms provided by the pipeline. In some cases these forms require producers to provide information or offer relief not required by Order No. 500. The Commission emphasizes that producers may use their own forms in making offers of credits and that a pipeline cannot refuse to accept a form that complies with the minimum information requirements of Order No. 500, even though the form differs from the pipeline's form. In this regard, the Commission published samples of acceptable offers of credits with its Order Explaining Crediting Provisions of Order No. 500 that could be used by producers. These forms contain all the information necessary to comply with Order No. 500. The Commission is republishing those forms with this order.

Finally, the Commission emphasizes that the pipeline and the shipper or producer may agree that the pipeline will transport the gas without the submission of an offer of credits. This enables pipelines and producers to settle take-or-pay liabilities outside the Order No. 500 crediting procedures.

III. Effective Date and Administrative Findings

The amendments to the crediting regulations adopted in this order will become effective upon issuance of this order. The Commission finds that these amendments may be made effective without 30 days advance publication under APA section 553(d). Immediate effectiveness is in the public interest, since the amendments relieve restrictions on the ability of producers and shippers of gas to obtain interstate transportation of gas. *See* 5 U.S.C. 553(d)(3) (1982). With respect to the substance of these changes, the Commission adopts and incorporates in support hereof the administrative findings stated in Part VI of Order No. 500.[16]

All credits generated by transportation performed before issuance of this order will be determined in accordance with the regulations in effect before issuance of this order. All credits generated by transportation performed on or after issuance of this order will be determined in accordance with the regulations adopted by this order, regardless of whether the producer's offer of credits was submitted before issuance of this order.

IV. Public Comment Procedures

Interested parties are invited to submit written comments with respect to the issues covered by their comments. Comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Comments should refer to Docket No. RM87–34–000 on the outside of the envelope and on all documents submitted to the Commission. Fourteen (14) copies should be submitted with the original.

To facilitate the Commission's analysis, the Commission urges commenters to provide a 3–5 page executive summary of their positions on the issues covered by their comments. Additionally, commenters should double space their comments, and provide a concise description identifying themselves.

All comments received by the Commission by January 22, 1988, will be considered prior to the promulgation of a final rule. Copies of the written

[16] Order No. 500, FERC Stats. and Regs. ¶ 30,761 at 30,798–99.

VOL 52 ISS 249 DEC 29 1987 UMI

VOL 52 ISS 249 DEC 29 1987 UMI

comments may be obtained from the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, DC 20426. Comments are available for public inspection during business hours at the same location. Copies of comments will be available for purchase.

In consideration of the foregoing, the Commission amends Part 284, Chapter I, Title 18, *Code of Federal Regulations*, as set forth below.

By the Commission. Commissioner Naeve concurred with a separate statement attached.

Lois D. Cashell,

Acting Secretary.

PART 284—CERTAIN SALES AND TRANSPORTATION OF NATURAL GAS UNDER THE NATURAL GAS POLICY ACT OF 1978 AND RELATED AUTHORITIES

1. The authority citation for Part 284 continues to read as follows:

Authority: Natural Gas Act, 15 U.S.C. 717–717w (1982), as amended; Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432 (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); E.O. 12009, 3 CFR 1978 Comp. p. 142.

2. In § 284.8, paragraph (f)(4)(ii) is amended by adding after the first sentence a sentence to read as follows:

§ 284.8 Firm transportation service.

* * * * *

(f) * * *

(4) * * *

(ii) * * * However, the pipeline may not apply credits arising from transportation performed before April 1, 1988, against its obligation, under a take-and-pay contract, to take gas which under state law in effect on June 23, 1987, was defined as casinghead gas.

* * * * *

3. In § 284.8, paragraphs (f)(8) through (f)(11) are added to read as follows:

§ 284.8 Firm transportation service.

* * * * *

(f) * * *

(8) *New natural gas.* Notwithstanding the above provisions, a producer is not required under this section to provide credits with respect to take-or-pay or take-and-pay obligations in order to obtain transportation of Order No. 500 new natural gas, as defined in paragraph (i). Also, a pipeline may not apply credits arising from the transportation of other gas against take-or-pay or take-and-pay obligations for Order No. 500 new natural gas.

(i) Order No. 500 new natural gas is:

(A) Natural gas produced from an Order No. 500 new well (as defined in paragraph ii) which is 2.5 miles or more from the nearest Order No. 500 market well (as defined in paragraph iii) or from any completion location of any Order No. 500 new well which is located at a depth at least 1,000 feet below the deepest completion location of each Order No. 500 marker well within 2.5 miles of such new well, or

(B) Natural gas produced from an Order No. 500 new well and from a reservoir from which natural gas was not produced in commercial quantities before June 23, 1987.

(ii) An Order No. 500 new well is any well the surface drilling of which began on or after June 23, 1987, or the depth of which was increased, by means of drilling on or after June 23, 1987, to a completion location which is located at least 1,000 feet below the depth of the deepest completion location of such well attained before June 23, 1987.

(iii) An Order No. 500 marker well is any well from which natural gas was produced in commercial quantities at any time after January 1, 1970, and before June 23, 1987.

(iv) For purposes of determining the distance from any Order No. 500 new well to any Order No. 500 marker well, the measurement shall be the horizontal distance from the surface location of the Order No. 500 new well to the surface location of the Order No. 500 marker well.

(9) *Intrastate system supply.* Notwithstanding the above provisions, a producer is not required under this section to provide credits with respect to take-or-pay or take-and-pay obligations in connection with an interstate pipeline's transportation from January 1, 1988, through March 31, 1988, of gas released from an intrastate pipeline's system supply gas, for average daily quantities transported by the interstate pipeline which do not exceed the average daily quantities transported in November 1987 under its reported transaction, if:

(i) The intrastate pipeline has released that gas under a release agreement providing the intrastate pipeline take-or-pay credits for transporting that gas against the pipeline's take-or-pay or take-and-pay liability under the contract from which the gas has been released,

(ii) The intrastate pipeline and interstate pipeline transport the gas in transactions commenced on or before November 15, 1987,

(iii) The intrastate pipeline reported its transportation transaction to the Commission pursuant to § 284.126(a), and

(iv) The interstate pipeline reported its transportation transaction to the Commission pursuant to § 284.106.

(10) *Special rule for certain processing plant resales.*

(i) Until April 1, 1988, natural gas which a processing plant operator purchased under percentage-of-proceeds contracts, entered into on or before June 23, 1987, with behind-the-plant producers and which the processing plant operator resells at the plant's tailgate is eligible for transportation by interstate pipelines when:

(A) The pipeline and the shipper or processing plant operator agree, or

(B) An offer has been submitted to the pipeline: (*1*) Signed by the processing plant operator and (*2*) identifying the gas made eligible for transportation through the filing of the offer, (*3*) which, upon acceptance of the pipeline, will result in a contract binding on the processing plant operator to grant the pipeline credits, as provided in this section subject to the limitation in paragraph (f)(10)(ii), in connection with the transportation of the subject gas.

(ii) Credits arising from the transportation from January 1, 1988, through March 31, 1988, of the gas described in paragraph (f)(10)(i) may be applied only against the transporting pipeline's take-or-pay or take-and-pay obligation under a pre-June 23, 1987, contract with the processing plant operator from which that pipeline has released the transported gas.

(11) *Offers to act as guarantor.* (i) Where the working interest owners of 85 percent of the gas tendered for transportation do not sign offers of credits, that gas nevertheless shall be eligible for transportation if some other person offers to act as guarantor for nonsigning producers such that 85 percent of the gas is covered either by offers of credits or offers to act as guarantor.

(ii) An offer to act as guarantor must:

(A) Identify the gas which will be transported pursuant to the offer and the producer of that gas,

(B) Be signed by the guarantor, and

(C) Constitute an offer, which upon acceptance by the pipeline, will result in a contract binding on the guarantor to pay the pipeline the amount by which the pipeline's take-or-pay or take-and-pay payments to the producers would have been reduced had the producer offered the pipeline credits under Order No. 500.

4. In § 284.9, paragraph (f)(4)(ii) is amended by adding after the first sentence a sentence to read as follows:

§ 284.9 Interruptible transportation service.

* * * * *

(f) * * *

(4) * * *

(ii) * * * However, the pipeline may not apply credits arising from transportation performed before April 1, 1988, against its obligation, under a take-and-pay contract, to take gas which under state law in effect on June 23, 1987, was defined as casinghead gas.

* * * * *

5. In § 284.9, paragraphs (f)(8) through (f)(11) are added to read as follows:

§ 284.9 Interruptible transportation service.

* * * * *

(f) * * *

(8) *New natural gas.* Notwithstanding the above provisions, a producer is not required under this section to provide credits with respect to take-or-pay or take-and-pay obligations in order to obtain transportation of Order No. 500 new natural gas, as defined in paragraph (i). Also, a pipeline may not apply credits arising from the transportation of other gas against take-or-pay or take-and-pay obligations for Order No. 500 new natural gas.

(i) Order No. 500 new natural gas is:

(A) Natural gas produced from an Order No. 500 new well (as defined in paragraph ii) which is 2.5 miles or more from the nearest Order No. 500 marker well (as defined in paragraph iii) or from any completion location of any Order No. 500 new well which is located at a depth at least 1,000 feet below the deepest completion location of each Order No. 500 marker well within 2.5 miles of such new well, or

(B) Natural gas produced from an Order No. 500 new well and from a reservoir from which natural gas was not produced in commercial quantities before June 23, 1987.

(ii) An Order No. 500 new well is any well the surface drilling of which began on or after June 23, 1987 or the depth of which was increased, by means of drilling on or after June 23, 1987, to a completion location which is located at least 1,000 feet below the depth of the deepest completion location of such well attained before June 23, 1987.

(iii) An Order No. 500 marker well is any well from which natural gas was produced in commercial quantities at any time after January 1, 1970, and before June 23, 1987.

(iv) For purposes of determining the distance from any Order No. 500 new well to any Order No. 500 marker well, the measurement shall be the horizontal distance from the surface location of the Order No. 500 new well to the surface location of the Order No. 500 marker well.

(9) *Intrastate system supply.* Notwithstanding the above provisions, a producer is not required under this section to provide credits with respect to take-or-pay or take-and-pay obligations in connection with an interstate pipeline's transportation from January 1, 1988, through March 31, 1988, of gas released from an intrastate pipeline's system supply gas, for average daily quantities transported by the interstate pipeline which do not exceed the average daily quantities transported in November 1987 under its reported transaction, if:

(i) The intrastate pipeline has released that gas under a release agreement providing the intrastate pipeline take-or-pay credits for transporting that gas against the pipeline's take-or-pay or take-and-pay liability under the contract from which the gas has been released,

(ii) The intrastate pipeline and interstate pipeline transport the gas in transactions commenced on or before November 15, 1987,

(iii) The intrastate pipeline reported its transportation transaction to the Commission pursuant to § 284.126(a), and

(iv) The interstate pipeline reported its transportation transaction to the Commission pursuant to § 284.106.

(10) *Special rule for certain processing plant resales.*

(i) Until April 1, 1988, natural gas which a processing plant operator purchased under percentage-of-proceeds contracts, entered into on or before June 23, 1987, with behind-the-plant producers and which the processing plant operator resells at the plant's tailgate is eligible for transportation by interstate pipelines when:

(A) The pipeline and the shipper or processing plant operator agree, or

(B) An offer has been submitted to the pipeline: (*1*) Signed by the processing plant operator and (*2*) identifying the gas made eligible for transportation through the filing of the offer, (*3*) which, upon acceptance of the pipeline, will result in a contract binding on the processing plant operator to grant the pipeline credits, as provided in this section subject to the limitation in paragraph (f)(10)(ii), in connection with the transportation of the subject gas.

(ii) Credits arising from the transportation from January 1, 1988, through March 31, 1988, of the gas described in paragraph (f)(10)(i) may be applied only against the transporting pipeline's take-or-pay or take-and-pay obligation under a pre-June 23, 1987, contract with the processing plant operator from which that pipeline has released the transported gas.

(11) *Offers to act as guarantor.* (i) Where the working interest owners of 85 percent of the gas tendered for transportation do not sign offers of credits, that gas nevertheless shall be eligible for transportation if some other person offers to act as guarantor for nonsigning producers such that 85 percent of the gas is covered either by offers of credits or offers to act as guarantor.

(ii) An offer to act as guarantor must:

(A) Identify the gas which will be transported pursuant to the offer and the producer of that gas,

(B) Be signed by the guarantor, and

(C) Constitute an offer, which upon acceptance by the pipeline, will result in a contract binding on the guarantor to pay the pipeline the amount by which the pipeline's take-or-pay or take-and-pay payments to the producers would have been reduced had the producer offered the pipeline credits under Order No. 500.

Example of a General Offer of Credits

OFFER OF TAKE-OR-PAY OR TAKE-AND-PAY CREDITS UNDER FERC ORDER NO. 500

The undersigned hereby offer(s) to grant the interstate pipeline(s) listed below any take-or-pay or take-and-pay credits required under 18 CFR 284.8(f)(1)(ii) and 284.9(f)(1)(ii) in connection with the transportation of all gas under lease to the undersigned on ———— [date] ————. Upon acceptance by the pipeline(s) listed below, this offer will result in a contract binding on the undersigned and its/their assignees.

ORDER NO. 500–C

Issued December 23, 1987.

Commissioner C. M. Naeve, concurring:

Although these changes in the Order 500 crediting mechanixm are different in particular respects from those which I would make, I nonetheless support this Order because it reduces the potential for disruption of gas markets. I am hopeful that in preparing the final rule, the Commission will continue to search for ways to address the Court's concerns in *Associated Gas Distributors* without imposing undue restraints on competition in the natural gas industry.

C. M. Naeve,

Commissioner.

BILLING CODE 6717–01–M

INTERNATIONAL TRADE COMMISSION

19 CFR 201, 212 and 213

Amendment of Rules of Practice and Procedure To Reflect Commission Change of Address

AGENCY: U.S. International Trade Commission.

ACTION: Amendment of rules.

SUMMARY: The Commission is in the process of relocating its offices from its present location at 701 E Street NW., Washington, D.C., to its new location at 500 E Street SW., Washington, D.C. The Commission expects the move to be completed by January 11, 1988. The Commission's ZIP code will remain unchanged at 20436.

EFFECTIVE DATE: January 11, 1988.

FOR FURTHER INFORMATION CONTACT: Kenneth R. Mason, Secretary, U.S. International Trade Commission, Washington, D.C. 20436 (telephone through January 8, 1988: 202–523–0161; on January 11, 1988, and thereafter: 252–1000).

SUPPLEMENTARY INFORMATION: These amendments are considered to be of an administrative and non-substantive nature and accordingly are being made without opportunity for public comment.

List of Subjects in 19 CFR Parts 201, 212, and 213

Administrative practice and procedure, Claims, Imports.

Authority: 19 U.S.C. 1335, etc.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: December 15, 1987.

Therefore, Chapter II of Title 19 of the Code of Federal Regulations is amended as follows:

PARTS 201, 212, AND 213 [AMENDED]

1. The authority citation for Part 201 continues to read as follows:

Authority. Sec. 335, 72 Stat. 680, sec. 401, 76 Stat. 902; 19 U.S.C. 1335, 1802, unless otherwise noted.

2. The authority citation for Part 212 continues to read as follows:

Authority: Sec. 203(a)(1), Pub. L. 96–461, 94 Stat. 2325 (5 U.S.C. 504(c)(1)).

3. The authority citation for Part 213 continues to read as follows:

Authority. Sec. 339 of the Tariff Act of 1930 (19 U.S.C. 1339), as added by sec. 221, Trade and Tariff Act of 1984 (Pub. L. 98–573, approved Oct. 30, 1984; 98 Stat. 2989); sec. 335, Tariff Act of 1930 (72 Stat. 680; 19 U.S.C. 1335).

§§ 201.3, 201.6, 201.17, 201.19, 201.23, 201.24, 201.25, 201.28, 201.29, 201.41, 201.170, 212.29, 213.4, and 213.7 [Amended]

4. (1) Substitute "500 E Street SW." for "701 E Street NW" or "on E Street between 7th and 8th Streets NW.", as the case may be, at §§ 201.3(a), 201.3(b), 201.6(b), 201.6(e), 201.6(f), 201.23(e), 201.24(a), 201.25(b), 201.28(a), 201.29(a), 201.41(b), 201.170(c), 212.29, 213.4(a), and 213.7 of the rules and at any other place in the rules that these terms are presently found; (2) to add the term "500 E Street SW." after the term "United States International Trade Commission" in §§ 201.17(a) and 201.19(a) of the rules; and (3) to delete the term "Room 130" in § 213.7 of the rules.

BILLING CODE 7020–02–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8169]

Income Tax; Taxable Years of Certain Partnerships

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to the appropriate taxable year for certain partnerships. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the Proposed Rules section of this issue of the **Federal Register.** The temporary regulations reflect an amendment to section 706(b) of the Internal Revenue Code with respect to the taxable years of certain partnerships as made by section 806 of the Tax Reform Act of 1986 and provide guidance to partnerships with respect to the new provision.

DATES: The regulations contained in this document will be effective for partnership taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: Beverly A. Baughman of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., NW., Washington, DC 20224. Attention: CC:LR:T. (202–566–3297, not a toll free call).

SUPPLEMENTARY INFORMATION:

Background

Prior to its amendment by section 806 of the Tax Reform Act of 1986 (H.R. 3838, Pub. L. 99–514, "the Act"), section 706(b) required a partnership adopting or changing a taxable year to use the same taxable year as the taxable year of all of its principal partners (or the calendar year, if all the partnership's principal partners did not have the same taxable year), unless the partnership established, to the satisfaction of the Secretary of the Treasury, a business purpose for selecting a different taxable year.

Section 706(b), as amended by section 806 of the Act, requires that any

partnership (except where a business purpose for some other taxable year is established) must conform its taxable year to (a) the taxable year of one or more of its partners who have an aggregate interest in partnership profits and capital of greater than 50 percent, (b) if no taxable year is described in (a), the taxable year of all of its principal partners, or (c) if no taxable year is described in (a) or (b), the calendar year or such other year as may be prescribed by regulations.

This document, under the authority of section 706(b)(1)(B)(iii), prescribes rules for determining when the calendar year will not be an appropriate taxable year for the partnership and which year will be appropriate in such cases.

Explanation of Provisions

Section 1.706–1T(a) generally provides that, if a partnership is unable to determine its taxable year by reference to the taxable year of its partners owning a majority interest in partnership profits and capital (as described in section 706(b)(1)(B)(i)) or by reference to the taxable year of all of its principal partners (as described in section 706(b)(1)(B)(ii)), its taxable year is the year that results in the least aggregate deferral of income to the partners. Deferral to each partner is measured in terms of months from the end of the partnership's taxable year forward to the end of the partner's taxable year. The taxable year that results in the least aggregate deferral of income to the partners is determined under § 1.706–1T(a)(2) by comparing the deferral that would result to the partners if a particular partner's taxable year were the partnership's taxable year. Rules are also provided to minimize the number of changes in the partnership's taxable year under section 706(b)(1)(B)(iii) where there would be a de minimis change in the aggregate deferral to the partners.

Regulatory Flexibility Act, Executive Order 12291, and Paperwork Reduction Act of 1980

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act (5 U.S.C. Chapter 6) does not apply and no Regulatory Flexibility Analysis is required for this rule. The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. The reporting requirements added by this document have been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. The reporting requirements have been approved by OMB under 1545–0099.

Drafting Information

The principal author of these temporary regulations is Gail H. Morse of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

Income taxes, Partnerships.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly , 26 CFR Parts 1 and 602 are amended as follows:

PART 1—[AMENDED]

Income Taxes

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. section 7805. * * * Section 1.706–1T also issued under 26 U.S.C. 706(b).

Par. 2. A new §1.706–1T is added immediately following existing §1.706–1 to read as follows:

§1.706–1T Taxable years of certain partnerships (temporary).

(a) *Taxable year determined by reference to the partners*—(1) *In general.* If for any taxable year a partnership's taxable year cannot be determined by reference to the taxable year of its partners owning a majority interest in partnership profits and capital (as described in section 706(b)(1)(B)(i)) or by reference to the taxable year of all its principal partners (as described in section 706(b)(1)(B)(ii)), then the partnership must determine its taxable year under section 706(b)(1)(B)(iii). Under section 706(b)(1)(B)(iii), the taxable year of the partnership, except as provided in paragraph (b) of this section, shall be the taxable year that results in the least aggregate deferral of income to the partners (as determined under paragraph (a)(2) of this section).

(2) *Taxable year that results in the least aggregate deferral of income.* The taxable year that results in the least aggregate deferral of income will be the taxable year of one or more of the partners in the partnership which will result in the least aggregate deferral of income to the partners. The aggregate deferral for a particular year is equal to the sum of the products determined by multiplying the month(s) of deferral for each partner that would be generated by that year and each partner's interest in partnership profits for that year. The partner's taxable year that produces the lowest sum when compared to the other partner's taxable years is the taxable year that results in the least aggregate deferral of income to the partners. If the calculation results in more than one taxable year qualifying as the taxable year with the least aggregate deferral, the partnership may select any one of those taxable years as its taxable year. However, if one of the qualifying taxable years is also the partnership's existing taxable year, the partnership must maintain its existing taxable year. The determination of the taxable year that results in the least aggregate deferral of income generally be made as of the beginning of the partnership's current taxable year. The district director, however, may determine that the first day of the current taxable year is not the appropriate testing day and require the use of some other day or period that will more accurately reflect the ownership of the partnership and thereby the actual aggregate deferral to the partners where the partners engage in a transaction that has as its principal purpose the avoidance of the principles of this section. Thus, for example the preceding sentence would apply where there is a transfer of an interest in the partnership that results in a temporary transfer of that interest principally for purposes of qualifying for a specific taxable year under the principles of this section. For purposes of this section, deferral to each partner is measured in terms of months from the end of the partnership's taxable year forward to the end of the partner's taxable year.

(3) *Determination of the taxable year of a partner or partnership that uses a 52–53 week taxable year.* For purposes of the calculation described in paragraph (a)(2) of this section, the taxable year of a partner or partnership that uses a 52–53 week taxable year shall be the same year determined under the rules of section 441(f) and the regulations thereunder with respect to the inclusion of income by the partner or partnership.

(4) *Special de minimis rule.* If the taxable year that results in the least aggregate deferral produces an aggregate deferral that is less than .5

when compared to the aggregate deferral of the current taxable year, the partnership's current taxable year shall be treated as the taxable year with the least aggregate deferral. Thus, the partnership will not be permitted to change its taxable year. However, this de minimis rule will not apply to the first taxable period beginning after December 31, 1986.

(b) *Business purpose.* A partnership may have a taxable year other than the year described in paragraph (a) of this section if it establishes, to the satisfaction of the Commissioner of Internal Revenue, a business purpose for such taxable year in accordance with and under the procedures established in § 1.442–1(b)(1). For purposes of this paragraph (b), any deferral of income to partners shall not be treated as a business purpose.

(c) *Procedural requirements and effective date*—(1) *In general.* The change in accounting period required by paragraph (a) of this section shall be treated as initiated by the partnership and made with the consent of the Commissioner. To effect the change, a partnership must show that the requirements of this section are satisfied in a statement setting forth the computations required to establish the taxable year that results in the least aggregate deferral of income to the partners under paragraph (a) of this section. The partnership must attach the statement to the income tax return for the short period involved in the changes and must indicate the following at the top of page 1 of the return: "FILED UNDER § 1.706–1T."

(2) *Effective date*—(i) *In general.* Except as provided in paragraph (c)(2)(ii) of this section, the rules of this section are effective for partnership taxable years beginning after December 31, 1986.

(ii) *Special rule for first taxable year beginning after December 31, 1986.* A partnership otherwise required to change its accounting period for its first taxable year beginning after December 31, 1986 to a year resulting in the least aggregate deferral of income to its partners under paragraph (a) of this section, may, at its option, delay the application of the rules of that paragraph until its first taxable year beginning after December 31, 1987. In such a case, the partnership must conform its first taxable year beginning after December 31, 1986 to the calendar year and must apply the rules of paragraph (a) of this section to its first taxable year beginning after December 31, 1987. See § 1.702–3T(a)(1) regarding the availability of a 4-year spread provision with respect to a partnership required to change its taxable year for its first taxable year beginning after December 31, 1986.

(iii) *Special eligibility for 4-year spread; years beginning after December 31, 1987.* Notwithstanding the provisions of § 1.702–3T(a)(1) limiting the availability of the 4-year spread provisions to a partnership's first taxable year beginning after December 31, 1986, if—

(A) A partnership is required under section 706(b)(1)(B)(iii) and paragraph (a) of this section to change to a taxable year that results in the least aggregate deferral of income to the partners for a partnership's first taxable year beginning after December 31, 1987,

(B) The partnership did exercise its option, as provided in paragraph (c)(2)ii) of this section, to delay the application of the rules of paragraph (a) of this section until the partnership's first taxable year beginning after December 31, 1987, and

(C) The partnership would have been required to change its accounting period under section 706(b)(1)(B)(iii) and paragraph (a) of this section for its first taxable year beginning after December 31, 1986, if paragraph (a) of this section had been applicable to such taxable year, the partners in the partnership will be eligible to utilize the 4-year spread provision provided in § 1.702–3T (subject to the other requirements of that section) with respect to the partnership's change in accounting period required under section 706(b)(1)(B)(iii) and paragraph (a) of this section for the partnership's first taxable year beginning after December 31, 1987.

(d) *Examples.* The principles of this section may be illustrated by the following examples:

Example (1). Partnership P is on a fiscal year ending June 30. Partner A reports income on the fiscal year ending June 30 and Partner B reports income on the fiscal year ending July 31. A and B each have a 50 percent interest in partnership profits. For its taxable year beginning July 1, 1987, the partnership will be required to retain its taxable year since the fiscal year ending June 30 results in the least aggregate deferral of income to the partners. This determination is made as follows:

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A	6/30	.5	0	0
Partner B	7/31	.5	1	.5
Aggregate deferral				.5

Test 7/31	Year End	Interest in Partnership Profits	Months of Deferral for 7/31 Year End	Interest x Deferral
Partner A	6/30	.5	11	5.5
Partner B	7/31	.5	0	0
Aggregate deferral				5.5

Example (2). The facts are the same as in *Example (1)* except that A reports income on the calendar year and B reports on the fiscal year ending November 30. For the partnership's taxable year beginning July 1, 1987, the partnership is required to change its taxable year to a fiscal year ending November 30 because such year results in the least aggregate deferral of income to the partners. This determination is made as follows:

Test 12/31	Year End	Interest in Partnership Profits	Months of Deferral for 12/31 Year End	Interest x Deferral
Partner A	12/31	.5	0	0
Partner B	11/30	.5	11	5.5
Aggregate deferral				5.5

Test 11/30	Year End	Interest in Partnership Profits	Months of Deferral for 11/30 Year End	Interest x Deferral
Partner A	12/31	.5	1	.5
Partner B	11/30	.5	0	0
Aggregate deferral				5.5

Example (3). The facts are the same as in *Example (2)* except that B reports income on the fiscal year ending June 30. For the partnership's taxable year beginning July 1, 1987, each partner's taxable year will result in identical aggregate deferral of income. If the partnership's current taxable year was neither a fiscal year ending June 30 nor the calendar year, the partnership would select either the fiscal year ending June 30 or the calendar year as its taxable year. However, since the partnership's current taxable year ends June 30, it must retain its current taxable year.

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A	6/30	.5	0	0
Partner B	7/31	.5	1	.5
Aggregate deferral				.5

Test 12/31	Year End	Interest in Partnership Profits	Months of Deferral for 12/31 Year End	Interest x Deferral
Partner A	12/31	.5	0	0
Partner B	6/30	.5	6	3.0
Aggregate deferral				3.0

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A	12/31	.5	6	3.0
Partner B	6/30	.5	0	0
Aggregate deferral				3.0

Example (4). The facts are the same as in *Example (1)* except that on December 31, 1987, partner A sells a 4 percent interest in the partnership to Partner C, who reports income on the fiscal year ending June 30, and a 40 percent interest in the partnership to Partner D, who also reports income on the fiscal year ending June 30. The taxable year beginning July 1, 1987, is unaffected by the sale. However, for the taxable year beginning July 31, 1988, the partnership must determine the taxable year resulting in the least aggregate deferral as of July 1, 1988. In this case, the partnership will be required to retain its taxable year since the fiscal year ending June 30 continues to be the taxable year that results in the least aggregate deferral of income to the partners.

Example (5). The facts are the same as in *Example (4)* except that Partner D reports income on the fiscal year ending April 30. As in Example (4), the taxable year during which the sale took place is unaffected by the shifts in interests. However, for its taxable year beginning July 1, 1988, the partnership will be required to change its taxable year to the fiscal year ending April 30. This determination is made as follows:

Test 7/31	Year End	Interest in Partnership Profits	Months of Deferral for 7/31 Year End	Interest x Deferral
Partner A	6/30	.06	11	.66
Partner B	7/31	.5	0	0
Partner C	6/30	.04	11	.44
Partner D	4/30	.4	9	3.60
Aggregate deferral				4.70

Test 6/30	Year End	Interest in Partnership Profits	Months of Deferral for 6/30 Year End	Interest x Deferral
Partner A	6/30	.06	0	0
Partner B	7/31	.5	1	.5
Partner C	6/30	.04	0	0
Partner D	4/30	.4	10	4.0
Aggregate deferral				4.5

Test 4/30	Year End	Interest in Partnership Profits	Months of Deferral for 4/30 Year End	Interest x Deferral
Partner A	6/30	.06	2	.12
Partner B	7/31	.5	3	1.50
Partner C	4/30	.45	9	4.05
Aggregate deferral				4.45

Test 4/30	Year End	Interest in Partnership Profits	Months of Deferral for 4/30 Year End	Interest x Deferral
Partner C	6/30	.04	2	.08
Partner D	4/30	.4	0	0
Aggregate deferral				1.70

§ 1.706-1T(a)(4) Test:	
Current taxable year (June 30)	4.5
Less: Taxable year producing the least aggregate deferral (April 30)	1.7
Additional aggregate deferral (greater than .5)	2.8

Example (6). Partnership P has two partners, A who reports income on the fiscal year ending March 31, and B who reports income on the fiscal year ending July 31. A and B share profits equally. P has determined its taxable year under § 1.706–1T(a)(2) to be the fiscal year ending March 31 as follows:

Test 3/31	Year End	Interest in Partnership Profits	Deferral for 3/31 Year End	Interest x Deferral
Partner A	3/31	.5	0	0
Partner B	7/31	.5	4	2
Aggregate deferral				2

Test 7/31	Year End	Interest in Partnership Profits	Deferral for 7/31 Year End	Interest x Deferral
Partner A	3/31	.5	8	4
Partner B	7/31	.5	0	0
Aggregate deferral				4

In May 1988, Partner A sells a 45 percent interest in the partnership to C, who reports income on the fiscal year ending April 30. For the taxable period beginning April 1, 1989, the fiscal year ending April 30 is the taxable year that produces the least aggregate deferral of income to the partners. However, under paragraph (a)(4) of this section the partnership is required to retain its fiscal year ending March 31. This determination is made as follows:

Test 3/31	Year End	Interest in Partnership Profits	Deferral for 3/31 Year End	Interest x Deferral
Partner A	3/31	.05	0	0
Partner B	7/31	.5	4	2.0
Partner C	4/30	.45	1	.45
Aggregate deferral				2.45

Test 7/31	Year End	Interest in Partnership Profits	Deferral for 7/31 year end	Interest Deferral
Partner A	3/31	.05	8	.40
Partner B	7/31	.5	0	0
Partner C	4/30	.45	9	4.05
Aggregate deferral				4.45

Test 4/30	Year End	Interest in Partnership Profits	Deferral for 4/30 year end	Interest Deferral
Partner A	3/31	.05	11	.55
Partner B	7/31	.5	3	1.50
Partner C	4/30	.45	0	0
Aggregate deferral				2.05

§ 1.706-1T(a)(4) Test:	
Current taxable year (3/31)	2.45
Less: Taxable year producing the least aggregate deferral (4/30)	2.05
Additional aggregate deferral (less than .5)	.40

PART 602—[AMENDED]

OMB Control Numbers Under the Paperwork Reduction Act

Par. 3. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table: "§ 1.706–1T * * * 1545–0099."

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: December 16, 1987.

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

DEPARTMENT OF JUSTICE

28 CFR Parts 0 and 68

[A.G. Order 1245–87]

Organization of the Department of Justice Executive Office for Immigration Review

AGENCY: Executive Office for Immigration Review, Department of Justice.

ACTION: Final rule.

SUMMARY: This is to correct the final rule which was published on November 24, 1987, at 52 FR 44971. That rule, among other things, erroneously stated that the Executive Office for

Immigration Review had had its name changed to the Executive Office for Immigration Matters. This rule is published to correct that erroneous statement. The correct name of the organization remains the Executive Office for Immigration Review. The rule also corrects similar erroneous name references in 28 CFR Part 68.

EFFECTIVE DATE: December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Gerald S. Hurwitz, Counsel to the Director, Executive Office for Immigration Review, Suite 1609, 5203 Leesburg Pike, Falls Church, Virginia 22041, telephone (703) 756–6470.

SUPPLEMENTARY INFORMATION: The final rule published on November 24, 1987, at 52 FR 44971, erroneously stated that the name of the Executive Office for Immigration Review had been changed to the Executive Office for Immigration Matters. This was published in error. This final rule corrects the error and clearly indicates that the correct name of the organization is the Executive Office for Immigration Review. The rule also corrects similar erroneous name references in 28 CFR Part 68.

This is not a major rule within the meaning of section 1(b) of Executive Order 12291. In accordance with 5 U.S.C. 605(b), the Attorney General certifies that this rule will not have a significant impact on a substantial number of small entities.

List of Subjects

28 CFR Part 0

Government employees, Organizations and functions (Government agencies), Authority delegations (Government agencies).

28 CFR Part 68

Administrative practice and procedures, Aliens, Citizenship and naturalization, Civil rights, Discrimination in employment, Employment, Equal employment opportunity, Immigration, Nationality, Non-Discrimination.

Accordingly, by the authority vested in me, including 28 U.S.C. 509, 510, Title 28 of the Code of Federal Regulations is revised as follows:

PART 0—[AMENDED]

1. The authority citation for Part 0 continues to read as follows:

PART 1601—[AMENDED]

§ 1601.80 [Amended]

Accordingly, 29 CFR Part 1601 is amended in § 1601.80 by adding the Lousiville and Jefferson County Human Relations Commission in alphabetical order.

Signed at Washington, DC this 23rd day of December, 1987.

James H. Troy,

Director, Office of Program Operations.

[FR Doc. 87–29768 Filed 12–28–87; 8:45 am]

BILLING CODE 6570–06–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 102

[DoD Directive 1215.6]

Uniform Reserve, Training and Retirement Categories

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: This Part revises 32 CFR Part 102 and establishes new policies and procedures consistent with recent changes in law and development of revised Defense Department policy. There have been significant changes in the roles and missions of the Reserve Components since this was last published. The National Guard and Reserve Forces have expanded and taken on increased responsibilities for National Security as a part of the Total Force. This part outlines new policies and categories for reporting and managing the Reserve Components.

EFFECTIVE DATE: September 22, 1987.

FOR FURTHER INFORMATION CONTACT: Colonel D. Smith, Director Guard/Reserve Manpower Programs, Office of the Secretary of Defense (Reserve Affairs), Rm 3C325, telephone 695–7306, Pentagon, Washington, D.C. 20301.

SUPPLEMENTARY INFORMATION: 32 CFR Part 102 was last printed in the **Federal Register** on February 12, 1970.

List of Subjects in 32 CFR Part 102

Armed forces reserves, Wages.

Accordingly, 32 CFR Part 102, is revised as follows:

PART 102—UNIFORM RESERVE, TRAINING AND RETIREMENT CATEGORIES

Sec.

102.1 Reissuance and purpose.
102.2 Applicability.
102.3 Definitions.
102.4 RCC and TRC category table.
102.5 Policy.
102.6 Members participating in approved programs outside the Department of Defense.
102.7 Funds.
Appendix A—Uniform Reserve, Training and Retirement Categories.
Appendix B—Table 1, Authorized Reserve, Training and Retirement Categories.
Appendix C—Acronyms.

Authority: Sec. 301, 80 Stat. 379; 5 U.S.C. 301.

§ 102.1 Reissuance and purpose.

This part revises Part 102 to:

(a) Update DoD policy and assign responsibilities for implementing the recent changes in law.

(b) Establish DoD policy guidance for maintaining and reporting personnel data in accordance with DoD Directive 1207.17 [1] and 32 CFR Part 114.

(c) Designate uniform Reserve component categories (RCCs), training or retired categories (TRCs) for the Ready Reserve, Standby Reserve, and Retired Reserve of the Armed Forces under Sections 268, 270, 271, 273, 274, 1376, 2001, and 6017 of Title 10, United States Code.

(d) Establish mininal training criteria for each category of the Reserve components (RCs).

(e) Provide uniform planning policies and procedures on training.

(f) Establish policy guidance for participation in Selective Service System (SSS) activities, civil defense activities, and Continental United States (CONUS) Defense programs by members of the Ready and Standby Reserve.

§ 102.2 Applicability.

This part applies to the Office of the Secretary of Defense (OSD), the Military Departments and their Reserve components, the Organization of the Joint Chiefs of Staff (OJCS), the U.S. Coast Guard and its Reserve component with the concurrence of the Department of Transportation (DoT), and the Defense Agencies (hereafter referred to collectively as "DoD Components").

§ 102.3 Definitions.

Active Duty (AD). Full-time duty in a U.S. Military Service. A general term applied to all active Military Service, including full-time National Guard duty, without regard to duration or purpose. May be served with either ACs or RCs.

Active Status. All Reserves are in an active status except those on an Inactive Status List of a RC, in the Inactive Army National Guard, or in a retired status in accordance with Section 267(b) of Title 10, U.S.C. Those in an active status may train for points and/or pay and may be considered for promotion.

AD for Special Work (ADSW). ADSW is authorized for personnel from military and Reserve personnel appropriations for projects on AC or RC programs. These include annual screening, training camps operations, training ships operation, and unit conversions to new weapons systems when such duties are essential to the organization. Support for study groups, training sites and exercises, accomplishing short-term projects, and performing administrative or support functions. ADSW tours exceedings 180 days are accountable against AD end strength in accordance with 10 U.S.C. 115(b)(1)(B). By policy, such tours normally are limited to 139 days or less in 1 FY. Exceptions to the 139-day limit may be granted on an individual basis for specific mission requirements. Nontechnician personnel shall receive priority consideration for such tours.

AD for Training (ADT). An ADT tour under orders providing for automatic reversion to inactive duty status when the specified period of ADT is completed. ADT includes full-time attendance at formal specialized skill training, flight training, combat crew training, and professional development education programs intended to provide RC members with necessary skills and disciplines supporting RC missions. Special AD for activities having a primary training content also is authorized as ADT.

Annual Screening. At least 1 day of ADT is required each year for IRR members to accomplish the annual screening requirements of Section 271 of Title 10, U.S.C. The Services are required to maintain the current status of each member's physical condition, dependency status, military qualifications, civilian occupational skills, availability for service, and other information prescribed by Section 271 of Title 10, U.S.C. and the Service Secretary.

Annual Training (AT). The minimal period of AT or annual field training that a Reserve member must perform each year to satisfy the AT requirements associated with his and or her RC assignment. AT normally is performed during one consecutive period. Selected units or IMAs may perform this training in increments of 3 or more days if training requirements and any additional costs (including travel costs) are justified.

Inactive Duty Training (IDT). Authorized and scheduled training performed by a Reservist not on AD, AT, or ADT and consisting of regular training periods, assemblies or drills, periods of applicable duty or equivalent training, additional special duties authorized for Reservists by an authority designated by the Secretary concerned and performed by Reservists with the prescribed organization where they are assigned. Includes similar duties performed by Reservists in their status as National Guard members.

Inactive Status. Those Reserve members, on an inactive status list of a RC in accordance with 10 U.S.C. 273, or assigned to the Inactive Army National Guard. Those in an inactive status may not train for points or pay and may not be considered for promotion.

Individual Mobilization Augmentees (IMAs). IMAs are drilling individual Reservists that are trained and preassigned to an AC organization, a SSS, or a FEMA billet that must be filled on or shortly after mobilization. IMAs participate in training activities on a part-time basis with these organizations preparing for recall or mobilization. The IDT amount required is determined by component policy and may vary from 0 to 48 drills a year.

IMA Detachments. An administrative unit for managing and training IMA.

Initial ADT (IADT). IADT includes basic military training and technical skill training required for all accessions. For nonprior service male enlistees who are between the ages of 18½ and 26, this IADT shall be for a period of not less than 12 weeks to commence insofar as practical within 270 days after the date of enlistment. For all other enlistees and inductees, IADT shall be for a period prescribed by the Secretary concerned to commence insofar as practical within 360 days after entry into service, except that in time of war or national emergency declared by Congress or the President the period of basic training (or

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, Attn: Code 1052, Philadelphia, PA 19120.

VOL 52 ISS 249 DEC 29 1987 UMI

its equivalent) shall be for a period of not less than 12 weeks.

A member of the RC may not be assigned to active duty on land outside the United States, its territories and possessions until the member has completed basic training.

Key Employee. Any member identified by his and/or her public or private employer occupying a key position as defined in 32 CFR Part 44.

Key Position. A civilian (public or private sector) position that may not be vacated during war or national emergency as designated by the Agency Head and approved by the Secretary concerned in accordance with 32 CFR Part 44.

Multiple IDT Periods (MIDTPs). Consists of two scheduled periods of IDT performed in 1-calendar day, each at least 4 hours in duration. No more than two IDT periods may be performed in 1 day.

Nondeployable Account. Separate accounts in each unit and centrally for individuals not in units that collect Reservists assigned to RCCs and TRCs UF, UQ, UP, and UX for both officer and enlisted personnel who have not completed basic IADT of 12 weeks or its equivalent. These personnel are not considered as trained strength assigned to units or mobilization positions and therefore are not deployable overseas on land with those units or to those mobilization positions. Synonymous with Training Pipeline.

Nonprior Service Personnel. An individual receiving a commission in or enlists directly into a U.S. Armed Force and has not completed basic IADT.

Qualifying Years Creditable for Retirement Pay. In order for a Guardsman or Reservist to be eligible for retired pay at age 60, the individual must have at least 20 years of service in which the individual receives at least 50 retirement points in a year. The last 8 years of qualifying years of service must have been served in a RC.

Reserve Component (RC) Category (RCC). The category identifying the status of individual in a specific RCC within each RC Identified by a RCC designator.

RCs of the Armed Forces. As defined in 10 U.S.C. 261(a), the RCs include the U.S. Army National Guard, the Army Reserve, the Naval Reserve, the Marine Corps Reserve, the U.S. Air National Guard, the Air Force Reserve, and the Coast Guard Reserve.

Secretary of Military Department (Secretary Concerned). The Secretaries of the Army, Navy, Air Force, and (for purposes of this part) the Commandant of the Coast Guard when the Service is operating as a DOT Agency.

Selected Reserve Strength. The total number of Guardsmen and Reservists who are members of the Selected Reserve subject to the Presidential recall authority of 200,000 persons and for mobilization under declarations of war or national emergency. Includes paid and nonpaid members. All Selected Reservists are in an active status.

Trained Strength in Units. Those personnel assigned to units who have completed basic IADT of 12 weeks or its equivalent and are eligible for deployment overseas on land, when mobilized under proper authorities. Excludes personnel in nondeployable accounts.

Training and Retired Category (TRC). The category identifying the status of individuals in a specific TRC within each RCC and RC. Identified by a TRC designator.

Training Period. An authorized and scheduled regular IDT period of a prescribed time, not less than 2 hours for retirement point credit, and not less than 4 hours for pay. Previously used interchangeably with other common terms such as drills, drill periods, assemblies, periods of instruction, etc.

Training Pipeline. RCC designation for those untrained officers and enlisted personnel who have not completed IADT of 12 weeks or its equivalent. Synonymous with nondeployable account.

Training Unit. A unit established to provide military training to individual Reservists or to RC units.

Unit. When used alone, the term denotes a unit of the Selected Reserve that is organized, equipped, and trained to be mobilized and to serve on AD as a unit or that augments or is augmented by another unit. Headquarters and support functions without wartime missions are not considered units under this Directive.

Voluntary Training. Training in a nonpay status for IRR members and active status Standby Reservists. Participating in voluntary training is for retirement points only and may be achieved by training with drilling units of the Selected Reserve, voluntary training units, or reinforcement training units; by ADT without pay; by completing of authorized military correspondence courses; by attendance at designated courses of instruction; by participating in designated special military events; or by participating in authorized civil defense activities. Retirees also may train voluntarily without pay or other credit with organizations to which they shall be assigned upon recall to AD, or with other organizations with which applicable arrangements have be made. Opportunity to participate voluntarily shall be limited to that training made available within the manpower and resources authorized by the Secretary concerned.

Voluntary Training Unit or Reinforcement Training Unit. A unit formed by volunteers to provide RC training in a nonpay status for IRRs and active status Standby Reservists attached under competent orders and participating in such units for retirement points.

§ 102.4 RCC and TRC category table.

Table 1 (see Appendix B of this part) establishes authorized RCCs and TRCs in the RCs for training and accountability purposes. Each unit and member of the Ready Reserve, Standby Reserve, and Retired Reserve not counted in active duty (AD) end strengths, in accordance with 10 U.S.C. 115(b)(1)(B), shall be placed in one of the RCCs and TRCs so identified.

§ 102.5 Policy.

(a) *Establishment of Criteria.* To ensure that trained and qualified RC units and individuals are available for AD in time of war or national emergency and that funds appropriated annually for RC training are adequate for meeting mobilization requirements, the Secretary concerned shall establish necessary criteria and procedures to do the following:

(1) Place all RC members in a RCC and TRC in accordance with this part. Individuals shall be assigned to RCCs and TRCs based on their mobilization obligations and training requirements.

(2) Ensure that all RC members receive training in accordance with mobilization assignments and required readiness levels. All members of the Ready Reserve, except members of the U.S. Army National Guard and the U.S. Air National Guard, may be required to serve on AD training (ADT) up to 30 days a year (10 U.S.C. 270(a)(2)). Training for the Individual Ready Reserve (IRR), Standby Reserve, and Retired Reserve may be accomplished voluntarily in accordance with DoD procedures in this part.

(3) Approve any additional inactive duty training (IDT) as necessary and consistent with law. Authorizing and utilizing additional training is subject to the categories, limitations, and controls in § 102.5(c).

(4) Authorize ADT and AD for special work (ADSW) subject to the categories, limitations, and controls in § 102.5(d).

(b) *Considerations for Establishing Criteria.* (1) Training programs shall provide for the minimal number of IDT periods, annual training (AT), and ADT required for attaining the prescribed unit readiness status and maintaining individual proficiency.

(2) Paid IDT periods shall not be less than 4 hours. No more than two IDT periods may be performed in any calendar day.

(3) IDT periods for points only (without pay) shall not be less than 2 hours duration with a maximum of two points authorized in any 1-calendar day (one point in any 1-calendar day for attendance at professional or trade conventions) (DoD Instruction 1215.7 [2]).

(4) Where practical, multiple IDT periods (MIDTPs) shall be used for maximizing the effectiveness of training.

(c) *Additional IDT Periods.* Additional IDT periods are intended to improve readiness by providing for individuals and units to receive required and necessary training for attaining and maintaining designated readiness levels. The Secretary concerned shall establish guidance for and approve use of additional IDT periods in accordance with limits outlined in the following:

(1) These training periods are intended for the principal use of nontechnician drilling Reservists. The RC shall identify additional IDT periods separately from normal unit or individual training periods in budget documents and in internal records so that training period costs and training support costs for each type of additional training clearly may be identified, justified, and audited. Those additional IDT periods used by technicians shall be identified separately in budget documents to monitor compliance with this policy. IDT for all Guard and Reserve personnel shall be in accordance with 37 U.S.C. 206.

(2) Three categories of additional IDT periods are as follows:

(i) Additional training periods (ATPs) for units, subunits, and individuals are for accomplishing additional required training as defined by a unit's wartime mission. The number of these training periods shall not exceed 12 per fiscal year (FY) for any member.

(ii) Additional flying and flight training periods (AFTPs) are authorized for primary aircrew members for conducting aircrew training and combat crew qualification training to attain and maintain aircrew flying proficiency and sustain mobilization readiness. AFTPs shall not be in addition to the ATPs in § 102.5(c)(2)(i). The number of these training periods shall not exceed 48 per fiscal year (FY) for any aircrew member unless specifically authorized by the Secretary concerned.

(iii) Readiness Management Periods (RMPs) are used to support the ongoing day-to-day operation of the unit, accomplishing unit administration, training preparation, support activities, and maintenance functions. The number of periods shall not exceed 24 per fiscal year (FY) for any member. These training periods shall be used only where sufficient full-time support personnel are not available to accomplish these duties. RMPs shall not be performed on the same day another training period (IDT, ATP, or AFTP) is being performed and not more than one RMP shall be performed by an indivdual in 1-calendar day.

(d) *Active Duty.* At any time, an authority designated by the Secretary concerned may order a member of the Reserve component under his or her jurisdiction to AD or retain or her on AD with the consent of the member. However, a member of the Army National Guard of the United States or the Air National Guard of the United States may not be ordered to active duty under this subsection without the consent of the governor or other appropriate authority of the state or territory, Puerto Rico, the Canal Zone, or the District of Columbia, whichever is concerned (10 U.S.C. 672(d)). Five categories of AD or RC members serving with RC are as follows:

(1) Initial active duty training (IADT), which includes basic military training and technical skill training, is required for all accessions. For nonprior service (NPS) male enlistees who are between the ages of 18½ and 26, this IADT shall be for a period of not less than 12 weeks to commence insofar as practical within 270 days after the date of enlistment. For all other enlistees and inductees, IADT shall be for a period prescribed by the Secretary concerned to commence insofar as practical within 360 days after entry into service, except that in time of war or national emergency declared by Congress or the President the period of basic training (or its equivalent) shall be for a period of not less than 12 weeks. (10 U.S.C. 511(b), 511(d), 671(b)).

(2) AT is required for all members of the Ready Reserve. By DoD policy, this requirement is limited to members of the Selected Reserve. For members of the Reserves, this training shall be for not less than 14 days (exclusive of travel time) each year (10 U.S.C. 270(a)(1)). Units of the National Guard are required to perform full-time military training for at least 15 days per year including travel time (32 U.S.C. 502).

(3) ADT is authorized to provide for full-time attendance at organized and planned specialized skill training, flight training, combat crew training, unit conversion training, refresher and proficiency training, officer acquisition training, professional development education programs, etc. for providing RC members with necessary skills and disciplines supporting RC missions. Authorized ADT must provide a primary training content to recipient. Authorization for ADT shall be managed in accordance with Directives established by the Secretaries concerned. Nontechnician personnel shall receive priority consideration for such training.

(4) ADSW is authorized for personnel from applicable military or Reserve personnel appropriations for projects supporting active or RC programs, such as annual screening, operation of training camps, training ships, and unit conversions to new weapons systems, when such duties are essential to the organization. Projects supporting study groups, training site and exercises, short-term mission projects, and administrative support functions also are included. Authorization for ADSW shall be managed in accordance with Directives established by the Secretary concerned. ADSW tours exceeding 180 days are accountable against AD strengths (regular or RC AD end strengths, consistent with pay appropriations) in accordance with Section 115(b)(1)(B) of Title 10, U.S.C. By DoD policy, these tours normally are limited to 139 days or less in 1 FY. Exceptions to the 139-day limit may be granted on an individual basis for specific mission requirements. Nontechnician personnel shall receive priority consideration for these tours. Short breaks in tours, i.e., 30 days or less, to circumvent this requirement are not authorized.

(5) AD, other than for training or ADSW, including full-time National Guard duty, is authorized in support of RC missions, under Sections 265, 672(d), 678, 715, 3019, 3033, 3496, 8019, 8033, and 8496 of Title 10, U.S.C. and Section 708 of Title 32, U.S.C. These members are included in the full-time support numbers for each RC under the collective title of Active Guard or Reserve (AGR), including Navy training and administration of Reserves (TARs) and all statutory tour personnel.

(e) *Restriction on Assignment Outside United States.* A member of the RCs may not be assigned to active duty on land outside the United States, its territories and possessions until the member has completed basic training (10 U.S.C. 671(a)).

[2] See footnote 1 to § 102.1(b).

(f) *Training Participation.* The Secretaries concerned shall establish minimal standards for satisfactory participation at required training periods, which shall include the number and percentages of training periods for meeting the minimal standards. Individuals attending IDT periods are required to meet these minimal training standards. These standards shall contain procedures for accounting for absences and excused drills, as necessary. Individuals voluntarily may attend extra IDT periods for points only in accordance with 32 CFR Part 100.

(1) *Selected Reserve.* (i) IDT. Except as specifically provided in regulations by the Secretary of Defense or the Secretary of Transportation for the Coast Guard, members of the Ready Reserve shall participate in at least 48 scheduled training periods each year. (See Section 270(a)(1) of Title 10, U.S.C. and 32 U.S.C. 502).

(ii) AT. Except as specifically provided for in regulations by the Secretary of Defense or the Secretary of Transportation for the Coast Guard, AT is required for all members of the Ready Reserve. By DoD policy, this requirement is limited to members of the Selected Reserve. For members of the Reserves, this training shall be for not less than 14 days (exclusive of travel time) each year. Units of the National Guard are required to perform full-time military training for at least 15 days per year including travel time.

(iii) AT tours for individual mobilization augmentees (IMAs) or other Reservists individually assigned to all training categories ordered to AT at headquarters, support organizations, or to activities not operating on Saturday, Sunday, or Federal holidays, normally are limited by DoD policy to a maximum of 12 days excluding travel time; i.e., from Monday of the first week through Friday of the second week.

(A) When valuable training opportunities are available and required on weekends or for longer periods than 12 days, members may be ordered to AT for up to 19 days excluding travel time for activities such as participating in mobilization exercises. Training may begin on days other than Monday when special activities begin during the week.

(B) AT normally is performed during one consecutive period. Split tours may be authorized for selected units or individuals if required to meet training missions. Any additional costs must be justified fully. Authorization for variations in AT lengths shall be managed in accordance with Directives established by the Secretaries concerned.

(iv) Short periods of AD performed by members of the Selected Reserve, under Sections 672(d), 673, 673b, 3500, or 8500 of Title 10, U.S.C. may not be substituted for training required by 10 U.S.C. 270 and by this part, unless in the judgment of the Secretary concerned:

(A) AD service performed under these sections is equivalent to the training that might have been performed under the authority of Section 270 of Title 10, U.S.C. and this part.

(B) AD service under these sections when combined with training required by Section 270 of Title 10, U.S.C. and this part constitutes an undue personal hardship.

(v) NPS Personnel:

(A) Those personnel commissioned or enlisted directly into a U.S. Armed Force who have not completed basic training (IADT) of 12 weeks or its equivalent.

(B) The Secretaries concerned may require personnel commissioned or enlisted for service in the Selected Reserve to participate in IDT periods before completing IADT. These training periods may be with or without pay.

(C) IADT, which includes basic military training and technical skill training, is required for all accessions. For NPS male inlistees who are between the ages of 18½ and 26, this initial active duty training shall be for a period of not less than 12 weeks to commence insofar as practical within 270 days after the date of enlistment. For all other enlistees and inductees, initial AD training shall be for a period prescribed by the Secretary concerned to commence insofar as practical within 360 days after entry into service, except that in time of war or national emergency declared by Congress or the President the period of basic training (or its equivalent) shall be for a period of not less than 12 weeks. (See Sections 511(b), 511(d), and 671(b) of Title 10, U.S.C.)

(D) Individual Reservists are exempt from participating in AT or ADT during the last 120 days before completing their Military Service Obligation (MSO) if they have served on AD for 1 year or longer. (See Section 270(a) of Title 10, U.S.C.).

(2) *IRR.* (i) Members of the IRR, not scheduled for mandatory or voluntary training, are required to serve at least 1 day on AD each year to accomplish annual screening requirements in accordance with Sections 271(a), 275(a), 652, and 1004 of Title 10, U.S.C. The Services are required to maintain the current status of each member's physical condition, dependency status, military qualifications, civilian occupational skills, availability for service, and other information as prescribed. Annual screening by the Services shall include determining skill proficiency degradation and, if necessary, identifying applicable refresher training needs by skill.

(ii) IRR members, including individuals enlisting directly into the IRR, may participate voluntarily in IDT for points only in accordance with component regulations.

(3) *Standby Reserve.* The Standby Reserve consists of personnel who maintain their military affiliation without being in the Ready Reserve in accordance with 10 U.S.C. 267, 272 and 273 and DoD Directive 1235.9 [3].

(i) *Active Status List.* The following members of the Standby Reserve are in an active status. They may participate voluntarily without pay in RC training for retirement points only and may be considered for promotion.

(A) Personnel not having fulfilled their statutory MSO.

(B) Personnel temporarily assigned for hardship or other cogent reason who intend returning to the Ready Reserve.

(C) Personnel retained in an active RC status under Section 1006 of Title 10, U.S.C.

(D) Members of Congress and any Service members transferred from the Ready Reserve to the Standby Reserve after being designated as key personnel by their employers may volunteer for assignment to the Standby Reserve Active Status List for the period they remain designated as key personnel. Individuals desiring to be transferred shall apply directly to the RC concerned.

(ii) *Inactive Status List.* The following members of the Standby Reserve are in an inactive status. They may not participate for points, pay, or be considered for promotion:

(A) Members transferred to the Inactive Status List instead of separating in accordance with Section 1209 of Title 10, U.S.C.

(B) All other members transferred to the Inactive Status List in accordance with DoD Directive 1235.9. Personnel enrolled in a military school course, including correspondence courses, when transferred from the Ready Reserve to the Standby Reserve Inactive Status List may continue voluntarily participating in the course until completion. These personnel shall not be entitled to pay and allowances, travel and transportation, or to earn promotion and retirement points for this training.

(4) *Retired Reserve.* Consists of all personnel transferred to the Retired Reserve and subject to mobilization in accordance with 32 CFR Part 64. Retired

[3] See footnote 1 to § 102.1(b).

Reservists voluntarily may train (without pay) with a unit where they have premobilization orders. Suitable arrangements with the unit are required. The Retired Reserve consists of the following categories:

(i) Reserve members having completed 20 qualifying years creditable for retirement pay, are 60 years or more of age, and have applied for retired pay.

(ii) Reserve members having completed 20 qualifying years creditable for retirement pay, are not yet 60 years of age, or are age 60 and have not applied for retirement pay.

(iii) Reserve members retired for physical disability under 10 U.S.C. 1201, 1202, 1204, or 1205. Members have completed 20 years of active service creditable for retirement pay or are more than 30 percent disabled.

(iv) Reserve members having completed 20 or more years of AD service and retired under Sections 3911, 3914, 6323, 6330, 8911, or 8914 of Title 10, U.S.C. This includes regular enlisted personnel of the Army, Navy, Marine Corps, and Air Force with 20 to 30 years of Military Service who become Reserve members on retirement. Navy and Marine Corps retirees are transferred to the Fleet Reserve (Navy) and Fleet Marine Corps Reserve, respectively.

(v) Reserve personnel drawing retirement pay based on retirement for reasons other than age, Service requirements, or physical disability. This category is restricted to those who are retired under special conditions as authorized by the Assistant Secretary of Defense (Reserve Affairs) (ASD(RA)) pursuant to legislation.

(vi) Personnel not eligible for retirement pay, but having requested placement on the Honorary Retired List under Section 274 of Title 10, U.S.C. and under 32 CFR Part 115.

(5) *Voluntary Training.* Members of the RCs, not subject to mandatory training, shall be encouraged to participate in order to maintain their mobilization readiness. Opportunity to participate voluntarily without pay in training shall be limited by the manpower and resources authorized by the Secretary.

§ 102.6 Members participating in approved programs outside the Department of Defense.

(a) *Selective Service System.* The SSS administers the Military Selective Service Act (MSSA) in accordance with 50 U.S.C., App. 451 et seq. The MSSA authorizes the Director of Selective Service, by delegation from the President, "* * * to order to active duty with their consent and to assign to the Selective Service System such officers of the selective-service section of the State headquarters and headquarters detachments and such other officers of the federally recognized National Guard of the United States or other armed forces personnel (including personnel of the reserve components thereof), as may be necessary for the administration of the national and of the several State headquarters of the Selective Service System."

(1) *Active Duty.* Requests for assignment to SSS in an AD status must be approved in accordance with DoD Directive 1000.17 [4]. Costs for these members shall be reimbursed to the Department of Defense. Members shall not be assigned to a RCC or TRC, shall not be counted against RC strengths, and shall not be included in the RCCPDS files.

(2) *Inactive Duty.* The Department of Defense and the Office of the Director of Selective Service shall agree annually on the number of RC members assigned as IMAs to the SSS. The SSS shall reimburse the Department of Defense for IDT and AT for these members.

(b) *Civil Defense Activities and CONUS Defense Programs.* (1) The U.S. civil defense and CONUS defense programs are an integral part of U.S. national security. Support of civil defense may be provided through RC members participating with Federal, State, and local civil agencies only when clearly furthering specifically identifiable DoD interests. Participating shall be in an IDT or ADT status and on a reimbursable basis, except when the primary basis for participating is to meet a DoD program requirement. Subject to priorities and guidance in 32 CFR Part 185, military support of these activities is a proper mission for DoD Components. Military planning and liaison may be provided by RC members at selected civil government and military headquarters and includes such tasks and responsibilities as mutual support to civil authorities for civil defense, CONUS defense, physical security of key assets, and disaster relief operations.

(2) Programs involving RC members in civil defense activities directly supporting the Federal Emergency Management Agency (FEMA) or State and local government under a FEMA program must be approved jointly by FEMA and the Department of Defense. Assigning members in an AD (other than for training) status supporting of civil defense outside the Department of Defense must be approved in accordance with DoD Directive 1000.17. The following programs are approved for such participation.

(i) *Federal Liaison Officers.* These are Reserve officers serving as IMAs performing planning and liaison responsibilities between DoD Components and Federal regional headquarters, including interface with the civil sector as directed by their DoD Component through the Military Service planning agent. Federal liaison officers function primarily in support of DoD missions. All costs are paid by the DoD Component. Each Military Department is authorized to assign one or more Federal liaison officers (other than flag or general officer rank) at each FEMA Region and at FEMA National Headquarters.

(ii) *State Liaison Officers.* These are Reserve officers serving as IMAs performing planning and liaison responsibilities between their DoD Components and State or U.S. Territory Civil Defense or Emergency Service headquarters for interfacing with the civil sector as directed by their DoD Component through the Military Service planning agent. State liaison officers function primarily in support of DoD missions. All costs are paid by the DoD Component. Each Military Department is authorized to assign one or more State liaison officers (other than flag or general officer rank) at each State or U.S. territorial headquarters and shall assign or attach such officers to functions supervised by the State Area Command (STARC).

(iii) *Regional Military Emergency Coordinators (RMECs).* These are Reserve officers serving as IMAs and performing resource claimancy tasks for their DoD Components while participating in resource management of emergency preparedness and crisis operations under DoD Directive 5030.45 [5]. RMEC officers function primarily in support of DoD missions. All costs are paid by the DoD Component. Each Military Department is authorized to assign one or more officers (other than flag or general officer rank) to the DoD RMEC team.

(iv) *Civil Preparedness Support Detachments (CPSD).* These are Selected Reserve units of the U.S. Army Reserve (USAR) whose missions are to augment the communications and security capabilities of FEMA emergency operations centers.

(v) *FEMA IMAs.* These are IMAs assigned to responsibilities supporting civil defense planning at FEMA headquarters and regions, and at State and local civil defense activities. These

[4] See footnote 1 to § 102.1(b).

[5] See footnote 1 to § 102.1(b).

IMAs perform 2 weeks of annual ADT and FEMA reimburses the Department of Defense for these training costs.

(3) Members of the IRR and Standby Reserve Active Status List voluntarily participating in approved Civil Defense activities may receive retirement points in accordance with DoD Instruction 1215.7.

(4) IRR members participating in civil defense activities may request ADT to attend civil defense courses. If so ordered, these Reservists shall be entitled to pay and allowances including travel allowances for such training.

§ 102.7 Funds.

(a) Funds for personnel in the Uniform Reserve, Training and Retirement categories in the RCs, as identified in this part, shall be in accordance with DoD 7110.1–M.

(b) The Secretary concerned is authorized to include in the budget for the active component (AC), funds providing AD tours for Reseves on temporary duty in support of AC and RC programs.

Appendix A—Uniform Reserve, Training and Retirement Categories

There are three RCCs. They are the Ready Reserve, the Standby Reserve, and the Retired Reserve. Each member of the National Guard and Reserve is assigned within one of these categories. (All National Guard members, including those in the Inactive National Guard (ING), are in the Ready Reserve.)

A. *Ready Reserve Categories.* The Ready Reserve is comprised of military members of the Reserve and National Guard, organized in units or as individuals, and are liable for recall to AD for augmenting the AC in time of war or national emergency under 10 U.S.C. 672 and 673. The Ready Reserve consists of three RC subcategories: the Selected Reserve, the IRR, and the ING.

1. *Selected Reserve Categories.* The Selected Reserve consists of those units and individuals in the Ready Reserve designated by their respective Services and approved by the Joint Chiefs of Staff (JCS) as so essential to initial wartime missions that they have priority over all other Reserves. All Selected Reservists are in an active status. The Selected Reserve consists of the following Reserve categories:

a. *Selected Reserve Units.* Units manned and equipped to serve and/or train either as operational or as augmentation units. Operational units train and serve as units. Augmentation units train together, but when mobilized, lose their unit identity and become part of an AC unit or activity. Selected Reserve units include the following training categories:

(1) *Drilling Unit Reservists.* Trained unit members participating in unit training activities on a part-time basis. (RCC and TRC SA.)

(2) *Unit Full-Time Support Personnel.*

(a) *Active Guard Reserve (AGR).* Guard or Reserve members of the Selected Reserve ordered to AD or full-time National Guard duty with their consent for organizing, administering, recruiting, instructing, or training RC units. All unit AGR members must be assigned against or attached to an authorized mobilization position in the unit they support. (RCC and TRC SG.)

(b) *Military Technicians (MT).* Federal civilian employees providing full-time support for administration, training, and maintenance in a Selected Reserve unit. These employees must maintain their status as drilling Reservists in the same unit, are often referred to as dual status individuals, and are counted in the drilling Reservist subcategory. Dual status means they are both civilian employees and drilling Reservists of a Guard or Reserve unit. All dual status MTs must be in mobilizable positions. (RCC and TRC SM.)

(c) *Active Component (AC).* AD members paid from regular component appropriations assigned or attached to units by their respective Services to provide advice, liaison, management, administration, training, and/or maintenance support in the category of full-time support. These personnel are not part of the Selected Reserve, but shall deploy with their assigned unit when mobilizing. ACs are counted as part of trained strength in units, but not in the Selected Reserve strengths.

(d) *Civil Service Employees (CIV).* These personnel are hired under 5 U.S.C. 3101 and 32 U.S.C. 709 to provide administrative support to the RCs. They are in the category of full-time support to the RCs, but are not part of the Selected Reserve. CIVs do not have mobilization assignments and they are not in the Selected Reserve strengths.

(3) *Individuals in a Simultaneous Membership Program.* Senior Reserve Officer Training Corps (ROTC) Cadets and Marine Corps Platoon Leader Class students who are also permitted to be members of a Selected Reserve unit. (RCC and TRC ST).

b. *Trained Individuals.* Individual members of the Selected Reserve assigned to an AC organization. Trained individuals include the following training categories:

(1) *IMAs.* Trained individuals preassigned to an AC, SSS, or a FEMA organization's billet that must be filled on or shortly after mobilization. IMAs participate in training activities on a part-time basis with an AC unit preparing for recall in a mobilization. The amount of training required is determined by RC policy and may vary from 0 to 48 training periods a year. All IMAs must perform a minimal 2 weeks of AT each year. (RCC and TRC TB.)

(2) *Individual AGR.* Individual Active Guard Reserve members of the Selected Reserve ordered to AD or full-time National Guard duty in an AC organization with their consent for organizing, administering, recruiting, instructing, or training the RCs. They are assigned in headquarters and support functions (i.e., Army personnel at Major U.S. Army Reserve Command (MUSARC) and/or State level and above.) (RCC and TRC TR.)

(3) *Individual MTs.* Military Technicians, who are Federal civilian employees providing full-time support for administration, training, and maintenance in the Selected Reserve, not in a unit. These employees must maintain their status as drilling Reservists. All individual MTs must be in mobilizable positions. (RCC and TRC TW.)

c. *Training Pipeline.* Selected Reserve officer and enlisted personnel who have not yet completed IADT. In accordance with 10 U.S.C. 671, all Ready Reservists shall receive training commensurate with their intended wartime assignments, and must complete a minimum of 12 weeks or the equivalent of IADT before any deployment on land outside the United States. The training pipeline is synonymous with the term non-deployable account. Since these personnel in the training pipeline may be mobilized, but may not be available for deployment with their units, they are accounted for separately in the following training categories:

(1) *Personnel currently on IADT.* Includes the second part of split IADT. (RCC and TRC UF.)

(2) *Personnel Awaiting Second Part of Split IADT.* (RCC and TRC UQ.)

(3) *Personnel Awaiting IADT.* Includes personnel in the Selected Reserve serving with or without pay. NPS males between the ages of 18½ and 26 years enlisting under Section 511(d) of Title 10, U.S.C. shall enter IADT insofar as practicable within 270 days after the date of that enlistment. All other members shall perform IADT insofar as practicable within 360 days of that enlistment. (RCC and TRC UP.)

(4) *Other Selected Reserve Untrained Personnel in Training Programs.* Includes chaplains, medical, and early commissioning programs. (RCC and TRC UX.)

2. *IRR Categories.* The IRR (together with the ING) consists of those Ready Reservists not in the Selected Reserve. IRR consists of the following Reserve categories:

a. IRR is a manpower pool principally with individuals having had training, having served previously in the AC or in the Selected Reserve, and having some period of their MSO remaining. There are some voluntary individuals in the IRR for hardship or special nonpay programs providing a variety of professional assignments and opportunities for earning retirement points and military benefits. These personnel all have an obligation to complete either MSO or another contractual commitment. Members voluntarily may participate in training for retirement points and promotion with or without pay. Required training (involuntary) may not exceed 30 days a year under 10 U.S.C. 270(a)(2). (RCC and TRC RE for those trained. TRC RH for those requiring further training or with unknown training status. See Appendix B)

b. Test programs were conducted in FY 1979 and FY 1983 for enlisting nonprior service personnel directly into the IRR. These personnel were required to receive IADT and are required to receive periodic refresher training. (RCC and TRC RE for those trained, or RCC and TRC RH for those requiring further training, or those with unknown training status.)

c. The IRR also includes some personnel participating in officer training programs or in the Armed Forces Health Scholarship program. Members in this scholarship program are required to perform 45 days of AD for training a year in accordance with Section 2121(c) of Title 10, U.S.C. (RCC and TRC PJ for officers not in the Selected Reserve participating in officer training programs or RCC and TRC PK for officers not in the Selected Reserve participating in Armed Forces Health Scholarship Programs).

3. *ING Category.* The ING consists of National Guard personnel in an inactive status in the Ready Reserve, not in the Selected Reserve, attached to a specific National Guard unit. For these personnel to remain ING members, they must muster once a year with their assigned unit, but they do not participate in training activities. On mobilization, ING members mobilize with their units. Similar to the IRR, some ING members have legal and contractual obligations. ING members may not train for points or pay and are not eligible for promotion. Currently, the ING category is used only by the Army National Guard. (RCC and TRC II.)

B. *Standby Reserve Categories.* The Standby Reserve consists of personnel maintaining their military affiliation without being in the Ready Reserve, having been designated key civilian employees, or who have a temporary hardship or disability. These individuals are not required to perform training and are not part of units. The Standby Reserve is a pool of trained individuals who may be mobilized as needed to fill manpower needs in specific skills. The Standby Reserve consists of the following training categories:

1. *Active Status List.* The following members of the Standby Reserve in an active status may participate voluntarily without pay in RC training for retirement points only and may be considered for promotion:

a. Members of Congress and any members transferred from the Ready Reserve to the Standby Reserve, as a result of being designated as key personnel by their employers, may volunteer for assignment of the Standby Reserve Active Status List for the period they remain designated as key personnel. Individuals desiring to be transferred shall apply directly to the component concerned. (RCC and TRC YC.)

b. Personnel not having fulfilled their statutory MSO, or temporarily assigned for hardship reason intending to return to the Ready Reserve, or retained by an RC in an active status under 10 U.S.C. 1006 (RCC and TRC YD.)

2. *Inactive Status List.* The following members of the Standby Reserve are in an inactive status. They may not participate for points or pay and may not be considered for promotion:

a. Members transferred to the Inactive Status List instead of separating under Section 1209 of Title 10, U.S.C. (RCC TRC YL.)

b. All other members transferred to the Inactive Status List in accordance with DoD Directive 1235.9 (RCC TRC YN.)

C. *Retired Reserve Categories.* 1. Consists of all personnel transferred to the Retired Reserve. Retired Reservists voluntarily may train with a unit where they have premobilization orders. Suitable arrangements with the unit are required. The Retired Reserve consists of the following retired categories.

a. Reserve members having completed 20 qualifying years creditable for retirement pay, are 60 years or more of age, and have applied for retirement pay. These members shall be assigned to RCC and TRC V1.

b. Reserve members having completed 20 qualifying years creditable for retirement pay, are not yet 60 years of age, or are age 60 and have not applied for retirement pay. These members shall be assigned to RCC and TRC V2.

c. Reserve members retired for physical disability under Sections 1201, 1202, 1204, or 1205 of Title 10, U.S.C. Members have completed 20 years of active service creditable for retirement pay or are more than 30 percent disabled. These members shall be assigned to RCC and TRC V3.

d. Reserve members having completed 20 or more years of AD service and retired under Sections 3911, 3914, 6323, 6330, 8911, or 8914 of Title 10, U.S.C. This includes regular enlisted personnel of the Army, Navy, Marine Corps and Air Force with 20 to 30 years of Military Service who become Reserve members on retirement. Navy and Marine Corps retirees are transferred to the Fleet Reserve and Fleet Marine Corps Reserve, respectively. These personnel shall be assigned to RCC and TRC V4.

e. Reserve personnel drawing retired pay under other than age, Service requirements, or physical disability. This category is restricted for retirement under special conditions as authorized by the Office of the Assistant Secretary of Defense (Reserve Affairs) (OASD(RA)) pursuant to legislation. These personnel shall be assigned to RCC and TRC V5.

f. Personnel not eligible for retirement pay, but having requested placement on the Honorary Retired List under section 274 of Title 10, U.S.C. and 32 CFR part 115. These personnel shall be assigned to RCC and TRC V6.

2. Enlisted Navy and Marine Corps Reserve and regular members retired with 20 or more years of AD, but less than 30 years, are assigned to the Fleet Reserve (Navy) and Fleet Marine Corps Reserve, respectively. When these personnel complete a total of 30 years of Active and Fleet Reserve (retired) service, the Reserve members are then assigned to the Retired Reserve and regular members are assigned to the Regular Retired List. Army and Air Force regular and Reserve enlisted personnel retiring after completing 20 or more years, but less than 30 years of AD, are members of the Reserve and are included in the Retired Reserve. When these members complete a total of 30 years of active and retired service, the regular enlisted retirees are placed on the regular retired list.

3. All retired members having completed at least 20 years AD (Regular or Reserve), regardless of the retired list where assigned, may be ordered to AD when required by the Secretary of the

Military Department in accordance with Section 688 of Title 10, U.S.C.

4. Retired Reserve members may be ordered to AD in their status as Retired Reserve members. It is not necessary to place the member in the Ready Reserve for this purpose.

5. Discharged retired members are former members having completed 20 satisfactory years creditable for retirement, but electing to be discharged from the RCs. Since these personnel have been discharged, they are not a part of the Retired Reserve.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-87-094]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Atlantic Beach, NC

AGENCY: Coast Guard, DOT.

ACTION: Final Rule-Revocation.

SUMMARY: This amendment revokes the regulations for the S. 58 drawbridge across the Atlantic Intracoastal Waterway, mile 206.7, because the swing bridge has been removed. Regulations for the other bridges on the Atlantic Intracoastal Waterway remain unchanged. Notice and public procedure have been omitted from this action due to the removal of the bridge concerned.

EFFECTIVE DATE: These regulations become effective December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704, (804) 398-6222.

Drafting information: The drafters of these regulations are Linda L. Gilliam, Project Officer, and CDR Robert J. Reining, Project Attorney.

SUPPLEMENTARY INFORMATION: This action has no economic consequences. It merely revokes regulations for a swing bridge that no longer exists. Consequently, this action is considered to be non-major under Executive Order 12291 on Federal Regulation, and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). Since there is no economic impact, a full regulatory evaluation is unnecessary. Because no notice of proposed rulemaking is required under 5 U.S.C. 553, this action is exempt from the Regulatory Flexibility Act (5 U.S.C. 605(b)). However, this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations is amended as follows:

PART 117—DRAWBRIDGE REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1-46; 33 CFR 1-05-1(g)

§ 117.821 [Amended]

2. Section 117.821 (b) is removed and paragraphs (c) and (d) are redesignated as paragraphs (b) and (c).

Dated: December 8, 1987.

A.D. Breed,

Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

BILLING CODE 491-014-M

COPYRIGHT ROYALTY TRIBUNAL

37 CFR Part 304

[Docket No. CRT 87-4 PBRA]

1987 Adjustment of the Public Broadcasting Royalty Rates and Terms

AGENCY: Copyright Royalty Tribunal.

ACTION: Notice of final determination.

SUMMARY: This notice announces the adoption of final rules governing the terms and rates of copyright royalty payments with respect to certain uses by public broadcasting entities of published nondramatic musical works, and published pictorial, graphic, and sculptural works. The terms and rates shall apply for the five-year period 1988-1992.

DATE: The effective date of these rules is January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Robert Cassler, General Counsel, 1111 20th Street NW., Suite 450, Washington, DC 20036 (202-653-5175).

SUPPLEMENTARY INFORMATION: 17 U.S.C. 118 establishes a copyright compulsory license for the use by public broadcasting entities of published nondramatic musical works and published pictorial, graphic, and sculptural works. 17 U.S.C. 118(c) provides that between June 30 and December 31 of every year ending in a 2 or a 7, the Tribunal shall conduct a proceeding for the determination of reasonable terms and rates of royalty payments for the use of these works. Accordingly, the Tribunal commenced the 1987 public broadcasting rate adjustment proceeding on June 30, 1987. 52 FR 24326. On November 20, 1987, the Tribunal published in the **Federal Register** a notice of proposed rulemaking. In the notice, the Tribunal described the structure and chronology of the 1987 public broadcasting rate adjustment proceeding, the rates proposed by the various parties, and our reasons for proposing or not proposing the recommended terms and rates. 52 FR 44610.[1] Comments were due December 15, 1987.

[1] The Notice of Proposed Rulemaking, 52 FR 44610 (November 20, 1987), the Further Notice of Proposed Rulemaking 52 FR 45664 (December 1, 1987), and this Notice of Final Determination together constitute the final determination of the 1987 Public Broadcasting Rate Adjustment Proceeding.

The PBS/NPR/SESAC Issue

At the time the Tribunal published the Notice of Proposed Rulemaking on November 20, Public Broadcasting Service (PBS) and National Public Radio (NPR) were attempting to finalize a voluntary license agreement with SESAC, Inc. (SESAC). Absent an agreement between PBS, NPR, and SESAC, the Tribunal announced its intention to render a final determination on PBS and NPR use of the music in SESAC's repertory based upon the written record of the proceeding by the December 31, 1987 statutory deadline. Subsequent to the publication of the Notice of Proposed Rulemaking, the Tribunal was informed by PBS, NPR and SESAC that they had finalized their voluntary license agreement, and that a disposition of the PBS/NPR/SESAC issue by the Tribunal was no longer necessary. Accordingly, the Tribunal adopts no regulations to govern the use by PBS and NPR of musical compositions found in the catalogue of SESAC.

The Comments

The Tribunal received five comments in response to its Notice of Proposed Rulemaking. The commenters were PBS, NPR, the American Society of Composers, Authors, and Publishers (ASCAP), Broadcast Music, Inc. (BMI), and a joint comment was filed by the National Federation of Community Broadcasters (NFCB), and the National Religious Broadcasters Noncommercial Radio Music License Committee (NRB). Each one of the commenters supports the substantive rule changes proposed by the Tribunal. PBS, NPR, and ASCAP filed recommended editorial changes in the proposed rules and they are discussed as follows:

ASCAP agreed with the Tribunal that the language proposed by ASCAP and the American Council on Education (ACE) for a yearly cost of living adjustment to the rate paid by colleges and universities not affiliated with NPR would have, if taken literally, resulted in an eleven-month cost of living adjustment rather than a twelve-month cost of living adjustment. ASCAP stated that it was the intention of ASCAP and ACE to propose a full yearly cost of living adjustment, and therefore, agreed with the Tribunal's re-wording of the proposed regulation. However, ASCAP has proposed in its comments a slighly different regulation which it believes results in a more tightly written rule, leaving no doubt as to which Consumer Price Index figures are to be used by the Tribunal. The Tribunal agrees with ASCAP's comments and accordingly, adopts ASCAP's latest draft for § 304.10.

PBS and NPR reviewed the Tribunal's rules and indicated in their comments where they believe the Tribunal made inadvertent omissions from the rules previously adopted, and where they believe the Tribunal made typographical errors. In each instance cited by PBS and NPR, they are correct that the discrepancies noted were either omissions or typographical errors, and they have been corrected in the final rules.

PBS expressed some concern that some language changes in the proposed regulations could be construced as having a substantive purpose, unless the purely editorial nature of the change is made clear. Specifically, PBS points to the Tribunal's substitution of "voluntary written agreements" for "17 U.S.C. 118(b)(2)" in §§ 304.4 and 304.7(a), and PBS recommends that the Tribunal retain "17 U.S.C. 118(b)(2)," as previously written.

To allay PBS' concerns, the Tribunal states that unless a language change has been explained in the Notice of Proposed Rulemaking, the Further Notice of Proposed Rulemaking, or the Notice of Final Determination, the change was meant for purely editorial reasons and no substantive modification was intended. The reason the Tribunal has changed "17 U.S.C. 118(b)(2)" to "voluntary written agreements" in §§ 304.4 and 304.7(a), and the reason the Tribunal has included reference to the agreements by PBS and NPR with ASCAP, BMI and SESAC in § 304.4 is based upon our experience with the public's difficulty with reading Part 304. The most commonly asked question of this agency is: How much does PBS and NPR pay ASCAP, BMI, and SESAC? The answer is that the Tribunal has no regulations regarding such payments, because they are subject to voluntary license agreements. It is hoped that the new language in section 304 will make this clearer to the public.

Similarly, the Tribunal changed the phrase "nonprofit radio stations" to "noncommercial radio stations," because the Tribunal follows the FCC's definition in such matters, and the FCC uses the phrase "noncommercial radio station."

List of Subjects in 37 CFR Part 304

Copyright, Music, Radio, Television.

For the reasons set forth in the preamble, Part 304 of Chapter III, Title 37, Code of Federal Regulations is revised as follows:

PART 304—USE OF CERTAIN COPYRIGHTED WORKS IN CONNECTION WITH NONCOMMERCIAL BROADCASTING

Sec.
304.1 General.
304.2 Definition of public broadcasting entity.
304.3 [Reserved]
304.4 Performance of musical compositions by PBS, NPR and other public broadcasting entities engaged in the activities set forth in 17 U.S.C. 118(d).
304.5 Performance of musical compositions by public broadcasting entities licensed to colleges and universities.
304.6 Performance of musical compositions by other public broadcasting entities.
304.7 Recording rights, rates and terms.
304.8 Terms and rates of royalty payments for the use of published pictorial, graphic, and sculptural works.
304.9 Unknown copyright owners.
304.10 Cost of living adjustment.
304.11 Notice of restrictions on use of reproductions of transmission programs.
304.12 Amendment of certain regulations.
304.13 Issuance of interpretative regulations.

Authority: 17 U.S.C. 118, 801(b)(1) and 804.

§ 304.1 General.

This Part 304 establishes terms and rates of royalty payments for certain activities using published nondramatic musical works and published pictorial, graphic and sculptural works during a period beginning on January 1, 1988 and ending on December 31, 1992. Upon compliance with 17 U.S.C. 118, and the terms and rates of this part, a public broadcasting entity may engage in the activities with respect to such works set forth in 17 U.S.C. 118(d).

§ 304.2 Definition of public broadcasting entity.

As used in this part, the term "public broadcasting entity" means a noncommercial educational broadcast station as defined in section 397 of Title 47 and any nonprofit institution or organization engaged in the activities described in 17 U.S.C. 118(d)(2).

§ 304.3 [Reserved]

§ 304.4 Performance of musical compositions by PBS, NPR and other public broadcasting entities engaged in the activities set forth in 17 U.S.C. 118(d).

The following schedule of rates and terms shall apply to the performance by PBS, NPR and other public broadcasting entities engaged in the activities set forth in 17 U.S.C. 118(d) of copyrighted published nondramatic musical compositions, except for public broadcasting entities covered by Sections 304.5 and 304.6, and except for compositions which are the subject of

voluntary license agreements, such as the PBS/NPR/ASCAP, the PBS/NPR/BMI and the PBS/NPR/SESAC license agreements.

(a) *Determination of royalty rate.* (1) For the performance of such a work in a feature presentation of PBS:

1988–1989	1990–1991	1992
$168.00	$175.00	$194.00

(2) For the performance of such a work as background or theme music in a PBS program:

1988–1989	1990–1991	1992
$42.00	$44.35	$46.70

(3) For the performance of such a work in a feature presentation of a station of PBS:

1988–1989	1990–1991	1992
$14.00	$15.00	$16.00

(4) For the performance of such a work as background or theme music in a program of a station of PBS:

1988–1989	1990–1991	1992
$3.00	$3.15	3.30

(5) For the performance of such a work in a feature presentation of NPR:

1988–1989	1990–1991	1992
$16.90	$17.75	18.70

(6) For the performance of such a work as background or theme music in an NPR program:

1988–1989	1990–1991	1992
$4.10	$4.30	$4.50

(7) For the performance of such a work in a feature presentation of a station of NPR:

1988–1989	1990–1991	1992
$1.20	$1.25	$1.30

(8) For the performance of such a work as background or theme music in a program of a station of NPR:

1988–1989	1990–1991	1992
$0.40	$0.45	$0.50

(9) For the purpose of this schedule the rate for the performance of theme music in an entire series shall be double the single program theme rate.

(10) In the event the work is first performed in a program of a station of PBS or NPR, and such program is subsequently distributed by PBS or NPR, an additional royalty payment shall be made equal to the difference between the rate specified in this section for a program of a station of PBS or NPR, respectively, and the rate specified in this section for a PBS or NPR program, respectively.

(b) *Payment of royalty rate.* The required royalty rate shall be paid to each known copyright owner not later than July 31 of each calendar year for uses during the first six months of that calendar year, and not later than January 31 for uses during the last six months of the preceding calendar year.

(c) *Records of use.* PBS and NPR shall, upon request of a copyright owner of a published musical work who believes a musical composition of such owner has been performed under the terms of this schedule, permit such copyright owner a reasonable opportunity to examine their standard cue sheets listing the nondramatic performances of musical compositions on PBS and NPR programs. Any local PBS and NPR station that is required by paragraph 4b of the PBS/NPR/ASCAP license agreement dated October 5, 1987 to prepare a music use report shall, upon request of a copyright owner who believes a musical composition of such owner has been performed under the terms of this schedule, permit such copyright owner to examine the report.

(d) *Terms of use.* The applicable fee in this schedule shall be the fee for the time period during which the first performance in a program occurred, and shall cover performances of such work in such program for a period of three years following the first performance.

§ 304.5 Performance of musical compositions by public broadcasting entities licensed to colleges and universities.

(a) *Scope.* This section applies to the performance of copyrighted published nondramatic musical compositions by noncommercial radio stations which are licensed to colleges, universities, or other nonprofit educational institutions and which are not affiliated with National Public Radio.

(b) *Voluntary license agreements.* Notwithstanding the schedule of rates and terms established by this section, the rates and terms of any license agreements entered into by copyright owners and colleges, universities, and other nonprofit educational institutions concerning the performance of copyrighted musical compositions, including performances by noncommercial radio stations, shall apply in lieu of the rates and terms of this section.

(c) *Royalty rate.* A public broadcasting entity within the scope of this section may perform published nondramatic musical compositions subject to the following schedule of royalty rates:

(1) For all such compositions in the repertory of ASCAP annually—$159.

(2) For all such compositions in the repertory of BMI annually—$159.

(3) For all such compositions in the repertory of SESAC annually—$37.

(4) For the performance of any other such composition—$1.

(d) *Payment of royalty rate.* The public broadcasting entity shall pay the required royalty rate to ASCAP, BMI and SESAC not later than January 31 of each year.

(e) *Records of use.* A public broadcasting entity subject to this section shall furnish to ASCAP, BMI and SESAC, upon request, a music-use report during one week of each calendar year. ASCAP, BMI and SESAC shall not in any one calendar year request more than 10 stations to furnish such reports.

§ 304.6 Performance of musical compositions by other public broadcasting entities.

(a) *Scope.* This section applies to the performance of copyrighted published nondramatic musical compositions by radio stations not licensed to colleges, universities, or other nonprofit educational institutions and which are not affiliated with National Public Radio.

(b) *Voluntary license agreements.* Notwithstanding the schedule of rates and terms established in this section, the rates and terms of any license agreements entered into by copyright owners and noncommercial radio stations within the scope of this section concerning the performance of copyrighted musical compositions, including performances by noncommercial radio stations, shall apply in lieu of the rates and terms of this section.

(c) *Royalty rate.* A public broadcasting entity within the scope of this section may perform published nondramatic musical compositions subject to the following schedule of royalty rates:

(1) For all such compositions in the repertory of ASCAP, in 1988, $230; in 1989, $240; in 1990, $250; in 1991, $265; in 1992, $280.

(2) For all such compositions in the repertory of BMI, in 1988, $230; in 1989, $240; in 1990, $250; in 1991, $265; in 1992, $280.

(3) For all such compositions in the repertory of SESAC, in 1988, $50; in 1989, $52; in 1990, $54; in 1991, $57; in 1992, $60.

(4) For the performance of any other such compositions, in 1988 through 1992, $1.

(d) *Payment of royalty rate.* The public broadcasting entity shall pay the required royalty rate to ASCAP, BMI, and SESAC not later than January 31 of each year.

(e) *Records of use.* A public broadcasting entity subject to this section shall furnish to ASCAP, BMI, and SESAC, upon request, a music-use report during one week of each calendar year. ASCAP, BMI, and SESAC each shall not in any one calendar year request more than 5 stations to furnish such reports.

§ 304.7 Recording rights, rates and terms.

(a) *Scope.* This section establishes rates and terms for the recording of nondramatic performances and displays of musical works, other than compositions subject to voluntary license agreements, on and for the radio and television programs of public broadcasting entities, whether or not in synchronization or timed relationship with the visual or aural content, and for the making, reproduction, and distribution of copies and phonorecords of public broadcasting programs containing such nondramatic performances and displays of musical works solely for the purpose of transmission by public broadcasting entities. The rates and terms established in this schedule include the making of the reproductions described in 17 U.S.C. 118(d)(3).

(b) *Royalty rate.* (1)(i) For uses described in paragraph (a) of this section of a musical work in a PBS-distributed program, the royalty fees shall be calculated by mutiplying the following per-composition rates by the number of different compositions in that PBS-distributed program:

	1988–1989	1990–1991	1992
Feature	$83.35	$87.70	$92.05
Concert feature (per minute)	24.05	25.35	27.75
Background	42.00	44.35	46.70
Theme:			
Single program or first series program	42.00	44.35	46.70
Other series program	17.05	18.00	18.95

(ii) For such uses other than in a PBS-distributed television program, the royalty fee shall be calculated by multiplying the following per-composition rates by the number of different compositions in that program:

	1988–1989	1990–1991	1992
Feature	$5.65	$7.30	$7.95
Concert feature (per minute)	1.80	1.90	2.00
Background	3.00	3.15	3.30
Theme:			
Single program of first series program	3.00	3.15	3.30
Other series program	1.20	1.25	1.30

(iii) In the event the work is first recorded other than in a PBS-distributed program, and such program is subsequently distributed by PBS, an additional royalty payment shall be made equal to the difference between the rate specified in this section for other than a PBS-distributed program and the rate specified in this section for a PBS-distributed program.

(2) For uses licensed herein of a musical work in a NPR program, the royalty fees shall be calculated by multiplying the following per-composition rates by the number of different compositions in any NPR program distributed by NPR. For purposes of this schedule "National Public Radio" programs include all programs produced in whole or in part by NPR, or by any NPR station or organization under contract with NPR.

	1988–1989	1990–1991	1992
Feature	$8.00	$9.50	$10.00
Concert feature (per half hour)	13.00	14.00	15.00
Background	4.50	4.75	5.00
Theme:			
Single program of first series program	4.50	4.75	5.00
Other series program	1.80	1.90	2.00

(3) For the purposes of this schedule, a "Concert Feature" shall be deemed to be the nondramatic presentation in a program of all or part of a symphony, concerto, or other serious work originally written for concert performance or the nondramatic presentation in a program of portions of a serious work originally written for opera performance.

(4) For such uses other than in a NPR-produced radio program:

Feature	$.60
Feature (concert) (per half hour)	1.20
Background	.30

(5) The schedule of fees covers broadcast use for a period of three years following the first broadcast. Succeeding broadcast use periods will require the following additional payment: second three-year period—50 percent; each three-year period thereafter—25 percent; provided that a 100 percent additional payment prior to the expiration of the first three-year period will cover broadcast use during all subsequent broadcast use periods without limitation. Such succeeding uses which are subsequent to December 31, 1992 shall be subject to the royalty rates established in this schedule.

(c) *Payment of royalty rates.* The required royalty rate shall be paid to each known copyright owner not later than July 31 of each calendar year for uses during the first six months of that calendar year, and not later than January 31 for uses during the last six months of the preceding calendar year.

(d) *Records of use.* (1) Maintenance of cue sheets. PBS and its stations, NPR or other television public broadcasting entity shall maintain and make available for examination pursuant to subsection (e) copies of their standard cue sheets or summaries of same listing the recording of the musical works of such copyright owners.

(2) Content of cue sheets or summaries. Such cue sheets or summaries shall include:

(i) The title, composer and author to the extent such information is reasonably obtainable.

(ii) The type of use and manner of performance thereof in each case.

(iii) For Concert Feature music, the actual recorded time period on the program, plus all distribution and broadcast information available to the public broadcasting entity.

(e) *Filing of use reports with the Copyright Royalty Tribunal (CRT).* (1) Deposits of cue sheets or summaries. PBS and its stations, NPR, or other television public broadcasting entity shall deposit with the CRT copies of their standard music cue sheets or summaries of same (which may be in the form of hard copy of computerized reports) listing the recording pursuant to this schedule of the musical work of copyright owners. Such cue sheets or summaries shall be deposited not later than July 31 of each calendar year for recordings during the first six months of the calendar year and not later than January 31 of each calendar year for recordings during the second six months of the preceding calendar year. PBS and NPR shall maintain at their offices copies of all standard music cue sheets from which such music use reports are prepared. Such music cue sheets shall be furnished to the CRT upon its request and also shall be available during regular business hours at the offices of PBS or NPR for examination by a copyright owner who believes a musical composition of such owner has been recorded pursuant to this schedule.

VOL 52 ISS 249 DEC 29 1987 UMI

§ 304.8 Terms and rates of royalty payments for the use of published pictorial, graphic, and sculptural works.

(a) *Scope.* This section establishes rates and terms for the use of published pictorial, graphic, and sculptural works by public broadcasting entities for the activities described in 17 U.S.C. 118. The rates and terms established in this schedule include the making of the reproduction described in 17 U.S.C. 118(d)(3).

(b) *Royalty rate.* (1) The following schedule of rates shall apply to the use of works within the scope of this section:

(i) For such uses in a PBS-distributed program:

(A) For a featured display of a work.

1988–1989	1990–1991	1992
$55.00	$58.00	$61.00

(B) For background and montage display.

1988–1989	1990–1991	1992
$25.75	$26.25	$29.75

(C) For use of a work for program identification or for thematic use.

1988–1989	1990–1991	1992
$108.25	$114.25	$120.25

(D) For the display of an art reproduction copyrighted separately from the work of fine art from which the work was reproduced, irrespective of whether the reproduced work of fine art is copyrighted so as to be subject also to payment of a display fee under the terms of this schedule.

1988–1989	1990–1991	1992
$35.50	$37.50	$39.50

(ii) For such uses in other than PBS-distributed programs:

(A) For a featured display of a work.

1988–1989	1990–1991	1992
$35.50	$37.50	$39.50

(B) For background and montage display.

1988–1989	1990–1991	1992
$18.25	$19.25	$20.25

(C) For use of a work for program identification or for thematic use.

1988–1989	1990–1991	1992
$72.75	$76.75	$80.75

(D) For the display of an art reproduction copyrighted separately from the work of fine art from which the work was reproduced, irrespective of whether the reproduced work of fine art is copyrighted so as to be subject also to payment of a display fee under the terms of this schedule.

1988–1989	1990–1991	1992
$18.25	$19.25	$20.25

For the purposes of this schedule the rate for the thematic use of a work in an entire series shall be double the single program theme rate. In the event the work is first used other than in a PBS-distributed program, and such program is subsequently distributed by PBS, an additional royalty payment shall be made equal to the difference between the rate specified in this section for other than PBS-distributed program and the rate specified in this section for a PBS-distributed program.

(2) "Featured display" for purposes of this schedule means a full-screen or substantially full-screen display appearing on the screen for more than three seconds. Any display less than full-screen or substantially full-screen, or full-screen for three seconds or less, is deemed to be a "background or montage display".

(3) "Thematic use" is the utilization of the works of one or more artists where the works constitute the central theme of the program or convey a story line.

(4) "Display of an art reproduction copyrighted separately from the work of fine art from which the work was reproduced" means a transparency or other reproduction of an underlying work of fine art.

(c) *Payment of royalty rate.* PBS or other public broadcasting entity shall pay the required royalty fees to each copyrighted owner not later than July 31 of each calendar year for uses during the first six months of that calendar year, and not later than January 31 for uses during the last six months of the preceding calendar year.

(d) *Records of use.* (1) PBS and its stations or other public broadcasting entity shall maintain and furnish either to copyright owners, or to the offices of generally recognized organizations representing the copyright owners of pictorial, graphic, and sculptural works, copies of their standard lists containing the pictorial, graphic, and sculptural works displayed on their programs. Such notice shall include the name of the copyright owner, if known, the specific source from which the work was taken, a description of the work used, the title of the program on which the work was used, and the date of the original broadcast of the program.

(2) Such listings shall be furnished not later than July 31 of each calendar year for displays during the first six months of the calendar year, and not later than January 31 of each calendar year for displays during the second six months of the preceding calendar year.

(e) *Filing of use reports with the CRT.* (1) PBS and its stations or other public broadcasting entity shall deposit with the CRT copies of their standard lists containing the pictorial, graphic, and sculptural works displayed on their programs. Such notice shall include the name of the copyright owner, if known, the specific source from which the work was taken, a description of the work used, the title of the program on which the work was used, and the date of the original broadcast of the program.

(2) Such listings shall be furnished not later than July 31 of each calendar year for displays during the first six months of the calendar year, and not later than January 31 of each calendar year for displays during the second six months of the preceding calendar year.

(f) *Terms of use.* (1) The rates of this schedule are for unlimited broadcast use for a period of three years from the date of the first broadcast use of the work under this schedule. Succeeding broadcast use periods will require the following additional payment: second three-year period—50 percent; each three-year period thereafter—25 percent; provided that a 100 percent additional payment prior to the expiration of the first three-year period will cover broadcast use periods without limitation. Such succeeding uses which are subsequent to December 31, 1992 shall be subject to the rates established in this schedule.

(2) Pursuant to the provisions of 17 U.S.C. 118(f), nothing in this schedule shall be construed to permit, beyond the limits of fair use as provided in 17 U.S.C. 107, the production of a transmission program drawn to any substantial extent from a published compilation of pictorial, graphic, or sculptural works.

§ 304.9 Unknown copyright owners.

If PBS and its stations, NPR and its stations, or other public broadcasting entity is not aware of the identity of, or unable to locate, a copyright owner who is entitled to receive a royalty payment under this Part, they shall retain the required fee in a segregated trust account for a period of three years from the date of the required payment. No claim to such royalty fees shall be valid after the expiration of the three year period. Public broadcasting entities may establish a joint trust fund for the purposes of this section. Public broadcasting entities shall make available to the CRT, upon request, information concerning fees deposited in trust funds.

§ 304.10 Cost of living adjustment.

(a) On December 1, 1988 the CRT shall publish in the Federal Register a notice of the change in the cost of living as determined by the Consumer Price Index (all consumers, all items) during the period from the most recent Index published prior to December 1, 1987 to the most recent Index published prior to December 1, 1988. On each December 1 thereafter the CRT shall publish a notice of the change in the cost of living during the period from the most recent Index published prior to the previous notice to the most recent Index published prior to December 1 of that year.

(b) On the same date of the notices published pursuant to paragraph (a) of the section, the CRT shall publish in the Federal Register a revised schedule of rates for § 304.5 which shall adjust those royalty amounts established in dollar amounts according to the change in the cost of living determined as provided in paragraph (a) of this section. Such royalty rates shall be fixed at the nearest dollar.

(c) The adjusted schedule of rates for § 304.5 shall become effective thirty days after publication in the Federal Register.

§ 304.11 Notice of restrictions on use of reproductions of transmission programs.

Any public broadcasting entity which, pursuant to 17 U.S.C. 118, supplies a reproduction of a transmission program to governmental bodies or nonprofit institutions shall include with each copy of the reproduction a warning notice stating in substance that the reproductions may be used for a period of no more than seven days from the specified date of transmission, that the reproductions must be destroyed by the user before or at the end of such period, and that a failure to fully comply with these terms shall subject the body or institution to the remedies for infringement of copyright.

§ 304.12 Amendment of certain regulations.

Subject to 17 U.S.C. 118, the Administrative Procedure Act and the Rules of Procedure of the Copyright Royalty Tribunal, the CRT may at any time amend, modify or repeal regulations in this part adopted pursuant to 17 U.S.C. 118(b)(3) by which "copyright owners may receive reasonable notice of the use of their works" and "under which records of such use shall be kept by public broadcasting entities."

§ 304.13 Issuance of interpretative regulations.

Subject to 17 U.S.C. 118, the Administrative Procedure Act and the Rules of Procedure of the Copyright Royalty Tribunal, the CRT may at any time, either on its own motion or the motion of a person having a significant interest in the subject matter, issue such interpretative regulations as may be necessary or useful to the implementation of this part. Such regulations may not prior to January 1, 1993 alter the schedule of rates and terms of royalty payments by this part.

Mario F. Aguero,
Chairman.

POSTAL SERVICE

39 CFR Part 224

Miscellaneous Organizational Changes; Correction

AGENCY: Postal Service.

ACTION: Final rule; correction.

SUMMARY: The purpose of this document is to correct an error in the revised functional statement of the Rates and Classification Department of the Finance and Planning Group at Headquarters which, along with a number of other functional statements, was published in the Federal Register on December 11, 1987 (52 FR 46998).

EFFECTIVE DATE: December 11, 1987.

FOR FURTHER INFORMATION CONTACT: Richard W. Peterson (202) 268-4183.

SUPPLEMENTAL INFORMATION: In FR Doc. 87-28514, in the issue of Friday, December 11, 1987, the Postal Service published a final rule revising the functional statements of the various Headquarters and field groups, divisions and offices to reflect a general reorganization and realignment of functions. One of the stated functions of the Rates and Classification Department at Headquarters was "developing and litigating rate recommendations to the Postal Rate Commission". The word "litigating" is incorrect; it should have read "supporting".

For the above reason, the Postal Service hereby corrects FR Doc. 87-28514, beginning on page 46998 in the issue of Friday, December 11, 1987, as follows:

PART 224—[AMENDED]

§ 224.2 [Amended]

On page 46998, middle column, in paragraph (c)(4) of § 224.2, strike out the word "litigating" and insert "supporting" in lieu thereof.

Fred Eggleston,
Assistant General Counsel, Legislative Division.

Incorporation by Reference of the Manual of Regulations and Procedures for Federal Radio Frequency Management

AGENCY: National Telecommunications and Information Administration (NTIA), Commerce.

ACTION: Final rule.

SUMMARY: Within the jurisdiction of the United States Government, use of the radio frequency spectrum for radio transmissions for telecommunications or for other purposes shall be made by the United States Government Stations only as authorized by the Assistant Secretary of Commerce for Communications and Information (hereinafter referred to as the Assistant Secretary). Such use shall, unless specific provision is made otherwise, comply with the provisions of the Manual of Regulations and Procedures for Federal Radio Frequency Management (NTIA Manual). The incorporation by reference of the NTIA Manual in the Code of Federal Regulations is to advise non-frequency managers in the Federal Agencies of the regulations governing the use of the radio frequency spectrum.

EFFECTIVE DATE: December 29, 1987.

The incorporation by reference of the publication listed in the regulations is approved by the Director of the Federal Register as of December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Edwin E. Dinkle, National Telecommunications and Information Administration, Department of Commerce, Room H1605, 14th and

Constitution Avenue NW., Washington, DC 20230; (202) 377–0599.

SUPPLEMENTARY INFORMATION: The President by Reorganization Plan No. 1 of 1977 and Executive Order 12046 of March 27, 1978, delegated to the Secretary of Commerce authority to act for the President or under the President's authority in the discharge of certain Presidential telecommunication functions under the Communications Act of 1934, as amended, and the Communications Satellite Act of 1962.

The Secretary of Commerce has delegated this Presidential authority to the Assistant Secretary of Commerce for Communications and Information (the Assistant Secretary). The Manual of Regulations and Procedures for Federal Radio Frequency Management (NTIA Manual) is issued by the Assistant Secretary, and is specifically designed to detail the Assistant Secretary's frequency management responsibilities.

List of Subjects in 47 CFR Part 300

Incorporation by Reference: Radio, Telecommunications.

1. Therefore there is established in Title 47 of the Code of Federal Regulations (Telecommunications), a new Chapter III—National Telecommunications and Information Administration, Department of Commerce. Chapter III will consist of Part 300—Manual of Regulations and Procedures for Federal Radio and Frequency Management.

PART 300—[AMENDED]

Sec.

300.1 Incorporation by reference of the Manual of Regulations and Procedures for Federal Radio Frequency Management.

Authority: Exec. Order 12046 (March 27, 1978), 43 FR 13349, 3 CFR 1978 Comp., p. 158.

§ 300.1 Incorporation by Reference of the Manual of Regulations and Procedures for Federal Radio Frequency Management

(a) The Manual of Regulations and Procedures for Federal Radio Frequency Management (hereinafter referred to as the NTIA Manual) is issued by the Assistant Secretary of Commerce for Communications and Information, and is specifically designed to cover the Assistant Secretary's frequency management responsibilities pursuant to delegated authority under Executive Order 12046 (March 27, 1978).

(b) The Federal agencies shall meet the requirements set forth in the May 1986 edition of the NTIA Manual, as amended, which is incorporated by reference with the approval of the Director, Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51.

(c) The NTIA Manual is updated January, May, and September of each year and notice of these changes are printed in the **Federal Register**. The NTIA Manual can be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, by referring to Catalog Number 903–008–00000–8. The NTIA Manual is on file at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC 20408.

BILLING CODE 3510–60–M

VETERANS ADMINISTRATION

48 CFR Parts 801, 814, 815, 833, 836, 842 and 852

Acquisition Regulations Concerning the Competition in Contracting Act; Technical Amendments

AGENCY: Veterans Administration.

ACTION: Final technical amendments.

SUMMARY: The Veterans Administration (VA) amends its regulations concerning the Competition in Contracting Act (CICA) and the FAC (Federal Acquisition Circular) 84–5 to: (1) correct references to the Office of Construction which the VA renamed the Office of Facilities; (2) correct references to other provisions referred to in the VAAR; (3) correct references to organizational element titles which were changed due to reorganization within the VA; (4) correct language inadvertently omitted from the CICA final regulation published on July 31, 1987, in the **Federal Register** (52 FR 28558); and (4) correct erroneous terminology.

EFFECTIVE DATE: July 31, 1987.

FOR FURTHER INFORMATION CONTACT: Chris A. Figg, Chief Policy Division, Office of Procurement and Supply (91A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–2334.

SUPPLEMENTARY INFORMATION: All the changes contained in these regulations are technical ones designed to correct erroneous references, reflect new organizational titles, correct language which was inadvertently omitted from the final CICA regulation, and correct erroneous terminology. There are no substantive changes. Public participation in this rulemaking is therefore unnecessary (5 U.S.C. 553(d)(3)).

This rule has been reviewed in conjunction with Executive Order 12291, Federal Regulation, and has been determined not to be a "major rule" as defined therein.

Since a notice of proposed rulemaking is unnecessary and will not be published, these amendments do not come within the term "rule" as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2), and are therefore not subject to the requirements of the Act. Nevertheless, these amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612.

These amendments do not impose any additional reporting or recordkeeping requirements on the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Parts 801, 814, 815, 833, 836, 842, and 852

Government procurement.

Approved: December 15, 1987.

Thomas K. Turnage,

Administrator.

48 CFR Parts 801, 814, 815, 833, 836, 842, and 852 are amended as follows:

1. The authority citation for Parts 801, 814, 815, 833, 836, 842 and 852 continues to read as follows:

Authority: 38 U.S.C. 210 and 40 U.S.C. 486(c).

PART 801—VETERANS ADMINISTRATION ACQUISITION REGULATIONS SYSTEM

801.404 [Amended]

2. Section 801.404 is amended by removing the words "Agency Procurement Executive" and adding, in their place, the words, "Senior Procurement Executive".

3. a. In subsection 801.602–70, paragraph (a)(6) is revised to read as set forth below.

b. In subsection 801.602–70, paragraph (a)(7) is amended by removing the words "formally advertised" and adding, in their place, the words "sealed bid".

c. In subsection 801.602–70, paragraph (g) is amended by removing "814.407–8(a) " and adding, in its place, "813.103".

801.602–70 Legal/technical review requirements to be met prior to contract execution.

(a) * * *

(6) Any proposed agreement that is unique, novel or unusual (including all consignment agreements, regardless of anticipated dollar value—except those established and provided in Federal Supply Schedule Contracts).

* * * * *

801.602–71 [Amended]

4. a. In subsection 801.602–71, paragraph (b)(2) is amended by removing "815.204" and adding, in its place, "815.7001".

b. In subsection 810.602–71, paragraph (b)(4) is amended by removing "801.602–70(a)(4)(ii)" and adding, in its place, "801.602–70(d)(4)(ii)".

801.602–72 [Amended]

5. In subsection 801.602–72, paragraph (b) is amended by removing "815.204(e)" and adding, in its place, "815.7001".

PART 814—SEALED BIDDING

6. In section 814.201, the tables in paragraphs (d)(1) and (d)(2) are revised to read as follows:

814.201 Preparation of invitations for bids.

* * * * *

(d) * * *

(1) * * *

Quantity	Unit	Unit Price	Summary
XX	XX	XX	$ XX

(Bidder will enter summary amount.)

(2) * * *

Quantity	Unit	Unit Price	Summary
XX	XX	XX	$ XX

(Bidder will enter unit price and summary amount.)

* * * * *

814.202–4 [Amended]

7. Subsection 814.202–4 is amended by removing the word "clause" and adding in its place, the word "provision".

PART 815—CONTRACTING BY NEGOTIATION

8. In section 815.7001, paragraph (c) introductory text is amended by revising the last sentence, and paragraph (c)(5) is revised to read as follows:

815.7001 Personal or professional services.

* * * * *

(c) * * * Except as provided in paragraph (d) of this section, such proposed contracts will be submitted for approval to the Director for Operations (10B/EMS), when authority is 38 U.S.C. 5053 or 38 U.S.C. 4117, so as to reach Central Office 60 days prior to effective date of the contract.

* * * * *

(5) A copy of all executed sharing contracts, both new and renewal, will be forwarded to the Director for Operations (10B/EMS) for review and for purposes of making the annual report to Congress as required by 38 U.S.C. 5057.

* * * * *

PART 833—PROTESTS, DISPUTES, APPEALS

9. In section 833.103, paragraph (b)(1) is revised as set forth below and paragraph (f)(2) is amended by removing the words "(June 1985)" and adding, in their place, the words "(July 1985)".

833.103 Protests to the agency

* * * * *

(b) * * * (1) All solicitations, except those issued by the Office of Facilities, will instruct interested parties to deliver a copy of any GAO or GSBCA protest to the contracting officer and the Director, Office of Procurement and Supply (93D), VA Central Office, 810 Vermont Avenue NW., Washington, DC 20420, by adding this requirement to its service of protest provision, FAR 52.233–2.

* * * * *

PART 836—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

10. In Part 836, all references to "Office of Construction" are revised to read "Office of Facilities".

PART 842—CONTRACT ADMINISTRATION

842.705 [Amended]

11. In section 842.705, paragraph (b) is amended by removing the words "Office of Construction" wherever they appear, and adding, in their place, "Office of Facilities".

PART 852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

852.233–70 [Amended]

12. In subsection 852.233–70, the provision heading is amended by removing the words "(Jan 1987)" and adding, in their place, the words "(June 1987)".

852.236–88 [Amended]

13. a. In subsection 852.236–88, the heading to the clause in paragraph (b) is amended by removing the word "Over".

b. In the clause to paragraph (b), paragraph (g) is amended by removing the word "subcontractor's" and adding, in its place, the word "subcontractors' ".

BILLING CODE 6320–01–M

DEPARTMENT OF COMMERCE

National Oceanic And Atmospheric Administration

50 CFR Part 371

[Docket No. 60616–6116]

Fraser River Sockeye and Pink Salmon Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of 1987 in-season orders.

SUMMARY: The Secretary of Commerce (Secretary) hereby publishes all the in-season orders that were issued by the Fraser River Panel (Panel) of the Pacific Salmon Commission (Commission) and subsequently approved and issued by the Secretary during the 1987 sockeye and pink salmon fisheries in United States waters within the Fraser River Panel Area [Fraser River Panel Area (U.S.)]. These orders, established fishing times, areas, and types of gear for U.S. treaty Indian and all-citizen fisheries during the period the Commission exercised jurisdiction over these fisheries.

Due to the frequency with which in-season orders are issued, publication of individual orders is impracticable. All the 1987 orders are therefore being published in this notice to avoid fragmentation.

EFFECTIVE DATES: Each of the following in-season orders of the Secretary was effective upon announcement on telephone hotlines as specified at 50 CFR 371.21(b)(1) (51 FR 23425, June 27, 1986).

ADDRESS: Comments on these in-season orders may be sent to Rolland A. Schmitten, Director, Northwest Region, NMFS, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206–526–6150; or Richard B. Thompson, 206–526–6144.

SUPPLEMENTARY INFORMATION: The Treaty between the Government of the United States of America and the Government of Canada Concerning Pacific Salmon (Treaty) was signed at Ottawa on January 28, 1985, and subsequently was given effect in the United States by the Pacific Salmon Treaty Act (Act) at 16 U.S.C. 3631 *et seq.*

Under authority of the Act, an emergency interim rule was promulgated at 50 CFR Part 371 (51 FR 23420, June 27, 1986) to provide a framework for implementation of certain regulations of the Commission and in-season orders of the Commission's Panel for sockeye and

pink salmon fisheries in the Fraser River Panel Area (U.S.). The emergency interim rule was effective from June 22, 1986, and remains in effect until modified, superseded, or rescinded. It applies to the Fraser River Area (U.S.) during the period each year when the Commission exercises jurisdiction over these fisheries.

The emergency interim rule closed the Fraser River Panel Area (U.S.) to sockeye and pink salmon fishing unless opened by Panel regulations or by in-season orders of the Secretary that give effect to Panel orders, unless such orders are determined not to be consistent with domestic legal obligations. During the fishing season, the Secretary may issue orders that establish fishing times and areas consistent with the annual Commission regime and in-season orders of the Panel. Such orders must be consistent with domestic legal obligations. The Secretary issues in-season orders through his delegate, the Northwest Regional Director of NMFS. Official notice of these in-season actions of the Secretary is provided by two telephone hotlines described at 50 CFR 371.21(b)(1) (51 CFR 23425, June 27, 1986). In-season orders of the Secretary must be published in the **Federal Register** as soon as practicable after they are issued under 50 CFR 371.21(b)(4) (51 FR 23425, June 27, 1986). Due to the frequency with which in-season orders are issued, publication of individual orders is impracticable. All the 1987 orders are therefore being published in this notice to avoid fragmentation.

The following in-season orders were adopted by the Panel and issued for U.S. fisheries by the Secretary during the 1987 fishing season. The times listed are local times, and the areas designated are Puget Sound Management and Catch Reporting Areas as defined in the Washington State Administrative Code at Chapter 220-22.

Order No. 1987-1: Issued 3:10 p.m., July 27, 1987

Treaty-Indian fishery: Areas 4B, 5, and 6C—Open to drift gill nets 12:00 noon Tuesday, July 28 to 12:00 noon Sunday, August 2. Areas 6, 7, and 7A—Remain closed to net fishing.

All-citizen fishery: Areas 4B, 5, 6, 6C, 7, and 7A—Remain closed to net fishing.

Order No. 1987-2: Issued 12:50 p.m., July 31, 1987

Treaty-Indian fishery: Areas 4B, 5, and 6C—Remain open to drift gill net fishing. Areas 6, 7, and 7A—Open to net fishing 7:00 p.m. Tuesday, August 4 to 9:30 p.m. Thursday, August 6.

All-citizen fishery: Areas 4B, 5, 6, 6C, 7, and 7A—Open to reef nets 5:00 a.m. to 9:30 p.m. Tuesday, August 4. Open to gill nets 7:00 p.m. Tuesday, August 4 to 9:30 a.m. Wednesday, August 5; open to purse seines 5:00 a.m. to 9:30 p.m. Wednesday, August 5.

Order No. 1987-3: Issued 12:30 p.m., August 7, 1987

Treaty-Indian fishery: Areas 4B, 5, and 6C—Remain open to drift gill nets. Areas 6, 7, and 7A—Open to net fishing 5:00 a.m. Tuesday, August 11 to 9:30 a.m. Thursday, August 13.

All-citizen fishery: Areas 4B, 5, 6, 6C, 7, and 7A—Open to reef nets 5:00 a.m. to 9:30 p.m. Monday, August 10 and Tuesday, August 11; open to purse seines 5:00 a.m. to 9:30 p.m. Tuesday, August 11 and Wednesday, August 12; open to gill nets 7:00 p.m. Tuesday, August 11 to 9:30 a.m. Wednesday, August 12, and 7:00 p.m. Wednesday, August 12 to 9:30 a.m. Thursday, August 13.

Order No. 1987-4: Applied only to Canadian area fisheries

Order No. 1987-5: Issued 12:30 p.m., August 14, 1987

Treaty-Indian fishery: Areas 4B, 5, and 6C—Remain open to drift gill nets. Areas 6, 7, and 7A—Open to net fishing 6:00 p.m. Saturday, August 15, to 9:00 p.m. Tuesday, August 18.

All-citizen fishery: Areas 4B, 5, 6, 6C, 7, and 7A—Open to reef nets 5:00 a.m. to 9:00 p.m. Saturday, August 15 and Sunday, August 16; open to gill nets 6:00 p.m. Sunday, August 16 to 9:00 a.m. Monday, August 17, and 6:00 p.m. Monday, August 17 to 9:00 a.m. Tuesday, August 18; open to purse seines 5:00 a.m. to 9:00 p.m. Monday, August 17 and Tuesday, August 18.

Order No. 1987-6: Applied only to Canadian area fisheries

Order No. 1987-7: Issued 3:10 p.m., August 17, 1987

Treaty-Indian fishery: Areas 6, 7, and 7A—Open to net fishing 9:00 p.m. Tuesday, August 18 to 9:00 p.m. Wednesday, August 19.

Order No. 1987-8: Issued 3:45 p.m., August 19, 1987

Treaty-Indian fishery: Areas 6, 7, and 7A—Open to net fishing 9:00 p.m. Wednesday, August 19 to 9:00 a.m. Saturday, August 22.

All-citizen fishery: Areas 4B, 5, 6, 6C, 7, and 7A—Open to reef nets 5:00 a.m. to 9:00 p.m. Thursday, August 20; open to purse seines 5:00 a.m. to 9:00 p.m. Friday, August 21; open to gill nets 6:00 p.m. Friday, August 21 to 9:00 a.m. Saturday, August 22.

Order No. 1987-9: Applied only to Canadian fisheries

Order No. 1987-10: Issued 1:10 p.m., August 21, 1987

Treaty-Indian fishery: Areas 6, 7, and 7A—Extended for net fishing 9:00 a.m. Saturday, August 22 to 9:00 a.m. Monday, August 24.

Order No. 1987-11: Issued 4:45 p.m., August 22, 1987

Treaty-Indian fishery: Areas 6, 7, and 7A—Extended for net fishing 9:00 a.m. Monday, August 24 to 9:00 p.m. Tuesday, August 25.

All-citizen fishery: Areas 4B, 5, 6, and 6C—Remain closed to net fishing. Areas 7 and 7A—Open to reef nets 5:00 a.m. to 9:00 p.m. Sunday, August 23; open to gill nets 6:00 p.m. Sunday, August 23 to 9:00 a.m. Monday, August 24; open to purse seines 5:00 a.m. to 9:00 p.m. Monday, August 24.

Order No. 1987-12: Applied only to Canadian area fisheries

Order No. 1987-13: Issued 11:55 a.m., August 26, 1987

Treaty-Indian fishery: Areas 6, 7, and 7A—Open to net fishing 5:00 a.m. Thursday, August 27 to 9:00 a.m. Saturday, August 29.

All-citizen fishery: Areas 7 and 7A—Open to reef nets and purse seines 5:00 a.m. to 9:00 p.m. Thursday 27; open to gill nets 6:00 p.m. Thursday, August 27 to 9:00 a.m. Friday, August 28.

Order No. 1987-14: Issued 1:30 p.m., August 28, 1987

Treaty-Indian fishery: Areas 6, 7, and 7A—Extended for net fishing 9:00 a.m. Saturday, August 29 to 9:00 p.m. Tuesday, September 1.

All-citizen fishery: Areas 7 and 7A—Open to reef nets 5:00 a.m. to 9:00 p.m. Sunday, August 30; open to gill nets 6:00 p.m. Sunday, August 30 to 9:00 a.m. Monday, August 31; open to purse seines 5:00 a.m. to 9:00 p.m. Monday, August 31.

Order No. 1987-15: Issued 11:25 a.m., August 31, 1987

Treaty-Indian fishery: Area 4B, 5, and 6C—Closed to drift gill nets 12:00 noon Saturday, September 5. Areas 6, 7, and 7A—Extended for net fishing 9:00 p.m. Tuesday, September 1 to 9:00 a.m. Friday, September 4.

All-citizen fishery: Areas 7 and 7A—Open to purse seines 5:00 a.m. to 9:00 p.m. Wednesday, September 2; open to gill nets 6:00 p.m. Wednesday, September 2 to 9:00 a.m. Thursday, September 3; open to reef nets 5:00 a.m. to 9:00 p.m. Friday, September 4.

Order No. 1987-16: Issued 10:50 a.m., September 11, 1987

Treaty-Indian fishery: Areas 4B, 5, and 6C—Retain regulatory control until further notice. Remain closed to drift gill nets.

All-citizen fishery: Areas 4B, 5, 6, and 6C—Retain regulatory control until further notice. Remain closed to net fishing.

Order No. 1987-17: Issued 3:15 p.m., September 18, 1987

Treaty-Indian and all-citizen fisheries: Areas 4B, 5, and 6C—Regulatory control relinquished effective 12:01 a.m., Sunday, September 27. Remain closed to net fishing. Area 7A—Regulatory control extended to 12:01 a.m. Sunday, October 4 in those waters lying northerly and westerly of a straight line drawn from the low water range marker in Boundary Bay through the east tip of Point Roberts to the East Light in Saturna Island in the Province of British Columbia. These waters remain closed to net fishing.

Order No. 1987-18: Issued 2:45 p.m., October 1, 1987

Treaty-Indian and all-citizen fisheries: Area 7A—Regulatory control extended to 12:01 a.m. Sunday, October 11 in those waters lying northerly and westerly of a straight line drawn from Iwersen's Dock on Point Roberts to Georgina Point Light at the entrance to Active Pass in the Province of British Columbia. These waters remain closed to net fishing.

BILLING CODE 3510-22-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 652

[Docket No. 70617-7148]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of allowable surf clam fishing time.

SUMMARY: NOAA issues this notice to establish allowable fishing time at 36 hours for each quarter of 1988 for vessels harvesting surf clams in the Mid-Atlantic Area of the exclusive economic zone. This action will provide flexibility and predictability to operators in the use of fishing time during the period. The intended effect is to match fishing effort to the available quota for the area.

EFFECTIVE DATES: January 3 through December 31, 1988. Fishing trips must be scheduled with 10 days' advance written notice.

ADDRESS: Send request for fishing time to the Surf Clam Coordinator, NMFS, 2 State Fish Pier, Gloucester, MA 01930. If this publication appears too late to allow such notice for those wishing to schedule trips during the first week of the first quarter, trips for that week only can be scheduled by calling 617-281-3600, ext. 252.

FOR FURTHER INFORMATION CONTACT: Jack Terrill, 617-281-3600 ext. 252.

SUPPLEMENTARY INFORMATION: Regulations implementing the Fishery Management Plan for the Atlantic Surf Clam and Ocean Quahog Fisheries contain at § 652.22(a)(3) a provision allowing the Regional Director to revise allowable fishing times to promote fishing for surf clams throughout the year with a minimum of changes. The Regional Director during the first quarter of 1987 decided, with the unanimous support of the Mid-Atlantic Fishery Management Council, to exercise his authority under § 652.22(a)(3) to allocate fishing time by quarter and allow each operator the maximum flexibility possible to schedule that time to best advantage. That program was continued for the remainder of 1987 with some modifications required to facilitate enforcement.

Based on an analysis of 1987 quarterly fishing effort, projected trends for the upcoming quarter, and comments from industry, the Regional Director has decided to allocate 36 hours of fishing time for each quarter during 1988. That time must be scheduled in six fishing trips of six hours' duration each, which may be taken on any six separate days during the normal daily and weekly fishing times established in § 652.22(a)(1), (2), and (3). The first quarter ends on March 31, 1988.

Adjustments to the number of trips, to insure the attainment of the quarterly quota, will be made in the quarter immediately following when more complete catch information is available. This procedure is intended to prevent disruption of processing schedules resulting from adjustments made mid-quarter.

Other Matters

This action is taken under 50 CFR Part 652 and is taken in compliance with Executive Order 12291.

[Docket No. 71153-7253]

Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment.

SUMMARY: NOAA announces a technical amendment to the regulations implementing the Fishery Management Plan for the Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California (FMP). The amendment is necessary to update obsolete language. It is intended to improve clarity and accuracy in the regulations.

EFFECTIVE DATE: This action will be effective on December 28, 1987. Comments will be accepted until January 12, 1988.

ADDRESSES: Comments may be mailed to Rolland A. Schmitten, Director, Northwest Region, NMFS, BIN C15700, 7600 Sand Point Way NE., Seattle, WA 98115-0070; or E. Charles Fullerton, Director, Southwest Region, NMFS, 300 S. Ferry Street, Terminal Island, CA

VOL 52 ISS 249 DEC 29 1987 UMI

90731–7415. Information relevant to this notice has been compiled in aggregate form and is available for public review during business hours at the same addresses.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten (Regional Director) at 206–526–6150; or E. Charles Fulleton (Regional Director) at 213–514–6196.

SUPPLEMENTARY INFORMATION: Framework regulations governing the ocean salmon fisheries at 50 CFR Part 661 were promulgated on October 31, 1984 (49 FR 43682). The regulations have been amended several times (50 FR 812, January 7, 1985; 50 FR 4977, February 5, 1985; 50 FR 42529, October 21, 1985; 52 FR 4146, February 10, 1987; 52 FR 34807, September 15, 1987). Various events have occurred since the original regulations were implemented which make some of the language obsolete or unclear. The cumulative effect of the many regulatory changes also have created imprecise or inconsistent wording.

The changes contained in this amendment do not introduce new information nor deviate from current agency procedure. Among the changes being made in the regulations are the following:

1. The term "fishery conservation zone" and its acronym "FCZ" are replaced by the term "exclusive economic zone" and its acronym "EEZ," pursuant to Presidential Proclamation Numbered 5030, dated March 10, 1983, and the Magnuson Fishery Conservation and Management Act at 16 U.S.C. 1802(6) and 1811, as amended by Pub. L. 99–659, Title I, sections 101(a), 112, 100 Stat. 3706, 3715 (2986).

2. Section 661.2(a) is revised to delete an obsolete reference and to substitute in its place a reference to the current international Pacific Salmon Commission established by the Treaty Between the Government of the United States of America and the Government of Canada Concerning Pacific Salmon, signed at Ottawa, January 28, 1985.

3. The definition of *Council* is changed to show the new address of the Pacific Fishery Management Council.

4. The definition of *Regional Director* is revised to show zip-plus-four codes in the addresses.

5. An amendment to the regulations at 52 FR 4148 (February 10, 1987) resulted in a discussion of the Oregon Production Index (OPI) being deleted in the regulations. The next remaining section of the regulations refers to "OPI" without further explanation, by stating that "The allowable harvest in the area from Cape Falcon to Leadbetter Point will be established to address a blend of OPI and Washington state coho management considerations." The reference to "OPI" has been changed to "Oregon" in this sentence.

Classification

The Regional Director has determined that this rule is necessary to clarify and update the regulations for conservation and management of the ocean salmon fishery off Washington, Oregon, and California, and that it is consistent with the FMP, the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 *et. seq.*, and other applicable law.

Under the National Environmental Policy Act, 42 U.S.C. 4321 *et seq.*, the Council prepared an environmental impact statement (EIS) for the FMP, and a notice of availability was published. There will be no change in environmental impact from that determined in the EIS as a result of this rule.

The Assistant Administrator for Fisheries finds that because the changes made by this technical amendment are only minor corrections which will have no substantive effect and in which the public is not particularly interested, it is unnecessary to seek prior public comment under 5 U.S.C. 553(b)(B) and (c) and there is good cause not to delay the effective date of this rule for 30 days after 5 U.S.C. 553(d). However, as with other Department of Commerce rules, comments of the public are invited for 15 days after this notice is filed for public inspection with the Office of the Federal Register.

As no notice of proposed rulemaking is required, this rule is also exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 603 *et seq.*) and no Regulatory Flexibility Analysis has been prepared. However, the Council has previously prepared a regulatory impact review and regulatory flexibility analysis as a part of the FMP and its regulations. There will be no change in impacts from those previously determined as a result of this rule.

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act (44 U.S.C. 3501 *et. seq.*).

This rule merely corrects minor errors; therefore it is not a major rule under Executive Order 12291 and its issuance is in compliance with the order. Because this rule will have no substantive effect on any person or fishing practice, there will be no change in the impacts analyzed in the regulatory impact reviews prepared for the implementing regulations.

List of Subjects in 50 CFR Part 661

Fisheries, Fishing, Indians.

Dated: December 23, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For reasons explained in the preamble, 50 CFR Part 661 is amended as follows:

PART 661—[AMENDED]

1. The authority citation for Part 661 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. Section 661.1 is revised to read as follows:

§ 661.1 Purpose.

The purpose of this part is to provide for management of salmon and steelhead fisheries off the coasts of Washington, Oregon, and California in the exclusive economic zone (the EEZ, also known as the 3-to-200-mile zone) over which the United States exercises exclusive fishery management authority (i.e., the Pacific Fishery Management Council's Salmon Fishery Management Area) under the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.*

3. In § 661.2, paragraph (a) is revised to read as follows:

§ 661.2 Relation to other laws.

(a) This part does not apply to fishing for pink and sockeye salmon between 48°N. latitude and the U.S.-Canada border during such times that the Pacific Salmon Commission exercises jurisdiction over such fishing under the Treaty Between the Government of the United States of America and the Government of Canada Concerning Pacific Salmon, signed at Ottawa, January 28, 1985.

* * * * *

§ 661.3 [Amended]

4. In § 661.3, in the definition of *Council*, the address is revised to read "Metro Center, Suite 420, 2000 S.W. First Avenue, Portland, OR 97201–5344."; in the definition of *Fishery management area*, the term "Fishery Conservation Zone" and acronym "FCZ" are revised to read "Exclusive Economic Zone" and "EEZ," respectively; and in the definition of *"Regional Director,"* the zip codes for the Northwest Region and the Southwest Region are revised to read "98115–0070" and "90731–7415," respectively.

§ 661.21 [Amended]

5. In § 661.21(a), the first letter of the word "secretary" is capitalized.

Appendix II.B [Amended]

6. In Appendix II.B, paragraph (b) is revised by replacing the acronym "OPI" with the word "Oregon."

[FR Doc. 87–29800 Filed 12–28–87; 8:45 am]

BILLING CODE 3510–22–M

---

50 CFR Parts 672 and 675

[Docket No. 70472–7197]

Groundfish of the Gulf of Alaska, Bering Sea and Aleutian Islands

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule that amends current regulations implementing the Fishery Management Plans for Groundfish of the Gulf of Alaska and for Groundfish of the Bering Sea and Aleutian Islands (FMPs). This rule modifies domestic reporting requirements with respect to State of Alaska fish tickets. This action is necessary to respond to an administrative problem identified by the NMFS Alaska Region. The intended effect of this action is improved precision and accuracy in accounting for commercial groundfish harvests off Alaska.

EFFECTIVE DATE: January 28, 1988.

ADDRESSES: Copies of documents supporting this rule may be obtained from Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, Alaska 99802–1668.

FOR FURTHER INFORMATION CONTACT: Jay J. C. Ginter (Fishery Management Biologist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: Domestic and foreign groundfish fisheries in the exclusive economic zone (EEZ) in the Gulf of Alaska (GOA) and the Bering Sea and Aleutian Islands (BSAI) area are managed according to policies expressed in the FMPs. The FMPs were developed by the North Pacific Fishery Management Council (Council) under authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). The FMPs are implemented by regulations governing foreign fisheries appearing at 50 CFR 611.92 and 611.93 and by regulations governing domestic fisheries appearing at 50 CFR Parts 672 and 675.

A description of the problems addressed by this action is given in the preamble to the proposed rule published in the **Federal Register** on June 16, 1987 (52 FR 22892). In summary, NOAA identified three problems in administering paragraphs (a) and (b) of §§ 672.5 and 675.5. These paragraphs implement provisions of the FMPs to collect groundfish catch information through State of Alaska fish tickets required under the Alaska Administrative Code (5 AAC 39.130). The identified problems and their resolution by this action are as follows:

1. Although the current regulations require fish tickets for every sale or delivery of groundfish at a "port of landing," that term is not defined in the regulations. This action eliminates that term, clarifies and simplifies the regulatory language, and implements identical requirements for the GOA and BSAI areas.

2. The current regulations for the BSAI area do not require fish tickets for groundfish landed in Alaska. This action includes a fish ticket requirement for these fish by providing a uniform Federal requirement for all groundfish taken in the GOA and BSAI areas.

3. The current regulations for the GOA and BSAI groundfish fisheries require fish tickets only for sales and deliveries of groundfish caught in the EEZ. Since enforcement agents cannot reliably document the origin of domestic catch, they cannot effectively enforce the Federal reporting requirements. This action changes the regulations to require fish tickets for groundfish caught in the EEZ and in the territorial sea adjacent to the GOA and BSAI management areas and in the internal waters of the State of Alaska by vessels which have groundfish permits issued under these parts. This rule will simplify enforcement by requiring fish tickets from all permitted vessels, regardless of where the fish are caught. This action is reasonable because most of the groundfish caught by Federally permitted vessels are caught in the EEZ.

This action does not add reporting burdens on fishermen because it imposes Federal requirements that are the same as existing State of Alaska reporting requirements under 5 AAC 39.130.

This action requires fish tickets from domestic fishermen who sell or deliver groundfish on land or at sea. Thus, all domestically harvested groundfish are accounted for by fish tickets except for groundfish delivered to foreign processors in the EEZ. The latter fish are accounted for by the U.S. observer on the foreign processor and the foreign fishing reporting program, therefore, these fish are specifically exempt from this action.

This rule includes the option that the vessel operator may elect to have the fish ticket submitted by the purchaser.

This final rule restates current requirements that vessels landing outside of Alaska will need to submit to the State of Alaska a copy of a document that is equivalent to State of Alaska fish tickets (§§ 672.5(a)(1) and 675.5(a)(1)). These reporting requirements are cleared under the OMB Control Number 0648–0016.

Finally, this rule deletes a fishing effort reporting requirement in the current GOA regulations under § 672.5 (a)(1)(ii). This action makes the regulations for the GOA and BSAI areas uniform regarding fishing effort reporting and eliminates a potential source of confusion in the reporting requirements for groundfish fisheries off Alaska.

This action is intended to clarify the reporting requirements and provide a more accurate and enforceable system of accounting for harvested groundfish.

NOAA expects no environmental and economic effects from implementing this rule. It will not change the status quo since it will not affect the amount of groundfish harvested, the species taken or the location of fishing activity. This rule will not affect the cost of fishing and will not impose any new reporting requirements. The only new effect of this rule will be the imposition by Federal regulation of existing State of Alaska fish ticket requirements. Hence, no additional paperwork burden is imposed on fishermen.

Public Comments

No public comments were received in response to the proposed rule.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary for the conservation and management of the groundfish fisheries in the Gulf of Alaska, the Bering Sea and the Aleutian Islands area, and that the rule is consistent with the Magnuson Act. In addition, based on the above discussion, the Administrator of NOAA has determined that this rule (1) is not a major Federal action requiring preparation of an environmental assessment, (2) is not a major rule requiring a regulatory impact analysis under Executive Order 12291, (3) will not have significant effects on small entities under the Regulatory Flexibility Act, and (4) contains no additional collection of information requirement subject to the Paperwork Reduction Act. NOAA has determined that this rule will be

VOL 52 ISS 249 DEC 29 1987 UMI

implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Alaska. This determination was submitted for review to the responsible State agency under section 307 of the Coastal Zone Management Act. The State did not respond within 45 days; therefore, the State's agreement is presumed.

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Reporting and recordkeeping requirements.

Dated: December 23, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Parts 672 and 675 are amended as follows:

PART 672—[AMENDED]

1. The authority citation for 50 CFR Part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 672.5, paragraphs (a)(1) and (a)(2) are revised to read as follows:

§ 672.5 Reporting requirements.

(a) * * *

(1) The operator of any fishing vessel (including any catcher/processor vessel) to which a permit has been issued under § 672.4 of this Part, that catches groundfish in any of the Gulf of Alaska regulatory areas, the territorial sea adjacent to any regulatory area, or internal waters of the State of Alaska, shall be responsible for the submission to ADF&G of an accurately completed State of Alaska fish ticket or an equivalent document containing all of the information required on an Alaska fish ticket. Fish tickets are not required for groundfish sold or delivered to a foreign processing vessel which has a permit under § 611.3 of this Title.

(i) When to submit fish tickets.

(A) Sales or deliveries to shore. Except as provided by paragraph (a)(1)(ii) of this section, the operator of any fishing vessel who sells or delivers his catch of groundfish to shore must submit the fish ticket required under paragraph (a)(1) of this section within one week after such fish are sold or delivered.

(B) Sales or deliveries to vessels. Except as provided by paragraph (a)(1)(ii) of this section, the operator of any fishing vessel who sells or delivers his catch of groundfish to another vessel must submit the fish ticket required under (a)(1) of this section within one week after he returns to port.

(ii) At the election of the fishing vessel operator who catches groundfish, fish tickets may be prepared, and submitted under paragraph (a)(1)(i)(A) of this section to ADF&G by the shore-based purchaser within one week after such fish are received by the purchaser, or, if submitted under paragraph (a)(1)(i)(B) of this section, to ADF&G by the vessel-based purchaser within one week after such purchaser returns to shore. For purposes of this paragraph, a "purchaser" is any person who receives from a fishing vessel regulated under this Part, groundfish caught in any area or location as defined at § 672.2 of this Part, the territorial sea, or internal waters of the State of Alaska.

(2) Address. Send these documents to the Director, Commercial Fish Division, Alaska Department of Fish and Game Headquarters, P.O. Box 3–2000, Juneau, Alaska 99802.

* * * * *

PART 675—[AMENDED]

3. The authority citation for 50 CFR Part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In § 675.5, paragraphs (a)(1) and (a)(2) are revised to read as follows:

§ 675.5 Reporting requirements.

(a) * * *

(1) The operator of any fishing vessel (including any catcher/processor vessel) to which a permit has been issued under § 675.4 of this part, that catches groundfish in the Bering Sea and Aleutian Islands management area or either subarea, the territorial sea adjacent to either subarea, or internal waters of the State of Alaska, will be responsible for the submission to ADF&G of an accurately completed State of Alaska fish ticket or an equivalent document containing all of the information required on an Alaska fish ticket. Fish tickets are not required for groundfish sold or delivered to a foreign processing vessel which has a permit under § 611.3 of this title.

(i) When to submit fish tickets.

(A) Sales or deliveries to shore. Except as provided by paragraph (a)(1)(ii) of this section, the operator of any fishing vessel who sells or delivers his catch of groundfish to shore must submit the fish ticket required under paragraph (a)(1) of this section within one week after such fish are sold or delivered.

(B) Sales or deliveries to vessels. Except as provided by paragraph (a)(1)(ii) of this section, the operator of any fishing vessel who sells or delivers his catch of groundfish to another vessel must submit the fish ticket required under paragraph (a)(1) of this section within one week after he returns to port.

(ii) At the election of the fishing vessel operator who catches groundfish, fish tickets may be prepared, and submitted under paragraph (a)(1)(i)(A) of this section to ADF&G by the shore-based purchaser within one week after such fish are received by the purchaser, or, if submitted under paragraph (a)(1)(i)(B) of this section, to ADF&G by the vessel-based purchaser within one week after such purchaser returns to shore. For purposes of this paragraph, a "purchaser" is any person who receives from a fishing vessel regulated under this Part, groundfish caught in either subarea of the Bering Sea and Aleutian Islands management area, the territorial sea, or internal waters of the State of Alaska.

(2) Address. Send these documents to the Director, Commercial Fish Division, Alaska Department of Fish and Game Headquarters, P.O. Box 3–2000, Juneau, Alaska 99802.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register

Vol. 52, No. 249

Tuesday, December 29, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 302 and 333

Procedures for Selecting Candidates for Appointment

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: To improve the procedures used by agencies in selecting candidates for appointments in the excepted service and for temporary and term appointments outside registers in the competitive service, the Office of Personnel Management (OPM) proposes to revise its regulations. The proposed regulations would permit candidates for either type of appointment to be referred in one of two ways: in preference order without ranking; or under ranking and referral procedures comparable to those used in competitive examinations. This would give agencies greater flexibility in recognizing qualitative differences among candidates for jobs that require specialized skills and training and would simplify referral procedures when jobs have minimal skill requirements or when all applicants have substantially equal qualifications. The proposed regulations would also make editorial changes to clarify the applicability of procedural requirements and would permit agencies to consider current employees for excepted appointments on the same basis as former employees. Currently, an agency may consider its former employees for excepted appointments before it considers outside candidates, but when considering current employees, must treat such applicants as though they were outside candidates. The proposed regulations would permit movement of current employees to positions where their skills could be better used, even when an agency was not adding to its workforce.

DATE: Comments must be received on or before February 29, 1988.

ADDRESS: Send or deliver written comments to Curtis J. Smith, Associate Director for Career Entry, Office of Personnel Management, Room 6F08, 1900 E Street NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Tracy Spencer, (202) 632–6817.

SUPPLEMENTARY INFORMATION:

I. Ranking and referral procedures.

Both Parts 302 and 333 implement statutory requirements for veterans preference in appointments. While OPM's regulations fully implement the letter and the spirit of the law giving preference in civilian employment to eligible veterans who have served in defense of their country, the specific procedures for applying preference currently prescribed in Parts 302 and 333 reflect outdated assumptions about the types of jobs likely to be filled by excepted appointments and appointments outside registers.

Part 302, which covers appointments in the excepted service, generally requires agencies to use the same procedures as are applied in competitive examinations: that is, to rate eligible candidates on a numerical scale from 70 to 100, to assign appropriate extra points for veterans preference, and to refer candidates for selection consideration under a rule of three. Exceptions to the procedural requirements are authorized when there are so few candidates that all who qualify will be offered employment; when there are so many candidates that only those in the group most likely to be referred (e.g., compensably disabled veterans) need to receive final ratings; and when OPM approves use of special procedures, such as adjective category ranking, for particular positions. Exceptions to the procedural requirements have been approved for several types of positions, including those involving strictly occasional or as-needed employment, those that must be filled on an emergency basis, and those excepted from the competitive service on account of their confidential or policy-determining character. For many other excepted service positions, the pool of candidates is so small that no ranking is required.

The current regulations were based on the assumption that positions subject to the ranking and referral requirements would have specific knowledge and skill requirements that can and should be recognized in the referral process. For many positions, that is true. However, an increasing number of excepted authorities cover part-time, seasonal, or other positions for which knowledges and skills are usually learned on the job. Agencies make appointments to these positions at entry levels, for which qualification requirements are often minimal and candidates plentiful. The requirement to assign numerical scores and make arbitrary distinctions among essentially equal candidates for these jobs creates an unnecessary paperwork burden.

By contrast, Part 333, which covers temporary and term appointments made outside registers, makes no provision for comparative ranking or a rule-of-three, but instead requires that all candidates be referred in the order of their veterans preference. For many years, these provisions were adequate. Appointments outside the register were typically authorized either for low-level, short term jobs with minimal skill requirements, or for jobs with such specific skill requirements that few candidates would qualify. In either case, comparative ranking would be academic. Now, however, appointments outside the register are authorized for positions up to grade GS–12 in situations that may last as long as 4 years. Those positions often have specialized qualification requirements that should be recognized in the referral process.

In sum, both Parts 302 and 333 now cover positions that would be filled more efficiently through the use of different procedures. Because both parts afford eligible veterans as much preference as they would receive in competitive examinations, using either set of procedures for any of the positions would comply with veterans preference law. Therefore, these proposed regulations would provide unranked referral in preference order as an alternative method of making appointments under Part 302, and would provide numerical ranking and the rule-of-three as an alternative for appointments outside registers.

II. Consideration of current employees for excepted appointments.

Although Part 302 authorizes agencies to establish procedures for promotion or reassignment of excepted employees, the agencies' ability to use that authority

is very limited. Because most excepted appointing authorities cover only specified positions, excepted employees can be promoted or reassigned only among those positions. Movement to any other position is technically a new appointment and must be processed as such. Part 302 allows agencies to consider reemployment candidates (including both their own former employees and preference eligibles formerly employed by any agency) ahead of candidates for new appointments. However, the part does not permit current employees to be considered for new appointments ahead of outside candidates. This means that an agency having excepted positions for which current employees serving under other appointing authorities are well qualified cannot appoint such employees to those positions unless it either considers outside candidates or separates the employees and reappoints them from the reemployment list.

Because an agency's desire to limit consideration to current employees often reflects budget or ceiling constraints and because the employees' familiarity with the agency's work would give them a competitive edge in any case, the current provisions are not likely to create significant employment opportunities for outside candidates. They are more likely to generate unproductive separation and reappointment paperwork. Therefore, the proposed regulations would permit agencies to enter both current and former employees on their reemployment lists. The regulations would not reduce the procedural protections afforded competitive service employees who are selected for excepted appointments. Those employees would still be informed about giving up their competitive status by accepting excepted appointments and would be asked to sign a statement that they understand and voluntarily accept the conditions of excepted appointment.

III. Coverage of 5 CFR Part 302

OPM's authority to issue regulations governing appointments in the excepted service extends only to excepted positions subject to the provisions of title 5 of the United States Code unless the provisions of another title require use of veterans preference procedures parallel to title 5 of the U.S. Code. (Currently, only title 39 of the U.S. Code, covering positions in the United States Postal Service, contains such a requirement.) Responsibility for administering veterans preference and other legal requirements in personnel systems established outside of title 5 of the U.S. Code rests with the employing agencies. In accordance with the Home Rule Act of 1980, the personnel system of the government of the District of Columbia has also been removed from OPM's control for the purpose of these regulations. However, the language of Part 302 states that the regulations apply to all excepted positions in the executive branch and the government of the District of Columbia. To avoid confusion, the proposed regulations are reworded to reflect their coverage more accurately.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation affects only the procedures used to appoint certain Federal employees.

List of Subjects in 5 CFR Parts 302 and 333

Administrative practice and procedures, Government employees.

U.S. Office of Personnel Management
Constance Horner,
Director.

Accordingly, OPM proposes to amend 5 CFR Parts 302 and 333 as follows:

PART 302—EMPLOYMENT IN THE EXCEPTED SERVICE

1. The authority citation for Part 302 is revised as set forth below; and, the authorities following individual sections within the part are removed:

Authority: 5 U.S.C. 1302, 3301, 3302, 8151, E.O. 10577 (3 CFR 1954–1958 Comp., p. 218); § 302.105 also issued under 5 U.S.C. 1104, Pub. L. 95–454, sec. 3(5); § 302.501 also issued under 5 U.S.C. 7701 et seq.

2. In § 302.101, paragraphs (a) and (b) are revised to read as follows:

§ 302.101 Positions covered by regulations.

(a) *Positions covered.* With respect to the application of veteran preference, this part applies to each position in the executive branch of the Federal Government that is not in the competitive service *and* that is subject to the provisions of title 5, United States Code, or subject to a statutory requirement to follow the veteran preference provisions of title 5. With respect to restoration rights that are due to compensable injury and appeals therefrom, this part applies to those positions covered by 5 U.S.C. 8101(1) that are not in the competitive service.

(b) *Positions not covered.* This part does not apply to a position or appointment that is required by the Congress to be confirmed by, or made with the advice and consent of, the Senate.

* * * * *

3. Section 302.102 is amended to add the following language to the end of paragraph (b) and add new paragraphs (b) (1) and (2) to read as follows:

* * * * *

(b) * * * When an employee serving under a nontemporary appointment in the competitive service is selected for an excepted apointment or for noncareer executive assignment, the agency must—

(1) Inform the employee that, because the position is in the excepted service, it may not be filled by a competitive appointment, and that acceptance of the proposed appointment will take him/her out of the competitive service while he/she occupies the position; and

(2) Obtain from the employee a written statement that he/she understands he/she is leaving the competitive service voluntarily to accept an appointment in the excepted service.

* * * * *

4. Section 302.201 is revised to read as follows:

§ 302.201 Persons entitled to veteran preference.

In actions subject to this part, each agency shall grant veteran preference as follows:

(a) When numerical scores are used in the evaluation and referral, the agency shall grant 5 additional points to preference eligible under section 2108(3) (A) and (B) of title 5, United States Code, and 10 additional points to preference eligibles under section 2108(3) (C) through (G) of that title.

(b) When eligible candidates are referred without ranking, the agency shall note preference as "CP" for preference eligibles under section 2108(3) (C) of title 5, United States Code, and as "TP" for all other preference eligibles under that title.

5. In § 302.302, paragraphs (b) and (c) are redesignated as paragraphs (c) and (d), respectively; paragraph (a) is redesignated as paragraph (b) and is revised as set forth below; and a new paragraph (a) is added to read as follows:

§ 302.302 Examination of applicants.

(a) *Eligibility.* An evaluation of the qualifications of applicants for a position covered by this part may be conducted at any time before an appointment is made. The evaluation may involve only determination of eligibility or ineligibility or may include qualitative rating of candidates. If the evaluation involves only basic eligibility, numerical scores will not be assigned and eligible candidates will be referred in accordance with the procedures described in paragraph (e) of § 302.304. If qualitative ranking is desired, numerical scores may be assigned in accordance with paragraph (b) of this section.

(b) *Rating.* Numerical scores will be assigned on a scale of 100. Each applicant rated 70 or more will be eligible for appointment. Candidates scoring 70 or more will receive additional points for veteran preference as provided in § 302.201. Numerical ratings are not required when all qualified applicants will be offered immediate appointment. When there is an excessive number of applicants: numerical rating are required only for a sufficient number of the highest qualified applicants to meet the anticipated needs of the agency within a reasonable period of time; and the agency shall adopt procedures to insure the consideration of all preference eligibles in the order in which they would have been considered if all applicants had been assigned numerical ratings. An agency shall furnish a notice of the rating assigned to an applicant on his/her request.

* * * * * *

6. In § 302.303, paragraph (a) and the introductory text of paragraph (b) are revised to read as follows:

§ 302.303 Maintenance of employment lists.

(a) *Establishment.* An agency shall enter the names of all applicants rated eligible under § 302.202 on either the appropriate reemployment list or the appropriate regular employment list, in the following order:

(1) *When candidates have been rated only for basic eligibility under § 302.202(a):* (i) Preference eligibles having a compensable service-connected disability of 10 percent or more (designated as "CP") unless the list will be used to fill professional positions at the GS–9 level and above, or equivalent;

(ii) All other preference eligibles; and

(iii) Qualified candidates not eligible for veteran preference.

(2) *When candidates have been assigned numerical scores under § 302.202(b):* (i) Preference eligibles having a compensable service-connected disability of 10 percent or more, in the order of their augmented ratings, unless the list will be used to fill professional positions at the GS–9 level and above, or equivalent;

(ii) All other qualified candidates in the order of their augmented ratings. At each score, qualified candidates eligible for 10-point preference will be entered ahead of those eligible for 5-point preference, and those eligible for 5-point preference will be entered ahead of those not eligible for veteran preference.

(b) *Reemployment list.* The reemployment list may include the names of current employees of the agency and of former employees of the agency who are to be considered for future employment. The list must, however, in all cases, include the following:

* * * * *

7. In § 302.304, paragraphs (a) and (d) are revised as set forth below and a new paragraph (e) is added to read as follows:

§ 302.304 Arrangement of ratings.

(a) *Order of consideration.* Except as provided in paragraphs (d) and (e) of this section, an agency shall consider applicants who have been assigned eligible ratings for a given position in either Order A or Order B, as set forth in paragraphs (b) and (c) of this section.

* * * * *

(d) *Professional order.* An agency shall consider applicants who have been assigned eligible ratings for professional and scientific positions at the GS–9 level and above, or equivalent, in the following order:

(1) *Applicants on the agency's reemployment list.* If numerical scores have been assigned, the applicants will be considered in the order of their augmented scores. If numerical scores have not been assigned, all preference eligibles will be considered together, regardless of the type of preference, followed by all other reemployment candidates.

(2) *Applicants on the regular employment list.* If numerical scores have been assigned, the applicants will be considered in the order of their augmented scores. If numerical scores have not been assigned, all preference eligibles will be considered together, regardless of the type of preference, followed by all other candidates.

(e) *Unranked order.* When numerical scores are not assigned, the agency may consider applicants who have received eligible ratings for positions not covered by paragraph (d) of this section in either of the following orders:

(1) *By preference status.* Under this method, preference eligibles having a compensable service-connected disability of 10 percent or more are considered first, followed by other preference eligibles and, last, by non-preference eligibles. Within each preference category, applicants from the reemployment list will be placed ahead of applicants from the regular employment list.

(2) *By reemployment/regular list status.* Under this method, all applicants on the reemployment list are considered before applicants on the regular employment list. On each list, preference eligibles having a compensable service-connected disability of 10 percent or more are considered first, followed by other preference eligibles and, last, by non-preference eligibles.

8. In § 302.401, the introductory text of paragraph (a) is revised to read as follows:

§ 302.401 Selection and appointment.

(a) *Selection.* When making an appointment from a reemployment or regular list on which candidates have not received numerical scores, an agency must make its selection from the highest available preference category, as long as at least three candidates remain in that group. When fewer than three candidates remain in that group. When fewer than three candidates remain in the highest category, consideration may be expanded to include the next category. When making an appointment from a list on which candidates have received numerical scores, the agency must make its selection for each vacancy from not more than the highest three names available for appointment in the order provided in § 302.304. Under either method, an agency is not required to—

* * * * *

PART 333—RECRUITMENT AND SELECTION FOR TEMPORARY AND TERM APPOINTMENTS OUTSIDE THE REGISTER

9. The authority citation for Part 333 continues to read as follows:

Authority: 5 U.S.C. 1302, 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.

10. The following sentence is added to the end of § 333.101:

§ 333.101 Standards for temporary and term appointments outside the register.

***Candidates found to be qualified shall be assigned either an eligible

rating or a numerical score of at least 70 on a scale of 100.

11. Section 333.102 is redesignated as § 333.201 and revised as set forth below and a Subpart B heading is added; and a new § 333.102 is added to read as follows:

§ 333.102 Preference in temporary and term appointments outside the register.

In actions subject to this part, each agency shall grant veteran preference as follows:

(a) When numerical scores are used in evaluation and referral, the agency shall grant 5 additional points to preference eligibles under section 2108(3) (A) and (B) of title 5, United States Code, and 10 additional points to preference eligibles under section 2108(3) (C) through (G) of that title.

(b) When eligible candidates are referred without ranking, the agency shall note preference as "CP" for preference eligibles under section 2108(3)(C) of title 5, United States Code, and as "TP" for all other preference eligibles under that title.

Subpart B—Consideration for Appointment

§ 333.201 Making appointments from an unranked list.

In making temporary and term appointments from a list of eligible candidates who have not received numerical scores, an agency shall give preference to preference eligibles as follows:

(a) for professional and scientific positions at the GS–9 level and above, or equivalent, preference shall be given to preference eligibles without regard to the type of preference.

(b) For other positions, preference shall be given first to preference eligibles with compensable service-connected disability of 10 percent or more, and second to other preference eligibles.

(c) Except as provided in paragraphs (b) and (c) of § 333.202, qualified candidates not eligible for veteran preference may be selected only when no qualified veteran preference eligibles are available.

12. A new § 333.202 is added to Subpart B to read as follows:

§ 333.202 Making appointments from a numerically ranked list.

(a) *Establishing the list.* An agency shall enter the names of all applicants having an eligible numerical score on the employment list in the following order:

(1) Preference eligibles having a compensable service-connected disability of 10 percent or more in the order of their augmented ratings, unless the list will be used to fill professional positions at the GS–9 level and above, or equivalent;

(2) All other qualified candidates in the order of their augmented ratings. At each score, qualified candidates eligible for 10-point preference will be entered ahead of those eligible for 5-point preference, and those eligible for 5-point preference will be entered ahead of those not eligible for veteran preference.

(b) *Selection.* When making an appointment from a list on which candidates have received numerical scores, the agency must make its selection for each vacancy from not more than the highest three names available for appointment in the order provided in paragraph (a) of this section, except that an agency is not required to—

(1) Consider an applicant who has previously been considered three times by the same appointing officer for positions at the same grade level and for the same line of work;

(2) Consider a preference eligible whose eligibility for further consideration for the position has been discontinued as provided in paragraph (c) of this section.

(c) *Passing over a preference eligible.* When an agency making an appointment passes over the name of a preference eligible who is entitled to prior consideration under paragraph (a) of this section and selects a nonpreference eligible, the agency must record its reasons for so doing, and must furnish a copy of those reasons to the preference eligible or to his or her representative on request. An agency may discontinue consideration of a preference eligible for a position if, on three occasions, the agency has considered the candidate for the position and has passed over his or her name and recorded its reasons for so doing.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 87–176]

7 CFR Part 319

Importation of Apples, Peaches, and Citrus From Sonora

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the Fruits and Vegetables regulations by specifying definite areas in Sonora, Mexico, which the Administrator of the Animal and Plant Health Inspection Service has determined to be free from certain injurious insect pests and from which apples, grapefruit, oranges, peaches, and tangerines may be imported without treatment for these pests. This action would allow the importation in accordance with the regulations of these fruits from the specified definite areas.

DATE: Consideration will be given only to comments postmarked or received on or before January 28, 1988.

ADDRESS: Send an original and two copies of written comments to Steven B. Farbman, Assistant Director, Regulatory Coordination, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket Number 87–176. Comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Frank Cooper, Senior Operations Officer, Port Operations Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 666, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8248.

SUPPLEMENTARY INFORMATION: The Fruits and Vegetables regulations in 7 CFR 319.56 *et seq.* (referred to below as the regulations) impose restrictions on the importation of fruits and vegetables in order to prevent the introduction and dissemination of injurious insects, including fruit flies, that are new to or not widely distributed within and throughout the United States.

In a final rule published in the **Federal Register** on August 7, 1987 (52 FR 29369–29371, Docket Number 87–020), we amended § 319.56–2 by, among other things, adding new paragraphs (e)(4) and (f), which provided requirements for importation of certain fruits and vegetables based on their origin in a definite area or district. The definite area or district must meet certain criteria designated to ensure that it is free from all or certain injurious insects, and certain other criteria. Section 319.56–2(e)(4) allows importation of a fruit or vegetable that:

(4) Is imported from a definite area or district of the country of origin that is free from certain injurious insects that attack the fruit or vegetable, its importation can be

authorized without risk, and the criteria of paragraph (f) of this section are met with regard to those certain insects, provided that all other injurious insects that attack the fruit or vegetable in the area or district of the country of origin have been eliminated from the fruit or vegetable by treatment or any other procedures that may be prescribed by the Deputy Administrator.

Section 319.56–2(f) contains the criteria by which the Administrator [1] designates definite areas or districts. These criteria are as follows:

(f) Before the Deputy Administrator may authorize importation of a fruit or vegetable under § 319.56–2(e) (3) or (4), he or she must determine that the following criteria have been met: (1) Within the past 12 months, the plant protection service of the country of origin has established the absence of infestations of injurious insects known to attack fruits or vegetables in the definite area or district based on surveys performed in accordance with requirements approved by the Deputy Administrator as adequate to detect these infestations; (2) the country of origin has adopted and is enforcing requirements to prevent the introduction of injurious insects known to attack fruits and vegetables into the definite area or district of the country of origin that are deemed by the Deputy Administrator to be at least equivalent to those requirements imposed under this chapter to prevent the introduction into the United States and interstate spread of injurious insects; and (3) the plant protection service of the country of origin has submitted to the Deputy Administrator written detailed procedures for the conduct of surveys and the enforcement of requirements under this paragraph to prevent the introduction of injurious insects. When used to authorize importation under § 319.56–2(e)(3), the criteria must be applied to all injurious insects that attack the fruit or vegetable; when used to authorize importation under § 319.56–2(e)(4), the criteria must be applied to those particular injurious insects from which the area or district is to be considered free.

The Administrator of the Animal and Plant Health Inspection Service (APHIS) has determined that certain areas in the state of Sonora, Mexico, meet all the criteria contained in §§ 319.56–2(e)(4) and 319.56–2(f) for importation of fruit from definite areas and districts free from certain injurious insects, specifically five types of fruit flies (*Ceratitis capitata, Anastrepha ludens, A. serpentina, A. obliqua,* and *A. fraterculus*), which are known to occur in Mexico and attack apples, grapefruit, oranges, peaches, and/or tangerines.

The criteria of § 319.56–2(e)(4) are met in that the definite areas are free from the five listed fruit flies, the criteria of § 319.56–2(f) are met with regard to those fruit flies (as discussed below), and articles imported from the definite areas would still be subject to all treatments or other procedures required by 7 CFR Part 319 for pests other than the five listed fruit flies. Under these circumstances, the Administrator has determined that apples, grapefruit, oranges, peaches, and tangerines may be imported from the definite areas without risk.

The criteria contained in § 319.56–2(f) are met as described below.

The definite areas are the municipalities of Altar, Atil, Caborca, Carbo, Empalme, Guaymas, Hermosillo, Pitiquito, Puerto Penasco, and San Miguel. Each municipality forms one definite area.

For the past 12 months, the Mexican Ministry of Agriculture and Water has performed trapping surveys that showed these municipalities to be free from the listed fruit flies. The Administrator has determined that the methods employed in these surveys are adequate to detect infestations of these insects.

The Mexican government has adopted and is enforcing requirements to prevent the introduction of the listed fruit flies into any of the municipalities that form the definite areas. The Administrator has determined that these requirements are at least equivalent to the requirements imposed by 7 CFR Chapter III to prevent the introduction and dissemination of the listed fruit flies into and within the United States.

The Mexican Ministry of Agriculture and Water Resources has submitted to the Administrator detailed procedures for the conduct of pest surveys in these municipalities and the enforcement of requirements to exclude the listed fruit flies from these municipalities. The Administrator has reviewed these procedures and has determined that they meet the requirements of the regulations.

Based on the procedures submitted by the Mexican Ministry of Agriculture and Water Resources, we believe that apples, grapefruit, oranges, peaches, and tangerines may be imported from the municipalities proposed as definite areas without risk and without treatment for the five listed fruit flies.

Therefore, we propose to add a new paragraph (h) to § 319.56–2, listing the areas in Sonora, Mexico, that meet the requirements for definite areas. The paragraph would read as follows:

(h) The Administrator has determined that the following municipalities in Sonora, Mexico, meet the criteria of § 319.56–2 (e) and (f) with regard to the insect pests *Ceratitis capitata, Anastrepha ludens, A. serpentina, A. obliqua,* and *A. fraterculus*: Altar; Atil; Caborca; Carbo, Empalme; Guaymas; Hermosillo; Pitiquito; Puerto Penasco; and San Miguel. Apples, grapefruit, oranges, peaches, and tangerines may be imported from these areas without treatment for the pests named in this paragraph.

We also propose to add a new paragraph (g) to § 319.56–2 that would require that each box of fruit exported to the United States under §§ 319.56–2 (e)(4) and (f) must be clearly labelled with: (1) The name of the orchard or grove of origin, or the name of the grower, and (2) the name of the municipality and state in which it was produced, and (3) the type and amount of fruit it contains. This provision would help ensure that only fruit from approved definite areas would be allowed importation under §§ 319.56–2 (e)(4) and (f).

Executive Order 12291 and Regulatory Flexibility Act

We are proposing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this proposed rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The primary effect of adoption of this proposal would be to allow the importation of apples, grapefruit, oranges, peaches, and tangerines, from the listed definite areas without treatment for the five listed fruit flies. This would increase imports of these articles, by lowering the import costs through eliminating the cost of treatments, and would result in increased competition for United States growers of these articles. Adoption of this proposal could have economic effects on importers of these articles, on fumigators at the Mexican border, and on dometic growers, distributors, and retailers of these fruits.

The scale of these effects should be very small. Less than 1% of the citrus, apples, and peaches consumed in the United States comes from Sonora. While the amount imported should increase slightly if this proposal is adopted, Sonora is not a major production area for these articles and cannot supply

[1] Due to changes in agency operating procedures, we are proposing to change "Deputy Administrator" to "Administrator" throughout § 319.56–2.

much more than is currently being imported; we therefore believe that Sonora will continue to supply much less than 1% of the United States citrus, apple, and peach consumption.

Furthermore, imported Sonoran fruit may be marketed in all parts of the United States, and the effects of this importation would be distributed over hundreds of thousands of small fruit growers, distributors, and retailers. With such a dispersed market, and such a large number of small entities involved, we do not expect a significant economic impact on a substantial number of small entities.

Under these circumstances, the Administrator of the Animal and Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), we have submitted the information collection provisions in this rule to the Office of Management and Budget (OMB) for approval. You may send written comments on these provisions to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for APHIS, Washington, DC 20503. Please send a copy of your comments to Steven B. Farbman, Assistant Director, Regulatory Coordination, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

List of Subjects in 7 CFR Part 319

Agricultural commodities, Imports, Plant diseases, Plant pests, Plants (Agriculture), Quarantine, Transportation.

PART 319—FOREIGN QUARANTINE NOTICES

Accordingly, 7 CFR Part 319 would be amended as follows:

1. The authority citation for 7 CFR Part 319 would continue to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167; 7 CFR 2.17, 2.51, and 371.2(c).

2. In § 319.56–2, paragraph (g) would be redesignated as (i).

3. In § 319.56–2, new paragraphs (g) and (h) would be added to read as follows:

§ 319.56–2 Restrictions on entry of fruits and vegetables.

* * * * *

(g) Each box of fruit or vegetables imported into the United States in accordance with §§ 319.56–2(e) (3) or (4) and § 319.56–2(f) must be clearly labelled with:

(1) The name of the orchard or grove of origin, or the name of the grower, and

(2) The name of the municipality and state in which it was produced, and

(3) The type and amount of fruit it contains.

(h) The Administrator has determined that the following municipalities in Sonora, Mexico, meet the criteria of § 319.56–2 (e) and (f) with regard to the insect pests *Ceratitis capitata, Anastrepha ludens, A. serpentina, A. obliqua,* and *A. fraterculus*: Altar; Atil; Caborca; Carbo; Empalme; Guaymas; Hermosillo; Pitiquito; Puerto Penasco, and San Miguel. Apples, grapefruit, oranges, peaches, and tangerines may be imported from these areas without treatment for the pests named in this paragraph.

* * * * *

Done at Washington, DC, this 23rd day of December 1987.

Donald Houston,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–M

Commodity Credit Corporation

7 CFR Part 1403

Interest on Delinquent Debts

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The Commodity Credit Corporation (CCC) proposes to revise the regulation for the assessment of late payment charges on delinquent debts owed to CCC from 30-day periods to assessment on a daily basis and to revise the definition of "late payment charge" to be synonymous with "late payment interest" and "claim interest". The authority for the regulation is the Commodity Credit Corporation Charter Act.

DATES: Comments must be received on or before January 28, 1988 to be assured consideration.

ADDRESSES: Comments should be addressed to the Director, Fiscal Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC, 20013. All comments submitted in response to this proposed rule will be available for public inspection in Room 6094, South Agriculture Building, 14th and Independence Avenue, SW, Washington, DC, between 8:30 am and 4:00 pm, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Andree DuVarney, Claims Specialist, (202) 447–4070.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed in conformance with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" because this rule will not result in: (1) Annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, federal, State or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or in the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action does not constitute a review as to need, currency, clarity, and effectiveness of these regulations under Departmental Regulation 1512–1. No sunset review date has been set for this regulation because review is ongoing.

This action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is needed.

This activity is not subject to the provisions of Executive Order 12372 which requires intergovermental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

It has been determined that the Regulatory Flexibility Act is not applicable to this rule since this rule will not increase the federal paperwork burden for individuals, small businesses or other persons, and CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

The titles and numbers of the Federal Domestic Assistance Programs to which this proposed rule applies are: Commodity Loans and Purchases 10.051; Cotton Production Stabilization, 10.052; Feed Grain Production Stabilization, 10.055; Storage Facilities and Equipment loans, 10.056; Wheat Production Stabilization, 10.058; Rice Production Stabilization, 10.065; Grain Reserve Program, 10.067; as listed in the Catalog of Federal Domestic Assistance.

If a debt is repaid early in a 30-day period late payment charge is nonetheless assessed for the portion of the period during which no debt was owed. Therefore, there is no incentive for a debtor to pay a debt early in a 30-day period. The same amount of interest will be due whether the payment is made at the beginning of a 30-day period or at the end. The proposed revision to the regulation permits late payment charges to be assessed daily rather than for each 30-day period. This revision will more closely align the calculation of late payment charge with the calculation of interest charged for other USDA programs, will provide an incentive to debtors to repay debts earlier and will spread the CCC workload throughout the month.

The proposal to revise the regulation to define "late payment charge" to be synonymous with "late payment interest" and "claim interest" is made to clarify the meaning of the terms to the public.

The Attorney General and Comptroller General have jointly promulgated the Federal Claims Collection Standards (FCCS) in 4 CFR Parts 101 through 105 as mandated by the Federal Claims Collection Act of 1966, as amended (31 U.S.C. 3711–3719). CCC is generally exempt from the provisions of FCCS, since CCC has the authority under Section 4(k) of the CCC Charter Act (15 U.S.C. 714b(k)) to make final and conclusive settlement and adjustment of all its claims. However, the Board of Directors, CCC, has administratively determined the FCCS will be applicable to claims by CCC (CCC Claims Policy Docket CZ161a, Revision 4).

The FCCS requires that interest be charged on delinquent debts. In accordance with the FCCS, CCC issued regulations at 7 CFR Part 1403, to provide at 7 CFR 1403.3(c) that the late payment charge will be applied to delinquent debts for each 30-day period and that the full amount of the late payment charge will also be applicable to periods of less than 30 days. Since the effect of the regulation is to bunch payments at the end of the month, CCC has determined to charge late payment charge on a daily basis to provides some incentive to spread payments throughout the month.

Accordingly, the regulations at 7 CFR Part 1403 are amended as follows:

PART 1403—[AMENDED]

1. The authority citation for Part 1403 continues to read as follows:

Authority: Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714b. Interpret or apply sec. 407, 63 Stat. 1055, as amended, 7 U.S.C. 1427.

2. 7 CFR sec. 1403.2 is amended by revising paragraph (a) to read as follows:

§ 1403.2 Definitions.

(a) "Late payment charge", "late payment interest", and "claim interest" are deemed synonymous and are used interchangeably. These terms mean the amount of interest charged on delinquent debts.

* * * * *

3. 7 CFR 1403.3 is amended by revising paragraph (c) to read as follows:

§ 1403.3 Late payment charge.

* * * * *

(c) The late payment charge will be computed on a daily basis through the date payment is received by CCC.

Signed at Washington, DC., on December 21, 1987.

Milton Hertz,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

Animal and Plant Health Inspection Service

9 CFR Part 51

[Docket No. 87–139]

Animals Destroyed Because of Brucellosis

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We propose to amend the regulations governing the payment of indemnity for animals destroyed because of brucellosis by adding the Simbrah Association to the list of registered breed associations. This action is necessary to include all registered breed associations in the regulations. These associations register purebred animals, maintaining individual animal records that are critical for proper payment of indemnities to owners of cattle destroyed because of brucellosis. The payment of indemnities, in turn, encourages the elimination of cattle that may spread brucellosis.

DATE: Consideration will be given only to comments postmarked or received on or before January 28, 1988.

ADDRESSES: Send an original and two copies of written comments to Steven B. Farbman, Assistant Director, Regulatory Coordination, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Specifically refere to Docket Number 87–139. You may review these comments at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION: Dr. R.D. Hobbs, Senior Staff Veterinarian, Regulatory Communications and Compliance Policy Staff, VS, APHIS, USDA, Room 827, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–5861.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 51 (referred to below as the regulations) provide for the payment of indemnities to owners of cattle, bison, and swine destroyed because of brucellosis. Our experience indicates that, if these indemnities were not paid, many owners would not cooperate in the timely removal of infected animals from the herd or, in the case of herd depopulation, in removing a focus of infection in an otherwise clear area to prevent transmission of brucellosis to nearby, susceptible herds.

Under § 51.3(a)(1) of the regulations, the indemnity shall not exceed $250 for any registered cattle or nonregistered dairy cattle or, with certain exceptions, $50 for any nonregistered cattle or bison. Section 51.3(a)(2) also sets indemnity rates for cattle and bison, including registered cattle, destroyed during herd depopulation. These rates, too, are higher for registered cattle and nonregistered dairy cattle than for other nonregistered cattle and bison.

Section 51.1 of the regulations lists known registered breed associations. It also defines a registered breed association as:

An association formed and perpetuated for the maintanance of records of purebreeding of animal species for a specific breed whose characteristics are set forth in Constitutions, By-Laws, and other rules of the association. The records maintained by such an association shall include an Official Herd Book or other recordkeeping format and Certificates of Registration or Recordation

which identify an animal as registered animal of that registered breed association.

Registered animals are purebreds registered with a breed association listed in § 51.1 of the regulations. To receive indemnity for registered cattle destroyed because of brucellosis, an owner must provide registration papers in that owner's name for each animal destroyed.

The Simbrah Association petitioned APHIS to list it in § 51.1 of the regulations as a registered breed association. It provided APHIS with documents demonstrating that it qualified as a registered breed association. Since the Simbrah Association appears to meet the criteria for registered breed associations in § 51.1, we propose to add it to the list.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule would have an effect on the economy of less that $100 million; would not cause a major increase in costs or prices for consumers, individuals, industries, federal, state, or local government agencies, or geographic regions; and would not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

The economic impact of this proposed rule is that it would allow approximately 2,200 small cattle producers owning registered Simbrah to receive a higher indemnity rate if these cattle must be destroyed because of brucellosis. There are many thousands of small cattle producers who do not own this registered breed of cattle and would therefore not be affected by this proposed rule.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR 3015, Subpart V.)

List of Subjects in 9 CFR Part 51

Animal diseases, Bison, Brucellosis, Cattle, Hogs, Indemnity payments.

PART 51—ANIMALS DESTROYED BECAUSE OF BRUCELLOSIS

Accordingly, 9 CFR Part 51 would be amended as follows:

1. The authority citation for Part 51 would continue to read as follows:

Authority: 21 U.S.C. 111–113, 114, 114a, 114a–1, 120, 121, 125, 134b; 7 CFR 2.17, 2.51, and 371.2(d).

§ 51.1 [Amended]

2. In § 51.1, the definition of "Registered breed association" would be amended by inserting "Simbrah Association," immediately after "Santa Gertrudis Breeders International,".

Done in Washington, DC, this 22nd day of December 1987.

Donald Houston,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 87-29717 Filed 12-28-87; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-101-86]

Taxable Years of Certain Partnerships

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary income tax regulations relating to the taxable years of certain partnerships. The text of the temporary regulations serves as the comment document for this notice of proposed rulemaking.

DATES: The proposed amendments to the Income Tax Regulations contained in this document would be effective for partnership taxable years beginning after December 31, 1986.

Written comments and requests for a public hearing must be delivered or mailed by February 29, 1988.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-101-86) Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Beverly A. Baughman of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Ave., NW., Washington, DC 20224, Attention: CC:LR:T (202-566-3297, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations portion of this issue of the **Federal Register** amend the Income Tax Regulations (26 CFR Part 1) under section 706.

For the text of the temporary regulations see T.D. 8169 published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations explains the addition to the regulations.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Although this document is a notice of proposed rulemaking the solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Gail H. Morse of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

Lawrence B. Gibbs,

Commisioner of Internal Revenue.

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 934

Reopening of Public Comment Period; Proposed Amendment VII; North Dakota Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Reopening of public comment period.

SUMMARY: OSMRE is reopening the period for review and public comment on an amendment submitted by the State of North Dakota to modify its permanent regulatory program. On April 14, 1987 (52 FR 12002), OSMRE announced a public comment period and procedures for requesting a public hearing on the proposed amendment to the North Dakota permanent program which was approved by the Secretary of the Interior under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consisted of modifications to North Dakota Administrative Code (NDAC) Article 69-05.2 on performance bonds and liability insurance, postmining land use, and signs and markers. On September 23, 1987 (52 FR 35735), OSMRE reopened the comment period to allow the public an opportunity to comment on additional materials relating to the proposed amendment submitted August 24, 1987 by North Dakota in response to an issue letter from OSMRE July 27, 1987.

OSMRE is again reopening the comment period to allow the public an opportunity to comment on additional material relating to the proposed amendment submitted December 14, 1987 by North Dakota in response to an issue letter from OSMRE December 10, 1987.

This notice sets forth the times and locations that the proposed amendment as modified is available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment and information pertinent to the public hearing.

DATES: Written comments, data or other relevant information not received on or before 4:00 p.m. on January 13, 1988 will not necessarily be considered.

ADDRESSES: Written comments should be mailed or hand-delivered to Mr. Jerry R. Ennis, Director, Office of Surface Mining Reclamation and Enforcement, Casper Field Office, Federal Building, 100 East "B" Street, Room 2128, Casper, Wyoming 82601-1918

The public hearing, if requested, will be held at the North Dakota Capitol Building, Bismarck, North Dakota 58505.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry R. Ennis, Director, Office of Surface Mining Reclamation and Enforcement, Casper Field Office, Federal Building, 100 East "B" Street, Room 2128, Casper, Wyoming 82601-1918; Telephone: (307) 261-5776. Copies of the North Dakota program amendment, the North Dakota program, and the administrative record on the North Dakota program are available for public review and copying at the OSMRE offices and the office of the State regulatory authority listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Administrative Record, 1100 L Street NW., Room 5131, Washington, DC 20240.

Office of Surface Mining Reclamation and Enforcement, 100 East "B" Street, Room 2128, Casper, Wyoming 82601-1918.

North Dakota Public Service Commission, Reclamation Division, Capitol Building, Bismarck, North Dakota 58505.

SUPPLEMENTARY INFORMATION:

I. Background

Information concerning the general background on the permanent program, general background on the State program approval process, general background on the North Dakota program submission, Secretary's findings, disposition of public comments and Secretary's decision of conditional approval can be found in the December 15, 1980 **Federal Register** (45 FR 82214). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 934.10, 934.10, 934.12, 934.13, and 934.15.

II. Proposed Amendment

On February 17, 1987, the State of North Dakota submitted to OSMRE an amendment to its approved permanent regulatory program. The amendment consisted of revisions to the approved North Dakota regulations. The amended section of the regulations and brief description of the amended subject area is as follows: Section 69-05.2-12 performance bonds—liability insurance; section 69-05.2-13-04 performance standards—general requirements—signs and markers; and section 69-05.2-23 performance standards—postmining land use.

OSMRE is seeking comment on whether North Dakota's proposed revisions to its regulations are in accordance with SMCRA and no less effective than the requirements of the revised Federal regulations and satisfy the criteria for approval of State program amendments at 30 CFR 732.15 and 732.17.

The full text of the proposed program and modifications submitted by North Dakota for OSMRE's consideration are available for public review at the addresses listed.

During review of this amendment, OSMRE identified several concerns. OSMRE notified North Dakota of these concerns by letter dated July 27, 1987, and again December 10, 1987.

By letters received August 24, 1987 and December 14, 1987 North Dakota outlined its proposed remedies to meet OSMRE's concerns. The full text of these letters are available for review at the locations listed above under "addresses." OSMRE is now seeking comment on the December 14, 1987 response from North Dakota.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-87-080]

Drawbridge Operation Regulations; Anacostia River, Washington, DC

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of CONRAIL, the Coast Guard is considering amending the regulations governing the

operation of the vertical lift railroad bridge across the Anacostia River, at mile 3.4, in Washington, DC. The proposal would require eight hours advance notice for all bridge openings from October 1 through March 31 and for bridge openings on weekdays, other than Federal Holidays, between the hours of 11:00 p.m. to 7:00 a.m., from April 1 through September 30. This eliminates the need to have a person constantly available to open the draw during a time of the year when few vessels transit the river. It should provide for the reasonable needs of navigation.

DATE: Comments must be received on or before February 12, 1988.

ADDRESSES: Comments should be mailed to Commander (oan), 431 Crawford Street, Fifth Coast Guard District, Portsmouth, Virginia 23704–5004. The comments and other materials referenced in this notice will be available for inspection and copying at 431 Crawford Street, Room 507, Portsmouth, Virginia. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, (804) 398–6222.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal.

The Commander, Fifth Coast Guard District will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Linda L. Gilliam, Project Officer, and CDR Robert J. Reining, Project Attorney.

Discussion of Proposed Regulations

In December 1986, CONRAIL requested that the regulations for the railroad bridge be amended to restrict the openings of the bridge at all times between October 1 through March 31 and between 11:00 p.m. and 7:00 p.m. between April 1 through September 30. During these timeframes the bridge would only open if eight hours advance notice was given.

The current regulations in 33 CFR 117.253 require the railroad bridge to open on signal on weekdays, between 10:00 a.m. to 8:00 p.m. and at all times on Saturdays, Sundays, and Federal Holidays from April 1 to September 30. The draw is only required to open on signal on the hour from 8:00 a.m. to 10:00 a.m., on Mondays through Fridays, other than Federal Holidays, from April 1 through September 30, and from 10:00 a.m. to 6:00 p.m., on Saturdays, Sundays, and Federal Holidays, from October 1 through March 31. At all other times the draw is required to open on signal, if at least two hours notice is given.

The requested change increases the hours on weekdays during the boating season when the bridge is required to open on signal. If adopted, the bridge will be required to open on signal three hours earlier in the mornings and three hours longer in the evenings. The proposal eliminates the hourly openings during the nights on weekdays during the boating season and during the day on Saturdays, Sundays, and Federal Holidays during the late fall and winter months. The proposal also changes time required for advance notice from two hours to eight hours. The logs submitted by CONRAIL show that from October 1, 1985, through March 31, 1986, the bridge only opened a total of 50 times, an average of approximately 8 times a month. During the evenings from April 1, 1986, through September 30, 1986, the bridge opened 42 times. Based on this information, CONRAIL requested the elimination of the opening schedule for the winter months and the evenings during the boating season. They argue that there is insufficient waterway traffic to justify manning of this span on a continual basis all year round. They feel it would be more cost effective to provide a drawtender when eight hours advance notice is provided for openings during the evening hours of the boating season and during the winter months.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnnecessary. Because of the infrequent openings during the winter months and the evening hours of the boating season, the economic impact should be minimal. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 is amended to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).)

2. Section 117.253(b) is revised to read as follows:

§ 117.253 Anacostia River.

* * * * *

(b) The draw of the CONRAIL bridge, mile 3.4, shall open as follows:

(1) On signal on Saturdays, Sundays, and Federal holidays from April 1 through September 30.

(2) On signal on weekdays, which are not Federal Holidays, between 7:00 a.m., and 11:00 p.m., from April 1 through 30 September.

(3) On signal, if at least eight hours notice is given, at all other times.

(4) On signal at all times for public vessels of the United States, state and local government vessels, commercial vessels, and any vessel in an emergency involving danger to life or property.

Dated: December 8, 1987.

A. D. Breed,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

[FR Doc. 87–29755 Filed 12–28–87; 8:45 am]

BILLING CODE 4910–14–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[General Docket 87–551; FCC 87–375]

Radiofrequency Radiation Compliance of FM Booster Stations

AGENCY: Federal Communications Commission (FCC).

ACTION: Proposed rule.

SUMMARY: This item proposes to amend Part 1 of the Commission's Rules to add FM booster stations, licensed under Part 74, Subpart L, to the category of transmitters to which § 1.1307(b) applies. Section 1.1307(b) specifies that certain classes of transmitters must be analyzed for their potential to cause significant human exposure to radiofrequency (RF) radiation. This item is a direct result of the Commission's recent *Report and Order* in MM Docket 87–13 allowing significantly higher operating powers for this class of stations. The present proceeding is a consequence of the Commission's responsibilities under the National Environmental Policy Act of 1969 to evaluate environmental impact from FCC-regulated facilities.

DATES: Interested parties may file comments on or before February 8, 1988, reply comments on or before February 23, 1988.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Dr. Robert Cleveland, Office of Engineering and Technology, FCC, telephone (202) 653–8169.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Notice of Proposed Rule Making*, General Docket 87–551, FCC 87–375, Adopted December 1, 1987, and Released December 17, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

FM booster stations are a special class of FM translators that provide service to areas normally unable to receive satisfactory service from the full service stations due to terrain obstructions. Until recently such stations were limited to output powers of 10 watts or less. On July 16, 1987, (published in the **FEDERAL REGISTER** April 20, 1987, 52 FR 31398) the Commission adopted a *Report and Order* amending Part 74 of the FCC's Rules to permit substantial increases in the output power of FM booster stations. The new rules went into effect on September 21, 1987.

FM translators, licensed under Part 74, Subpart L, were previously categorically excluded from the requirement for evaluation of environmental radiofrequency radiation specified in § 1.1307(b) of the Commission's Rules. This exclusion was based primarily on the low power limitation for these transmitters. However, now that this power limitation has been relaxed, the Commission is proposing to revoke the categorical exclusion for this class of transmitting facilities. Although, in general, it is unlikely that these stations would cause excessive environmental exposures, the Commission no longer believes that a categorical exclusion is justified.

Initial Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rule will not, if promulgated, have a significant economic impact on a substantial number of small entities since the proposed rule is designed to provide for compliance with environmental requirements while simultaneously minimizing burden on applicants. It is expected that relatively few applicants would have an environmental problem that would lead to significant impact.

Paperwork Reduction Act

The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose new or modified requirements or burden upon the public. Implementation of any new or modified requirement or burden will be subject to approval by the Office of Management and Budget as prescribed by the Act.

Ex Parte

This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

Ordering Clauses

Accordingly, IT IS ORDERED that there is hereby instituted a *Notice of Proposed Rule Making* in this proceeding to amend Part 1 of the Commission's Rules and Regulations as set forth below. All interested persons may file comments on this specific proposal on or before February 8, 1988. Reply comments shall be filed on or before February 23, 1988. In accordance with § 1.1419, an original and five (5) copies of all filings shall be furnished to the Commission. Copies of comments and reply comments filed in this proceeding will be available for public inspection during regular business hours in the Commission's Reference Room at 1919 M Street, NW., Washington, DC 20554.

List of Subjects in 47 CFR Part 1

Practice and procedure, National Environmental Policy Act, Radiofrequency radiation.

Proposed Rule Changes

It is proposed to amend Part 1, Subpart I, of Title 47 of the Code of Federal Regulations as follows:

PART 1—PRACTICE AND PROCEDURE

The authority citation for Part 1 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303; implement, 5 U.S.C. 552, unless otherwise noted.

In § 1.1307, it is proposed that the note in paragraph (b) be revised as follows:

§ 1.1307 Actions which may have a significant environmental effect, for which environmental assessments (EAs) must be prepared.

* * * * *

(b) * * *

Note—Paragraph (b) shall only apply to facilities and operations licensed or authorized under Parts 5, 25, 73, and 74 (Subparts A, G, and L only). Facilities and operations licensed or authorized under other Parts or Subparts of the Commission's Rules shall be categorically excluded from consideration under paragraph (b) unless such exclusion is superseded by actions taken by the Commission under the provisions of paragraphs (c) or (d) of this section.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Denial of Petition for Rulemaking; Vehicle Rollover Resistance

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petition for rulemaking.

SUMMARY: The agency denies a petition for rulemaking submitted by Senator Timothy E. Wirth regarding vehicle rollover resistance. Senator Wirth petitioned the agency to: (1) Initiate rulemaking to establish a Federal motor vehicle safety standard to limit the rollover propensity of passenger cars, utility vehicles and pickup trucks, by requiring that those vehicles have a "stability factor" equal to or exceeding a specified minimum value; (2) open a

BEST COPY AVAILABLE

defect investigation of those existing vehicles whose stability factor is less than the minimum required by the standard requested above, to determine whether such vehicles should be retrofitted with roll cages; (3) obtain stability factor and rollover information for all vehicles sold in this country and make that information available to the public; and, (4) warn owners of vehicles with the greatest propensity for rollover of the operational limits of their vehicles and inform them of the steps they can take to prevent death and injury from a vehicle rollover.

NHTSA is denying Senator Wirth's request to establish a rollover safety standard because the agency has determined that, while there is a significant rollover problem and while a vehicle's stability factor has some relation to its overall involvement in rollover accidents, basing an effort to address the rollover problem on the stability factor alone is too narrow and inappropriate an approach. The order requested by the petitioner would neither adequately encompass the causes of vehicle rollover nor satisfactorily ameliorate the problem. Further, such an order might induce manufacturers to take actions that in some instances could have a net adverse effect on safety. Such an order could even result in outlawing all or most of an entire vehicle type. The agency believes it may be appropriate to consider rulemaking on vehicle rollover characteristics when its ongoing and planned research relating to stability and other aspects of the problem is completed.

The agency will respond to the petitioner's second request, the one for a defect proceeding, in a separate notice.

The agency is denying the petitioner's third request, i.e., to publish stability factor and rollover information. The agency does not agree with the petitioner that the stability factor alone is an accurate predictor of rollover involvement. Thus, the agency does not believe that this information will prove instructive to consumers.

However, the agency believes that the petitioner's fourth request has merit and accordingly has published an informational brochure that provides utility vehicle owners with safety information on the handling characteristics of their vehicles.

FOR FURTHER INFORMATION CONTACT:
Mr. Scott Shadle, Crash Avoidance Division, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590. Telephone (202) 366–5273.

SUPPLEMENTARY INFORMATION:

Petition for Rulemaking

In September 1986, Senator Timothy E. Wirth petitioned NHTSA to commence rulemaking and take over actions regarding the subject of vehicle rollover resistance. More specifically, the petition asked the agency to:

(1) Initiate rulemaking to establish a Federal motor vehicle safety standard to limit the rollover propensity of passenger cars, utility vehicles and pickup trucks, by requiring that those vehicles have a stability factor (petitioner defines "stability factor" as one-half of a vehicle's track width divided by the height of the vehicle's center of gravity; or T/2/H, where T is track width and H is center of gravity height) that equals or exceeds a specified minimum value;

(2) Open a defect investigation of those existing passenger cars, utility vehicles and pickup trucks whose stability factor is less than the minimum required by the standard requested above, to determine whether such vehicles should be retrofitted with roll cages, etc.;

(3) Obtain stability factor and rollover information for all vehicles sold in this country and make that information available to the public; and,

(4) Warn owners of vehicles with the greatest propensity for rollover of the operational limits of their vehicles and inform them of the steps they can take to prevent death and injury from a vehicle rollover.

The justification in the petition for these requests is based heavily on a research report by Leon Robertson and A. Benjamin Kelley, regarding the relationship between a vehicle's physical characteristics and the vehicle's involvement in rollover accidents. In their May 1986 report, "The Role of Stability in Rollover-Initiated Fatal Motor-Vehicle Crashes Under On-Road Driving Conditions," Robertson and Kelley studied whether there was a relationship between the physical stability measurements of 14 different vehicles and the rollover rates for those vehicles. The authors studied on-road crashes, and included in their data set "those [crashes] in which a rollover of the vehicle alone was the first harmful event, those in which no other vehicle was involved but the vehicle did not initially roll over, and multiple-vehicle collisions in which the vehicle did not initially roll over." (*Id* 34) The crash records were obtained from files from the Fatal Accident Reporting System (FARS), for years 1981–1984. (FARS, a system developed and managed by NHTSA, is a census of data on all fatal traffic accidents within the United States, District of Columbia and Puerto Rico.)

Robertson and Kelley stated that they found a strong correlation between the stability values of the vehicles they studied and the vehicles' "rollover-initiated" fatal crash rates. According to the authors, the stability factor accounted for almost two-thirds (63 percent) of the variation in percent rollovers among the vehicles studied. The authors concluded that "percent rollover is a linear function of vehicle stability" (*id*, 17)—i.e., vehicles with the lowest stability values (such as some types of utility vehicles) "rollover more than vehicles with higher measures because they are * * * designed in defiance of the laws of nature."

In his petition, Senator Wirth relied heavily on the indexed stability values of the Robertson and Kelley report to argue for an "objective standard" reducing the likelihood of vehicle rollovers. The petitioner stated that the study isolated the "cause" of rollover and provided a basis for an objective and practicable safety standard. The petitioner suggested that study has thus solved what he characterized as the longstanding obstacle to setting a standard addressing rollover tendencies, i.e., the lack of repeatability found in past explorations of vehicle handling tests. The petitioner suggested that NHTSA consider Robertson and Kelley's findings and prescribe a stability factor of 1.20 "as the minimum standard acceptable level of stability." (No particular value for a stability factor is recommended in Robertson and Kelley's report. The petitioner apparently selected the 1.20 stability value because it falls in between the range of values (1.01 to 1.10) for vehicles found in the report to have excessive involvement in rollover-initiated fatal crashes and the range of values (1.21 to 1.62) for the vehicles found in the report to have lower "rollover contribution to fatal crashes.")

Agency Response to Request for Rollover Safety Standard

After receiving Senator Wirth's petition, the agency commenced a thorough review of its requests and underlying justification. The agency carefully considered the petitioner's request for the issuance of a new safety standard to address the rollover problem. As part of this effort, the agency evaluated the methodology and conclusions of the Robertson and Kelley report and supplemented that work by making its own analysis of separate and larger samples of vehicles.

NHTSA has been especially concerned with rollover crashes due to the high injury and fatality rates associated therewith, and believes that it would be desirable to ameliorate the rollover problem through reasonable and practicable means. Rollover and other vehicle stability problems were identified in the agency's May 1987 report to Congress on "Light Truck and Van Safety." The agency noted in the report that:

> Pickup trucks and multipurpose passenger vehicles have higher fatality rate in rollovers than cars. Multipurpose passenger vehicles have three times the normalized fatality rate of all vehicles. Rollovers account for 44 percent of all light truck deaths, the single largest category for such vehicles. This is compared to rollovers representing only 23 percent of passenger car fatalities.

The report also discussed agency efforts to ameliorate those problems.

The agency has several planned activities specifically relating to rollover accident data gathering and the safety of certain special vehicle types, including the crashworthiness of open-body type utility vehicles, and the stability of light trucks and utility vehicles with modified suspensions. In addition, NHTSA is developing a research plan to address the stability of all types of light duty vehicles. A summary of all these ongoing and planned activities is discussed below in the section of the preamble entitled "Future agency action."

However, based on its careful consideration of the petitioner's request for a new standard, NHTSA has determined that this request should be denied since there is not a reasonable possibility that the requested new standard would be issued at the conclusion of a rulemaking proceeding. The agency does not believe that taking the single step of prescribing a minimum stability factor is the appropriate solution to the multifaceted problem of vehicle rollover.

Before discussing its evaluation of the petition's merits, the agency wishes to emphasize a few points about Senator Wirth's petition and NHTSA's denial thereof. First, this notice deals with an assumption or hypothesis that has been made by the petitioner regarding the relationship of stability factors to rollover crashes. Because the petitioner requests a course of action that is premised on the validity of this assumption, it has been necessary for the agency to determine whether that assumption is indeed valid.

More specifically, the key issue in the agency's evaluation is whether a vehicle's stability factor has been shown to be so intrisically related to rollover that all vehicles with certain "low" stability values should be considered inherently unstable and "designed in defiance of the laws of nature" (page five of the petition, quoting from Robertson and Kelley, page 36), and their manufacture should therefore be prohibited. This is not simply a technical matter, since prohibiting an entire class of vehicles raises issues of statutory authority, as discussed below in the section entitled "Statutory consideration."

Second, it should also be noted that the discussion and analyses that follow are in some cases limited to utility vehicles. ("Utility vehicles' are defined in 49 CFR 575.105 as multipurpose passenger vehicles (other than those which are passenger car derivatives) with special features for occasional off-road operation and a wheelbase of 110 inches or less.) There are two reasons for this approach. One is that although the petition requests a standard of general applicability that would be applicable to all light duty vehicles, it is clear from the petition that Senator Wirth focuses his concern on utility vehicles. The other is that it was appropriate in the agency's analysis of data from the Fatal Accident Reporting System (the FARS analysis, described below in the section entitled "Agency analyses of larger data samples) to consider only one class of vehicle in evaluating the effects of vehicle factors. This is because the rate of a vehicle's accident involvement in various accident modes is related to the basic design characteristics of the vehicle, which in turn, reflect the function for which it was designed.

NHTSA has further determined that the conclusions made about the role of the stability factor in rollover accidents resulting from its analyses of utility vehicles are also applicable to passenger cars and light trucks, i.e., the other classes of vehicles for which the petitioner requests a proscribed stability factor. The agency is aware of no information which would indicate that conclusions made from an analysis of utility vehicles concerning the stability factor are inappropriate as regards the other vehicle types. In fact, NHTSA's analysis of state accident data (the CARDfile analysis, described below in the section entitled "Agency analyses of larger data samples) did not indicate any differences between the effect of the stability factor on utility vehicles versus passenger cars as regards the rate of rollover accident involvement.

Evaluation of Robertson and Kelley

The agency is unable to agree with the petitioner that the Robertson and Kelley report "isolates the cause of rollover," or that it shows that a vehicle's stability factor is an appropriate or accurate predictor of vehicle rollover accident involvement. As will be discussed below, the agency's analyses indicate that the stability factor is a good predictor of rollover involvement if it is applied to a subsample of particular, individual vehicles, each of which has already been involved in a single vehicle accident, and used to predict which of them rolled over during its accident. However, the analyses also show that the stability factor is not nearly as effective in predicting rollover involvement when it is applied to a sample of vehicles, none of which has been involved in an accident, and used in an effort to predict which of them will become involved in a rollover accident. The reason for the lower predictive capability in the second instance is that the stability factor does not take into consideration the full array of vehicle characteristics that contribute to a vehicle's becoming involved in an accident which includes rollover. Stated differently, the stability factor explains nearly all the variance in the rollover accident involvement of vehicles that have already become involved in a single vehicle accident. However, it explains very little of the variance of different vehicles' becoming involved in those single vehicle accidents. Thus, it is not a valid predictor of the overall risk of rollover.

The stability factor does not take into consideration such chassis and suspension variables as wheelbase, kinematic and compliance characteristics of suspensions, and spring and shock absorber characteristics. Those characteristics are related to accident involvement. The propensity of vehicles to become involved in rollover accidents appears to be a function of both vehicle parameters related to a vehicle's directional control and stability and vehicle parameters related to a vehicle's rollover stability. In some cases, some of these vehicle parameters may influence both directional and rollover stability and in other cases, parameters related to one type of stability may be covariant with parameters related to the other, leading to a synergistic effect on a vehicle's overall rollover accident involvement. The agency believes that until the influences of and interactions between these factors are better understood, it would be inappropriate to initiate rulemaking in this area.

NHTSA has prepared a technical evaluation of the Robertson and Kelley study, which has been placed in Docket

PRM–MP 004. The following discussion provides only a brief summary of the detailed findings of the evaluation.

Similar to other statistical studies, the Robertson and Kelley analysis of utility vehicle rollovers strives to find patterns among seemingly varied data. In such a study, the researchers hope that patterns emerging from a systematic treatment of information can yield a better understanding of the reasons for the occurrence of a particular phenomenon. By their nature, statistical reports such as the Robertson and Kelley investigation draw inferences from the particular to the general. Robertson and Kelley endeavored to generalize about the role of stability in rollover accidents, by drawing inferences from the associations they found between stability and rollover involvement, for the sample of vehicles they selected to study.

Importance of representative sample: Since the authors made inferences from the sample of studied vehicles to the population of vehicles in the real world, it was important that the *sample* of vehicles selected for study be representative of the relevant larger population of vehicles. The agency does *not* believe that the sample selected for study, comprising three older utility vehicles and 11 older passenger cars, is representative of the real-world vehicle population or of current production vehicles. If the sample had been more representative of the recent or current vehicle population and had included more diverse types of utility vehicles such as the Ford Bronco II, post-1977 Ford Bronco, Chevrolet S–10 Blazer and Jeep Cherokee and Wagoneer, and included a representative sample of passenger cars in different size categories, for example, sub-compacts such as the Datsun B210, Toyota Corolla, Honda Civic and Volkswagen Rabbit, then it would have been more likely that the observations about the characteristics of the sample could have imparted helpful information about the role of the stability factor in real-world rollover crashes. (All of these listed models were included in either the agency's CARDfile analysis or its FAR analysis.) However, the sample in the Robertson and Kelley study was not so inclusive, making it is less likely that the inferences made about the parent population are valid. The unrepresentativeness of the cluster resulted in the clumps of data discussed below in the immediately following section.

Agency Analyses of Larger Data Samples

NHTSA performed several analyses of accident data to examine the influence of stability factor on rollover accident involvement. The agency examined an accident datafile (Crash Avoidance Research Data (CARD) file) comprising information derived from state police accident reports on eight utility vehicle models and 19 passenger cars. These vehicles sampled were selected to span the complete range of stability factors from large domestic passenger cars to utility vehicles. In addition, NHTSA also analyzed utility vehicle rollovers using data from the Fatal Accident Reporting System (FARS). In this latter analysis, the agency examined 1981 through 1985 FARS data and selected single vehicle accidents involving at least one occupant fatality, and single vehicle accidents that involved rollover as the first or subsequent event.

The results of the agency's CARDfile and FARS analyses confirmed the findings of the Robertson and Kelley report that there is a linear trend of stability factor versus rollover accident involvement. However, the results could not support the conclusions made by Robertson and Kelley or the recommendations made by the petitioner. Contrary to the impression created by the very limited sample used in the Robertson and Kelley report, graphing the stability factor versus rollovers per single vehicle accident (RO/SVA) rate for the population of passenger car and utility vehicle models included in the CARDfile analysis does not produce two distinct clusters of data points, one cluster for a group of vehicles with high stability factors and low RO/SVA rates and the other for a second group with low stability factors and high RO/SVA rates. Instead, the data points for the various vehicles are spread continuously and gradually across a wide range of stability factor values. Thus, the agency's analyses indicated that, contrary to the supposition of the petition, there is no obvious value above which a stability factor described a "safe" vehicle and below which the factor described an "unsafe" vehicle. Even if there were such an obvious value, the agency would still be confronted with the issues discussed below under "Statutory consideration."

Based on its analyses, the agency has determined that while a vehicle's stability factor can reasonably predict whether a vehicle which is already involved in a single vehicle accident will roll over, it does not accurately determine its likelihood of becoming involved in an accident that includes rollover. The agency has also determined that regulating the height and width of a vehicle is not, by itself, a reasonable means of addressing the rollover accident problem. By this statement, the agency does not intend to imply that the stability factor has an insignificant role in rollover involvement. Instead, the agency has determined that the available information indicates that a vehicle's stability factor is but *one* factor among many others affecting rollovers. The results from the agency's FARS analysis appeared to be consistent with findings from other studies indicating that there may be significant factors related to the directional control and stability characteristics of vehicles which may significantly influence the rollover accident involvement of vehicles (e.g., Malliaris, et al., "Problems in Crash Avoidance and in Crash Avoidance Research," March 1983; Dynamic Research, Inc., "Engineering Interpretation of Passenger Vehicle Accident Data," September 1986; Allen, et al., "Validation of Tire Side Force Coefficient and Dynamic Response Analysis Procedures: Field Test and Analysis Comparison of a Front Wheel vs. a Rear Wheel Drive Subcompact," February 1986; Forrest M. Council and Donald W. Reinfurt, "Safety Issues Related to Mini-cars from a Roadway Perspective," February 1987). Malliaris, et al. found that the likelihood of a rollover occurring in a single vehicle accident is dependent upon a vehicle's pre-crash condition. More than one-half of the vehicles involved in the rollover accident data reviewed in that study were sliding sideways prior to rolling over. The study concluded that the likelihood of different vehicles to be sliding sideways during a single vehicle accident varied from one vehicle type to another. Council and Reinfurt concluded that while the stability factor was related to rollover propensity,

> * * * it is not the sole indicator of the vehicle's propensity to roll. There exists an inherent resistance of vehicles to roll which must be a function of certain other vehicle parameters which are yet to be defined.

The agency plans to investigate accident data further in an attempt to determine which vehicle characteristics would tend to increase the likelihood that a vehicle will be involved in the accident mode (e.g., sliding sideways) where the chances of a rollover are increased. The Malliaris findings indicate that the effects of various vehicle characteristics on directional stability appear to be extremely important in determining the likelihood of a vehicle's being involved in a rollover. Yet, neither the nature of these effects nor those of other factors influencing rollover accident involvement are sufficiently understood at this time.

Statutory Consideration

The agency identified another significant concern in its evaluation of this petition. The adoption of the stability factor requirement could contravene section 103(f)(3) of the National Traffic and Motor Vehicle Safety Act which provides that the Federal motor vehicle safety standards must be reasonable and appropriate for each vehicle type to which they apply. In *Chrysler Corporation* v. *Department of Transportation*, 472 F.2d 659, at 679 (1972) (regarding the agency's first automatic restraint requirement for passenger cars), the United States Court of Appeals for the 6th Circuit stated the implications of that section:

> * * * that safety standards shall take into consideration different c'asses of vehicles, such as small cars, sports cars, or convertibles, and that standards shall not be used as a device to bring about their extintion, is made clear from the Act's legislative history:
>
> "[I]n determing whether any proposed standard is 'appropriate' for the particular type of motor-vehicle equipment or item of motor-vehicle equipment for which it is prescribed, the committee intends that the Secretary will consider the desirability of affording consumers continued wide range of choices in the selection of motor vehicles. Thus it is not intended that standards will be set which will eliminate or necessarily be the same for small cars or such widely accepted models as convertibles and sports cars, so long as all motor vehicles meet basic minimum standards." S. Rept. 1301, 2 U.S. Code, Cong. & Admin. News, 2714 (1966).

Since few existing utility vehicles have a stability factor exceeding 1.2, adoption of the stability factor requirement would require that almost all utility vehicles be changed. In many cases, those changes could be substantial and have adverse safety effects. The necessity of increasing a vehicle's stability factor might very likely induce its manufacturer to lower the center of gravity by reducing the weight of the structure surrounding the sides and top of the occupant compartment or by reducing ground clearance. The net effect of the former modification might be to make the utility vehicles less safe. For example, the elimination of roof structure or roll cages (which the petitioner claims the agency should require on vehicles with "low" stability factors) would increase the stability factor but decrease the vehicle's crashworthiness. The latter modification might severely reduce the capability of utility vehicles to perform their intended off-road occupational and recreational functions; in essence banning this type of vehicle. Particularly because of the latter type of effect, the agency believes that it should expand its search for solutions beyond the stability factor to include, for example, consideration of methods for reducing the likelihood that vehicles will become involved in the type of pre-rollover events like sliding and spinning which significantly increase the possibility of rollover.

Agency Decision

Based on the foregoing discussion, NHTSA believes it is untimely and unreasonable to promulgate a safety standard for rollover resistance based on the current state of knowledge about the problem. Therefore, because NHTSA has concluded that the approach the petitioner suggested, with its exclusive focus on the stability factor is not a satisfactory answer to the vehicle rollover problem, and since there is currently insufficient knowledge about vehicle crash avoidance performance on which to base a standard for vehicle rollover resistance, Senator Wirth's petition for rulemaking is denied.

NHTSA is in the midst of active research, as discussed in its May 1987 report to the Congress, and is planning other activities to address the issue of directional and rollover stability of light duty vehicles, including utility vehicles. The currently completed portion of the research plan is outlined below. The agency is confident that valuable information will be obtained from these and other research efforts. As more information becomes available, NHTSA believes the underlying factors contributing to rollover will be sufficiently understood and that a reasonable approach addressing the rollover problem can be achieved.

Future Agency Action

As described in NHTSA's Light Truck and Van Safety report, the agency has developed a research agenda that emphasizes areas where there appears to be a major safety problem susceptible to improvement and areas where promising measures for improved safety already exist. Areas that specifically relate to the rollover issues raised in the agency's evaluation of Senator Wirth's petition for rulemaking include the following:

- *Stability and Control of Light Trucks and Multipurpose Passenger Vehicles During Braking.* NHTSA has implemented a program to investigate the extent to which vehicle instability (due to factors such as unbalanced braking, center of gravity height, and suspension roll stiffness) results in loss of control and, ultimately, in rollover. A range of light, medium and full-sized pickup trucks and multipurpose passenger vehicles will be analyzed by computer simulation and full scale testing. This program has already begun, and NHTSA anticipates it will be completed in 1989.
- *Rollover Performance of Light Trucks.* NHTSA will conduct a series of dynamic rollover tests to evaluate roof structures and ejection prevention. NHTSA will examine accident data to determine the conditions under which rollover crashes resulting in serious injuries occur. Test devices and procedures will be evaluated during the next 12 months, and results from the rollover tests will be evaluated over the following two years.
- *Light Truck Accident Data Analysis.* The agency is analyzing the safety of various sizes and types of light trucks in different crash modes. Compact pickup, standard pickup, compact van, standard van, and multipurpose passenger vehicle categories are being analyzed in front, rear, side and rollover crash modes. Data from FARS and NASS, as well as from several state accident data files will be analyzed to gain a more complete picture of light truck safety problems.

In addition to these rsearch efforts, the following are other programs that specifically address rollover accidents and related vehicle factors:

- *Rollover, Braking, and Dynamic Stability-Modified Suspension Vehicles.* NHTSA will undertake research to determine the effects that modifications to a vehicle's center of gravity height have on the vehicle's rollover, braking and directional stablity. One of the vehicles to be tested during this program will be a utility vehicle.
- *Maryland Single Vehicle Rollover Study.* Over the next year, the Maryland State Police will collect greatly expanded pre-crash documentation and crash data on 2800 single vehicle rollover accidents.
- *Crashworthiness Research.* The accident data for utility vehicles indicate that the fatality rates for utility vehicles are much higher than those for other vehicle classes. These data also show, however, that utility vehicles overall are not involved in more accidents, and for accidents of all levels of severity, do not produce more injuries. However, utility vehicle

VOL 52 ISS 249 DEC 29 1987 UMI

accidents to result in greater numbers of severe injuries and fatalitites compared to other vehicle classes. This seems to be due both to the relative numbers of certain types of high injury producing accidents in which they are involved (e.g., rollovers) and the relatively higher numbers of severe injuries and fatalities that result from other types of accidents. Because these data indicate that the high fatality rates for utility vehicles may be partly explained by the crashworthiness of the vehicles, the potential benefits of improving the crashworthiness of utility vehicles, particularly in rollover accidents, will be reviewed by the agency. For the most part, this activity is part of the Rollover Performance of Light Trucks program that was mentioned above. However, NHTSA is considering focusing effort on addressing the peculiar issue of rollover crash protection for those utility vehicles that do not have a permanent roof structure. Further, NHTSA will evaluate the effectiveness of roll bars and roll cage structures that are installed on a vast majority of current utility vehicle models. The evaluation will involve analyzing accident data and dynamic rollover testing of vehicles.

The agency is also in the process of developing a work plan that will identify and resolve safety related problems dealing with light duty vehicles (i.e., passenger cars, light trucks and vans, and multipurpose passenger vehicles) that become unstable, go out of control and become involved in crashes as a result of driver or environmental inputs or inherent response characteristics of the vehicle. The goal of the research plan is to provide a thorough understanding of safety relevant vehicle stability and control characteristics under extreme performance conditions. Under these conditions, tires lose or are on the verge of losing adhesion or coupling with the road surface, and directional instability, roll instability and loss of control are likely to occur. The rollover accident will be singled out for special attention in a major portion of the plan.

Agency Response to Petitioner's Other Requests

The petitioner requested other actions by the agency, three of which were related to the stability factor. The agency will address the petitioner's request for a defect proceeding in a separate notice. Because the agency has determined that the stability factor alone has not been shown to be an accurate or reliable predictor of rollover involvement, the petitioner's request for publication of stability factor information is also denied. Publication of such information could lead consumers to select vehicles which, while differing in stability factors, may have completely unrelated probabilities of rolling over while in use.

While the agency has too many reservations about the role of stability factors in rollover involvement to propose a stability fator standard or publish stability factor information, NHTSA agrees with Senator Wirth in his belief that information about the operational limits of utility vehicles provided to the present owners of those vehicles could improve motor vehicle safety. The petitioner urged NHTSA to inform the general public "on how to drive safely in [utility] vehicles."

The agency already requires manufacturers of certain new utility vehicles to affix a sticker in the vehicle and include information in the owner's manual alerting drivers of the particular handling and maneuvering characteristics of utility vehicles (49 CFR 575.105). Nevertheless, NHTSA agrees with the petitioner that consumers could benefit from an information brochure on utility vehicle handling characteristics and that the safety information should reach as many utility vehicle drivers as possible. Thus, consistent with the petitioner's concerns, the agency has published a consumer information brochure on utility vehcile safety. The brochure notes that there are differences between utility vehicles and passenger cars and explains that those differences cause utility vehicles to handle and maneuver differently. It notes that if a utility vehicle driver makes sharp turns or abrupt maneuves, there is a risk that the vehicle may roll over or go out of control. In view of the rollover risk, the brochure cautions utility vehicle occupants that it is perticularly important to wear a safety belt to prevent ejection and identifies features such as rollbars and rollcages as means of obtaining additional crash protection.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

(Secs. 103, 119, Pub.L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 40 CFR 1.50 and 501.8)

Issued on December 22, 1987.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

49 CFR Parts 571 and 575

[Docket No. 85–15; Notice 5]

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment; Consumer Information Regulations

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the headlighting requirements of Standard No. 108 by deleting certain external dimensions for sealed beam headlamps, lifetime requirements for sealed beam headlamps and standardized replaceable light sources, photometric requirements for headlamps designed to conform to SAE J579a, and certain durability requirements for headlamps. A new category would be added, headlamps without dimensional requirements. An on-vehicle mechanical aim alternative to existing off-vehicle mechanical aim is also proposed. Finally, the notice proposes a new consumer information regulation requiring headlamp part number information to be provided with the vehicle at the time of its delivery to its first retail purchaser. A notice of request for comments was published on these subjects in 1985.

DATES: Comment closing date for the proposal is March 28, 1988. The effective date of the final rule would be 30 days after its publication in the **Federal Register.**

ADDRESSES: Comments should refer to the docket number and notice number and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh St., SW., Washington DC 20590. Docket hours are from 8 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: Richard Van Iderstine, Office of Rulemaking, NHTSA, (202–366–5280).

SUPPLEMENTARY INFORMATION: In the past 5 years, the proposal and adoption of additional headlighting systems and their light sources have constituted the major rulemaking actions with respect to Standard No. 108. In part, these actions have represented NHTSA's desire to move towards a more performance-oriented standard.

During this period, NHTSA has tentatively concluded that certain requirements of Standard No. 108 can be simplified or eliminated without compromising safety. In pursuing that conclusion, on October 22, 1985, NHTSA published a notice of Request for Comments that concentrated on certain areas of the headlighting requirements

of Standard No. 108 (50 FR 42735, with extension of comment time at 51 FR 1542 and correction at 51 FR 2536).

This notice of proposed rulemaking responds to the comments submitted on the October 1985 request, presents NHTSA's recommendations for short term simplification and elaborates on its rationale to support the premise that safety will not be compromised and that market forces will satisfactorily address a number of the elements of consumer satisfaction with headlighting systems.

I. Photometric Performance

The initial headlighting photometric requirements of Standard No. 108, effective Janaury 1, 1968, were those of SAE Standard J579a, August 1965. They remained the sole photometrics permissible for motor vehicles other than motorcycles until 1978 when the standard was amended to allow optional compliance with the photometrics of SAE Standard J579c, December 1974 (now December 1978). The principal difference between the two SAE requirements is the allowance of up to 100% more total candela on the upper beam of the J579c lamps. Also, the lower beam of a J579c lamp is aimed more to the left and has a higher intensity, and the upper beam is aimed higher. These differences proved of such benefit and interest to the consumer that, by the early 1980's, virtually all original equipment headlamps were those designed to conform to J579c; as a result, there is very little market today for even replacement headlamps designed to conform to J579a. As NHTSA commented in its 1985 notice, "The existence of three photometric requirements, one of which is for all practical purposes nearly obsolete, promotes unnecessary confusion and serves no apparent safety purposes." (50 FR 42739). The agency therefore has decided to propose the elimination of SAE J579a from Standard No. 108.

II. Elimination of Certain Dimensional Specifications

From its beginning, Standard No. 108 has incorporated by reference detailed SAE drawings prescribing dimensions for most types of sealed beam headlamps. More recently, in the absence of SAE references, detailed drawings have been directly incorporated into the Standard. These dimensions relate to the fit of the lamp into the housing, the size and shape of the lamp and retaining rings, seating plane lugs, electrical prongs, and headlamp mounting ring notches. The primary rationale for their incorporation has been to ensure compatibility between original and replacement equipment, so that proper replacement equipment shall be readily available, shall fit only in the proper receptacle to assure a photometrically correct system, and shall perform with the equivalence of the original lighting equipment.

Those who support dimensional specifications might argue that without them manufacturers of headlamps and associated components, and vehicles, will no longer have a common understanding of dimensional requirements to assure proper fitting of manufactured parts. Those who oppose dimensional requirements might reply that taillamps and other vehicle lamp dimensions are not regulated, that the marketplace will ensure an acceptable amount of commonality, and that dimensional specifications are not necessary for motor vehicle safety and are thus more properly the function of a non-governmental standards setting organization (such as the SAE where the sealed beam specifications originated). It should be noted that Standard No. 108 does not regulate dimensions relating to the size and shape of headlamps equipped with replaceable bulbs. NHTSA is unaware of any reason why headlamps with non-replaceable bulbs (e.g. integral beam headlamps, discussed below) should be treated differently. Since new types of sealed beam headlamps at the present time can only be allowed through the regulatory process, it can also be argued that dimensional requirements may impede technological progress.

In support of those who oppose dimensional requirements NHTSA has tentatively concluded that most dimensional specifications for new types of non-standardized headlighting systems are not necessary for motor vehicle safety. Accordingly, for existing standardized sealed beam headlighting systems, the agency is also proposing deleting dimensions that are not necessary for interchangeability. The agency believes that requirements necessary for interchangeability should be retained for these existing sealed beam systems in order to ensure that replacement headlamps manufactured after the effective date of the final rule will in fact fit. The agency is also proposing incorporating by reference SAE Standard J1383 APR85 *Performance Requirements for Motor Vehicle Headlamps* which retains only those dimensional requirements necessary for interchangeability, and deleting the SAE standards that are incorporated by reference in Tables I and III of Standard No. 108 which have been the source of excess dimensional requirements.

A new category of headlighting system is proposed, which would be known as an "integral beam headlighting system." It would not be required to have industry or Federally standardized dimensions, yet would be similar in concept to existing sealed beam headlighting systems. The integral beam headlamp would be defined as incorporating a lens, reflector and light source in an indivisible unit, but would not necessarily be "sealed" since this is a design related aspect. All new sealed beam systems would be treated as integral systems if this proposal is adopted. Essentially, the design of the size and shape of such a headlighting system would be left to the vehicle or lighting manufacturer. Since such dimensions of integral beam systems would not be standardized (as replaceable bulb headlamps are not standardized) vehicle manufacturers would be required to provide retail vehicle and other aftermarket headlamp purchasers with information necessary to maintain the vehicle's lighting in conformance with the Standard should lamp replacement be necessary. The photometric performance required of integral beam headlighting systems is proposed to be that prescribed by either SAE J579c (using either two or four headlamps per system), or Type F photometry of Figure 15 or 17 of Standard No. 108 (using two, four, or any even number of headlamps per system). The environmental performance required of this system would be that presently required of existing replaceable bulb headlighting systems, however if the lamp is of a "sealed" design, the manufacturer would be relieved of certifying compliance to certain performance requirements that do not apply to sealed lamps.

For aim retention upon lamp replacement the integral beam headlighting would be required to have a common aiming and mounting plane. This proposed common aiming and mounting plane would result in greatly reduced aiming error upon headlamp replacement. It would perform in much the same manner as the present standardized replaceable light source in that the lamp may be replaced with little effect on headlamp aim. This common aiming and mounting plane is presently specified for the most recently permitted sealed beam headlighting systems, Types F, G, and H.

To ensure mechanical aimability, the proposed integral beam systems would be required to have either aiming pads for use with existing off-vehicle mechanical aimers, or fiducial marks

with an integral on-vehicle aiming and mounting mechanism. The use of fiducial marks (as an option to present lens-mounted aiming pads) permits greater headlamp styling freedom, and can potentially provide better aim retention depending on the manufacturers' actual designs. The specification for fiducial marks would be a recognition that they are acceptable substitutes for the aiming pads that are presently found on the lenses of headlamps and are used for the purpose of determining photometric conformance to Standard No. 108, and for mechanical aiming purposes. As discussed in Section V below, the agency is proposing that this requirement for either aiming pads or fiducial marks would apply to new headlighting system designs of both integral beam and replaceable bulb types.

Because NHTSA would not specify the dimensions of integral beam headlamps, they would not be required to be interchangeable. They would, however, have to meet all headlamp performance requirements such as photometry, environmental degradation, and aimability. Thus, under the proposal, a manufacturer seeking to introduce a new integral beam system could do so without the necessity of petitioning for an amendment of Standard No. 108. A petition would be required only if the manufacturer sought a revision of performance specifications.

This proposal to forego regulation of size, shape, and interchangeability could conceivably result in most or all headlamps becoming uniquely designed for specific vehicles, a trend that has been seen with replaceable bulb headlamps. On the other hand, this freedom from regulated interchangeability may result in only a few new designs whose interchangeability would be based on the decisions of lighting or vehicle manufacturers. Or the end result could be a blend of the two. Since the introduction of replaceable bulb headlamps beginning with the 1984 model year, systems in which the interchangeability of the lens/reflector unit is unregulated, NHTSA is unaware of any replacement headlamps that have, in fact, proven incapable of interchangeability with original equipment lamps. Nonetheless, the agency seeks comments on this issue as it relates to the proposed integral beam headlighting systems.

Another aspect of this proposal is the change from a controlled review of new headlighting systems before introduction, to a less restricted review that does not include size, shape, and interchangeability. The present controlled review has delayed the time between development of new headlighting systems and their introduction in the market because of the necessity to file a petition for rulemaking, to have it considered internally by NHTSA, and to afford the public and industry an opportunity to comment on it before NHTSA's final review and publication of an amendment to Standard No. 108. One effect of this process is that of causing a modification of the system petitioned for into an implementable one that is essentially acceptable to all who have commented and who could be affected. NHTSA's proposal to eliminate that portion of the review pertaining to size, shape, and interchangeability and thus the need to petition for such changes, should allow the adoption of systems as originally petitioned for. The benefit would be greater flexibility for vehicle manufacturers in the styling of headlighting systems. Additionally, NHTSA could better direct resources towards areas of greater safety benefit. The effect of deletion of NHTSA's prior review of dimensional aspects would be the reduction of public and industry comment and influence of headlamp dimensions, and the uncertainty of the direction of industry when responding to this potential new freedom.

If the comments to the proposal mitigate against its adoption, manufacturers would have to continue to petition NHTSA for an amendment specifying the dimensions of each new headlighting system and any subsequent dimensional changes needed thereafter. NHTSA therefore seeks comments on the pros and cons of petitioning for design changes.

Finally, under a proposed amendment to Part 575, the consumer information regulation, vehicle manufacturers would be required to provide vehicle purchasers with parts number information for their particular vehicle if the vehicle's headlamp exterior dimensions are not prescribed either directly or indirectly by Standard No. 108. This would apply to all new headlighting systems, both integral beam and replaceable bulb types.

III. Life Expectancy of Headlamps

Standard No. 108 at present is regulatorily inconsistent, specifying average design life requirements for its standardized replaceable light sources, and two of its sealed beam systems, but not for the remaining five sealed beam systems designed to conform to SAE J579c. For regulatory consistency, this agency believes that the standard should either extend average design life requirements to all headlighting systems, or delete them for those presently covered. As the agency noted in its October 1985 notice, other options are to delete longevity requirements but require manufacturers to rate life expectancy on the bulb package, to require that the headlamp last the life of the vehicle, and to retain the existing requirements. The agency believes that the competitive forces of the marketplace will encourage manufacturers to maintain, or improve, the life-expectancy of light sources. Therefore the agency is proposing that all longevity requirements be deleted. However, because life of a light source has an influence on the total number of lamp outages during the life of a vehicle, thus possibly some influence on crash risk as well, NHTSA is requesting comments on whether or not the absence of an average design life requirement would have a discernible effect on the actual life of light sources in headlighting systems. Because filament life and lumen output (and hence photometric performance) are inversely related NHTSA envisions that trade offs could occur, with performance gains for lesser lamp life. With the apparent need of vehicle manufacturers for headlamps with minimum vertical height, low-profile lamps may have to sacrifice some longevity in order to achieve the required minimum photometric specifications. These trade offs have cost, quality, and performance effects on headlighting systems, their manufacturers, and their users. Therefore, NHTSA solicits comment on the proposed deletion of average design life requirements in order to understand more completely how these trade offs may affect safety, thus whether to adopt the proposed deletion, or to pursue another course.

IV. Durability

As a further simplification of headlighting requirements relating to durability and aim retention, NHTSA is proposing deletion of certain portions of SAE J580 DEC86 *Sealed Beam Headlamp Assembly*, which were adopted in the initial standard (SAE J580a, June 1966), and which may no longer be necessary for safety. These deletions include paragraphs 3.3 (vibration test), 6.1.3 (test for 20 cycles of full range aim adjustment), 6.3.1 (test for 20 cycles of retaining ring removal and installation), 6.2 and subparagraphs and 6.5 and subparagraphs (the inward force test and torque deflection test, respectively, except for all headlamps using externally applied mechanical aimers).

Durability tests exercise a headlighting system's ability to withstand the anticipated environment in service while still providing acceptable roadway illumination. The proposed deletions for 20-cycle aim range and retaining ring installation are deemed to be of little significance to safety. The deletion of inward force and torque deflection is appropriate for headlighting systems which do not use externally applied aimers, since these tests are intended to show resistance to the effects of the weight and application of *external* aimers.

The proposal for deletion of the vibration test, however, is not as straight forward. While vibration testing exercises lamps for resistance to such anticipated on-vehicle vibration effects as broken or cracked lenses, reflectors, light source mountings or aim hardware, the existing vibration test appears archaic, and may not accurately exercise the lamp system for these adverse effects. Despite this, the present test procedure has produced signal lamp failures that were also found in vehicles-in-use. Since this procedure currently applies to all lighting devices, and not just headlighting systems, it is difficult to justify deletion for only headlamps; however, no headlamp vibration test failures have been found to date. Consequently, it is currently not known whether there is a safety benefit from vibration testing of headlighting systems. The agency requests comment on deletion or development of a more correlated vibration performance specification.

Two other durability tests concern NHTSA, the Temperature Cycle Test (numbered S8.6.1 in the Proposal's revised format), and the Impact Test (S8.8). Presently these remain as part of the requirements for headlighting systems since the purpose of these requirements remains valid, however, NHTSA is concerned that the requirements may not truly reflect the real world. The temperature range may be too small in view of the ambient environmental temperatures and underhood temperature extremes that occur in the United States and in today's high temperature engine compartments. The impact energy also appears too low to simulate accurately the actual stone damage that can occur. NHTSA seeks comment on these procedures, and if appropriate, a more correlated set of procedures or performance requirements.

V. Headlamp Aimability

A further aspect of Standard No. 108 to which the agency has turned its attention is headlamp aimability. Currently, headlamps must be capable of mechanical aim using equipment specified by SAE J602, with the inspection criteria specified in SAE J599. However, with the proliferation in sizes and shapes of headlighting systems permissible under Standard No. 108 since 1983 has come a corresponding proliferation in adapters necessary for mechanical aimers to perform their purpose, creating confusion, difficulty, and higher potential for aiming error. The agency is therefore interested in developing a general aiming performance requirement that would permit headlamps to be aimed by means other than use of existing mechanical aimers and lens-mounted aiming pads if the new methods could perform as well as existing mechanical aimers, and if no excessive off-vehicle equipment would be required. One example of a new method for vertical aim inspection would be a spirit level incorporated in the headlamp housing which, when the vehicle attitude was horizontal and the air bubble was centered properly, would indicate proper vertical aim.

Under the proposal, each headlamp would have fiducial marks (or aiming pads if its manufacturer chose to retain its existing design) for the purpose of determining the reference axes to be used for photometric performance testing; such marks would also be the basis for the aiming reference when the headlamp is installed on the vehicle. The headlamp would be installed in the vehicle using a mounting-aiming mechanism incorporating vertical and horizontal aiming adjustments and references. (The proposal refers to this as a vehicle headlamp aiming device, or VHAD). It would be aimable using either conventional off-vehicle mechanical aimers or, should the manufacturer so decide, by on-vehicle aimers which use only a floor slope measurement as the off-vehicle reference.

VI. Consumer Information

The increasing variety of headlamps on the road today and those that may result from the proposed changes to Standard No. 108, may confuse consumers who desire to replace their own headlamps. To aid the consumer in ensuring that replacement headlamps are the equivalent in performance and application to original equipment headlamps, NHTSA is proposing amendments to Part 575, *Consumer Information Regulations*. These proposed changes would require that certain information be made available to vehicle purchasers at the time of purchase of the vehicle. The information would consist of the part or parts numbers of original and replacement headlamps appropriate to the vehicle, and the name or trademark of the lamp manufacturer. NHTSA believes that such consumer information is desirable to assure continued safe headlighting. Consequently, NHTSA is proposing additions to Part 575.4, 575.6, and a new § 575.102 *Headlamps*.

As part of this proposal, NHTSA has used the most recent SAE Standards and Recommended Practices for reference. Many of these updated references include performance or aspects not currently incorporated in Standard No. 108. Consequently, exceptions are stated so that the requirements that are actually proposed are essentially identical to that which currently exist.

Finally, as part of this proposed revision of Standard No. 108, NHTSA is separating the Scope and Purpose sections in line with its practice in a majority of the safety standards and reorganizing the various headlighting requirements into a new section S7 *Headlighting Requirements*. Of necessity, the remaining sections of the standard will have to be renumbered.

Impacts

NHTSA has considered this proposal and has determined that it is not major within the meaning of Executive Order 12291 "Federal Regulation" or significant under Department of Transportation regulatory policies and procedures, and that neither a regulatory impact analysis nor a full regulatory evaluation is required. However, a Preliminary Regulatory Evaluation (PRE) has been placed in the Docket. The proposals are intended to relieve a regulatory burden by affording manufacturers greater flexibility in the design of headlighting systems.

NHTSA has analyzed this proposal for the purposes of the National Environmental Policy Act. It is not anticipated that a rule based on the proposal would have a significant effect upon the environment. The design and composition of headlamps are not expected to change from those presently in production. However, should this rulemaking result in headlamps or bulbs with a shorter life, there would be a greater demand for replacement headlamps or bulbs and a corresponding increase in materials necessary for their manufacture. This conjecture is speculative.

VOL 52 ISS 249 DEC 29 1987 UMI

Additionally, with the movement away from Federal regulation of dimensions for the interchangeability of headlamps, the only source of vehicle-specific replacement headlamps may become the vehicle manufacturer and its authorized dealers, although this also is speculative.

The agency has also considered the impacts of this proposal in relation to the Regulatory Flexibility Act. I certify that this proposal would not have a significant impact upon a substantial number of small entities. Accordingly, no initial regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles and headlamps, those affected by the proposal, are generally not small businesses within the meaning of the Regulatory Flexibility Act. Finally, small organizations and governmental jurisdictions would not be significantly affected since the price of new vehicles and headlamps will be minimally impacted.

The consumer information requirements in this proposal are considered to be information collection requirements, as that term is defined by the Office of Management and Budget (OMB) in 5 CFR Part 1320. Accordingly, these proposed requirements are being submitted to the OMB for its approval, pursuant to the requirements of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Comments on the proposed information collection requirements should be submitted to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: Desk Officer for NHTSA. It is requested that comments sent to the OMB also be sent to the NHTSA rulemaking docket for this proposed action.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the docket section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the closing date indicated above, will be considered, and will be available for exmination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments on the rules docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

List of Subjects in 49 CFR Parts 571 and 575

Imports, Motor vehicle safety, Motor vehicles.

The engineer and lawyer primarily responsible for this proposal are Richard Van Inderstine and Taylor Vinson respectively.

In consideration of the foregoing, it is proposed that 49 CFR 571.108 Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment* be amended as follows:

PART 571—[AMENDED]

1. The authority citation for Part 571 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR Part 1.50.

2. The text of 49 CFR 571.108 (Paragraphs S1 through S8) would be revised as follows:

§ 571.108 Standard No. 108; Lamps, reflective devices, and associated equipment.

S1. *Scope.* This standard specifies requirements for original and replacement lamps, reflective devices, and associated equipment.

S2. *Purpose.* The purpose of this standard is to reduce traffic accidents and deaths and injuries resulting from traffic accidents, by providing adequate illumination of the roadway, and by enhancing the conspicuity of motor vehicle on the public roads so that their presence is perceived and their signals understood, both in daylight and in darkness or other conditions of reduced visibility.

S3. *Application.* This standard applies to passenger cars, multipurpose passenger vehicles, trucks, buses, trailers (except pole trailers and trailer converter dollies), and motorcycles, and to lamps, reflective devices, and associated equipment for replacement of like equipment on vehicles to which this standard applies.

S4. *Definitions.*

"Aiming Reference Plane" means a plane which is perpendicular to the longitudinal axis of the vehicle and tangent to the forward most aiming pad on the headlamp.

"Flash" means a cycle of activation and deactivation of a lamp by automatic means continuing until stopped either automatically or manually.

"Headlamp test fixture" means a device designed to support a headlamp or headlamp assembly in the test position specified in the laboratory tests and whose mounting hardware and components are those necessary to operate the headlamp as installed in a motor vehicle.

"Integral Beam Headlamp" means a headlamp comprising an integral and indivisible optical assembly including lens, reflector, and light source, that is neither a standardized seal beam headlamp designed to conform to paragraph S7.3 nor a replaceable bulb headlamp designed to conform to paragraph S7.5.

"Replaceable bulb headlamp" means a headlamp comprising a bonded lens and reflector assembly and one or two standardized replaceable light sources.

"Seasoning" means a process of energizing the filament of a headlamp, at design voltage, for a period of time equal to 1 percent of average rated laboratory life.

"Standardized replaceable light source" means an assembly of a capsule, base, and terminals that meets the requirements of S7.6.

S5. *Requirements.*

S5.1 *Required motor vehicle lighting equipment.*

S5.1.1 Except as provided in succeeding paragraphs of this S5.1.1, each vehicle shall be equipped with at least the number of lamps, reflective devices, and associated equipment specified in Tables I and III, as applicable. Required equipment shall be designed to conform to the SAE Standards or Recommended Practices

referenced in those tables. Table I applies to multipurpose passenger vehicles, trucks, trailers, and buses, 80 or more inches in overall width. Table III applies to passenger cars and motorcycles and to multipurpose passenger vehicles, trucks, trailers, and buses, less than 80 inches in overall width.

S5.1.1.1 A truck tractor need not be equipped with turn signal lamps mounted on the rear if the turn signal lamps at or near the front are so constructed (double-faced) and so located that they meet the requirements for double-faced turn signals specified in SAE Standard J588e, "Turn Signal Lamps," September 1970.

S5.1.1.2 A truck tractor need not be equipped with any rear side marker devices, rear clearance lamps, and rear identification lamps.

S5.1.1.3 Intermediate side marker devices are not required on vehicles less than 30 feet in overall length.

S5.1.1.4 Reflective material conforming to Federal Specification L–S–300, "Sheeting and Tape, Reflective; Non-exposed Lens, Adhesive Backing," September 7, 1965, may be used for side reflex reflectors if this material as used on the vehicle, meets the performance standards in either Table I or Table IA of SAE Standard J594f, "Reflex Reflectors", January 1977.

S5.1.1.5 The turn signal operating unit on each passenger car, and multipurpose passenger vehicle, truck, and bus less than 80 inches in overall width manufactured on or after January 1, 1973, shall be self-cancelling by steering wheel rotation and capable of cancellation by a manually operated control.

S5.1.1.6 Each stop lamp manufactured to replace a stop lamp that was designed to conform to SAE Standard J586b, *Stop Lamps*, June 1966, may also be designed to conform to J586b. It shall meet the photometric minimum candlepower requirements for Class A red turn signal lamps specified in SAE Standard J575d, *Test for Motor Vehicle Lighting Devices and Components*, August 1967. Each such lamp manufactured for use on a passenger car and on a multipurpose passenger vehicle, truck, trailer or bus less than 80 inches in overall width shall have an effective projected luminous area not less than 3½ square inches. If multiple compartment lamps or multiple lamps are used, the effective projected luminous area of each compartment or lamp shall be not less than 3½ square inches; however, the photometric requirements may be met by a combination of compartments or lamps.

S5.1.1.7 Each turn signal lamp manufactured to replace a turn signal lamp that was designed to conform to SAE Standard J588d, *Turn Signal Lamps*, June 1966, may also be designed to conform to J588d, and shall meet the photometric minimum candlepower requirements for Class A turn signal lamps specified in SAE Standard J575d, *Tests for Motor Vehicle Lighting Devices and Components*, August 1967. Each such lamp manufactured for use on a passenger car and on a multipurpose passenger vehicle, truck, trailer or bus less than 80 inches in overall width shall have an effective projected luminous area not less than 3½ square inches. If multiple compartment lamps or multiple lamps are used, the effected projected luminous area of each compartment or lamp shall be not less than 3½ square inches; however, the photometric requirements may be met by a combination of compartments or lamps. Each such lamp manufactured for use on a multipurpose passenger vehicle, truck, trailer or bus 80 inches or more in overall width shall have an effective projected luminous area not less that 12 square inches. S5.1.1.8 For each motor vehicle less than 30 feet in overall length, the photometric-minimum candlepower requirements for side marker lamps specified in SAE Standard J592e "Clearance, Side Marker, and Identification Lamps", July 1972, may be met for all inboard test points at a distance of 15 feet from the vehicle and on a verticle plane that is perpendicular to the longitudinal axis of the vehicle and located midway between the front and rear side market lamps.

S5.1.1.9 Boat trailers need not be equipped with both front and rear clearance lamps provided an amber (to front) and red (to rear) clearance lamp is located at or near the midpoint on each side of the trailer so as to indicate its extreme width.

S5.1.1.10 Multiple license plate lamps and backup lamps may be used to fulfill the requirements of the SAE Standards applicable to such lamps referenced in Tables I and III.

S5.1.1.11 A parking lamp, tail lamp, stop lamp, or turn signal lamp shall meet the minimum percentage specified in Figure 1a of the corresponding minimum allowable value specified in Figure 1b. The maximum candlepower output of each stop, turn signal, tail and parking lamp shall not exceed that prescribed in figure 1b. The values specified in Figure 1a and Figure 1b are substituted for those specified in Table 1 of the following SAE Standards: J222 *Parking Lamps*, J585e *Taillamps* (maximum at H or above), J585c *Stop Lamps*, and J588e *Turn Signal Lamps*, except that motocycle turn signal lamps need meet only one-half of the minimum photometric values specified in Figure 1b.

S5.1.1.12 A parking lamp, taillamp, stop lamp or turn signal lamp is not required to meet the minimum photometric value at each test point specified in this standard if the sum of the percentages of the minimum candlepower measured at the test points is not less than that specified for each group listed in Figure 1c.

S5.1.1.13 All passenger cars and mutipurpose passenger vehicles, trucks, and buses or less than 80 inches overall width shall be equipped with turn signal operating units designed to complete a durability test of 100,000 cycles.

S5.1.1.14 A trailer that is less than 30 inches in overall width may be equipped with only one of the following lamps and reflective devices, located at or near its verticle centerline: Tail lamp, stop lamp, and rear reflex reflector.

S5.1.1.15 A trailer that is less than 6 feet in overall length, including the trailer tongue, need not be equipped with front side marker lamps and front side reflex reflectors.

S5.1.1.16 A lamp designed to use a type of bulb that has not been assigned a mean spherical candlepower rating by its manufacturer and is not listed in SAE Standard J573d, "Lamp Bulbs and Sealed Units," December 1968, shall meet the applicable requirements of this standard when used with any bulb of the type specified by the lamp manufacturer, operated at the bulb's design voltage. A lamp that contains a sealed-in bulb shall meet these requirements with the bulb operated at the bulb's design voltage.

S5.1.1.17 Except for a lamp having a sealed-in bulb, a lamp manufactured on or after January 1, 1974, shall meet the applicable requirements of this standard when tested with a bulb whose filament is positioned within ±.010 inch of the nominal design position specified in SAE Standard J573d, "Lamp Bulbs and Sealed Units," December 1968, or specified by the bulb manufacturer.

S5.1.1.18 A backup lamp is not required to meet the minimum photometric values at each test point specified in Table I of SAE Standard J593c, *Backup Lamps*, February 1968 if the sum of the candlepower measured at the test points within each group listed in Figure 2 is not less than the group totals specified in that figure.

S5.1.1.19 Variable load turn signals flashers shall comply with voltage drop and durability requirements with the maximum design load connected and snall comply with starting time, flash

rate, and percent current "on" time requirements both with the minimum and with the maximum design load connected.

S5.1.1.20 The lowest voltage drop for turn signals flashers and hazard warning signal flashers measured between the input and load terminals shall not exceed 0.8 volt.

S5.1.1.21 A motor-driven cycle whose speed is attainable in 1 mile is 30 mph or less need not be equipped with turn signal lamps.

S5.1.1.22 A motor-driven cycle whose speed attainable in 1 mile is 30 mph or less may be equipped with a stop lamp whose effective projected luminous lens area is not less than 3½ square inches and whose photometric output for the groups of test points specified in Figure 1 is at least one-half of the minimum values set forth in that figure.

S5.1.1.23 Each tail lamp manufactured to replace a taillamp designed to conform to SEA Standard J585d, *Tail Lamps*, August 1970, may also be designed to conform to J585d.

S5.1.1.24 Each turn signal lamp manufactured to replace a turn signal lamp (on a motorcycle) that was designed to conform to SAE Standard J588d, *Turn Signal Lamps*, June 1966, may also be designed to conform to J588d.

S5.1.1.25 Each turn signal lamp on a motorcycle manufactured on and after January 1, 1973, shall have an effective projected luminous area not less than 3½ square inches.

S5.1.1.26 Note 6 of Table 1 in SAE Standard J588e, *Turn Signal Lamps*, September 1970, does not apply. A stop lamp that is not optically combined with a turn signal lamp shall remain activated when the turn signal is flashing.

S5.1.1.27 Each passenger car manufactured on or after September 1, 1985, shall be equipped with a high-mounted stoplamp which:

(a) Shall have an effective projected luminous area not less than 4½ square inches.

(b) Shall have a signal visible to the rear through a horizontal angle from 45 degrees to the left to 45 degrees to the right of the longitudinal axis of the vehicle.

(c) Shall have the minimum photometric values in the amount and location listed in Figure 10, instead of those in Table 1 of SAE Recommended Practice J186a, *Supplemental High-Mounted Stop and Rear Turn Signal Lamps*, September 1977.

(d) Need not meet the requirements of paragraphs 3.1.6 Moisture Test, 3.1.7 Dust Test, and 3.1.8 Corrosion Test of SAE Recommended Practice J186a if it is mounted inside the vehicle.

(e) Shall provide access for convenient replacement of the bulb without the use of special tools.

S5.1.1.28 A passenger car manufactured between August 1, 1984, and September 1, 1985, may be equipped with a high-mounted stop lamp that conforms to S5.3.1.8.

S5.1.1.29 Instead of the headlamps specified by Table III, a motorcycle may be equipped with one half of any headlighting system specified in S7 which provides both a full upper beam and full lower beam, and where more than one lamp must be used, the lamps shall be mounted vertically, with the lower beam as high as practicable. When installed on a motorcycle such half system need not meet the aiming requirements specified in S7.

S5.1.2 Plastic materials used for optical parts such as lenses and reflectors shall conform to SAE Recommended Practice J576c, May 1970, except that:

(a) Plastic lenses used for inner lenses or those covered by another material and not exposed directly to sunlight shall meet the requirements of paragraphs 3.4 and 4.2 of SAE J576c, when covered by the outer lens or other material;

(b) After the outdoor exposure test, the haze and loss of surface luster of plastic materials used for lamp lenses shall not be greater than 30 percent haze as measured by ASTM–1003–61, *Haze and Luminous Transmittance of Transparent Plastic;* and

(c) After the outdoor exposure test, plastic materials used for reflex reflectors shall meet the appearance requirements of paragraph 4.2.2 of SAE J576c.

S5.1.3 No additional lamp, reflective device or other motor vehicle equipment shall be installed that impairs the effectiveness of lighting equipment required by this standard.

S5.1.4 Each school bus shall be equipped with a system of either:

(a) Four red signal lamps designed to conform to SAE Standard J887, *School Bus Red Signal Lamps*, July 1964, and installed in accordance with that standard; or

(b) Four red signal lamps designed to conform to SAE Standard J887, *School Bus Red Signal Lamps*, July 1964, and four amber signal lamps designed to conform to that standard, except for their color, and except that their candlepower shall be at least 2½ times that specified for red signal lamps. Both red and amber lamps shall be installed in accordance with SAE Standard J887, except that:

(i) Each amber signal lamp shall be located near each red signal lamp, at the same level, but closer to the vertical centerline of the bus; and

(ii) The system shall be wired so that the amber signal lamps are activated only by manual or foot operation, and if activated, are automatically deactivated and the red signal lamps automatically activated when the bus entrance door is opened.

S5.1.5 The color in all lamps, reflective devices, and associated equipment to which this standard applies shall comply with SAE Standard J578c, *Color Specification for Electric Signal Lighting Devices*, February 1977.

S5.2 *Other requirements.*

S5.2.1 The words "it is recommended that," "recommendations," or "should be" appearing in any SAE Standard or Recommended Practice referenced or subreferenced in this standard shall be read as setting forth mandatory requirements, except that the aiming pads on the lens face and the black area surrounding the signal lamp recommended in SAE Standard J887, *School Bus Red Signal Lamps*, July 1964, are not required.

S5.2.2 The words "Type 1 (5¾")," "Type 2 (5¾")," "Type 2 (7")," "Type 1A," "Type 2A," and "Type 2B" appearing in any SAE Standard or Recommended Practice reference or subreferenced in this standard shall also be read as setting forth requirements respectively for the following types of headlamps: 1C1, 2C1, 2D1, 1A1, 2A1, and 2B1.

S5.3 *Location of required equipment.*

S5.3.1 Except as provided in succeeding paragraphs of S5.3.1, each lamp, reflective device, and item of associated equipment shall be securely mounted on a rigid part of the vehicle other than glazing that is not designed to be removed except for repair, in accordance with the requirements of Table I or III and in location specified in Table II (multipurpose passenger vehicles, trucks, trailers, and buses 80 or more inches in overall width) or Table IV (all passenger cars, and motorcycles, and multi-purpose passenger vehicles, truck, trailers and buses less than 80 inches in overall width), as applicable.

S5.3.1.1 Except as provided in S5.3.1.1.1, each lamp and reflective device shall be located so that it meets the visibility requirements specified in any applicable SAE Standard or Recommended Practice. In addition, no part of the vehicle shall prevent a parking lamp, taillamp, stop lamp, turn sigal lamp, or backup lamp from meeting its photometric output at any applicable group of test points specified in Figures 1c and 2, or prevent any other lamp from meeting the photometric output at any test point specified in any applicable SAE Standard or Recommended Practice. However, if motor vehicle equipment (e.g., mirrors, snow plows, wrecker booms, backhoes, and winches) prevents compliance with this paragraph by any required lamp or reflective devices, an auxiliary lamp or device meeting the requirements of this paragraph shall be provided.

S5.3.1.1.1 Clearance lamps may be mounted at a location other than on the front and rear if necessary to indicate the overall width of a vehcile, or for protection from damage during normal operation of the vehicle, and at such a location they need not be visible at 45 degrees inboard.

S5.3.1.2 On a truck tractor, the red rear reflex reflectors may be mounted on the back of the cab, at a minimum height not less than 4 inches above the height of the rear tires.

S5.3.1.3 On a trailer, the amber front side reflex reflectors and amber front side marker lamps may be located as far forward as practicable exclusive of the trailer tongue.

S5.3.1.4 When the rear identification lamps are mounted at the extreme height of a vehicle, rear clearance lamps need not meet the requirement of Table II that they be located as close as practicable to the top of the vehicle.

S5.3.1.5 The center of the lens referred to in SAE Standard J593c, *Backup Lamps*, February 1968, is the optical center.

S5.3.1.6 On a truck tractor, clearance lamps mounted on the cab may be located to indicate the width of the cab, rather than the overall width of the vehicle.

S5.3.1.7 The requirement that there be not less than 4 inches between a front turn signal lamp and a low beam headlamp, specified in SAE Standard J588e, *Turn Signal Lamps*, September 1970, shall not apply if the sum of the candlepower values of the turn signal lamp measured at the test points within each group listed in Figure 1c is not less than two and one-half times the sum specified for each group for yellow turn signal lamps.

S5.3.1.8 Each high-mounted stoplamp on a passenger car manufactured on or after September 1, 1985, shall be mounted with its center on the vertical centerline of the passenger car as the car is viewed from the rear. The lamp may be mounted at any position on the centerline, including the glazing. If the lamp is mounted inside the vehicle, means shall be provided to minimize reflections from the light of the lamp upon the rear window glazing that might be visible to the driver when viewed directly, or indirectly in the rearview mirror. If the lamp is mounted below the rear window, no portion of the lens shall be lower than 6 inches below the rear window on convertibles, or 3 inches on other passenger cars.

S5.4 *Equipment combinations.*

S5.4.1 Two or more lamps, reflective devices, or items of associated equipment may be combined if the requirements for each lamp, reflective device, and item of associated equipment are met, except that no clearance lamp may be combined optically with any taillamp or identification lamp, and no high-mounted stoplamp shall be combined with any other lamp or reflective device.

S5.5 *Special wiring requirements.*

S5.5.1 Each vehicle shall have a means of switching between lower and upper beams that conforms to SAE Recommended Practice J564a *Headlamp Beam Switching*, April 1964 or to SAE Recommended Practice J565b, *Semi-Automatic Headlamp Beam Switching Devices*, February 1969. Except as provided in S5.5.8, the lower and upper beams shall not be energized simultaneously except momentarily for temporary signaling purposes or during switching between beams.

S5.5.2 Each vehicle shall have a means for indicating to the driver when the upper beams of the headlamps are on that conforms to SAE Recommended Practice J564a, April 1964, except that the signal color need not be red.

S5.5.3 The taillamps on each vehicle shall be activated when the headlamps are activated in a steady-burning state.

S5.5.4 The stoplamps on each vehicle shall be activated upon application of the service brakes. The high-mounted stoplamp on each passenger car shall be activated only upon application of the service brakes.

S5.5.5 The vehicular hazard warning signal operating unit on each vehicle shall operate independently of the ignition or equivalent switch, and when activated, shall cause to flash simultaneously sufficient turn signal lamps to meet, as a minimum, the turn signal lamp photometric requirements of this standard.

S5.5.6 Each vehicle equipped with a turn signal operating unit shall also have an illuminated pilot indicator. Failure of one or more turn signal lamps to operate shall be indicated in accordance with SAE Standard J588e, *Turn Signal Lamps*, September 1970, except where a variable-load turn signal flasher is used on a truck, bus, or multipurpose passenger vehicle 80 or more inches in overall width, on a truck that is capable of accommodating a slide-in camper, or on any vehicle equipped to tow trailers.

S5.5.7 On all passenger cars, and motorcycles, and multipurpose passenger vehicles, trucks, and buses of less than 80 inches overall width:

(a) When the parking lamps are activated, the taillamps, license plate lamps, and side marker lamps shall also be activated; and

(b) When the headlamps are activated in a steady-burning state, the taillamps, parking lamps, license plate lamps and side marker lamps shall also be activated.

S5.5.8 On a motor vehicle equipped with a headlighting system designed to conform to the photometry of Figure 15, the lamps marked "L" or "LF" may be wired to remain permanently activated when the lamps marked "U" or "UF" are activated.

S5.5.9 The wiring harness or connector assembly of each headlamp system shall be designed so that only those filaments necessary for meeting lower beam photometrics are energized when the beam selector switch is in the lower beam position, and that only those filaments necessary for meeting upper beam photometrics are energized when the beam selector switch is in the upper beam position.

S5.5.10 The wiring requirements for lighting equipment in use are:

(a) Turn signal lamps, hazard warning signal lamps, and school bus warning lamps shall be wired to flash;

(b) High-mounted stop lamps on passenger cars manufactured on or after August 1, 1984, but before September 1, 1986, may flash when the hazard warning system is activated.

(c) Headlamps and side marker lamps may be wired to flash for signaling purposes;

(d) A motorcycle headlamp may be wired to allow either its upper beam or its lower beam, but not both, to modulate from a higher intensity to a lower intensity in accordance with section S5.6;

(e) All other lamps shall be wired to be steady-burning.

S5.6 *Motorcycle headlamp modulation system.*

S5.6.1 A headlamp on a motorcycle may be wired to modulate either the upper beam or the lower beam from its maximum intensity to a lesser intensity provided that:

(a) The rate of modulation shall be 240 ± 40 cycles per minute.

(b) The headlamp shall be operated at maximum power for 50 to 70 percent of each cycle.

(c) The lowest intensity at any test point shall be not less than 17 percent of

the maximum intensity measured at the same point.

(d) The modulator switch shall be wired in the power lead of the beam filament being modulated and not in the ground side of the circuit.

(e) Means shall be provided so that both the lower beam and upper beam remain operable in the event of a modulator failure.

(f) The system shall include a sensor mounted with the axis of its sensing element perpendicular to a horizontal plane. Headlamp modulation shall cease whenever the level of light emitted by a tungsten filament light operating at 3000° Kelvin is either less than 270 lux (25 foot-candles) of direct light for upward pointing sensors or less than 60 lux (5.6 foot-candles) of reflected light for downward pointing sensors. The light is measured by a silicon cell type light meter that is located at the sensor and pointing in the same direction as the sensor. A Kodak Gray Card (Kodak R-27) is placed at ground level to simulate the road surface in testing downward pointing sensors.

(g) When tested in accordance with the test profile shown in Figure 9, the voltage drop across the modular when the lamp is on at all test conditions for 12 volt systems and 6 volt systems shall not be greater than .45 volt. the modulator shall meet all the provisions of the standard after completion of the test profile shown in Figure 9.

(h) Means shall be provided so that both the lower and upper beam function at design voltage when the headlamp control switch is in either the lower or upper beam position when the modulator is off.

S5.6.2(a) Each motorcycle headlamp modulator not intended as original equipment, or its container, shall be labeled with the maximum wattage, and the minimum wattage appropriate for its use. Additionally, each such modulator shall comply with S5.6.1 (a) through (g) when connected to a headlamp of the maximum rated power and a headlamp of the minimum rated power and shall provide means so that the modulated beam functions at design voltage when the modulator is off.

(b) Instructions, with a diagram, shall be provided for mounting the light sensor including location on the motorcycle, distance above the road service, and orientation with respect to the light.

S5.7 *Replacement Equipment.*

S5.7.1 Each lamp, reflective device, or item of associated equipment manufactured to replace any lamp, reflective device, or item of associated equipment on any vehicle to which this standard applies, shall be designed to conform with this standard.

S5.7.2 Each lamp, reflective device, or item of associated equipment to which section S5.7.1 applies may be labled with the symbol DOT, which shall constitute a certification that it conforms to applicable Federal motor vehicle safety standards.

S6. *Subreferenced SAE Standards and Recommended Practices.*

S6.1 SAE Standards and Recommended Practices subreferenced by the SAE Standards and Recommended Practices included in Tables I and III and paragraphs S5.1.4 and S5.5.1 are those published in the 1970 edition of the SAE Handbook, except that the SAE standard referred to as "J575" is J575e, *Tests for Motor Vehicle Lighting Devices and Components*, August 1970, for stoplamps, taillamps, and turn signal lamps designed to conform to SAE Standards J586c, J585d/J585e, and J588e, respectively, and for high-mounted stoplamps designed to conform to SAE Recommended Practice J186a. The reference in J585e to J256 does not apply. For headlamps, the version of SAE Standard J575 is JUN80, and the version of SAE Standard J602 is OCT80.

S6.2 Requirements of SAE Standards incorporated by reference in this standard, other than J576b and J576c, do not include test for warpage of devices with plastic lenses.

S7 *Headlighting requirements.*

S7.1 Each passenger car, multipurpose passenger vehicle, truck, and bus shall be equipped with a headlighting system designed to conform to the requirements of S7.3, S7.4, or S7.5

S7.2 The lens of each headlamp shall be marked with the symbol "DOT", either horizontally or vertically, which shall consititute a certification that the headlamp is designed to conform to all applicable Federal motor vehicle safety standards.

S7.3 *Sealed beam headlighting system.* A sealed beam headlighting system shall be designed to meet the requirements of one of the following subparagraphs of S7.3.2 through S7.3.9. In references to Figures in SAE J1383 for headlamp dimensional requirements, only those dimensions marked "I" for interchangeability are applicable.

S7.3.1 The lens of each sealed beam headlamp designed to conform to S7.3.2 through S7.3.9 shall be marked according to paragraph 5.4.3 through 5.4.5 of SAE Standard J1383 APR85 *Performance Requirements for Motor Vehicle Headlamps.*

S7.3.2 *Type A headlighting system.* A Type A headlighting system consists of two Type 1A1 and two Type 2A1 headlamps and associated hardware, which are designed to conform to the following requirements:

(a) SAE Standard J1383 APR85 *Performance Requirements for Motor Vehicle Headlamps*, with the following exceptions:

(1) Paragraphs 1, 2.1.2, 2.8.2, 3, 4.1.1, 4.1.3, 4.4, 4.6, 4.8 through 4.16, 5.1.1, 5.1.3, 5.1.5, 5.1.7 through 5.1.16, 5.2.2, 5.3.5, 5.4.1, 5.4.2, and 6 through 6.4 do not apply.

(2) In paragraph 5.3.2, the words "and retaining rings" are omitted.

(3) In paragraphs 4.5.2 and 5.1.6, the words "either Table 1 or Table 2 of SAE J579 DEC84 as appropriate" are substituted for "Table 3."

(b) SAE Standard J580 DEC86 *Sealed Beam Headlamp Assembly* (except paragraphs 3, 4.1.1, 5.1.1.1, 5.1.2.3, and the second sentence of 5.1.6; in 5.2.1, delete the words "and retaining rings"; the correct reference is SAE J1383 Figure 6, 9, 12 and 14.

(c) The maximum wattage at 12.8 volts (design voltage): Single filament headlamp, 55 watts on the upper beam; dual filament headlamp, 43 watts on the upper beam and 65 watts on the lower beam.

S7.3.3 *Type B headlighting system.* A Type B headlighting system consists of two Type 2B1 headlamps and associated hardware, which are designed to conform to the following requirements:

(a) The requirements of paragraphs S7.3.2(a) and (b)

(b) The maximum wattage at 12.8 volts (design voltage): 70 watts on the upper beam and 60 watts on the lower beam.

S7.3.4 *Type C headlighting system.* A Type C headlighting system consists of two Type 1C1 and two Type 2C1 headlamps and associated hardware, which are designed to conform to the requirements of paragraph S7.3.2(a) through (c).

S7.3.5 *Type D headlighting system.* A Type D headlighting system consists of two Type 2D1 headlamps and associated hardware, which are designed to conform to the requirements of paragraph S7.3.3(a) and (b).

S7.3.6 *Type E headlighting system.* A Type E headlighting system consists of two Type 2E1 headlamps and associated hardware, which are designed to conform to the requirements of paragraph S7.3.3(a) and (b).

S7.3.7 *Type F headlighting system.* A Type F headlighting system consists of two Type UF and two Type LF headlamps and associated hardware, which are designed to conform to the following requirements:

(a) Figures 11, 12, 13, and 14 as appropriate.

(b) The photometric requirements of Figure 15 of this standard. A reaim tolerance of +/− ¼ degree is allowed for any test point on the Type LF lamp when tested alone, and such a tolerance is not allowed on the Type UF lamp when tested alone. For the test point 10U–90U, measurement shall be from the normally exposed surface of the lens face.

(c) SAE Standard J1383 APR85 *Performance Requirements for Motor Vehicle Headlamps*, Sections 2.4, 2.5, 2.6, 4.1, and 4.3.4.

(d) When tested in accordance with section (c), the mounted assembly (either Type UF or Type LF headlamps, respective mounting ring, aiming ring, and aim adjustment mechanism) shall be designed to conform to the requirements of Figure 15 for upper or lower beams respective without reaim when any conforming Type UF or LF headlamp is tested and replaced by another conforming headlamp of the same Type.

(e) SAE J580 DEC86 *Sealed Beam Headlamp Assembly* with the following exceptions:

(1) Section 2.2 Mounting Ring reads: "the adjustable ring upon which the sealed beam unit is mounted and which forces the sealed beam unit to seat against the aiming ring when assembled into a sealed beam assembly."

(2) The definition "2.3 Aiming Ring" reads: "The clamping ring that retains the sealed beam unit against the mounting ring, and that provides an interface between the unit's aiming/seating pads and the headlamp aimer adapter (locating plate)."

(3) Section 4.1.1 Vibration Test does not apply.

(4) Section 5.1.1.1 does not apply.

(5) Section 5.1.2.1 reads: "When the headlamp assembly is tested in the laboratory, a minimum aiming adjustment of +/− 2.5 degrees shall be provided in the horizontal plane and +/− 4 degrees in the vertical plane."

(6) Section 5.1.2.2 concludes: ". . . through an angle of +/− 2.5 degrees and +/− 4 degrees respectively."

(7) Section 5.1.6 is retitled "Retaining Ring/Aiming Ring Tests," and add: "92 x 150 mm . . . . . 0.340 in (8.6 mm)."

(8) Figures 2, 3, and 4 do not apply, and the reference to them in section 4.5 is replaced by "Figure 16, Deflectometer, of Federal Motor Vehicle Safety Standard No. 108."

(f) A lens for a Type F headlamp incorporating an upper beam shall be labeled "UF". A lens for a Type F headlamp incorporating a lower beam shall be labeled "LF". The face of letters, numbers, or other symbols molded on the surface of the lens shall not be raised more than 0.020 in (0.5 mm), and shall be placed no closer to the photometric center of the lens than 2.75 in. (70 mm.). The marking shall be molded in the lens and shall be not less than ¼ in. (6.35 mm.) in size.

(g) The maximum wattage at 12.8 volts (design voltage): 70 watts on the upper beam and 60 watts on the lower beam.

(h) Type F headlamps may be mounted on common or parallel seating and aiming planes to permit simultaneous aiming of both headlamps provided that or when tested with any conforming Type UF and LF headlamps according to Section S10:

(1) The assembly (consisting of the Type UF and LF headlamps, mounting rings, the aiming/seating rings, and aim adjustment mechanism), shall be designed to conform to the test point values of Figure 15.

(2) There shall be no provision for adjustment between the common or parallel aiming and seating planes of the two lamps.

S7.3.8 *Type G headlighting system.* A Type G headlamp system consists of two Type 1G1 headlamps and two Type 2G1 headlamps each of which is designed to conform to the following requirements:

(a) Figures 18 and 21.

(b) SAE Standard J1383 APR85 *Performance Requirements for Motor Vehicle Headlamps* (except paragraphs 1, 2.1.2, 2.8.2, 3, 4.1.1, 4.1.3, 4.4, 4.6, 4.8 through 4.16, 5.1.1, 5.1.3, 5.1.5 through 5.1.16, 5.2.2, 5.3.5 through 6.4). In paragraph 5.3.2 the words "and retaining rings" are omitted. In paragraph 4.5.2, the words "either Table 1 or Table 2 of SAE J579 DEC84, as appropriate" are substituted for the words "Table 3."

(c) SAE Standard J580 DEC86 *Sealed Beam Headlamp Assembly*, with the following exceptions:

(1) Sections 2.2, 2.3, 4.1.1, 5.1.1.1, 5.1.2.3, 5.1.6, and 5.2.1.

(2) Section 4.5 reads: "*Torque Deflection Test.* The headlamp assembly to be tested shall be mounted in the designed vehicle position and set at nominal aim (0.0). A special adapter (Figure 22) for the deflectometer (Figure 3) shall be clamped onto the headlamp assembly. A torque of 20 in/lbs (2.25 N-m) shall be applied to the headlamp assembly through the deflectometer, and a reading on the thumb wheel shall be taken. The torque shall be removed and a second reading on the thumb wheel shall be taken."

(d) The maximum wattage at 12.8 volts (design voltage) for the 1G1 and 2G1 upper beam is 55 watts and 43 watts respectively; for the 2G1 lower beam, 65 watts.

(e) A lens for a Type G headlamp incorporating only part of an upper beam shall be labeled 1G1. A lens for a Type G headlamp incorporating both part of an upper beam and a lower beam shall be labeled 2G1. The face of letters, numbers, or other symbols molded on the surface of the lens shall not be raised more than 0.020 in. (0.5 mm.), and shall be placed no closer to the geometric center of the lens than 2.75 in. (70 mm.). The marking shall be molded in the lens and shall not be less than ¼ in. (6.35 mm) in size.

S7.3.9 *Type H headlighting system.* A Type H headlamp system consisting of two Type 2H1 headlamps and associated hardware, which are designed to conform to the following requirements:

(a) Paragraph S7.3.8(a) through (c).

(b) The maximum wattage at 12.8 volts (design voltage): 70 watts on the upper beam and 60 watts on the lower beam.

(C) A lens for a Type H headlamp incorporating both and upper beam and a lower beam shall be labeled 2H1. The face of letters, numbers, or other symbols molded on the surface of the lens shall not be raised more than 0.020 in. (0.5 mm), and shall be placed no closer to the geometric center of the lens than 2.75 in. (70 mm.) The marking shall be molded in the lens and shall be not less than ¼ in. (6.35 mm) in size.

S7.4 *Integral Beam Headlighting System.* An integral beam headlighting system shall be designed to conform to the following requirements:

(a) Each integral beam headlamp shall be marked according to paragraph 5.4.1 and 5.4.2 of SAE Standard J1383 APR 85.

(b) The system shall provide in total not more than two upper beams and two lower beams of the performance described in either Figure 15, Figure 17, or Table 1 or Table 2 of SAE J579 DEC 84 *Sealed Beam Headlamp Units for Motor Vehicles.*

(c) In a four-headlamp system, each upper beam headlamp and each lower beam headlamp shall be designed to conform to the photometrics of either Figure 15, or Table 2 of SAE J579 DEC84.

(d) In a two-headlamp system, each headlamp shall be designed to conform to the photometrics of Figure 17, or Table 1 of SAE J579 DEC84.

(e) In a system in which there is more than one headlamp providing a lower beam as shown in Figure 15, and/or more than one headlamp providing an upper beam as shown in Figure 15, each headlamp shall be designed to meet the photometric performance requirements

based upon the following mathematical expression: conforming test point value=2(Figure 15 test point value)/ total number of lower or upper beam contributors, as appropriate, in the system. Table 1 and Table 2 of SAE J579 DEC84 shall not be used for these systems, nor shall Figure 17.

(f) The lower and upper beams shall be provided as follows where each headlamp contains two light sources:

(1) The lower beam shall be provided either by the most outboard light source (or the uppermost if arranged vertically), or by all light sources.

(2) The upper beam shall be provided either by the most inboard light source (or the lowermost if arranged vertically), or by all light sources.

(g) The lower and upper beams shall be provided only as follows where each headlamp contains a single filament:

(1) The lower beam shall be provided by the most outboard headlamps (or the uppermost if arranged vertically), and the lens of each such hadlamp shall be permanently marked with the letter "L."

(2) The upper beam shall be provided by the most inboard headlamps (or lowermost if arranged vertically), and the lens of each such headlamp shall be permanently marked with the letter "U."

(h) A tolerance of +/−¼ degree reaim tolerance during photometric performance tests is permitted for any headlamp, however, no reaim tolerance is permitted for any headlamp marked "U," which is designed to meet Figure 15. The test point 1OU–9OU shall be measured from the normally exposed surface of the lens face.

(i) A headlamp designed to meet Figure 15 may be mounted in an assembly that has common or parallel seating planes, for the individual lamps to permit simultaneous aiming of the beam(s) contributors, provded that with any complying contributor the assembly complete with all lamps meets the appropriate photometric requirements of Figure 15, when tested in accordance with S10. All other integral beam headlamps not designed to meet Figure 15 shall be mounted and aimed separately.

(j) Each integral beam headlamps system shall be designed to conform to the applicable photometric performance requirements in subsections (a) through (d) of this section when tested in accordance with Sections 4.1 and 4.1.4 of SAE Standard J1383 with any headlamp intended for use in such system. The term "aiming plane" means "aiming reference plane," or the aiming references as established by the manufacturer as required in paragraph S7.7.1.

(k) The system shall be aimable in accordance with the requirements of paragraph S7.7, and shall incorporate headlamps having common or parallel mounting and aiming planes, if the headlamps do not have both an integral mounting and aiming mechanism and a Vehicle Headlamp Aiming Device as described in paragraph S7.7.5.2.

(l) A headlamp with a glass lens need not meet the following tests of the paragraphs specified: abrasion resistance (S8.2), chemical resistance (S8.3), and impact (S8.8). If, in addition to a glass lens, the headlamp uses a non-plastic reflector, it need not meet the internal heat test of paragraph S8.6.2. A headlamp of sealed design as verified in paragraph S8.9 *Sealing* need not meet the following tests of the paragraphs specified: corrosion (S8.4), dust (S8.5), and humidity (S8.7), however, the headlamp shall meet the requirments of paragraphs 4.1, 4.1.2, 4.4 and 5.1.4 for corrosion and connector of SAE Standard J580 DEC86 *Sealed Beam Headlamp Assembly.*

(m) When tested according to any of the procedures indicated in subparagraphs (1) through (7) each headlamp shall meet the appropriate requirement:

(1) After an abrasion test conducted in accordance with paragraph S8.2, the headlamp shall meet the photometric requirements applicable to the headlamp system under test.

(2) After a chemical resistance test involving exposure to any of the fluids listed in paragraph S8.3, there shall be no surface deterioration, coating delamination, fractures, deterioration of bonding materials, color bleeding or color pickup visible without magnification, and the headlamp shall meet the photometric requirements applicable to the headlamp system under test.

(3) After a corrosion test conducted in accordance with paragraph S8.4 there shall be no evidence of external or internal corrosion or rust visible without magnification. Loss of adhesion of any applied coating shall not occur more than 0.125 in. (3.2 mm) from any sharp edge on the inside or outside. Corrosion may occur on terminals only if the current produced during the test of paragraph S8.4(c) is not less than 9.7 amperes.

(4) After a dust test conducted in accordance with paragraph S8.5, the headlamp shall meet the photometric requirements applicable to the headlamp system under test.

(5) The headlamp shall first meet the requirements of subparagraph (i) and then those of subparagraph (ii).

(i) After a temperature cycle test conducted in accordance with paragraph S8.6.1, the headlamp shall show no evidence of delamination, fractures, entry of moisture or deterioration of bonding material, color bleeding, warpage or deformation visible without magnification or lens warpage greater than .118 in (3 mm) when measured parallel to the optical axis at the point of intersection of the axis of each light source with the exterior surface of the lens, and it shall meet the photometric requirements applicable to the headlamp system under test.

(ii) After an internal heat test conducted in accordance with paragraph S8.6.2, there shall be no lens warpage greater than .118 in (3 mm) when measured parallel to the optical axis at the point of intersection of the axis of each light source with the exterior surface of the lens, and it shall meet the photometric requirements applicable to the headlamp system under test.

(6) After a humidity test conducted in accordance with paragraph S8.7, the inside of the headlamp shall show no evidence of delamination or moisture, fogging or condensation visible without magnification, and the headlamp shall meet the photometric requirements applicable to the headlamp system under test.

(7) After an impact test on a headlamp with a plastic lens, conducted in accordance with paragraph S8.8, there shall be no fracture of the adhesion of the lens coating or delamination of materials visible without magnification, and the lens shall not be broken, cracked, or chipped.

(n) Each headlamp shall be marked in compliance with § 575.6 of this chapter.

S7.5 *Replaceable Bulb Headlamp System.* Each replaceable bulb headlamp system shall be designed to conform to the following requirements:

(a) The system shall provide only two lower beams and two upper beams and shall incorporate no more than two standardized replaceable light sources in each headlamp.

(b) The photometrics of Table 1 of SAE Standard J579 DEC84 *Sealed Beam Headlamp Units for Motor Vehicles,* if the system is equipped only with HB1 light source, using any tupe HB1 light source.

(c) The photometrics of Figure 15 or Figure 17 using any standardized replaceable light source of the type intended for use in such system.

(d) The test requirements of sections 4.1 and 4.1.4 of SAE J1383 APR85, using the photometric requirements specified in (a) through (c). The term "aiming plane" means "aiming reference plane," fiducial marks, or aiming references established by the manufacturer as required in paragraph S7.7.1.

(e) For a headlamp equipped with one or two Type HB1 light sources, the following requirements apply:

(1) There shall be no mechenism that allows adjustment of an individual light source or adjustment of reflector aim on a headlamp with two light sources.

(2) The lower and upper beams of a headlamp system consisting of two lamps, each containing two light sources, shall be provided as follows:

(i) The lower beam shall be provided in one of the following ways:

(A) By the outboard light source (or the upper one if arranged vertically) designed to conform to the lower beam requirements of Table 1 of SAE Standard J579 DEC84 or

(B) By both light sources, designed to conform to the lower beam requirements of Table 1 of SAE Standard J579 DEC84.

(ii) The upper beam shall be provided in one of the following ways:

(A) By the inboard light source (or the lower one if arranged vertically) designed to conform to the upper beam requirements of Table 1 of SAE Standard J579 DEC84 or

(B) By both light sources, designed to conform to the upper beam requirements of Table 1 of SAE Standard J579 DEC84.

(iii) Each such headlamp manufactured as replacement motor vehicle equipment shall be designed to meet the requirements of paragraphs (f)(2)(i) and (f)(2)(ii) of this section.

(3) The lower and upper beams of a headlamp system consisting of four lamps, each containing a single light source, shall be provided as follows:

(i) The lower beam shall be provided by the outboard lamp (or upper one if arranged vertically), designed to conform to the lower beam requirements of Table 1 of SAE Standard J579 DEC84. The lens of each such headlamp shall be marked with the letter "L."

(ii) The upper beam shall be provided by the inboard lamp (or lower one if arranged vertically), designed to conform to the upper beam requirements of Table 1 of SAE Standard J579 DEC84. The lens of each such headlamp shall be marked with the letters "U."

(iii) Each such headlamp manufactured as replacement motor vehicle equipment shall be designed to meet the requirements of paragraphs (f)(3)(i) and (f)(3)(ii) of this section.

(f) The following requirements apply to a headlamp system equipped with Type HB3 and HB4, HB1 and HB3, or HB1 and HB4 light sources:

(1) There shall be no mechanism that allows adjustment of an individual light source, or adjustment of reflector aim on a headlamp with two light sources.

(2) The lower and upper beams of a headlamp system consisting of two lamps, each containing two light sources (Type HB3 and HB4, or Type HB1 with HB3 or HB4) shall be provided only as follows:

(i) The lower beam shall be provided in one of the following ways:

(A) By the outboard light source (or the uppermost if arranged vertically) designed to conform to the lower beam requirements of Figure 17; or

(B) By both light sources, designed to conform to the lower beam requirements of Figure 17.

(ii) The upper beam shall be provided in one of the following ways:

(A) By the inboard light source (or the lower one if arranged vertically) designed to conform to the upper beam requirements of Figure 17; or

(B) By both light sources, designed to conform to the upper beam requirements of Figure 17.

(3) The lower and upper beams of a headlamp system consisting of four lamps, using Type HB3 and HB4, HB1 and HB3, or HB1 and HB4 light sources, each containing only a single light source, shall be provided only as follows:

(i) The lower beam shall be produced by the outboard lamp (or upper one if arranged vertically), designed to conform to the lower beam requirements of Figure 15. The lens of each such headlamp shall be permanently marked with the letter "L."

(ii) The upper beam shall be produced by the inboard lamp (or lower one if arranged vertically), designed to conform to the upper beam requirements of Figure 15. The lens of each such headlamp shall be marked with the letter "U."

(4) A ¼ degree reaim tolerance is permitted for any test point. The test point 10U–90U shall be measured from the normally exposed surface of the lens face.

(g) Each lens reflector unit manufactured as replacement equipment shall be designed to conform to the requirements of paragraphs (f) and (g) of this section when any standardized replacement light source appropriate for such unit is inserted in it.

(h) The lens of each replacement bulb headlamp shall be permanently marked as follows:

(i) With the symbol DOT horizontally or vertically which shall constitute certification that the headlamp conforms to all applicable Federal motor vehicle safety standards.

(ii) The lens of each replaceable bulb headlamp using Type HB3 or HB4 light sources, or Type HB1 light sources in conjunction with Type HB3 or HB4 light sources within a headlamp system on a motor vehicle shall permanently display the Type designation(s) for that light source on the lens in front of each light source.

(i) The system shall be aimable in accordance with paragraph S7.7.

(j) Each headlamp shall meet the requirements of paragraph S7.4(l) and (m).

(k) Each headlamp shall be marked in compliance with § 575.6 of this chapter.

S7.6 *Standardized Replaceable Light Sources.* Each standardized replaceable light source shall be designed to conform to the following requirements:

(a) A Type HB1 light source shall be designed to conform to the dimensions specified in Figure 3 and shall incorporate a silicone O-ring. Its maximum power on the lower bean shall be 50 watts, and on the upper beam, 70 watts. Its luminous flux in lumens shall be 700 +/− 15% on the lower beam and 1200 +/− 15% on the upper beam.

(b) A Type HB3 light source shall be designed to conform to the dimensions specified in Figure 19. Its maximum power on the upper beam shall be 70 watts. Its luminous flux in lumens shall be 1700 +/− 12% on the upper beam.

(c) A Type HB4 light source shall be designed to conform to the dimensions specified in Figure 20. Its maximum power shall be 60 watts on the lower beam, and its luminous flux in lumens on the lower beam shall be 1000 +/− 15%.

(d) The filament of a light source shall be seasoned before measurement of maximum power and luminous flux.

(e) Measurement of maximum power and luminous flux shall be made with the direct current test voltage regulated within one quarter of one percent. The test voltage shall be design voltage, 12.8v. The measurement of luminous flux shall be in accordance with the Illuminating Engineering Society of North America, LM–45; *IES Approved Method for Electrical and Photometric Measurements of General Service Incandescent Filament Lamps* (April 1980), shall be made with the black cap installed on Type HB1 and HB4, and shall be made with the electrical conductor and light source base shrouded with an opaque white colored cover, except for the portion normally located within the interior of the lamp housing. The measurement of luminous flux for the Types HB3 and HB4 shall be with the base covered with a white

cover shown in Figures 19–1 and 20–1. The white covers are used to eliminate the likelihood of incorrect lumen measurement that will occur should the reflectance of the light source base and electrical connector be low.

(f) The capsule, lead wires and/or terminals, and seal on each Type HB1, Type HB3 and Type HB4 light source shall be installed in the base so as to provide an airtight seal. Such a seal exists when no air bubbles shall appear on the low pressure (connector) side after the light source has been immersed in water for one minute while inserted in a cylindrical aperture of 1.350 to 1.346 in. (34.30 to 34.2 mm) (HB1), or 0.796 +/−0.004 in (20.22+/−0.1. mm) (Type HB3), or 0.875 +/− 0.004 in (22.2 +/− 0.1 mm) (Type HB4) and subjected to a minimum air pressure of 70kPa (10 P.S.I.G.) on the glass capsule side.

(g) After the force deflection test conducted in accordance with S9, the permanent deflection of the glass envelope shall not exceed 0.005 in. (0.13 mm) in the direction of the applied force.

(h) A general tolerance shall apply to Figure 3 as follows: +/− 0.0004 in. (0.10 mm) to all linear dimensions and +/− degree 00 minutes to all angular dimensions except for referenced dimensions and unless otherwise specified.

(i) The base of each Type HB3 and Type HB4 light source shall be marked by its manufacturer or importer with its HB Type designation, with the name or any trademark of the manufacturer and importer (if applicable) that is registered with the U.S. Patent Office. Each standardized light source shall be marked with the symbol DOT horizontally or vertically, which shall constitute a certification that the light source conforms to all applicable Federal motor vehicle safety standards.

S7.7 Aimability Performance Requirements.

S7.7.1 Each headlamp shall be equipped with fiducial marks, aiming pads or similar references of sufficient detail and accuracy for determination of correct alignment with the photometer axis when being tested for photometric compliance, and to serve as the basis for the aiming reference when the lamp is installed on a motor vehicle.

S7.7.2 Each headlamp shall be installed on a motor vehicle with a mounting and aiming mechanism that allows aim inspection and adjustment of both vertical and horizontal aim, and is accessible for those uses without removal of any vehicle parts. The vertical mechanism shall be continuously adjustable over the full range. Adjustment of one axis through its full range shall not cause the aim of the other axis to deviate more than +/− 0.76 degree.

S7.7.3 When a headlamp system is installed on a motor vehicle, the range of its vertical aim shall not be less than the greater of the following: +/− 4 degrees, or the full range of pitch angle achievable by the vehicle on which the headlamp system is installed. The range of pitch angle shall as a minimum be determined from unloaded vehicle weight to gross vehicle weight rating, and incorporate pitch angle effects from maximum trailer or trunk loadings, the full range of tire intermix sizes and suspensions recommended and/or installed by the vehicle manufacturer, the anticipated effects of suspension sag, variable passenger loading, and vehicle repair accommodation.

S7.7.4 When a headlamp system is installed on a vehicle, the range of its horizontal aim shall not be less than 2.5 degrees.

S7.7.5 When a headlamp system is installed on a motor vehicle, it shall be aimable with either an externally applied headlamp aiming device or on-vehicle headlamp aiming devices installed by the vehicle manufacturer, in accordance with either paragraph S7.7.5.1 or S7.7.5.2. When aimed with the reference axis of each lamp aligned with the photometric axis, each installed headlamp system shall be designed to conform to the applicable photometric performance requirements specified by this standard. This performance shall occur with any headlamp intended for use in the headlighting system. When in use headlamps shall not have any style ornament or other feature, such as a translucent cover or grill, in front of the lens. Upon completion of the manufacture of the vehicle each headlamp system shall be aimed at 0.0 position +/− 0.19 degree vertically, and 0.38 degree horizontally with the vehicle at unloaded vehicle weight.

S7.7.5.1 *External aiming.* Each headlamp system that is capable of being mechanically aimed by external headlamp aiming devices shall be mechanically aimable using the equipment specified in SAE Standard J602 OCT80 *Headlamp Aiming Device for Mechanically Aimable Sealed Beam Headlamp Units* without the removal of any ornamental trim rings or other parts.

(a) *Torque deflection test.* Each headlamp system that is designed to use such devices shall not deviate more than 0.30 degree when a downward torque of 20 lb.-in. (2.25 N-m) is applied to the headlamp in its normal operating position, through the lamp's mechanical axis at the plane of the forwardmost aiming pad.

(b) *Inward force test.* When a headlamp is installed on a motor vehicle, its aim in any direction shall not change by more than 0.30 degree nor shall the lamp recede more than 0.1 in. (2.5 mm.) after being subjected to an inward force of 50 pounds (222 newtons) applied evenly to the lens parallel to the mechanical axis.

(c) *Corrosion test.* Each headlamp system mounting and aiming mechanism shall be subjected to a salt spray (fog) test in accordance with ASTM B117–73 *Method of Salt Spray (Fog) Testing* for a period of 50 hours, consisting of two successive 25 hour periods of 24 hours exposure followed by 1 hour of drying. At the end of 50 hours the headlamp system shall be capable of meeting any of the applicable requirements of paragraph S7.7.

(d) Each headlamp system designed to use the Headlamp Aiming Device Locating Plates for the 100 x 165 mm unit and the 142 x 200 mm unit which have adjustable length legs, shall meet the requirements of subparagraphs (1) and (2).

(1) The lens shall have three pads which meet the requirements of Figure 4, *Dimensional Specifications for Location of Aiming Pads on Replaceable Bulb Headlamp Units.* Except as provided in subparagraph (2) a whole number, which represents the distance in tenths of an inch (i.e. 0.3 inch = 3) from the aiming reference plane to the respective aiming pads which are not in contact with that plane, shall be inscribed adjacent to each respective aiming pad on the lens. The height of these numbers shall be not less than .157 inch (4 mm). If there is interference between the plane and the area of the lens between the aiming pads, the whole number will represent the distance to a secondary plane. The secondary plane shall be located parallel to the aiming reference plane and as close to the lens as possible without causing interference.

(2) If the most forward aiming pad is the lower inboard aiming pad, then the dimensions may be placed anywhere on the lens. The dimension for the outboard aiming pad (Dimension F in Figure 4) shall be followed by the letter "H" and the dimension for the center aiming pad shall be followed by the letter "V". The dimensions shall be expressed in tenths of an inch.

(e) Each headlamp may be designed to use the nonadjustable Headlamp Aiming Device Locating Plate for the 100 x 165 mm unit, the 142 x 200 mm unit, the 146 mm diameter unit, or the 178 mm diameter unit of SAE J602, or the 92 x 150 mm Type F unit. If so designed, no additional lens marking is necessary to designate the type of plate or dimensions.

S7.7.5.2 *On-vehicle aiming.* Each headlamp system that is capable of being aimed by on-vehicle equipment shall include a Vehicle Headlamp Aiming Device (VHAD) that conforms to the following requirements:

(a) The VHAD shall provide for headlamp aim inspection and adjustment in both the vertical and horizontal axis.

(1) *Vertical aim:* The VHAD shall include the necessary references and scales relative to the horizontal plane to assure correct vertical aim for photometry and aiming purposes. An off-vehicle measurement of the plane of the ground is permitted. In addition, an equal number of graduations from the "0" position representing angular changes in the axis in the upward and downward directions shall be provided. The "0" position shall indicate that the axis of the headlamp is horizontal.

(i) Each graduation shall represent a 0.19 degree (1 in. at 25 feet) change in axis position to provide for variations in aim at least from 1.2 degrees above and below the horizontal, and have an accuracy relative to the zero mark of less than 0.1 degree.

(ii) The VHAD shall be marked to indicate headlamp aim movement in the upward and downward directions.

(iii) Each graduation shall indicate a linear movement of the scale indicator of not less than 0.05 in. (1.27 mm).

(iv) The vertical indicator shall perform through a range of +/− ½ degrees.

(v) Means shall be provided in the VHAD for compensating for deviations in floor slope from the horizontal plane that would affect the correct positioning of the headlamp for vertical aim.

(2) *Horizontal aim.* The VHAD shall include a horizonal aim feature with a horizontal aim scale marked "0" with respect to the fiducial or reference marks or devices required by paragraph S7.7.1, The "0" mark shall be used to indicate alignment of the axis of the headlamps relative to the longitudinal axis of the vehicle. In addition, an equal number of graduations from the "0" position representing equal angular changes in the axis relative to the vehicle axis shall be provided.

(i) Each graduation shall represent a 0.38 degree change (2 in. at 25 feet) in axis position to provide for variations in aim at least 0.76 degree (4 in. at 25 feet) to the left and right of the longitudinal axis of the vehicle, and have an accuracy relative to the zero mark of less than 0.1 degree.

(ii) The VHAD shall be marked to indicate headlamp aim movement in the left and right directions.

(iii) The graduations shall be readable without moving any part of the vehicle except the hood, under an illumination level no greater than 30 foot candles, measured at the top of the radiator, by an observer having 20/20 vision (Snellen), and shall permit aim adjustment to within 0.38 degree (2 in. at 25 feet).

(iv) The horizontal indicator shall perform through a range of +/−0.76 degree (4 in. at 25 feet); however, the indicator itself shall be capable of a movement of +/−2.5 degrees relative to the longitudinal axis of the vehicle to accommodate any adjustment necessary for recalibrating the indicator after vehicle repair.

(b) The VHAD and associated headlamp(s) shall be rigidly mounted in a headlamp test fixture and comply with the following laboratory test procedures:

(1) Each graduation on the horizontal and vertical aim scales shall be checked and in no case shall the variation from the correct aim exceed +/−0.2 degree, and +/−0.1 degree respectively.

(2) With the aiming plane horizontal and vertical and with the scale on the device set at 0, the aimer shall be adjusted before each of the following tests to assure that the indicators are centered on 0.

(3) The VHAD and an unlighted headlamp assembly shall be stabilized at 20 +/−5 degrees F (−7+/−3 degrees C) in a circulating air environmental test chamber. After a period of 30 minutes, the variation from correct horizontal or vertical aim shall not exceed +/−0.2 degree, and +/−0.1 degree, respectively.

(4) The VHAD, and the headlamp assembly with it highest wattage filament (or combination of filaments intended to be used simultaneously) energized at its design voltage, shall then be stabilized at 100+/−5 degrees F (38+/−3 degrees C) in a circulating air environmental test chamber. After a period of 30 minutes, the variation from correct horizontal and vertical aim shall not exceed +/−.2 degree, and +/−0.1 degree, respectively.

(5) The VHAD and an unlighted headlamp assembly shall then be placed in a circulating air environmental test chamber and exposed to a temperature of 140 +/−5 degrees F (60+/−3 degrees C) for 24 hours, followed by a temperature of −40+/−5 degrees F (−40+/−3 degrees C) for 24 hours and then permitted to return to room temperature, after which the VHAD and headlamp assembly shall show no visible damage. The variation from correct horizontal or vertical aim shall not exceed +/−0.2 degree, and +/−0.1 degree, respectively.

(6) The VHAD and headlamp assembly shall then be tested according to the corrosion test requirements of paragraph S8.4.

(7) The VHAD and headlamp assembly (if the headlamp is separable or intended to be used with the VHAD) shall then be tested for compliance with the photometrics appropriate for it in accordance with the test procedures of paragraphs 4.1, and 4.1.4 (except for 4.1.4.3). A reaim tolerance of ¼ degree is permitted for any test point.

(c) The method for aim adjustment shall be provided in the vehicle operator's manual in clear operating instructions, or on a label permanently affixed to the vehicle adjacent to each VHAD.

S8 *Tests and Procedures for Headlighting Systems.* When tested in accordance with the following procedures, each integral beam headlamp shall meet the requirements of paragraph S7.4, and each replaceable bulb headlamp shall meet the requirements of paragraph S7.5.

S8.1 *Photometry.* Each headlamp shall be tested according to paragraph 3.5, Photometric Design Requirements and Table 1 of SAE Standard J579 DEC84 or Figure 15 or Figure 17 of this standard, as applicable, after the tests specified in paragraphs S8.2, S8.3, S8.5, S8.6.1, S8.6.2, and S8.7.

S8.2 *Abrasion.* (a) A headlamp shall be mounted in the abrasion test fixture in the manner indicated in Figure 5 with the lens facing upward.

(b) An abrading pad meeting the requirements in paragraphs (c)(1) through (c)(4) of this section shall be cycled back and forth (1 cycle) for 11 cycles at 4 ± 0.8 in. (10 cm ± 2 cm) per second over at least 80 percent of the lens surface, including all the area between the upper and lower aiming pads, but not including lens trim rings and edges.

(c)(1) The abrading pad shall be not less than 1.0 ± .04 in . (2.5 cm ± .1 cm) wide, constructed of 0000 steel wool, and rubber cemented to a rigid base shaped to the same vertical contour of the lens. The "grain" of the pad shall be perpendicular to the direction of motion.

(2) The abrading pad support shall be equal in size to the pad and the center of the support surface shall be within ± 0.8 in. (± 2 mm) of parallel to the lens surface.

(3) The density of the abrading pad shall be such that when the pad is mounted to its support and is resting unweighted on the lens, the base of the

pad shall be no closer than .125 in. (3.2 mm) to the lens at its closest point.

(4) When mounted on its support and resting on the lens of the test headlamp, the abrading pad shall then be weighted such that a pad pressure of 2.0 ± .15 psi (14 ± 1 KPa) exists at the center and perpendicular to the face of the lens.

(d) A pivot shall be used if it is required to follow the contour of the lens.

(e) Unused steel wool shall be used for each test.

S8.3 *Chemical resistance.* (a) The entire exterior lens surface of the headlamp in the headlamp test fixture and top surface of the lens-reflector joint shall be wiped once to the left and once to the right with a 6-inch square soft cotton cloth (with pressure equally applied) which has been saturated once in a container with 2 ounces of a test fluid as listed in paragraph (b). The lamp shall be wiped within 5 seconds after removal of the cloth from the test fluid.

(b) The test fluids are:

(1) Gasoline, unleaded, 89 octane or above (R ± M/2) (consisting by volume of 47% toluene, 3% benzine, and 50% iso-octane) used per OSHA Std. 29 CFR 1910.106—*Handling Storage and Use of Flammable combustible Liquids.*

(2) Tar remover (consisting of volume of 45% xylene and 55% petroleum base with mineral spirits).

(3) Power steering fluid (as specified by the manufacturer of the motor vehicle on which the headlamp is intended to be installed).

(4) Windshield washer fluid consisting of 0.5% monoethanolamine with the remainder 50% concentration of methanol/distilled water by volume.

(5) Antifreeze (50% concentration of ethylene glycol/distilled water by volume).

(c) After the headlamp has been wiped with the test fluid, it shall be stored in its designed operating attitude for 48 hours at a temperature of 73° F ± 7° (23° C ± 4° and a relative humidity of 30 ± 10 percent. At the end of the 48-hour period, the headlamp shall be wiped clean with a soft dry cotton cloth and visually inspected.

S8.4 **Corrosion.** (a) A connector test shall be performed on each filament circuit prior to the test in subparagraph (b) according to Figure 1 of SAE Standard J560 DEC86. The power source shall be set to provide 12.8 volts and the resistence shall be set to produce 10 amperes.

(b) The headlamp with connector attached to the terminals, unfixtured and its designed operating attitude with all drain holes, breathing devices or other designed openings in their normal operating positions, shall be subjected to a salt spray (fog) test in accordance with ASTM B117-73, *Method of Salt Spray (Fog) Testing*, for 240 hours, consisting of ten successive 24-hour periods. During each period, the headlamp shall be mounted in the middle of the chamber and exposed for 23 hours to the salt spray. The spray shall be activated during the 24th hour. The bulb shall be removed from the headlamp and from the test chamber during the one hour of salt spray deactivation and reinserted for the start of the next test period, at the end of the first and last three 23-hour periods of salt spray exposure, and at the end of any two of the fourth through seventh 23-hour periods of salt-spray exposure. The test chamber shall be closed at all times except for a maximum of 2 minutes which is allowed for removal or replacement of a bulb during each period. After the ten periods, the lens reflector unit without the bulb shall be immersed in deionized water for 5 minutes, then secured and allowed to dry by natural convection only.

(c) Using the voltage, resistance and pretest set up of paragraph (a) the current in each filament circuit shall be measured after the test conducted in paragraph (b).

S8.5 *Dust.* The headlamp, mounted on a headlamp test fixture, with all drain holes, breathing devices or other designed openings in their normal operating positions, shall be positioned within a cubical box, with inside measurements of 35.4 in. (900 mm) on each side or larger if required for adequate wall clearance, i.e., a distance of at least 5.9 in. (150 mm) between the headlamp and any wall of the box. The box shall contain 9.9 lb. (4.5 kg) of fine powdered cement which conforms to the ASTM C150–77 specification for Portland Cement. Every 15 minutes, the cement shall be agitated by compressed air or fan blower(s) by projecting blasts of air for a two-second period in a downward direction so that the cement is diffused as uniformaly as possible throughout the entire box. This test shall be continued for five hours after which the exterior surfaces of the headlamp shall be wiped clean.

S8.6 *Temperature and internal heat tests*—A headlamp with one or more replaceable standardized light sources shall be tested according to paragraphs S8.61 and S8.62. Tests shall be made with all filaments lighted at design voltage that are intended to be used simultaneously in the headlamp and which is combination draw the highest total wattage. These include but are not limited to filaments used for turn signal lamps, fog lamps, parking lamps, and headlamp lower beams lighted with upper beams when the wiring harness is so connected on the vehicle. If a turn signal is included in the headlamp assembly, it shall be operated at 90 flashes a minute with a 75 ± 2% current "on time." If the lamp produces both the upper and lower beam, it shall be tested in both the upper beam mode and the lower beam mode under the conditions above described, except for a headlamp with a single HB1 light source.

S8.6.1 *Temperature cycle.* A headlamp, mounted on a headlamp test fixture, shall be subjected to 10 complete consecutive cycles having the thermal cycle profile shown in Figure 6. During the hot cycle, the lamp, shall be energized commencing at point "A" of Figure 6 and de-energized at point "B." Separate or single test chambers may be used to generate the environment of Figure 6. All drain holes, breathing devices or other openings or vents of the headlamps shall be in their normal operating positions.

S8.6.2 *Internal Heat Test.* (a) The headlamp lens surface that would normally be exposed to road dirt shall be uniformly sprayed with any appropriate mixture of dust and water or other materials to reduce the photometric output at the H-V test point of the upper beam (or the ½D-1½R test point of the lower beam as appropriate) to 25 ± 2% of the output originally measured in the photometric test conducted pursuant to paragraphs S7.4(i), or S7.5(a) through (4), as applicable. A headlamp with single HB1 light source shall be tested on the upper beam only. Such reduction shall be determined under the same conditions as that of the original photometric measurement.

(b) After the photometric output of the lamp has been reduced as specified in paragraph (a), the lamp and its mounting hardware shall be mounted in an environmental chamber in a manner similar to that indicated in Figure 7 "Dirt/Ambient Test Setup." The headlamp shall be soaked for one hour at a temperature of 95 + 7 − 0 degrees F (35 + 4 − 0 °C) and then the lamp shall be energized according to paragraph S8.6 one hour in a still air condition, allowing the temperature to rise from the soak temperature.

(c) The lamp shall be returned to a room ambient temperature of 73 + 7 − 0 degrees F (23 + 0 degrees C) and a relative humidity of 30 ± 10 % and allowed to stabilize to the room ambient temperature. The lens shall then be cleaned.

S8.7 *Humidity.* The headlamp mounted on a headlamp test fixture shall be placed in a controlled environment consisting of a temperature of 100 + 7 − 0 °F (38 + 4 − 0 °C) with a relative humidity of not less than 90%. All drain holes, breathing devices, and other designed openings shall be in their normal operating positions. The headlamp shall be subjected to 20 consecutive 6-hour test cycles. In each cycle it shall be energized for 1 hour at design voltage with the highest combination of filament wattages that are intended to be used including a turn signal flashing at 90 flashes per minute with 75 ± 2% current "on time", if so equipped, and then de-energized for 5 hours. After competion of the last cycle, the lamp shall be soaked for 1 hour at 73 ± 7 − 0 °F (20 ± 4 − °C) and relative humidity of 30 ± 10% before it is removed for photometric testing. The headlamp shall be tested for photometrics at 10 ± 1 minutes following completion of the humidity test.

S8.8 *Impact.* The headlamp shall be rigidly mounted in a headlamp test fixture on the seating lugs with the mechanical axis (bulb socket axis) vertical, and the lens upward. The seating plane of the test fixture shall consist of oakwood 0.5 inch (13 mm) thick. One impact shall be delivered to the center of the lens on the mechanical axis using a steel ball bearing with a diameter of .9055 in. (23 mm) weighing 1.76 oz. (50 grams), dropped freely from a distance of 15.75 in. (40 cm) from the bottom of the ball to the surface of the lens, at the intersection of the ball trajectory and the mechanical axis of the headlamp.

S8.9 Sealing. An unfixture headlamp in its design mounting position shall be placed in water at a temperature of 176 +/−5 degree F (60 +/−3 deg. C) for one hour. The headlamp shall be energized in its highest wattage mode, with the test voltage at 12.8 +/−0.1 V. during immersion. The lamp shall then be de-energized and immediately submerged in its design mounting position into water at 32 +5–0 deg. F (0 +3–0 deg. C). The water shall be in a pressurized vessel, and the pressure shall be increased to 10 pounds per square inch guage (69 kPa), upon placing the lamp in the water. The lamp shall remain in the pressurized vessel for a period of thirty minutes. This entire procedure shall be repeated for four cycles, and then the lamp shall be inspected for any signs of water on its interior. During the high temperature portion of the cycles, the lamp shall be observed for signs of air escaping from its interior. Any water occurring on the interior or air escaping shall mean that the lamp is not a sealed lamp.

S9. *Deflection test for standardized replaceable light sources.*

With the light source rigidly mounted in a fixture in a manner indicated in Figure 8, apply a force of 4.0 ± 0.1 pounds (17.8 ± 0.4N) at a distance "A" from the reference plane perpendicular to the longitudinal axis of the glass capsule and parallel to the smallest dimension of the pressed glass capsule seal. The force application of shall be applied using a rod with a hard rubber tip with a minimum spherical radius of .039 in (1 mm). The force shall be applied radially to the surface of the glass capsule in four locations in a plane parallel to the reference plane and space at a distance "A" from that plane. These force applications shall be spaced 90 degrees apart starting at the point perpendicular to the smallest dimension of the pressed seal of the glass capsule. The bulb deflection shall be measured at the glass capsule surface at 180 degrees opposite to the force application.

S10. *Simultaneous Aim Photometry Tests.*

(a) *Type F. Headlamp Systems* The assembly shall be located on a goniometer placed not less than 60 feet (18.3m) from the photometer. The LF unit shall be aimed mechanically by centering the unit on the photometer axis and aligning the aiming plan of the lens perpendicular to the photometer axis. Then the assembly shall be moved in a plane parallel to the established aiming plane of the LF headlamp until the UF headlamp is centered on the photometer axis. Photometry measurements of the UF photometry unit shall be completed using the aiming plane so established, and the procedures of section 4.6 of SAE J575 JUN80, and Figure 15. A reaim tolerance of ± 1/4 degree is allowed for any test point.

(b) *Integral Beam Headlamp Systems.* The assembly used for simultaneously aiming more than one integral beam headlamp shall be placed on a test fixture on a goniometer located not less than 60 feet (18.3 m.) from the photometer. The assembly shall be aimed by centering the geometric center of the lower beam lens(es) on the photometer axis and by aligning the assembly's axis with the photometer axis. Photometric compliance of the lower beam shall be determined with all lower beam contributors illiminated and in accordance with section 4.6 Photometry of SAE Standard J575 JUN 80, and Figure 15. The assembly shall then be moved in a plane parallel to the established aiming plane of the lower bean until the assembly is located with the geometric center of the upper lens(es) on the photometer axis. Photometric compliance for upper beam shall now be determined using the figure and procedure specified for the lower beam. During photometric testing, a ¼ degree reaim in any direction for any test point is permitted for the upper beam, but is not permitted for the lower beam.

* * * * *

3. The item "Headlamps" of Tables I and III would be amended by removing the entries in the second column and the entries in the final column in each Table, and by adding "See S7." to the second column.

4. The footnotes in Tables I, II, and III, would be amended by changing the prefix of each from "S4" to "S5".

5. Footnote 2 in Table IV would be revised to read "S5.1.1.15".

PART 575—[AMENDED]

6. The authority citation for Part 575 would continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1407, 1421, 1423; delegation of authority at 49 C.F.R 1.50.

§ 575.4 [Amended]

7. Section 575.4(a) would be amended by revising the phrase "motor vehicles and tires" to read "motor vehciles, headlamps, and tires."

8. Secs, 575.4(b), (c), and (d) would be amended by revising the phrase "motor vehicles or tires" to read "motor vehicles, headlamps, or tires."

§ 575.6 [Amended]

9. In § 575.6, in paragraph (a), the phrase "vehicle and its tires" would be revised to read "vehicle, its headlamps and tires".

10. A new § 575.102 would be added to Subpart B to read as follows:

§ 575.102 Headlamps.

(a) *Scope.* This section requires manufacturers of motor vehciles to which this section applies to identify the part or parts numbers of original and replacement headlamps certified for use in their vehicles, and the name or trademark of the headlamp manufacturer.

(b) *Purpose.* The purpose of this section is to aid the consumer in ensuring that motor vehicle headlamps bought for replacement of original equipment are the equivalent in performance and application of the original equipment headlamps.

(c) *Application.* This section applies to passenger cars, multipurpose passenger vehicles, trucks, and buses, equipped with headlamps whose exterior dimension are not prescribed by, or incorporated by reference in, Standard No. 108 of this chapter (49 CFR 571.108).

BEST COPY AVAILABLE

VOL 52 ISS 249 DE 29 1987 UMI

(d) *Required Information.* Each manufacturer of passenger cars, multipurpose passenger vehicles, trucks, and buses, to which this section applies, shall provide informaiton with each vehicle at the time of its first purchase for purposes other than resale which must indiciate clearly the headlamp manufacturer's name and/or trade mark, and all headlamp parts numbers.

Issued on: December 23, 1987.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Food Stamp Program; Thrifty Food Plan for Alaska, Hawaii, Guam, and the Virgin Islands.

AGENCY: Food and Nutrition Service, USDA.

ACTION: General notice.

SUMMARY: The Department is updating the Thrifty Food Plan which determines the maximum amount of food stamps which participating households receive in Alaska, Hawaii, Guam, and the Virgin Islands. These adjustments, required by law, take into account changes in the cost of living.

EFFECTIVE DATE: October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas O'Conner, Chief, Administration and Design Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302, (703) 756-3383.

SUPPLEMENTARY INFORMATION:

Publication

State agencies implemented this action on October 1, 1987. Based on regulations published at 47 FR 46485-46487 (October 19, 1982) annual statutory adjustments to the Thrifty Food Plan are issued by General Notices published in the **Federal Register** and not through rulemaking proceedings.

Classification

Executive Order 12291. This action has been reviewed under Executive Order 12291 and Secretary's Memorandum 1512-1. It has been determined that this action would not result in an annual effect on the economy of $100 million or more; and it will not have significant adverse effects on competition, productivity, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has classified this action as "not major."

Executive Order 12372. The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the Final rule related Notice(s) to 7 CFR 3015, Subpart V (Cite 48 FR 29115, June 24, 1983; or 48 FR 54317, December 1, 1983, as appropriate, and any subsequent notices that may apply), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act. Anna Kondratas, Administrator of the Food and Nutrition Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The action will increase the amount of money spent on food through food stamps. However, this money will be distributed among food vendors in Alaska, Hawaii, Guam and the Virgin Islands, so the effect on any one vendor will not be significant.

Paperwork Reduction Act. This action does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget (OMB).

Background

Thrifty Food Plan (TFP).

The TFP is a plan for the consumption of foods of different types (food groups) that families might use to provide nutritious meals and snacks for family members. The plan suggests amounts of food for men, women, and children of different ages. The cost of the TFP is adjusted periodically to reflect changes in the costs of the food groups.

The TFP also constitutes the basis for allotments for food stamp households. As such, the cost of the TFP is the maximum benefit level payable to a household of a particular size. The maximum benefit is paid to households which have no net income. For households which have some net income, their allotment is determined by reducing the TFP for their household size by 30 percent of the household's net income.

Food stamp allotments are adjusted periodically to reflect changes in cost levels. Section 3(o) of the Food Stamp Act of 1977, as amended, requires that an adjustment take place on October 1, 1987, based upon TFP costs for the twelve months ending June 1987 for a family of four persons consisting of a man and woman ages 20-50 and children 6-8 and 9-11. The October 1, 1987 adjustment in food stamp allotments for the 48 States and D.C. was published in a separate Notice in the **Federal Register**.

TFPs for Alaska and Hawaii were delayed because of a change in BLS procedures. Under the revised BLS procedure, monthly food price data for Alaska and Hawaii are no longer available. Beginning with the January-June 1987 period, BLS began compiling and publishing CPI information for Anchorage and Honolulu and some other areas on a semiannual basis. Although *some* food price data were collected in June 1987 in Anchorage and Honolulu, the number of items for which prices were collected was too small to provide valid information for June 1987. Instead the information released by BLS was an average for the six-month period that includes June 1987. Although the six-month average could be used to obtain a TFP for Alaska and Hawaii for January-June 1987, this is not the same as the June 1987 TFP would be, so FNS Adjusted this average in order to approximate as nearly as possible the actual cost of the TFP for June 1987. In order to make the adjustment, FNS measured how the June 1986 Alaska and Hawaii TFPs compared with the January-June 1986 average TFPs for these areas. This measure was used as a proxy for how the June 1987 TFP would compare with the January-June 1987 averages, and it was multiplied by the January-June average TFPs. The resultant TFPs for June 1987 are $375.06 in Alaska and $444.46 in Hawaii. The TFPs for Guam and the Virgin Islands were $427.90 in Guam and $373.30 in the Virgin Islands.

To obtain the maximum food stamp benefit for each household size, the TFP costs for the four-person household were divided by four, multiplied by the appropriate household size and economy of scale factor, and the final result was rounded down to the nearest dollar.

Maximum food stamp benefits for Guam and the Virgin Islands cannot exceed those in the 50 States and D.C. In Alaska, where the TFP is based on Anchorage prices, the urban allotment is

the higher of the allotment that was in effect in urban areas on October 1, 1985 or 1.0079 percent higher than the Anchorage TFP. The allotment for rural I areas is the higher of the allotment that was in effect in each area on October 1, 1985 or 28.52 percent higher than the Anchorage TFP. (Thus, the allotment for Nenana will be at the previous level for rural Alaska.) The rural II allotment is 56.42 percent higher than the Anchorage TFP. For further information concerning the allotments for urban Alaska, rural I Alaska, Nenana, and rural II Alaska, see 50 FR 13759–13761.

The following table shows the new allotments for urban Alaska, rural I Alaska, Nenana, rural II Alaska, Hawaii, Guam, and the Virgin Islands.

THRIFTY FOOD PLAN AMOUNTS [1]—OCTOBER 1987, AS ADJUSTED

Household Size	Urban Alaska [2]	Rural I Alaska [3]	Rural II Alaska [4]	Nenana [3]	Hawaii	Guam [5]	Virgin Island [5]
1	$113	$144	$178	$158	$133	$128	$111
2	207	265	327	290	244	235	205
3	297	379	468	415	350	336	293
4	378	482	595	527	444	427	373
5	448	572	706	626	527	508	443
6	536	686	847	752	633	609	531
7	595	759	924	831	700	673	587
8	680	867	1070	949	800	770	671
Each additional member	+85	+108	+132	+119	+100	+96	+84

[1] Adjusted to reflect the cost of food in June, adjustment for each household size, economies of scale, and rounding.
[2] These levels are 1.0079 percent higher than the Anchorage TFP.
[3] These levels are 28.52 percent higher than the Anchorage TFP. With the exception of Nenana, all Rural I areas formerly received the allotment for urban Alaska.
[4] These levels are 56.42 percent higher than the Anchorage TFP.
[5] These levels were in effect in Nenana on October 1, 1985. They are higher than the allotment for Rural I Alaska.
[6] Adjusted to reflect changes in the cost of food in the 48 States and D.C., which correlate with price changes in these area. TFP costs in these areas cannot exceed costs in Rural II Alaska.

These amounts will go into effect October 1, 1987.

(91 Stat. 958 (7 U.S.C. 2011, et seq.))

Sonia Crow,

Acting Administrator

Date: December 21, 1987.

BILLING CODE 3410-30-M

Packers and Stockyards Administration

Certification of Central Filing System; Oklahoma

The Statewide central filing system of Oklahoma is hereby certified, pursuant to section 1324 of the Food Security Act of 1985, on the basis of information submitted by Hannah D. Atkins, Secretary of State, for farm products produced in that State as follows:

Cattle and calves	Potatoes
Goats	Sweet potatoes
Horses	Asparagus
Hogs	Corn sweet
Sheep and lambs	Okra
Chickens	Peas, southern
Eggs	Onions
Turkeys	Tomatoes
Milk	Apples
Mohair	Apricots
Wool	Cherries
Catfish	Grapes
Crawfish	Peaches
Rye	Pears
Wheat	Cantaloupes
Barley	Watermelons
Corn	Blackberries
Hay	Blueberries
Oats	Strawberries
Sorghum grain	Pecans
Triticale	Walnuts
Peanuts	Grass
Soybeans	Legume
Cotton	Popcorn
Dry beans	Ornamental trees and shrubs
Dry peas	
Roses	Trees hardwoods and pulpwoods
Shade trees	Honey
Trees Christmas	

This is issued pursuant to authority delegated by the Secretary of Agriculture.

Authority: Sec. 1324(c)(2), Pub. L. 99–198, 99 Stat. 1535, 7 U.S.C. 1631(c)(2); 7 CFR 2.17(e)(3), 2.56(a)(3), 51 FR 22795.

Dated: December 23, 1987.

B.H. (Bill) Jones,

Administrator, Packers and Stockyards Administration.

BOARD FOR INTERNATIONAL BROADCASTING

SES Performance Review Board; Membership

Section 4314 (c)(1) through (5) of title 5, U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more Performance Review Boards. The boards shall review and evaluate the initial appraisal by the supervisor of a senior executive's performance, along with any recommendations to the appointing authority relative to the performance of the senior executive.

Because of the Board for International Broadcasting's small size, a Performance Review Board register is established in which SES members from other small agencies participate. This notice is to establish a PRB for the Board for International Broadcasting. The members whose names appear are:

Lindley S. Sloan, Executive Director, Japan/US Friendship Commission (PRB Chairman)
Jeffrey S. Lubbers, Research Director, Administrative Conference of the U.S.
Gary Edles, Legal Counsel, Administrative Conference of the U.S.

Dated: December 23, 1987.

Mark G. Pomar,

Deputy Executive Director.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Patent and Trademark Office.

Title: Trademark Processing.

Form Numbers: PTO—Numerous; OMB—0651–0009.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 72,800 respondents; 32,351 reporting hours.

Needs and Uses: Information collected is for the purpose of applying for or maintaining a trademark. The information is used by PTO in assessing whether or not the applicant meets the criteria for registering a word, name, symbol, or device as a trademark.

Affected Public: Businesses or other for-profit institutions; small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Sheri Fox, 395–3785.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Office, Edward Michals, (202) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Sheri Fox, OMB Desk Officer, Room 3235, New Executive Office Building, Washngton, DC 20503.

Dated: December 22, 1987.

J. Randall Blumenschein,

Chief, Management Support Division, Office of Management and Organization.

BILLING CODE 3510-CW-M

International Trade Administration

[Docket No. 7684–01 and 7684–02]

Actions Affecting Export Privileges; Dan Peter Tadmor, Individually and Doing Business as Agentek, Ltd.

Summary

Pursuant to § 388.23 of the Export Administration Regulations, Dan Peter Tadmor, individually and doing business as Agentek Ltd., both with an address at Atidim Scientific Park, Dvora Hanevia St., P.O.B. 10150, Tel Aviv 61101, Israel, is hereby denied all export privileges for a period of ten years from the date of this Order. Commencing five years from the date of this Order, the denial of export privileges set forth in the Administrative Law Judges's Recommended Decision and Order shall be suspended for the remainder of the ten year period and shall be terminated at the end of such ten year period provided the Respondent commits no further violations of the Act, Regulations, or the final Order entered in this proceeding.

Order

On November 25, 1987, the Administrative Law Judge (ALJ) issued his Recommended Decision and Order in the above referenced matter. The Recommended Decision and Order was referred to me pursuant to the Export Administrative Amendments Act of 1985, 50 U.S.C. Appl 2412, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a), for final action.

Having examined the record and based on the facts adduced in this proceeding, I affirm the Recommended Decision and Order of the ALJ.

This constitutes final agency action in the proceeding.

Date: December 22, 1987.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

Appearance for Respondent: Mr. Dan Peter, Tadmor (pro se), Agentek Ltd., Atidim Scientific Park, Dvora Hanevia St., P.O.B. 10150, Tel Aviv 61101, Israel.

Appearance for Agency: Margo E. Jackson, Esq., Attorney-Adviser, Office of the Deputy Chief Counsel for Export Administration, U.S. Department of Commerce, Room H–3329, 14th & Constitution Ave., NW., Washington, DC 20230.

Decision and Order

Decision

Procedural Background

This proceeding against Respondent Dan Peter Tadmor, individually and doing business as Agentek Ltd., [1] began with the issuance October 16, 1986 of a charging letter by the Office of Export Enforcement, Trade Administration, U.S. Department of Commerce (the "Agency"). [2] This letter was issued under the authority of the Export Administration Act of 1979 (50 U.S.C. app. sections 2410–2420), as reauthorized and amended by the Export Administration Amendments Act of 1985, Pub. L. 9964, 99 Stat. 120 (July 12, 1985) (the "Act"), and under the authority of the Export Administration Regulations (currently codified at 15 CFR Parts 368–399 (1987)) (the "Regulations"). The letter charged that Respondent had violated §§387.4 and 387.6 of the Regulations in 1983–84 in two reexports for Israel to Switzerland of U.S.-origin computer-related equipment.

Respondent filed a March 2, 1987 answer to the charging letter. Neither Respondent nor Agency Counsel requested a hearing. Consequently, this matter is decided on the record without a hearing. Both Respondent and Agency Counsel made submissions for the record, which closed September 14, 1987. Since Respondent admitted the alleged violations, the sole disputed issue to be decided is the extent of any sanction.

Arguments of the Parties

Agency Counsel asserted that Respondnet reexported U.S.-origin computer-related equipment from Israel to Switzerland, in December 1983 and March 1984, without the U.S. authorization that he knew or should have known was required (August 24, 1987 Statement of Proposed Sanction 1–4). This equipment was controlled, according to Agency Counsel, for national security reasons (*id.* 2), and these unauthorized reexports were made notwithstanding several written representations by Respondent to the Agency and one to his U.S. exporter that he would comply with the Regulations (*id.* 3). Respondent's thinking in making the reexports, per Agency Counsel's evidence, was that he would obtain money needed to save his business, that he was unlikely to be caught, and that, if he were, any sanction would be minimal (*id.* 4). Agency Counsel proposed that the sanction should be a 10-year denial of U.S. export privileges.

Respondent admitted the unauthorized reexports of U.S.-origin equipment as charged, adding that the equipment had in fact been shipped from Israel through Switzerland to South Africa (March 2, 1987 Telex 1; March 27, 1987 Letter, enclosed March 23, 1987 Letter from representative 1–2; April 16, 1987 Final Deposition 2–4, 6–7). The whole thrust of Respondent's case was several points that he pleaded in mitigation. He argued that not he, but somebody else, had initiated the

[1] The charging letter was actually issued against Daniel Peter Tadmor, individually and doing business as Agentex Limited. Respondent then advised the Agency that his name is Dan Peter Tadmor, and that his company's name had become Agentek Ltd. Accordingly, this proceeding is conducted under the names thus communicated by Respondent to the Agency. See the July 17, 1987 Order for Filings by August 3 and 24, and September 24, 1987, at 2.

[2] When the Office of Export Enforcement issued the charging letter October 16, 1986, it was part of an organization within the U.S. Department of Commerce titled the International Trade Administration. As of October 1, 1987, however, it became part of an organization within the Department titled the Export Administration.

unauthorized reexports (March 23, 1987 Letter, *supra*, at 2; April 16, 1987 Deposition, *supra*, at 3). He said that he had learned of their illegality only after the transactions were under way (April 16, 1987 Deposition, *supra*, at 3), but then continued with them because the revenue from them was essential to saving his company (March 23, 1987 Letter, *supra*, at 2; April 16, 1987 Deposition, *supra*, at 3, 6, 7).

Respondent stressed further that he was continuing to cooperate fully with the Agency's investigation into the unauthorized reexports (March 23, 1987 Letter, *supra*, at 1; April 16, 1987 Deposition, *supra*, at 3, 4, 6), and that he had taken specific steps to assure his future compliance with the Regulations (March 23, 1987 Letter, *supra*, at 1; April 16, 1987 Deposition, *supra*, at 5). Finally, he claimed financial inability to pay more than a modest civil penalty or to survive any denial of U.S. export privileges (March 23, 1987 Letter, *supra*, at 2; April 16, 1987 Deposition, *supra*, at 7).

Findings

The record of this proceeding warrants the following findings. Respondent reexported U.S.-origin computer equipment from Israel to Switzerland in December 1983 and March 1984 (see Agency's August 24, 1987 Statement of Proposed Sanction, *supra*, Exhibits 4, 5), without the U.S. authorization that he knew or should have known was required. This equipment was controlled for national security reasons (*id.*, Exhibit 1). Respondent made these unauthorized reexports not withstanding his written representations to the Agency in 1981, 1982, and 1983, and to the U.S. exporter in 1984, that he would comply with the Regulations (*id.* Exhibits 2, 6).

Conclusions

The record requires the following conclusions. Respondent violated §§ 387.4 and 387.6 of the Regulations in December 1983 and March 1984 by reexporting U.S.-origin computer equipment from Israel to Switzerland without the required U.S. authorization. Such violations involving equipment controlled for national security reasons are a serious matter, and Respondent's arguments advanced in mitigation are insufficient to justify imposition of only a minor sanction. Somebody in Respondent's situation should be deterred from any calculation that the possible revenue from an unauthorized export might outweigh the chances of getting caught and the consequent cost of any sanction.

Agency Counsel's proposed 10-year denial of U.S. export privileges is reasonable. In view of all the circumstances cited by both Agency Counsel and Respondent, it would be fair to Respondent and would achieve effective enforcement of the Act and the Regulations if the last five years of the denial period are suspended, provided that Respondent has complied with the Act and the Regulations during the first five years.

Order

Accordingly, pursuant to the authority delegated to the undersigned by Part 388 of the Regulations, it is hereby ordered as follows.

I. For a period of 10 years from the date of the final Agency action, as modified during the second half of such period by the suspension set forth in Paragraph VI below, Respondent Dan Peter Tadmor, individually and doing business as Agentek Ltd., Atidim Scientific Park, Dvora Hanevia St., P.O.B. 10150, Tel Aviv 61101, Israel, and all successors, assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. Participation prohibited in any such transaction, either in the United States, or abroad, shall include, but not be limited to, participation:

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data.

Such denial of export privileges shall extend to matters which are subject to the Act and the Regulations.

III. After notice and opportunity for comment, such denial of export privileges may be made applicable to any person, firm, corporation, or business organization with which the Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

IV. All outstanding individual validated export licenses in which Respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Respondent's privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

V. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure and specific authorization from the Office of Export Licensing, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with Respondent or any related person, or whereby Respondent or any related person may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly:

(i) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for Respondent or any related person denied export privileges, or

(ii) Order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States.

VI. Commencing five years from the data that this Order becomes effective, the denial or export privileges set forth in Paragraphs I-V above shall be suspended, in accordance with § 388.16 of the Regulations, for the remainder of the ten-year period set forth in Paragraph I above, and shall be terminated at the end of such 10-year period, provided that Respondent has committeed no further violations of the Act, the Regulations, or the final Order entered in this proceeding.

VII. This Order as affirmed or modified shall become effective upon entry of the Secretary's final action in this proceeding pursuant to the Act (50 U.S.C.A. app. 2412(c)(1)).

Date: November 25, 1987.

Thomas W. Hoya,

Administrative Law Judge.

BILLING CODE 3510-DT-M

Initiation of National Security Investigation of Imports of Crude Oil and Refined Petroleum Products

AGENCY: U.S. Department of Commerce, International Trade Administration, Office of Industrial Resource Administration.

ACTION: Notice of an investigation under section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), and request for comments.

SUMMARY: This notice is to advise the public that an investigation is being conducted under section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), to determine the effects on the national security of imports of crude oil and refined petroleum products. Interested parties are invited to submit written comments, opinions, data, information or advice relative to the investigation to the Strategic Analysis Division, Office of Industrial Resource Administration, U.S. Department of Commerce.

DATA: Comments must be received not later than Thursday 28, 1988. Written comments should be addressed to: Steven C. Goldman, Director, Strategic Analysis Division, Office of Industrial Resource Administration, International Trade Administration, U.S. Department of Commerce, Room 3878, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Steven C. Goldman, Director, Strategic Analysis Division, Office of Industrial Resource Administration, Internatinal Trade Administration, U.S. Department of Commerce, Room 3878, Washington, DC 20230, (202) 377-4060.

SUPPLEMENTARY INFORMATION: In an application submitted on December 1, 1987 by the National Energy Security Committee on behalf of a coalition of associations, companies and individuals, the Department of Commerce was requested to initiate an investigation under section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), to determine the effect on the national security of imports of crude oil and refined petroleum products.

On December 23, 1987 the Department of Commerce confirmed receipt of and accepted the application requesting an investigation. The findings and recommendations of the investigation will be reported by the Secretary of Commerce to the President no later than December 1, 1988.

The articles to be investigated include crude oil and refined petroleum products. Crude oil is currently classifiable in the Tariff Schedules of the United States (TSUSA) Annotated (1987) at items 475.05 (crude oil testing under 25 degrees A.P.I.) and 475.10 (crude oil testing 25 degrees A.P.I. or more).

The following refined petroleum products are classified under these specific TSUSA categories: 475.25 (motor fuel, including gasoline, leaded and unleaded; naphtha-type jet fuel and kerosene-type jet fuel); 475.30 (kerosene derived from petroleum, shale oil, or both—except motor fuel): 475.34 (naphthas derived from petroleum, shale oil, natural gas or combinations thereof—except motor fuel); 475.40 (mineral oil or medicinal grade derived from petroleum, shale oil, or both); 475.45, 475.55 and 475.60 (lubricating oils and greases, derived from petroleum shale oil, or both, with or without additives); 475.65 and 475.70 (mixtures of hydrocarbons not specially provided for, derived wholly from petroleum, shale oil, natural gas, or combinations thereof, which contain by weight not over 50% of any single hydrocarbon compound); 494.22 (paraffin and other petroleum waxes); 517.5120 (petroleum coke); and 521.11 (asphaltum, bitumen and limestone-rock asphalt).

This investigation is being undertaken in accordance with Part 359 of Title 15 of the Code of Federal Regulations (15 CFR Part 359). Interested parties are invited to submit written comments, opinions, data, information or advice relevant to this investigation to the Office of Industrial Resource Administration, U.S. Department of Commerce, no later than January 28, 1988.

All materials should be submitted with 10 copies. Public information will be made available at the Department of Commerce for public inspection and copying. Material that is national security classified information or business confidential information is subject to the provisions of § 359.6 of the regulations (15 CFR 359.6)

The public record concerning this investigation will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4104, Department of Commerce, 14th and Pennsylvania Avenue NW, Washington, DC 20230. The records in this facility may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations.

Information about the inspection and copying of records at the facility may be obtained from Patricia L. Mann, International Trade Administration's Freedom of Information Officer (202-377-3031).

If deemed appropriate by the Department, public hearings may be held to elicit further information as provided in § 359.8 (15 CFR 359.8) of the regulations. Notice will be published in the Federal Register, giving the time, place, and matters to be considered at such hearing(s) so that interested parties will have an opportunity to participate.

December 23, 1987.

Gilert B. Kaplan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-01-M

National Oceanic and Atmospheric Administration

Listing of Endangered and Threatened Species and Designating Critical Habitat; Petitions for the Adoption of Rules and Regulations for the Granting of Permits for Whale Watching

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of receipt of petitions.

SUMMARY: NMFS has received two petitions from GreenWorld to issue regulations to control commercial whale watching.

FOR FURTHER INFORMATION CONTACT: Robert C. Ziobro, Protected Species Management Division, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, (202/673-5348).

SUPPLEMENTARY INFORMATION: On December 1 and 9, 1987, NMFS received petitions from GreenWorld to "promulgate regulations to control whale watching and to construct a permit system for it" and to protect right whales "from the harm of close vessel approaches and especially from commercial whale watching." In accordance with the provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) and the Administrative Procedure Act (5 U.S.C. 553(e)), the Service will review available information on whale watching to determine if the petitioned action is warranted.

Date: December 23, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-23-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishment of Staged Entry for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Diana Solkoff, International Trade Specialist, Office of Textile and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 566-6828. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to stage entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton and man-made fiber textile products in Categories 334, 359-C and 648, produced or manufactured in the People's Republic of China and currently embargoed.

Background

A CITA directive dated December 23, 1986, as amended, was published in the **Federal Register** (51 FR 47041) which announced the establishment of import limits for certain cotton and man-made fiber textile products, including Categories 334, 359-C and 648, produced or manufactured in China and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987. These categories are currently embargoed.

The U.S. Government has decided to stage entry for a five-month period for Categories 334, 359-C 648 for goods exported in excess of the restraint limits established in the directive of December 23, 1986, as amended.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED(1987).

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 21, 1987.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: To facilitate implementation of the Memorandum of Understanding of December 19, 1987, between the Government of the United States and the People's Republic of China, I request that, effective on January 1, 1988, you permit entry for consumption, or withdrawal for consumption, in the United States, of cotton and man-made fiber textile products in the following categories, produced or manufactured in China and exported to the United States in excess of the restraint limits established for the twelve-month periods which began on January 1, 1987 and extends through December 31, 1987 in each of the 30-day periods in the following amounts:

Category	Period	Amount to be entered
334	January 1-February 1	48,740 dozen.
	February 2-March 2	48,740 dozen.
	March 3-April 1	48,740 dozen.
	April 2-May 2	48,740 dozen.
	May 3-June 1	48,740 dozen.
359-C	January 1-February 1	184,000 pounds.
	February 2-March 2	184,000 pounds.
	March 3-April 1	184,000 pounds.
	April 2-May 2	184,000 pounds.
	May 3-June 1	184,000 pounds.
648	January 1-February 1	207,016 dozen.
	February 2-March 2	207,016 dozen.
	March 3-April 1	207,016 dozen.
	April 2-May 2	207,016 dozen.
	May 3-June 1	207,016 dozen.

Merchandise entered in 1988 in the foregoing categories, exported in excess of limits established for the twelve-month period which began on January 1, 1987 and extends through December 31, 1987, shall be charged to the limits established for the period beginning on January 1, 1988 and extending through December 31, 1988.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[1] In Category 359-C, only TSUSA numbers 381.0822, 381.6510, 384.0928 and 384.5222.

[FR Doc. 87-29886 Filed 12-23-87; 11:33 am]

BILLING CODE 3510-DR-M

Announcement of Import Restraint Levels and Guaranteed Access Levels for Certain Cotton and Man-Made Fiber Textile Products From Trinidad and Tobago; Effective on January 1, 1988

December 21, 1987.

The Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, and the President's February 20, 1986 announcement of a Special Access Program for textile products assembled in participating Caribbean Basin beneficiary countries from fabric formed and cut in the United States, and pursuant to the requirements set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information, contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption, or withdrawal from warehouse for consumption, of certain cotton and man-made textile products, produced or manufactured in Trinidad and Tobago and exported during 1988, in excess of the designated twelve-month levels.

In addition, the Commisisoner is also directed to establish guaranteed access levels for certain properly certified cotton and man-made fiber textile products which are assembled in Trinidad and Tobago from fabric formed and cut in the United States and exported during the same twelve-month period.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 23, 1986, between the Governments of the United States and Trinidad and Tobago, as translated to the new category system, establishes designated consultation levels for Categories 336/636, 338/339, 340/640, 347/348/647/648 and 352/652, exported during the agreement year which begins on January 1, 1988 and extends through December 31, 1988.

In addition to the designated consultation levels, the bilateral agreement also establishes guaranteed access levels for properly certified textile products assembled in Trinidad and Tobago from fabric formed and cut in the United States within Categories 336/636, 338/339, 340/640, 347/348/647/648 and 352/652, exported from Trinidad and Tobago during the agreement year which begins on January 1, 1988 and extends through December 31, 1988.

Textile products in Categories 336/636, 338/339, 340/640, 347/348/647/648 and 352/652 which are exported from Trinidad and Tobago on or after January 1, 1988, qualifying for the Special Access Program for entry under TSUSA 807.0010, must be accompanied by a properly completed CBI Export Declaration (Form ITA-370P).

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

The letter to the Commisisoner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 21, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreements of October 23, 1986 between the Governments of the United States and Trinidad and Tobago; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption or withdrawal from warehouse for consumption of cotton and man-made fiber textile products in the following categories, produced or manufactured in Trinidad and Tobago and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the following designated levels:

Category	12-month restraint level
336/636	65,000 dozen.
338/339	105,000 dozen.
340/640	50,000 dozen.
347/348/647/648	100,000 dozen.
352/652	100,000 dozen.

Note.—Of which not more than 25,000 dozen shall be in shirts made from yarn dyed fabric of two or more colors in the warp and/or filling. (Categories 340pt/640pt.—only. TSUSA numbers 381.0522, 381.3132, 381.3142, 381.3152, 381.5500, 381.5610, 381.5625, 381.5637, 381.5660, 381.9535, 381.9547, 381.9550 and 384.2306.)

To the extent that trade which not falls in the foregoing categoreies is within a category limit for the period October 1, 1986 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

In accordance with the provisions of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), you are directed to establish guaranteed access levels for properly certified cotton and man-made fiber textile products in the following categories which are assembled in Trinidad and Tobago from fabric formed and cut in the United States and exported to the United States from Trinidad and Tobago during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

Category	Guaranteed access level
336/636	300,000 dozen.
338/339	225,000 dozen.
340/640	150,000 dozen.
347/348/647/648	300,000 dozen.
352/652	300,000 dozen.

Any shipment for entry under TSUSA 807.0010 which is not accompanied by a valid and correct certification and CBI Export Declaration in accordance with the provisions of the certification requirements established in the directive of July 28, 1987 shall be deined entry unless the Government of Trinidad and Tobago authorizes the entry and any charges to be appropriate designated consultation levels. Any shipment which is declared as TSUSA 807.0010 but found not to qualify for the Special Access Program may be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textiles Agreements.

BILLING CODE 3510-DR-M

Amendment of Import Limits and Restraint Period for Certain Cotton, Wool and Man-Made Fiber Textiles and Textile Products Produced or Manufactured in the Federative Republic of Brazil

December 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published blow, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to amended the previously established import restraint limits for cotton, wool and man-made fiber textile products, produced or manufactured in Brazil and exported during the new restraint period which began on April 1, 1987 and extends through December 31, 1987.

Background

A CITA directive dated March 23, 1987 was published in the **Federal**

Register (52 FR 9884) which established import restraint limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1987 and extends through March 30, 1988.

During consultations held between the Governments of the United States and the Federative Republic of Brazil, it was understood that the previously established twelve-month restraint period would be amended to establish an aggregate limit and, within the aggregate, specific limits for textiles and textile products in Categories 300/301, 310/318, 313, 314, 315, 317, 319, 334/335, 336, 337, 338/339, 347/348, 350, 352, 359/659, 361, 363, 369pt. (dishtowels), 433, 445/446, 604, 614, 638/639, 647/648, 666, and 669pt. (man-made fiber bags), produced or manufactured in Brazil and exported during the new prorated period which began on April 1, 1987 and extends through December 31, 1987. Carryforward and carryover of 100 percent will be available in the foregoing categories between this and the new restraint period.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the Federal Register.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on March 23, 1987 by the Chairman, Committee for Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in the Federative Republic of Brazil and exported during the twelve-month period which began on April 1, 1987 and extends through March 31, 1988.

Effective on January 1, 1988, the directive of March 23, 1987 is hereby amended to amend the previously established import restraint limits for cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Brazil and exported during the new restraint period which began on April 1, 1987 and extends through December 31, 1987:

Category	Amended restraint limit
300–369, 400–469, and 600–670, as a group	216,750,000 years equivalent.
300/301	6,531,364 pounds.
310/318	2,526,100 square yards.
313	23,373,000 square yards.
314	2,623,500 square yards.
315	11,376,450 square yards.
317	10,323,075 square yards.
319	8,427,000 square yards.
334/335	57,304 dozen of which not more than 11,461 dozen shall be in TSUSA numbers 381.4810, 381.4850, 384.3705, 384.3721, 384.3741, 384.3755, 384.3769, 384.3770, 384.3772, and 384.3774.
336	29,486 dozen.
337	82,585 dozen.
338/339	442,418 dozen.
347/348	379,215 dozen of which not more that 75,843 dozen shall be in TSUSA numbers 381.0542, 381.6230, 381.6260, 384.0722, 384.0724, 384.0726, 384.0729, 384.4735, 384.4740, 384.4746 and 384.4747.
350	49,473 dozen.
352	294,945 dozen.
359/659	4,634,850 square yards equivalent.
361	379,215 numbers.
363	11,376,450 numbers.
369pt.[1]	505,620 pounds.
433	12,499 dozen.
445/446	88,965 dozen.
604	350,595 pounds.
614	4,213,500 square yards.
638/639	168,540 dozen.
647/648	379,215 dozen.
666	1,348,320 pounds.
669pt.[2]	1,685,400 pounds.

[1] In Category 369pt., dishtowels in TSUSA numbers 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440 and 366.2860.
[2] In Category 669pt., man-made fiber bags in TSUSA number 385.5300.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–29758 Filed 12–28–87; 8:45 am]

BILLING CODE 3510–DR–M

Import Limits for Certain Cotton, Wool and Man-Made Fiber Textiles and Textile Products Produced or Manufactured in the Federative Republic of Brazil

Effective January 1, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Naomi Freeman, International Trade Specialist, Office of Textile and Apparel, U.S. Department of Commerce, (202) 377–4221. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption, and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products, produced or manufactured in Brazil and exported during the three-month period which begins on January 1, 1988 and extends through March 31, 1988, in excess of the designated restraint limits.

Background

Pursuant to consultations held under the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 7 and 29, 1985, as amended, it was understood that the twelve-month restraint period from April 1, 1987 through March 31, 1988 would be divided into two periods: April 1, 1987 through December 31, 1987 and January 1, 1988 through March 31, 1988 with 100 percent carryover/carryforward available between the two periods. The following directive establishes an aggregate specific limit and, within the aggregate, specific limits for textiles and textile products in Categories 218, 219, 225/317/326, 300/301, 313, 314, 315, 334/335, 336, 337, 338/339, 347/348, 350, 352, 359/659, 361, 363, 369pt. (dishtowels), 433, 445/446, 604, 624, 638/639, 647/648, 666, and 669pt. (man-made fiber bags), produced or manfactured in Brazil and exported during the three-month period which begins on January 1, 1988, and extends through March 31, 1988. The agreement includes sublimits for corduroy coats and trousers in Categories 334/335 and 347/348.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984, (49 FR 44782), July 14, 1986 (51 FR 25386) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of Treasury, Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 7 and 29, 1985, as amended, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Brazil and exported during the three-month period which begins on January 1, 1988 and extends through March 31, 1988, in excess of the restraint limits indicated below:

Category	3-month restraint limit
200–239, 300–369, 400–469, and 600–670, as a group	72,642,245 square yards equivalent.
Sublevels within the group	
218	872,593 square yards.
219	2,739,701 square yards.
225/317/326	3,428,298 square yards.
300/301	2,354,846 pounds
313	8,392,250 square yards.
314	1,004,089 square yards.
315	3,777,745 square yards.
334/335	19,101 dozen of which not more than 3,820 dozen shall be in TSUSA numbers 381.4810, 381.4850, 384.3705, 384.3721, 384.3741, 384.3755, 384.3769, 384.3770, 384.3772, and 384.3774.
336	9,832 dozen.
337	27,528 dozen.
338/339	147,473 dozen.
347/348	126,405 dozen of which not more than 25,281 dozen shall be in TSUSA numbers 381.0542, 381.6230, 381.6260, 384.0722, 384.0724, 384.0726, 384.0729, 384.4735, 384.4740, 384.4746 and 384.4747.
350	16,854 dozen.
352	98,315 dozen.
359/659	1,544,950 pounds.
361	126,405 numbers.
363	3,792,150 numbers.
369–D[1]	168,540 pounds.
433	4,166 dozen.
445/446	16,322 dozen.
604	126,405 pounds.
624	1,350,280 square yards.
638/639	56,180 dozen.
647/648	126,405 dozen.
666	449,440 pounds.
669–P[2]	561,800 pounds.

[1] In Category 369–D, dishtowels in TSUSA numbers 365.6615, 366.1720, 366.1740, 366.2020, 366.2040, 366.2420, 366.2440 and 366.2860.
[2] In Category 669–P, Man-made fiber bags in TSUSA number 385.5300.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period April 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such good shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of August 7 and 29, 1985, as amended, between the Governments of the United States and the Federal Republic of Brazil which provide, in part, that: (1) specific limits may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provision of the bilateral agreement will be made to you by letter.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements

[FR Doc. 87–29759 Filed 12–28–87; 8:45 am]

BILLING CODE 3510–DR–M

Amendment to the Export Licensing System for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

December 22, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to permit entry of the previously designated textiles and textile products from the People's Republic of China visaed using export licenses/commercial invoices printed on green and yellow guilloche patterned background paper for merchandise exported on or after January 1, 1988.

Background

A CITA directive dated February 23, 1984 (49 FR 7269), as further amended on July 29, 1987 (52 FR 28741), established an export licensing system for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China. The Governments of the United States and the People's Republic of China have agreed to further amend the export licensing system, effective on January 1, 1988, to provide for the use of textile export licenses/commercial invoices, issued by the Government of the People's Republic of China for shipments exported on or after January 1, 1988, which are printed on a green guilloche patterned background paper, covering specific limit categories, and yellow guilloche patterned paper, covering non-specific limit categories. The green and yellow forms replace the blue and green licenses/invoices currently in use. The visa stamp is not being changed at this time.

William J. Dulka,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 22, 1987.

VOL 52 ISS 249 DEC 29 1987 UMI

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of February 23, 1984, as amended on July 29, 1987, which established an export licensing system for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China.

Effective on January 1, 1988, the textile export license/commercial invoice, issued by the Government of the People's Republic of China, will be printed on green and yellow guilloche patterned background paper for merchandise currently subject to the export licensing system, and exported on or after January 1, 1988. The green form will replace the blue form which currently accompanies merchandise in categories covered by specific limits under the agreement, and the yellow form will replace the green form used for non-specific limit categories.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William J. Dulka,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29761 Filed 12-28-87; 8:45 am]

BILLING CODE 3510-DR-M

Announcement of Import Restraint Limits for Certain Cotton, Wool, and Man-Made Fiber Textile Products Produced or Manufactured in the Socialist Federal Republic of Yugoslavia

Effective on January 1, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption and withdrawal from warehouse of consumption of cotton, wool and man-made fiber textile products, produced or manufactured in Yugoslavia and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the designated limits.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 26 and 27, 1978, as amended and extended, between the Governments of the United States and the Socialist Federal Republic of Yugoslavia, and as translated to the new category system, establishes, among other things, specific limits for cotton, wool and man-made fiber textile products in Categories 340/640, 341/641, 433, 434, 435, 442, 443/643, 444, 447/448, 604-A, 645/646, 666, produced or manufactured in Yugoslavia and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury,
Washington, DC.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 26 and 27, 1978, as amended and extended, between the Governments of the United States and the Socialist Federal Republic of Yugoslavia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made textile products in the following categories, produced or manufactured in Yugoslavia and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988, in excess of the following limits:

Category	12-Month Restraint Limit
340/640	382,024 dozen.
341/641	249,100 dozen.
433	7,899 dozen.
434	8,758 dozen.
435	38,637 dozen.
442	10,858 dozen.
443/643	287,844 numbers of which not more than 103,020 numbers shall be in Category 443.
444	91,152 numbers.
447/448	48,424 dozen of which not more than 28,849 dozen shall be in Category 447 and not more than 26,849 dozen shall be in Category 448.
604-A[1]	636,000 pounds.
645/646	116,600 dozen.
666	2,014,000 pounds.

[1] In Category 604-A, only TSUSA numbers 310.5049 and 310.6045.

To the extent that trade which now falls in the foregoing categories is within a category limit for the periods November 1, 1986 and January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during those periods. In the event the limits established for those periods have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future according to provisions of the bilateral agreement of October 26 and 27, 1978, as amended and extended, between the Governments of the United States and the Socialist Federal Republic of Yugoslavia which provide, in part, that: (1) carryforward and carryover may not exceed 11 percent and swing may not exceed 6 percent for cotton and man-made fiber and 5 percent for wool, provided that a corresponding reduction in square yard equivalent is made in another specific limit during the same agreement period; and (2) special shift up to 10 percent may be available in Categories 340/640 and 341/641, provided swing is not utilized.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR

DEPARTMENT OF DEFENSE

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee Panel on Laser Weapons will meet on January 14-15, 1988. The meeting will be held at the Office of the Chief of Naval Research, 800 North Quincy Street, Arlington, Virginia. The meeting will commence at 9:00 A.M. and terminate at 4:30 P.M. on January 14; and commence at 9:00 A.M. and terminate at 4:00 P.M. on January 15, 1988. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide for the Navy an assessment of the potential military value of laser technology for weapon applications. The agenda will include technical briefings and discussions addressing military laser weapon programs. These briefings and discussions will contain classified information that is specifically authorized under criteria established by Executive Order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive Order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander L. W. Snyder, U.S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217-5000, Telephone Number: (202) 696-4870.

Date: December 23, 1987.

W. R. Babington, Jr.,

Commander, JAGC, U.S. Navy Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 87-65-NG]

Bishop Pipeline Corp., Inc.; Application to Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of applications for blanket authorization to Import Natural Gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) give notice of receipt on November 20, 1987, of an application filed by Bishop Pipeline Corporation, Inc. (Bishop Pipeline), for blanket authorization to import up to 50 MMcf per day and a maximum of 36.5 Bcf of natural gas over a two-year term beginning on the date of first delivery. Bishop Pipeline, a Texas corporation, whose principal place of business is in Houston, Texas, would import gas for its own account or act as a broker for U.S. purchasers or Canadian suppliers. The gas would be sold on a short-term or spot basis to a range of purchasers including local distribution companies, and end-users. The specific terms of each import and sale would be negotiated on an individual basis, including price and volumes. Bishop Pipeline intends to utilize existing pipeline facilties for transportation of the volumes imported. Bishop Pipeline also proposes to submit quarterly reports detailing each transaction.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than January 28, 1988.

FOR FURTHER INFORMATION CONTACT:

Tom Dukes, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue SW., Washington, DC 20858, (202) 586-9590

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 5876-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the market served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

In the event the ERA approves this request, it may, in order to maximize operating flexibility under the authorization, designate only a total volume of natural gas to be imported during the authorized term rather impose daily limits.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of interventation, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriated action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. They should be be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. They must be filed no later than 4:30 p.m. E.S.T., January 28, 1988.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as

VOL 52 ISS 249 DEC 29 1987 UMI

necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factural issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary of a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Bishop Pipeline's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 21, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of requests submitted for clearance to the Office of Management and Budget.

SUMMARY: The Energy Information Administration (EIA) has submitted the energy information collection(s) listed at the end of this notice to the Office of Management and Budget (OMB) for apporval under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not contain information collection requirements contained in new or revised regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by the Department of Energy (DOE).

Each entry contains the following information: (1) The sponsor of the collection (the DOE component or Federal Energy Regulatory Commission (FERC)); (2) Collection number(s); (3) Current OMB docket number (if applicable); (4) Collection title; (5) Type of request, e.g., new, revision, or extension; (6) Frequency of collection; (7) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (8) Affected public; (9) An estimate of the number of respondents per report period; (10) An estimate of the number of responses annually; (11) Annual respondent burden, i.e., an estimate of the total number of hours needed to respond to the collection ; and (12) A brief abstract describing the proposed collection and the respondents.

DATES: Comments must be filed on or before January 28, 1988.

ADDRESS: Address comments to the Department of Energy Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503. (Comments should also be addressed to the Office of Statistical Standards, at the address below.)

FOR FURTHER INFORMATION AND COPIES OF RELEVANT MATERIALS CONTACT: Carole Patton, Office of Statistical Standards (EI-70), Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586-2222.

SUPPLEMENTARY INFORMATION: If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this Notice, you should advice the OMB DOE Desk Officer of your intention to do so as soon as possible. The Desk Office may be telephoned at (202) 395-3084.

The energy information collection submitted to OMB for review were:

1. Energy Information Administration.
2. EIA-176, 191, 400, 627, and 857.
3. 1905-0147, 1905-0026, 1901-0289, 1905-0122, and 1905-0157 respectively.
4. Natural Gas Program Package.
5. Revision—In addition to the revisions outlined in a **Federal Register** Notice, 52 FR 5176, dated February 19, 1987, EIA is proposing to discontinue holding information collected on the EIA-176, Annual Report of Natural and Supplemental Gas Supply and Disposition, as confidential.
6. Monthly, Quarterly, and Annually.
7. Mandatory.
8. Businesses or other for profit, State or local governments, and small businesses or organizations.
9. 2,374 respondents.
10. 7,925 responses.
11. 41,492 hours.
12. The Natural Gas Program Package forms collect production, processing, transmission, storage, consumption, and price data. The data are used to address significant energy industry issues. Data from these forms are published in various EIA publications. Respondents are pipeline companies, distributors, storage operators, plant operators, and State agencies.

Statutory authority: Sec. 5(a), 5(b), 13(b), and 52, Pub. L. 93-275, Energy Information Administration Act of 1974, (15 U.S.C. 764(a), 764(b), 772(b), and 790(a)).

Issued in Washington, DC, December 22, 1987.

John Gross,

Acting Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CI88-102-000, et al.]

TXO Production Corp. et al.; Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

December 23, 1987.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and petitions which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before January 6, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding.

Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI86-737-002 and CI85-738-002]

Arkla Energy Resources, a Division of Arkla, Inc.; Applications for Extension of Blanket Limited-Term Abandonment and Blanket Limited-Term Certificate With Pregranted Abandonment on Behalf of Producer-Suppliers

December 23, 1987

Take notice that on December 3 and 8, 1987, Arkla Energy Resources (AER), a division of Arkla, Inc., P.O. Box 21734, Shreveport, Louisiana 71151, pursuant to Section 7 of the Natural Gas Act, and Sections 154 and 157 of the Commission's Regulations, on behalf of its producer-suppliers filed applications for a three-year extension of the blanket limited-term abandonment authorization and of the blanket limited-term certificate of public convenience and necessity with pregranted abandonment initially granted to it on January 21, 1987, for a term of one year. Such authorization is scheduled to expire on January 21, 1988.

AER states that the benefits it sought to obtain by filing its original applications have in fact been realized by AER's LTA program. Under AER's LTA program, eligible producer-suppliers have sold gas that AER has temporarily released from its contracts with those producer-suppliers. These third-party sales enable eligible producer-suppliers to maintain their production instead of having it curtailed for lack of markets. These transactions also afford AER an opportunity to obtain relief from any take-or-pay obligations it may have with eligible producer-suppliers. All quantities released and sold enter the market place at market-responsive prices, promoting competition and providing consumers with lower-priced gas. Finally, transportation of gas sold under AER's LTA authority has helped to maintain throughput levels on AER's pipeling system, thereby benefitting all of AER's customers. AER believes that these benefits will continue to accrue in the future, and may increase if the Commission extends the existing authorizations for three years.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene in order to give the Commission adequate time to consider AER's requests, since AER's existing authorization expires January 21, 1988, and lack of continued authority could exacerbate AER's take-or-pay problem. Therefore, any person desiring to be heard or to make any protest with reference to said applications should on or before January 4, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for AER to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29787 Filed 12-28-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA88-1-23-001]

Eastern Shore Natural Gas Co.; Tariff Filing

December 23, 1987.

Take notice that Eastern Shore Natural Gas Company (Eastern Shore) on December 17, 1987 tendered for filing the following tariff sheets to original Volume No. 1 of its FERC Gas Tariff:

Revised Tariff Sheets To Be Effective November 1, 1987

Substitute Thirty-Sixth Revised Sheet No. 5
Substitute Thirty-Sixth Revised Sheet No. 6
Substitute Thirty-Sixth Revised Sheet No. 10
Substitute Thirty-Sixth Revised Sheet No. 11
Substitute Thirty-Sixth Revised Sheet No. 12
Substitute Thirty-Sixth Revised Sheet No. 13
Substitute Seventh Revised Sheet No. 14

Proposed Tariff Sheets To Be Effective January 15, 1987

Second Revised Sheet No. 230
First Revised Sheet No. 242
First Revised Sheet No. 243
First Revised Sheet No. 244

Revised Tariff Sheets to Correct Designation in Previously Filed Tariff Sheets

Thirty-Sixth Revised Sheet No. 5
Thirty-Sixth Revised Sheet No. 6
Thirty-Sixth Revised Sheet No. 10
Thirty-Sixth Revised Sheet No. 11
Thirty-Sixth Revised Sheet No. 12
Thirteenth Revised Sheet No. 13
Seventh Revised Sheet No. 14

Eastern Shore states that the purpose of the tariff sheets is to revise certain tariff sheets in compliance with the Commission's November 13, 1987 Order in Docket No. TA88-1-23-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before December 31, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-1-4-000]

Granite State Gas Transmission, Inc.;

Proposed Changes in Rates and Tariff Provisions

December 23, 1987.

Take notice that on December 17, 1987, Granite State Gas Transmission, Inc. (Granite State), 120 Royall Street, Canton, Massachusetts 02021, tendered for filing with the Commission the revised tariff sheets listed below in its FERC Gas tariff, First Revised Volume No. 1 containing changes in rates and tariff provisions for effectiveness on January 1, 1988.

Second Substitute Twenty-First Revised Sheet No. 7
Seventh Revised Sheet No. 7-A
Substitute Original Sheet No. 7-B
Substitute Twelfth Revised Sheet No. 9
Fourth Revised Sheet No. 11
Substitute Second Revised Sheet No. 67
Second Substitute Fifth Revised Sheet No. 68
Substitute Second Revised Sheet No. 69
Second Substitute Fourth Revised Sheet No. 70
Substitute Second Revised Sheet No. 70-A
Second Substitute Third Revised Sheet No. 71
Substitute Second Revised Sheet No. 71-A
Second Substitute Third Revised Sheet No. 72
Second Substitute Fourth Revised Sheet No. 75
Second Substitute Second Revised Sheet No. 75-A
Second Substitute First Revised Sheet No. 75-B
Third Substitute Original Sheet No. 75-C
Substitute First Revised Sheet No. 78
Substitute First Revised Sheet No. 79
Second Revised Sheet No. 81
Third Substitute First Revised Sheet No. 82
Original Sheet No. 82-A
Original Sheet No. 82-B
Substitute Original Sheet No. 85
Substitute Original Sheet No. 86
Second Substitute Second Revised Sheet No. 112

The filing also includes Second Substitute Original Sheet No. 75-C for effectiveness on November 27, 1987.

According to Granite State, the proposed rate and tariff changes are applicable to jurisdictional services rendered to Bay State Gas Company (Bay State) and Northern Utilities, Inc. (Northern Utilities). Granite State further states that the rate and tariff changes: (1) Track changes in the cost of gas at suppliers' rates that will be in effect on January 1, 1988; (2) reflect the amortization of the balance of unrecovered purchase gas costs and associated carrying charges on Granite State's books as of September 30, 1987; (3) revise a transportation cost adjustment for the cost of a transportation service rendered by Tennessee Gas Pipeline Company, a Division of Tenneco Inc. under Rate Schedule CGT-NE; (4) revise certain sections of the purchased gas cost adjustment provisions in its tariff to reflect the receipt of additional volumes of firm gas upon the commencement of the Phase 2 deliveries of the Boundary Gas, Inc. project and the elimination of incremental pricing surcharge adjustments pursuant to Commission Order No. 478; and (5) establish a Gas Research Institute surcharge provision applicable to certain volumes of gas purchased from Canadian sources. According to Granite State, the revised sales rates in this filing result in an increase of $1,410,234 annually for sales to Bay State and $156,440 annually for sales to Northern Utilities.

According to Granite State copies of its filing were served upon its customers, Bay State and Northern Utilities, and the regulatory commissions of the States of Maine and Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 31, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Office of Hearings and Appeals

Cases Filed During the Week of October 23 Through October 30, 1987

During the week of October 23 through October 30, 1987, the appeals and applications for other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the applications within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

George B. Breznay,

Director, Office of Hearings and Appeals.

December 22, 1987.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARING AND APPEALS

[Week of October 23 through October 30, 1987]

Date	Name and location of applicant	Case No.	Type of submission
Oct. 27, 1987	Pacific Motors Trucking Company, Washington, DC.	RR270-22	Request for modification/rescission in the Stripper well litigation proceeding. If granted: The September 24, 1987 Decision and Order issued to Pacific Motor Trucking Company (Case No. RF270-1263) would be modified and the firm's application for refund as a surface transporter in the stripper well litigation proceeding would be approved.
Oct. 27, 1987	Sause Brothers Ocean Towing, Washington, DC.	RR271-9	Request for modification/rescission in the stripper well litigation refund proceeding. If granted: The October 7, 1987 Decision and Order issued to Sause Brothers (Case No. FR271-165) would be modified and the firm's application for refund as a rail and water transporter in the stripper well litigation proceeding would be approved.
Oct. 27, 1987	Washington Public Power Supply System Richland, Washington.	KFA-0135	Appeal of an information request denial. If granted: The September 29, 1987 Freedom of Information Request Denial issued by the DOE Richland Operations Office would be rescinded and the Washington Public Power Supply System would receive access to a copy of a report prepared by David, Wright & Jones under contract to Battelle Pacific Northwest Laboratories.
Oct. 29, 1987	Arizona, Phoenix, Arizona	KEG-0021	Petition for Special Redress. If granted: The Office of Hearings and Appeals would approve Arizona's proposed expenditures of Stripper Well funds which were disapproved by the Assistant Secretary for Conservation and Renewable Energy.

REFUND APPLICATIONS RECEIVED

[Week of October 23 to October 30, 1987]

Date	Name	Case No.
08/26/87	Halbur Oil Co., Inc.	RF265-2578

Director, Office of Hearings and Appeals.
December 22, 1987.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of October 30 through November 6, 1987]

Date	Name and location of applicant	Case No.	Type of submission
Oct. 30, 1987	Hanford Education Action League, Spokane, Washington.	KFA-0136	Appeal of an information request denial. If granted: The September 25, 1987 Freedom of Information Request Denial issued by the DOE Richland Operations Office would be rescinded and Hanford Education Action League would receive access to information regarding accident reports at the Hanford site.
Oct. 30, 1987	Mt. Airy Refining Company, Washington, DC.	KRD-0322 KRH-0322	Motions for discovery and evidentiary hearing. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted in response to a Proposed Remedial Order issued to Mt. Airy Refining Company (Case No. KRO-0320).
Nov. 2, 1987	Atlantic Richfield Company, Washington, DC.	KFA-0137	Appeal of an information request denial. If granted: The October 2, 1987 Decision and Order (Case No. KFA-0115) issued to U.S.A. Petroleum Corp. would be modified and its implementation would be stayed pending further reconsideration and judicial review.
Nov. 2, 1987	Dover Garage II, Inc., New York, New York.	RR270-33	Request for modification/rescission in the stripper well litigation. If granted: The October 5, 1987 Decision and Order issued to Dover Garage II, Inc. (Case No. RF270-1251) would be modified and the firm's application for refund as a surface transporter in the stripper well litigation would be approved.
Nov. 3, 1987	Highway Oil Company, Inc., Washington, DC.	KRD-0031	Motion for discovery. If granted: Discovery would be granted to Highway Oil Company, Inc., in connection with its Statement of Objections to a Proposed Remedial Order issued to the firm (Case No. HRO-0123).
Nov. 3, 1987	Maine, Augusta, Maine	KEG-0022	Petition for special redress. If granted: The Office of Hearings and Appeals would review and approve Maine's proposed expenditures for Stripper Well funds which were disapproved by the Assistant Secretary for Conservation and Renewable Energy.
Nov. 3, 1987	Reco Petroleum, Inc., Reading, Pennsylvania.	KEE-0156	Exception to the reporting requirements. If granted: Reco Petroleum, Inc. would no longer be required to file Form EIA-782B, the "Resellers/Retailers' Monthly Petroleum Product Sales Report."
Nov. 4, 1987	Giant Industries, Inc., Washington, DC.	RR270-24	Request for modification/rescission in the stripper well litigation proceeding. If granted: The October 5, 1987 Decision and Order issued to Giant Industries (Case No. RF270-437) would be modified and the firm's application for refund as a surface transporter in the stripper well litigation proceeding would be approved.
Nov. 4, 1987	M.A. Malik, Hartford, Connecticut	KFA-0138	Appeal of an information request denial. If granted: The October 23, 1987 Freedom of Information Request Denial issued by the Office of Scientific and Technical Information, Oak Ridge Operations Office, would be rescined and M.A. Malik would receive access to certain DOE "CAPE packages."

BILLING CODE 6450-01-M

Issuance of Decisions and Orders During the Week of October 26 Through October 30, 1987

During the week of October 26 through October 30, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals."

Appeals

Coalition for Safe Power, 10/27/87, KFA-0125

The Coalition for Safe Power (Coalition) filed an Appeal from a denial by the Chief of the Information Technology Management Branch (Authorizing Official) of the DOE Richland Operations Office (Richland) of a request for a fee waiver. The Coalition's FOIA request sought a waiver of the fee for duplicating the May 1987 "Hanford Site Waste Management Report" (Report). The Report was available for public inspection in the Richland Public Reading Room at the time of the Coalition's request. In considering the Appeal, the DOE found that DOE's policy of denying fee waivers for documents already available in a DOE Public Reading Room is permissible under the FOIA. Accordingly, the Appeal was denied.

E. B. Brooks, Jr., 10/27/87, HRA-0009

On April 26, 1985, E.B. Brooks, Jr. (Brooks) filed an Appeal from a Modified Remedial Order (MRO) issued to the firm by the Economic Regulatory Administration (ERA) on April 10, 1985. The MRO modified provisions of a Remedial Order (RO) issued to Brooks on July 25, 1977. According to the MRO, Brooks never complied with the RO which ordered restitution for crude oil overcharges. In its Appeal, Brooks claimed credit for refunds in the form of price rollbacks between July 1977 and June 1981. After considering Brooks' Appeal, the Office of Hearings and Appeals (OHA) concluded: (1) that Brooks had made substantial partial payments of principal and interest owed under the RO, and (2) that ERA's calculation of the remaining amount owed by Brooks was incorrect. OHA, therefore, denied Brooks' Appeal and issued the MRO, with amendments, as a final Remedial Order. The final order requires ERA to notify the firm of its remaining liability after ERA correctly calculates that liability. The decision also addresses such matters as the proper application of Brooks' partial payments to principal and accrued interest, and the nonacceptability of tolling interest charges during a period when the original RO was stayed, as well as the proper application of DOE policy concerning the compounding of interest.

Remedial Order

Intercoastal Operating Co., Inc., 10/29/87, HRO-0192

The DOE issued a final Remedial Order to Intercoastal Operating Co., a related company, two officers/working interest owners and three additional working interest owners, affirming with modifications a Proposed Remedial Order (PRO) that the Economic Regulatory Administration (ERA) issued to them on August 18, 1983. In the PRO, ERA alleged that during the period September 1973 through September 1980, IOC sold crude oil at prices in excess of those permitted by DOE regulations, in many instances by improperly certifying certain properties as stripper well properties. In its Statement of Objections, the firm attempted to demonstrate that ERA used incorrect well count data, obtained from contemporaneous reports IOC filed with a Louisiana state regulatory agency, to calculate the average daily production for one of the properties, and that more reliable evidence of well count data was available. After considering the evidence in the record, the DOE determined that ERA's reliance on the state reports was justified and that no more accurate data was available. The DOE concluded that the PRO should be issued in final form, with modifications of the interest calculation and refund disposition provisions to reflect current DOE policy.

Motion for Discovery

Cities Service Oil and Gas Corp., 10/27/87, KRD-0030

Cities Service Oil and Gas Corporation (Cities) filed a Motion for Discovery in connection with an enforcement proceeding involving the firm. In its discovery request, Cities requested that the ERA and its prospective witnesses produce documents in order to permit the firm to prepare for an upcoming evidentiary hearing. With respect to certain documents primarily concerning tier trades of crude oil with Cities, the DOE determined that discovery was warranted. Accordingly, the Motion for Discovery was granted in part.

Refund Applications

A.C.B. Trucking, Inc., 10/27/87, RF270-2494

The DOE issued a Decision and Order revising a previous Decision which granted refunds to several applicants in the Surface Transporters refund proceeding, *Anderson Trucking Service, Inc.*, 16 DOE ¶ 85,132 (1987) (*Anderson*), since the volume approved for one of the applicants, A.C.B. Trucking, Inc. (A.C.B.), was incorrect. Specifically, the DOE found that virtually all of A.C.B.'s claimed purchase volumes were for fuel purchased by owner-operators hired by the firm during the Settlement Period. Since A.C.B. did not actually purchase the fuel used by its owner-operators, and the volume of fuel it did purchase was less than the 250,000 gallon threshold for eligibility, it is ineligible to receive a refund. The DOE therefore modified *Anderson* to deny A.C.B.'s Application for Refund.

Bernard A. Krouse d/b/a BAK Ltd./ Portland Heating Oil Company, 10/26/87, RF300-3

The DOE issued a Decision and Order, granting an Application for Refund filed by Portland Heating Oil Company, from the consent order fund obtained by the DOE from Bernard A. Krouse d/b/a BAK LTD. The applicant elected to apply for a refund based upon the presumptions set forth in *Bernard A. Krouse* d/b/a *BAK LTD*, 16 DOE ¶ 85,389 (1987). The refund granted in this proceeding totals $2,599 ($1,377 in principal and $1,222 in interest).

Bronson Community Schools et al., 10/27/87, RF272-91, et al.

The DOE issued a Decision and Order considering the applications filed by Bronson Community Schools and four other claimants seeking refunds for crude oil overcharges. Each applicant demonstrated the volumes of refined petroleum products that it purchased during the covered period. Further, since each applicant established that it was an end-user of those products, each was presumed to have been injured by the alleged crude oil overcharges. Accordingly, the five applications were approved. The sum of the refunds granted in this determination is $2,060.

CenTra, Inc. et al., 10/26/87, RF270-1196

The DOE issued a Decision and Order approving the Application for Refund from the Surface Transporters Escrow submitted by CenTra, Inc. on behalf of its subsidiaries. The DOE made adjustments in the gallons claimed by CenTra, Inc. to exclude the volume of petroleum products purchased by the

firm's leased owner-operators. The total number of gallons approved in this Decision and Order was 342,418,845.

Cranston Oil Service Company, Inc./ Amee's Gift Shop et al., 10/28/87, RF276–1, et al.

The DOE issued a Decision and Order concerning ten Applications for Refund filed by end-users of No. 2 heating oil covered by a consent order that the agency entered into with Cranston Oil Service Company Inc., and its successor-in-interest, Galego Oil Company. The Applications were evaluated in accordance with procedures set forth in *Cranston Oil Service Co.*, 14 DOE ¶ 85,499 (1986). The sum of the refunds approved in this Decision is $305, representing $269 in principal and $36 in interest.

Getty Fleet Corp., Slay Warehousing Co., Texaco Marine Service, Inc., 10/27/87, RF271–59, RF271–80, RF271–82.

The Office of Hearings and Appeals (OHA) issued a Decision and Order granting the Applications for Refund from the Rail and Water Transporters (RWT) Escrow filed by three firms. OHA found that all three companies were members of the class for which the RWT Escrow was established, and that each company had adequately supported the volume of petroleum products which it claimed to have purchased during the Settlement Period. The total amount of gallons approved in this Decision and Order was 511,812,513.

Getty Oil Company/Farmers Union Cooperative Assn. et al., 10/29/87, RF265–195, et al.

The DOE issued a Decision and Order concerning 13 Applications for Refund filed by end-users of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of Getty products that were purchased. As end-users, these applicants were entitled to receive the full volumetric refund. The sum of the refunds approved in this Decision is $26,605, representing $13,245 in principal and $13,360 in accrued interest.

Getty Oil Company/International Drilling & Energy Corporation el al., 10/28/87; RF265–55 et al.

The DOE issued a Decision and Order concerning 54 Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In 43 of these cases, the applicants were eligible for a refund below the $5,000 threshold. In the remaining 11 cases, the applicants elected to limit their claims to $5,000. The sum of the refunds approved in this Decision is $234,363, representing $116,838 in principal and $117,525 in accrued interest.

Leo's-Winstead's Inc./Joe's Service Center et al., 10/26/87; RF294–2 et al.

The DOE issued a Decision and Order concerning six Applications for Refund filed by purchasers of Nos. 1 and 2 fuel oil and motor gasoline from Leo's-Winstead's, Inc. (Leo's). Each firm applied for a refund based on the procedures outlined in *Leo's-Winstead's, Inc.*, 15 DOE ¶ 85,514 (1987), governing the disbursement of settlement funds received from Leo's pursuant to a September 3, 1981 Consent Order. Three of the applicants, Joe's Service Center, Keith's Service, and McCall Service Stations, Inc., are retailers of Leo's covered products who claimed refunds of less that $5,000. Using the small claims presumption for resellers, the DOE concluded that they were injured. The remaining applicants, Marcum Distributing Company, Botsford Ready Mix Co. and Butler Manufacturing Company, are end-users of Leo's covered products, and are therefore presumed to have been injured. After examining the applications and supporting documentation submitted by the claimants, the DOE concluded that they should receive refunds totaling $13,712, representing $11,623 in principal and $2,089 in accrued interest.

Marathon Petroleum Company/G & G Oil Company of Indiana, 10/28/87; RF250–2412, RF250–2413.

The DOE issued a Decision and Order concerning an Application for Refund filed by G & G Oil Company of Indiana, a reseller of products covered by a consent order that the agency entered into with Marathon Petroleum Company. The Applicant demonstrated the volume of its purchases from Marathon, and accepted the presumption of injury for medium range claimants in the Marathon refund proceeding by limiting its claim to 35 percent of its allocable share. The refund approved in this Decision is $6,311 in principal and $796 in interest.

Marathon Petroleum Company/ T & M Oil Co., Inc., 10/28/87; RF250–2724.

The DOE issued a Decision and Order concerning an Application for Refund filed by T & M Oil Co., Inc., a retailer of motor gasoline covered by a consent order that the agency entered into with Marathon Petroleum Company. The Applicant demonstrated the volume of its purchases from Marathon, and accepted the presumption of injury for medium range claimants in the Marathon refund proceeding by limiting its claim to 35 percent of its allocable share. The refund approved in this Decision is $19,222 in principal and $2,426 in interest.

Marathon Petroleum Company/Witham Sales & Service, Don Foster Oil Company, 10/28/87; RF250–2410, RF250–2411, RF250–2414, RF250–2415.

The DOE issued a Decision and Order concerning the Applications for Refund filed on behalf of Witham Sales & Service and Don Foster Oil Company, both retailers of products covered by a consent order that the agency entered into with Marathon Petroleum Company. Each Applicant demonstrated the volume of its Marathon purchases, and elected to accept the presumption of injury for medium range claimants in the Marathon proceeding by limiting its claim to 35 percent of its allocable share. The total amount of the refunds approved in this Decision is $12,418 in principal and $1,567 in interest.

Maritime Overseas Corp., 10/28/87; RR272–4

The Office of Hearings and Appeals (OHA) issued a Decision and Order, denying a Motion for Reconsideration filed by Maritime Overseas Corporation. Maritime's motion sought the reversal of a previous OHA Order denying Maritime's Application for Refund from OHA's Subpart V crude oil proceeding. In sustaining its previous Order, OHA pointed to the fact that Maritime had waived its rights to participate in Subpart V by filing an Application for Refund from the M.D.L. 378 Escrow account established for Rail and Water Transporters.

Nash Finch Company, 10/26/87; RF270–567

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE stripper well exemption litigation. The DOE approved the gallonage of refined petroleum products claimed by Nash Finch Company. The DOE will use that gallonage as a basis for the refund that will ultimately be disbursed to the firm. The DOE stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amount of the firm's refund will be determined at a later date.

National Helium Corp./Louisiana, Standard Oil Co. (Indiana)/ Louisiana, Charter Co./Louisiana, OKC Corp./Louisiana, 10/28/87; RM–3,78, RM21–79, RM23–83, RM13–84.

The DOE issued a Decision and Order approving the Motions for Modification filed by the State of Louisiana in the National Helium Corp., Standard Oil Co. (Indiana), Charter Co., and OKC Corp. refund proceedings. In accordance with the Decision, Louisiana may modify its previously-approved plans for use of second-stage monies and may use $16,144 for administrative expenses. In addition, the New Orleans Vanpool Program may offer its rideshare services to other regions of Louisiana. In evaluating the Motions, the DOE found that these modifications were consistent with the analysis and criteria applied by the DOE when it evaluated the State's original plans.

Pacific Motor Trucking Co., 10/27/87; RF270–2493

The Office of Hearings and Appeals (OHA) issued a Decision and Order granting Pacific Motor Trucking Co.'s Application for Refund from the Surface Transporters (ST) Escrow. OHA had previously denied Pacific Motor's ST application because Pacific Motor's separately incorporated affiliate had filed for a refund from the Rail and Water Transporters (RWT) Escrow. It was OHA's original position that such multiple applications were prohibited by the terms of the ST and RWT Releases. Based on a revised interpretation of those Releases, OHA reinstated and approved Pacific Motor's application. Pacific Motor's refund will be based on its purchases of 115,928,122 gallons of U.S. petroleum products.

Petroleum Heat and Power Co., Inc. William Parese et al., 10 /28/87; RF285–1 et al.

The DOE issued a Decision and Order concerning the Applications for Refund filed by 12 end-users of Petroleum Heat and Power Co., Inc. (PH&P) No. 2 heating oil. The applicants applied for refunds based on the procedures outlined in *Petroleum Heat and Power Co., Inc.*, 15 DOE ¶85,036 (1986), governing the disbursement of settlement funds received from PH&P pursuant to a November 13, 1980 Consent Order. Since all of the claimants were end-users, they were presumed to have been injured by PH&P's alleged overcharges. After examining the applications and supporting documentation submitted by the applicants, the DOE granted them refunds totaling $385, representing $234 in principal and $151 in accrued interest.

Pyrofac Gas Corporation/Andrew J. Visotsky, Paul A . Martin, 10/27/87, RF277–29, RF277–37.

The DOE issued a Decision and Order concerning two Applications for Refund filed by purchasers of Pyrofax propane. Each individual applied for a refund based on the procedures outlined in *Pyrofax Gas Corp.*, 15 DOE ¶ 85,494 (1987) (*Pyrofax*), governing the disbursement of settlement funds received from Pyrofax pursuant to a March 23, 1981 Consent Order. The applications were submitted by two individual who were end-users of Pyrofax propane. Both applicants submitted information from which the DOE was able to establish their purchase volumes. In accordance with the procedures in *Pyrofax*, end-users were presumed to be injured. After examining the applications and supporting documentation submitted by the claimants, the DOE concluded that they should receive refunds totaling $63, representing $35 in principal and $28 in accrued interest.

Roberts Diary Co., Mid-America Dairymen, Inc., 10/28/87, RF270–1334, RF272–443.

The Department of Energy (DOE) issued a Decision and Order concerning the Application for Refund from the Surface Transporter Escrow filed by Roberts Dairy Co. and the Application for Refund from the Subpart V crude oil refund proceeding filed by Mid-America Dairymen, Inc. In the Decision, the DOE found that when Robert submitted a Surface Transporter refund application, it waived its right and the right of its affiliates, including Mid-America Dairymen, to any claim to monies from the Subpart V crude oil refund proceeding. Accordingly, the DOE dismissed Mid-America's Subpart V refund application and proceeded with its analysis of Roberts' Surface Transporter claim. As a Surface Transporter, Roberts will be eligible to receive a refund based on its purchases of 4,237,036 gallons of petroleum products. A per gallon refund amount and the total amount of Roberts' refund will be determined after the DOE completes it analysis of all Surface Transporter claims.

Standard Oil Co. (Indiana)/Montana, 10/28/87, FRM251–82

The DOE issued a Decision and Order regarding a Motion for Reconsideration filed by the State of Montana in the Standard Oil Company (Indiana) second-stage refund proceeding. The Motion requested approval of a highway lighting program previously denied in *Standard Oil Company (Indiana)/ Montana*, 16 DOE ¶ 85,308 (1987). Specifically, Montana requested permission to use $123,752 for a proposal to replace 1,118 mercury vapor lights with more energy efficient high pressure sodium lights. The DOE found that the program will result in energy conservation and it was therefore approved.

57th Street Management Corp., 10/28/87, RF270–157.

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for Surface Transporters pursuant to the settlement agreement in the DOE stripper well exemption litigation. The DOE approved the volume of refined petroleum products claimed by 57th Street Management Corp. (57th Street), the operator of a fleet of taxicabs, and will use that volume as a basis for the refund that will ultimately be issued to 57th Street. The Decision stated that because the size of a Surface Transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amount of 57th Street's refund will be determined at a later date. The total volume approved in this Decision is 18,277,276 gallons.

Dismissal

The following submissions were dismissed:

Champion International Corp	RF272–1778
Dixie Chemical Corp	RF277–12
Kimberly-Clark Integrated Services Corp	RF272–471
Luxuray, Inc	RF265–262
Mr. Taxi, Inc	RF270–538
Myer's Propane Gas Service, Inc	RF277–84
Rolla Public Schools	RF293–6
Royal Taxi, Inc	RF270–539
Smith Fuels, Inc	KEE–0141
Tenafly Taxi, Inc	RF270–540
Triangle Oil Company	KEE–0132
University of Missouri-Rolla	RF293–4

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter.

BILLING CODE 6450-01-M

Issuance of Decisions and Orders During the Week of November 2 Through November 6, 1987

During the week of November 2 through November 6, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Coalition for Safe Power, 11/4/87, KFA-0128

The Coalition for Safe Power filed an Appeal from a denial by the Assistant Secretary of the DOE's Office of Environment, Safety and health of a Request for Information which the Coalition had submitted under the Freedom of Information Act (FOIA). The Coalition sought access to the working papers of an environmental survey preliminary report on the Hanford Reservation Site. In considering the Appeal, the DOE found that the working papers were properly withheld in their entirety under Exemption 5 of the FOIA. The DOE concluded that the working papers did not contain any segregable factual information which could be released without compromising the deliberative process because the factual material in the working papers was either inextricably intertwined with the deliberative material, or served as the basis for the author's tentative recommendations and conclusions. In addition, the DOE determined that the agency did not waiver its deliberative process privilege by providing a copy of the working papers to Representative Ronald L. Wyden of Oregon in his official capacity as a member of the House Energy and Commerce Committee. The DOE further found that the unauthorized leak of this information to the press did not waive the privilege. Accordingly, the Appeal was denied.

Stephen Quakenbush, 11/3/87, KFA-0126

Stephen Quakenbush filed an Appeal from a denial by the Director of the Classification and Technical Information Division of the DOE Albuquerque Operations Office of a Request for Information which he submitted under the Freedom of Information Act (FOIA). The appellant sought access to information compiled pursuant to his request for a security clearance. The Authorizing Official denied his request for the information under Exemption 7A of the FOIA. The DOE found that the Authorizing Official did not provide even a generic index of the withheld documents nor explain why they were exempt from disclosure under Exemption 7A. In addition, the DOE found that all of the information in the file could not be properly exempted under Exemption 7A, but might be subject to other FOIA exemptions. Accordingly, the matter was remanded to the Authorizing Official for further consideration.

USA Petroleum Corp., Atlantic Richfield. Co., 11/3/87, KFA-0134, KFA-0131

The Department of Energy (DOE) granted two motions filed by USA Petroleum Corp. (USAP) and the Atlantic Richfield Company (ARCO), respectively, in connection with an October 2, 1987 Decision and Order concerning a Freedom of Information Act (FOIA) Appeal filed by USAP. *USA Petroleum Corp.*, 16 DOE ¶ 80,119 (1987). The DOE agreed with USAP that the ordering paragraphs of the Decision should be clarified to ensure that ARCO's Refiner's Monthly Cost Allocation Reports pertaining to the period of petroleum price controls should be released regardless of when they were filed. The DOE also agreed with ARCO that footnote eight, concerning the origin of a spreadsheet referred to in the Decision, should be deleted. The DOE ordered the October 2 Decision modified accordingly.

Remedial Order

Tonkawa Refining Company, 11/2/87, HRO-0301

Tonkawa Refining Company objected to a Proposed Remedial Order issued to the firm by the Economic Regulatory Administration. In the PRO, the ERA alleged that during the period January through December 1980, Tonkawa inaccurately reported to the Entitlements Program the volume and regulatory tier classification of its crude oil receipts, in violation of 10 CFR 211.66(b) and (h). The PRO concluded that Tonkawa should be required to make restitution by refunding to the DOE $7,069,173 plus interest, the amount of excess benefits which the firm allegedly received from the Entitlements Program. Tonkawa maintained that it accurately reported its crude oil receipts, and challenged the accuracy of the ERA's calculations. The DOE concluded that Tonkawa failed to rebut the ERA's prima facie showing that the firm did not submit accurate Refiners Monthly Reports. As a result, the DOE determined that Tonkawa should be required to disgorge the excess benefits that it received. Accordingly, the Proposed Remedial Order, with certain amendments and modifications, was issued as a final Remedial Order of the DOE.

Request for Modification and/or Rescission

MONTANA, 11/2/87, KER-0033

The DOE issued a Decision and Order concerning the Motion for Reconsideration filed by the State of Montana. The State sought reconsideration of a DOE determination that denied the Petition for Special Redress filed by Montana concerning the use of Stripper Well funds for two proposed programs. The first program would use $139,042 for a biological weed control program. After examining the additional information provided by Montana, the DOE determined that the program was likely to result in energy conservation benefits in the near future. The second program would use $65,000 for roof repairs at West Yellowstone Airport. Montana showed that a significant amount of additional motor gasoline would be consumed by travelers if the West Yellowstone Airport were closed due to deterioration of the terminal's roof. Accordingly, Montana's Motion for Reconsideration was granted.

Request for Exception

Senco Marketing, 11/6/87, KEE-0111

Senco Marketing (Senco) filed an Application for Exception from the requirement that it file Form EIA-782B, entitled "Resellers/Retailers' Monthly Petroleum Product Sales Report." In considering the Request, the DOE found that Senco's reporting burden was not significantly different from that of other firms participating in the EIA-782B survey. Accordingly, exception relief was denied.

Refund Applications

Brookville Leasing Ltd., 11/3/87, RR270-14

The Department of Energy (DOE) issued a Decision and Order granting a Motion for Reconsideration filed by Brookville Leasing Ltd. (Brookville). In a prior determination, the DOE dismissed Brookville's Surface Transporter Refund Application because Brookville had not met the minimum gallonage amount required for Surface Transporter applicants. In granting Brookville's Motion, the DOE determined that Brookville had been unfairly penalized for an oversight made by its representative. Because Brookville later submitted information showing purchases over the minimum requirement, the DOE determined that Brookville should receive a Surface Transporters refund.

Burlington Industries, Inc., 11/2/87, RF272-2977

The Office of Hearings and Appeals (OHA) issued a Decision Order denying Burlington Industries' Application for Refund from OHA's Subpart V crude oil proceedings. OHA's denial was based on the fact that Burlington had waived its rights to participate in Subpart V by filing an Application for Refund from the M.D.L. 378 Escrow account established for Surface Transporters.

Cargill, Incorporated, RF270-2490, Excel Corporation, RF270-2491, and Cargo Carriers, 11/4/87, RF270-2490, RF270-2491, and RF271-232

The Department of Energy (DOE) issued a Decision and Order reinstating the applications submitted by Cargill, Incorporated (Cargill) and Excel Corporation (Excel) for a refund from the Surface Transporters (ST) Escrow, and the application of Cargo Carriers for a refund from the Rail and Water Transporters (RWT) Escrow. Both of these escrows were established as a result of the Stripper Well Settlement Agreement. The DOE had dismissed these applications on the request of the applicants. The applicants had stated that they wished to apply in crude oil refund proceedings under the provisions of 10 CFR Part 205, Subpart V (Subpart V). Subsequent to the DOE's dismissal of the three claims, the DOE determined that the waiver language in the RWT and ST applications becomes effective and irrevocable upon the filing of those applications with the DOE. Because this ruling precluded Cargill, Excel and Cargo Carriers from applying for a crude oil refund under Subpart V, the DOE sua sponte reinstated their respective escrow claims. Based on the documentation submited by the applicants, the DOE approved the respective ST claims of Cargill and Excel in full, and approved Cargo Carrier's RWT claim after adjusting the gallonage to include only its purchases during the Settlement Period. The DOE will determine the amount of each applicant's refund after it completes its analysis of all RWT and ST claims. The total number of gallons approved in this Decision for a refund from the RWT Escrow is 80,257,160, and the total number of gallons approved for refund from the ST Escrow is 42,071,923.

CF Industries, Inc., et al., 11/2/87, RF272-472, et al.

The Department of Energy (DOE) issued a Decision and Order dismissing the applications of five companies for crude oil refund pursuant to the provisions of 10 CFR Part 205, Subpart V (Subpart V). The DOE dismissed these cases because each of the applicants had already been approved for a refund from one of the Transporters Escrows, Surface or Rail and Water, created by the Stripper Well Settlement Agreement. Under the terms of the Settlement Agreement, in order to receive a refund from one of the Stripper Well escrow accounts, the applicant had to waive its right to a refund in any Subpart V crude oil proceeding. Accordingly, these firms were ineligible for Subpart V crude oil refunds.

Charles F. Cates & Sons, Inc., 11/3/87, RR270-21

The Department of Energy (DOE) issued a Decision and Order granting a Motion for Reconsideration filed by Charles F. Cates & Sons (Charles). In a prior determination, the DOE dismissed Charles' Surface Transporter refund application because Charles failed to submit requested information in a timely manner. In granting Charles' Motion, the DOE decided that Charles was unable to comply promptly with a DOE information request for persuasive reasons. After evaluating the information submitted by the firm, the DOE concluded that Charles is eligible to receive a refund from the Surface Transporters Escrow.

Cranston Oil, Service Company, Inc., John Pelli et al., 11/3/87, RF276-9 et al.

The DOE issued a Decision granting 50 Applications for Refund from the consent order fund obtained by the DOE from Cranston Oil Service, Inc., and its successor-in-interest Galego Oil Company. The 50 refund applicants were end-users of Cranston No. 2 heating oil during the consent order period. Each applicant elected to apply for a refund based upon the presumptions set forth in *Cranston Oil Service Co.*, 14 DOE ¶ 85,499 (1986). The total amount of refunds approved in this determination is $3,588 representing $3,159 in principal and $429 in interest.

Cranston Oil, Service Company, Inc., Richard T. Almay et al., 11/2/87, RF276-18 et al.

The DOE issued a Decision granting 50 Applications for Refund from the consent order fund made available to the DOE by Cranston Oil Service, Inc., and its successor-in-interest Galego Oil Company. The 46 refund applicants were end-users of Cranston No. 2 heating oil during the consent order period. Each applicant elected to apply for a refund based upon the presumptions set forth in *Cranston Oil Service Co.*, 14 DOE ¶ 85,499 (1986). The total amount of refunds approved in this determination is $2,528 ($2,222 in principal and $306 in interest).

Dow Chemical Company, 11/4/87, RR271-7

The Office of Hearings and Appeals (OHA) issued a Decision and Order granting a Motion for Reconsideration filed by Dow Chemical Company on October 21, 1987. In its motion, Dow asked that OHA reverse its previous denial of Dow's Application for Refund from the Rail and Water Transporters (RWT) Escrow established by the Stripper Well Settlement Agreement. OHA had originally denied Dow's application, because an affiliate of the firm had filed for a refund from the Refiners Escrow. OHA granted Dow's motion based on the holding set forth in *Union Pacific Railway Co.*, 16 DOE ¶ 85,526 (1987), that separately incorporated affiliates could file for refunds from different M.D.L 378 Escrows. The DOE also considered the merits of Dow's claim and approved an RWT refund based on Dow's purchases of 99,640,222 gallons of U.S. petroleum products.

Escanaba Area Public Schools, 11/4/87, RF272-97

The DOE issued a Decision and Order considering the application filed by Escanada Area Public Schools seeking a refund for crude oil overcharges. Escanaba demonstrated that during the period of crude oil price controls, it purchased 752,537 gallons of petroleum products which were consumed in vehicles used to transport students. The DOE found that since Escanaba was an end user of refined petroleum products, it was presumed to have been injured by the alleged crude oil overcharges. Accordingly, the application was approved and Escanaba was granted a refund of $151.

Food Haulers, Inc., 11/4/87, RF270-1028

The Department of Energy (DOE) issued a Decision and Order approving an Application for Refund from the Surface Transporters Escrow established as a result of the Stripper Well Settlement Agreement. The applicant demonstrated that it was contractually responsible for the cost of fuel used in the vehicles it leased from

owner-operators. Accordingly, the DOE approved the applicant's entire gallonage claim. The total number of gallons approved in this Decision is 25,460,656.

Getty Oil Company/Blass LP Gas, Inc., et al., 11/4/87, RF265–2505 et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In two of these cases, the applicants were eligible for a claim below the $5,000 small claims threshold. In the remaining two cases, the applicants elected to limit their claims to $5,000. The sum of the refunds approved in this Decision is $31,159, representing $15,513 in principal and $15,646 in accrued interest.

Getty Oil Company/Hank's Skelly, et al., 11/4/87, RF265–2235, et al.

The DOE issued a Decision and Order concerning four Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In all of these cases, the applicants were eligible for a claim below the $5,000 small claims threshold. The sum of the refunds approved in this Decision is $8,206, representing $4,086 in principal and $4,120 in accrued interest.

Getty Oil Company/U-Pump-It of Kansas, Inc., et al., 11/2/87, RF265–390 et al.

The DOE issued a Decision and Order concerning six Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In four of these cases, the applicants were eligible for a claim below the $5,000 small claims threshold. In the remaining two cases, the applicants elected to limit their claims to $5,000. The sum of the refunds approved in this Decision is $31,634, representing $15,749 in principal and $15,885 in accrued interest.

Getty Oil Company/Verberg Skelly Service, et al., 11/6/87, RF265–445, et al.

The DOE issued a Decision and Order concerning 48 Applications for Refund filed by resellers and retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In 38 of these cases, the applicants were eligible for a claim below the $5,000 small claims threshold. In the remaining 10 cases, the applicants elected to limit their claims to $5,000. The sum of the refunds approved in this Decision is $216,112, representing $107,595 in principal and $108,517 in accrued interest.

Hilt Truck Line, Inc., 11/2/87, RF270–1464

The DOE issued a Decision and Order denying an Application for Refund from the Surface Transporters Escrow established as a result of the Stripper Well Settlement Agreement. The DOE determined that he claim of Hilt Truck Line, Inc. was based entirely on gallons of fuel purchased by owner-operators, not the firm itself. These gallons are ineligible for a refund because they were not purchased by the applicant. Therefore, the applicant did not meet the minimum requirements for a Surface Transporter Refund and its Application was denied.

International Multifoods Corporation, 11/4/87, RF270–2344

The Department of Energy (DOE) issued a Decision and Order partially approving an Application for Refund from the Surface Transporters Escrow established as a result of the Stripper Well Settlement Agreement. One of the Applicant's divisions rented vehicles from two independent leasing companies during the Settlement Period. The DOE determined that this division absorbed fuel costs under one of the lease agreements but not under the other. Therefore, the DOE partially approved the claim. The total number of gallons approved in this Decision is 9,330,295.

Madison Bottling Company, 11/2/87, RF270–2495

The Department of Energy (DOE) issued a Decision and Order rescinding a prior Decision that approved a refund for Madison Bottling Company (Madison) in the Surface Transporters Escrow Refund Proceeding. The DOE determined that because Madison had purchased less than 250,000 gallons of petroleum products during the Stripper Well Litigation Settlement Period, it was not a member of the class for which the Surface Transporters Escrow was established. Accordingly, the DOE concluded that Madison is not eligible to receive a Surface Transporters Refund.

Manufacturers Cartage Company, 11/4/87, RF270–2486

The Department of Energy (DOE) issued a Decision and Order reinstating the application submitted by Manufacturers Cartage Company (MCC) for a refund from the Surface Transporters (ST) Escrow established as a result of the Stripper Well Settlement Agreement. The DOE had originally denied MCC's application because an affiliate of the firm had filed for a refund from the Rail and Water Transporters Escrow. The DOE reinstated MCC's claim based on the principles set forth in the case of *Union Pacific Railway Co.*, 16 DOE ¶ 85,526 (1987). In that case, the DOE determined that separately incorporated affiliates could file for refunds from different M.D.L. 378 Escrows. The DOE also considered the merits of MCC's claim. The DOE determined that the documentation submitted by MCC to support its claim was satisfactory and, accordingly, approved the claim in full. The DOE will determine a per gallon refund amount and establish the amount of the applicant's refund after it completes its analysis of all ST claims. The total number of gallons approved in this Decision is 783,619.

Marathon Petroleum Company/Gulf Oil Corporation, 11/4/87, RF250–2574, RF250–2575

The DOE issued a Decision and Order granting the Application for Refund filed on behalf of Gulf Oil Corporation in the Marathon Petroleum Company special refund proceeding. The applicant elected to limit its claim to the small claims threshold of $5,000. The total refund approved in this Decision is $5,000 in principal and $631 in interest.

Marathon Petroleum Company/Orth Oil, Inc., 11/4/87, RF250–1854, RF250–1855

The DOE issued a Decision and Order concerning Applications for Refund filed by Orth Oil, Inc. in the Marathon Petroleum Company special refund proceeding. Orth, a purchaser of Marathon gasoline and middle distillates, elected to limit its refund claim to the $5,000 small claims level, and was therefore not required to submit a detailed showing of injury. The sum of the refunds approved in this Decision and Order is $5,631, representing $5,000 in principal and $631 in interest.

Martin Oil, Service/Ashland Oil, Inc., et al., 11/2/87, RF240–21 et al.

The DOE issued a Decision and Order concerning five Applications for Refund filed in the Martin Oil Service, Inc. special refund proceeding. All five of the Applicants were identified as spot purchasers in *Martin Oil Service, Inc.*, 14 DOE ¶ 85,059 (1986). None of the applicants rebutted the presumption set forth in that Decision that spot purchasers of Martin's refined petroleum products were not injured by Martin's overcharges. Consequently, all five applications were denied.

Mobil Oil Corp./American Airlines, et al., 11/4/87, RF225–4288 et al.

The DOE issued a Decision and Order granting applications of seven end-users and one reseller requesting refunds from the Mobil Oil Corporation consent order fund. Each applicant presented evidence that it purchased refined petroleum products from Mobil during the consent order period. The end-user applicants purchased products both directly and indirectly supplied by Mobil. According to the methodology set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985) (*Mobil*), each applicant was found to be eligible for a refund from the Mobil consent order fund based on the volume of its purchases times the applicable presumption of injury level times the volumetric refund amount. The refunds approved in this Decision totaled $163,265 ($132,324 principal plus $30,941 interest).

Morgan Cab Company, 11/2/87, RF270–515

The DOE issued a Decision and Order in connection with its administration of the $10.75 million escrow fund established for surface transporters pursuant to the settlement agreement in the DOE stripper well exemption litigation. The DOE approved the gallonage of refined petroleum products claimed by Morgan Cab Company. The DOE will use that gallonage as a basis for the refund that will ultimately be issued to the firm. The Decision stated that because the size of a surface transporter applicant's refund will depend upon the total number of gallons that are ultimately approved, the actual amount of the firm's refund will be determined at a later date.

Phillips Petroleum Company, 11/4/87, RF271–1

The Office of Hearings and Appeals (OHA) issued a Decision and Order denying a Motion for Reconsideration filed by Phillips Petroleum Company on June 19, 1987. In its motion, Phillips asked that OHA reverse its previous denial of Phillip's Application for Refund from the Rail and Water Transporters (RWT) Escrow. OHA had originally denied the application because Phillips had filed for a refund from the Refiners Escrow. In the case of *Union Pacific Railway Co.*, 16 DOE ¶ 85,526 (1987), OHA determined that the RWT Release permitted separately incorporated affiliates to file for refunds from different M.D.L. 378 Escrows, but precluded a single firm or the unincorporated divisions of a firm doing so. Phillips had filed an Application for Refund from the Refiners Escrow. Thus, it was precluded from participating in the RWT Escrow by the terms of the RWT Release.

Puget Sound Freight Lines, 11/4/87, RF271–236

The Department of Energy (DOE) issued a Decision and Order reinstating the application submitted by Puget Sound Freight Lines (Puget Freight) for a refund from the Rail and Water Transporters (RWT) Escrow established as a result of the Stripper Well Settlement Agreement. The DOE had originally denied Puget Freight's application because an affiliate of the firm had filed for a refund from the Surface Transporters Escrow. The DOE reinstated Puget Freight's claim based on the principles set forth in *Union Pacific Railway Co.*, 16 DOE ¶ 85,526 (1987). In that case, the DOE determined that separately incorporated affiliates could file for refunds from different M.D.L. 378 Escrows. The DOE also considered the merits of Puget Freight's RWT claim. The DOE determined that the documentation Puget Freight provided to support its claim was satisfactory and, accordingly, approved the claim in full. The DOE will determine a per gallon refund amount and establish the amount of Puget Freight's refund after it completes its analysis of all Rail and Water claims. The total number of gallons approved in this Decision is 7,039,020.

Sause Brothers Ocean Towing Company, 11/5/87, RF271–9

The Office of Hearings and Appeals (OHA) granted a Motion for Reconsideration filed by Sause Brothers Ocean Towing Company (Ocean Towing) on October 27, 1987. OHA had originally denied the Application for Refund from the Rail and Water Transporters (RWT) Escrow submitted by the firm because the firm had failed to respond to certain factual inquiries regarding its application. In its motion, the firm stated that it had not been able to respond because of the illness of the employee who had prepared the application. OHA determined that the firm's explanation was reasonable, and that the information finally submitted by the firm adequately supported its application. Accordingly, the firm's RWT refund claim was approved.

Tennessee River Pulp and Paper Company, 11/3/87, RF272–4758

The Office of Hearings and Appeals (OHA) issued a Decision and Order denying Tennessee River Pulp and Paper Company's Application for Refund from OHA's Subpart V crude oil proceedings. OHA based its denial on the fact that one of Tennessee's affiliates, the Corinth and Counce Railroad, waived its and Tennessee's rights to participate in Subpart V crude oil proceedings by filing an Application for Refund from the M.D.L. 378 Escrow account established for Rail and Water Transporters.

Tri Boro Taxi Cab Company, 11/6/87, RF270–2496

The Department of Energy (DOE) issued a Decision and Order modifying a prior Decision that approved a refund for Tri Boro Taxi Cab Company (Tri Boro) in the Surface Transporters Escrow Refund Proceeding. The DOE determined that because of an inadvertent error, Tri Boro was granted a larger refund than it was eligible to receive based on the number of gallons of petroleum products it purchased during the Stripper Well Litigation Settlement Period.

Dismissals

The following submissions were dismissed:

Name and Case No.
Butler Gulf Service—RF300–325
Campbell's Gulf—RF300–36
Clemons Gulf—RF300–56
Curtis Beard Service—RF300–42
Duane Schreurs—RF272–8097
Faucette's Gulf Service—RF300–30
J.O. Heflin—RF272—0825
Kittrell's Conoco—RF220–406
Pacific Motor Trucking Company—RR270–22
Philadelphia Electric Co.—RF225–1464
Walts Gulf Service—RF300–377
Yorktowne Paper Mills, Inc.—RF272–413.

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

George B. Breznay,

Director, Office of Hearings and Appeals.

December 22, 1987.

BILLING CODE 6450–01–M

Issuance of Decisions and Orders During the Week of November 9 Through November 13, 1987

During the week of November 9 through November 13, 1987, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief

filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Alan Penan, 11/10/87, KFA–0130

Alan Penan filed an Appeal from a denial by the Chief of the Freedom of Information and Privacy Acts Activities Branch of the DOE Office of Administrative Services of a request submitted under the Freedom of Information Act (FOIA). Mr. Penan sought access to an administrative file which had been provided to the Department of Justice by the Office of Personnel Management (OPM) during the course of a lawsuit which Mr. Penan filed against the Department of Energy (DOE). In response to Mr. Penan's FOIA request, the Authorizing Official informed him that the request had been referred to OPM. In his Appeal, Mr. Penan objected to that referral and asked that the DOE be directed to respond to his request. However, the DOE pointed out that Mr. Penan's request had been transferred to OPM after the Authorizing Official was unable to locate any documents in the DOE's possession that were responsive to the FOIA request. In addition, the OPM had indicated to the Authorizing Official that it possessed responsive documents. Under these circumstances, the DOE found that the Authorizing Official had conducted an adequate and reasonable search for any responsive documents in the DOE's possession. Accordingly, Mr. Penan's Appeal was denied.

Cascade Broadcasting Company, Washington Public Power Supply, 11/10/87, KFA–0129, KFA–0135

Cascade Broadcasting and WPPSS filed Appeals from denials by the Assistant Manager of the Richland Operations Office of Requests for Information which the firms had requested under the Freedom of Information Act. In considering the appeals, the DOE found that the requested document was properly withheld under Exemption 5. An important issue that was considered in the Decision and Order was whether disclosure of a DOE report to Congressmen and a governor, for consultative purposes, constitutes a waiver of confidentiality under Exemption 5.

Petition for Special Redress

Indiana, 11/10/87, KEG–0019

The DOE issued a Decision and Order concerning a Petition for Special Redress submitted by the State of Indiana. The State sought approval to use Stripper Well monies for these projects which the DOE's Assistant Secretary for Conservation and Renewable Energy held to be inconsistent with the terms of the Stripper Well Settlement Agreement. The DOE disapproved the State's proposal to use $1,500,000 for the City of Anderson Substation Relocation Program, $95,867 for the Shale Oil-Modified Asphaltic Paving Materials Program, and $225,000 for the Indiana Geological Survey-Image Analyzing Petroscopic Microscope Program. The DOE found that the Substation Relocation Project should not be funded with oil overcharge monies because it would neither promote significant energy conservation nor accomplish restitution. Similarly, the Shale Oil-Modified Asphaltic Paving Materials Program was disapproved because it appeared to be an economic development project that promised little or no energy-related benefits to injured citizens of Indiana. Finally, the DOE determined that the Indiana Geologic Society should not be permitted to use oil overcharge funds to purchase a Petroscopic Microscope because Indiana had made no showing that energy conservation or restitution would result from the purchase of this device. Accordingly, Indiana's Petition for Special Redress was denied.

Request for Exception

Wholesale Petroleum Agency, 11/10/87, KEE–0150

The Wholesale Petroleum Agency (Wholesale), a retailer of motor gasoline, diesel fuel and motor oil, filed an Application for Exception requesting that it be relieved of the requirement to file Form EIA–782B, entitled "Resellers'/Retailers' Monthly Petroleum Product Sales Report." In reviewing the request, the DOE found that Wholesale would not experience any inordinate burden by fulfilling its reporting obligation and that any burden to the firm of providing the data produced by the Form did not outweigh the benefits to the Nation of having this information. Accordingly, exception relief was denied.

Interlocutory Order

Highway Oil Company, Inc., Economic Regulatory Administration, 11/9/87, KRZ–0065, KRR–0031, and KRZ–0054

On March 9, 1987, the Highway Oil Company, Inc. (Highway) filed a Motion to Dismiss a Proposed Remedial Order (PRO) issued to Highway by the Economic Regulatory Administration (ERA) on October 29, 1982. In its Motion Highway argued that the PRO should be dismissed with prejudice because the ERA had not filed recalculations of the overcharges alleged in the PRO on a timely basis. In considering the Motion, the DOE found that the ERA had, in essence, complied with all orders issued by the DOE and that the ERA's conduct had not resulted in any undue delay of this proceeding. Accordingly, the Motion to Dismiss was denied.

On March 16, 1987, the ERA filed a Motion for Leave to File Recalculations of the amount of overcharges alleged in the PRO issued to Highway. In considering the Motion, the DOE found that the public interest in reaching a prompt adjudication of this case on the merits, coupled with the absence of any prejudice to Highway in accepting recalculations that reduced the amount of overcharges alleged, constituted good cause for granting the ERA's Motion. Accordingly, the DOE accepted into the record the ERA's recalculations submitted on March 16, 1987.

Finally, Highway requested that if ERA's Motion to File Recalculations were granted, the DOE should reconsider its previous denial of Highway's June 21, 1985 request to supplement the record. In denying the firm's Request for Reconsideration, the DOE found that its determination to accept the ERA's recalculations into the record provided no basis for reconsidering its earlier denial of Highway's request to file supplemental material.

Supplemental Order

International Telephone & Telegraph Company, 11/12/87, DEX–0043

The DOE conducted a review of exception relief that had been granted to International Telephone & Telegraph Company (IT&T) on April 20, 1978. The exception had permitted a subsidiary of IT&T, the Eason Oil Company, to increase its selling prices for natural gas liquids above the maximum levels permitted under DOE regulations for the period March 31, 1978 through September 30, 1978. That exception relief was granted to permit the firm to recover all of its increased nonproduct costs at its Crescent plant.

In reviewing the exception proceeding, the DOE determined that $236,822 of the nonproduct costs claimed in IT&T's 1978 exception application were incurred as a result of the acquisition of Eason by IT&T, and were not directly related to the costs of operating the Crescent plant. The DOE found that such merger related expenses did not form a proper basis for exception relief.

Accordingly, the DOE determined that the 1978 exception relief should be recalculated to exclude the $236,822 in improper merger-related costs. Authority to modify the 1978 Decision was based upon Paragraph (7) of the Order in that decision which stated that the relief may be revoked or modified at any time upon a determination that the factual basis underlying the application was incorrect. Since the DOE found that IT&T had materially misrepresented the relevant facts when it stated in its application, a Supplemental Order was issued reducing the amount of exception relief for the relevant period from 6.295 to 4.277 cents per gallon.

Refund Applications

Britt Well Service, Inc., 11/10/87, RF272–227

The Department of Energy (DOE) issued a Decision and Order dismissing the application of Britt Well Service, Inc. (Britt) for a refund pursuant to the provisions of 10 CFR Part 205, Subpart V (Subpart V). The DOE dismissed Britt's claim because one of Britt's affiliates, Britt Trucking Company, Inc. (Britt Trucking) had already been approved for a refund from the Surface Transporters Escrow established by the Stripper Well Settlement Agreement. Under the terms of the Settlement Agreement, in order to receive a refund from one of the Stripper Well escrow accounts, the applicant had to waive its right to a refund in a Subpart V proceeding. The Settlement Agreement states that this waiver is also binding on the applicant's affiliates. Accordingly, Britt is bound to the terms of the waiver signed by Britt Trucking, and the DOE dismissed Britt's Subpart V claim.

Cranston Oil Service Company, Inc., Frank M. Capace, et al., 11/12/87, RF276–6, et al.

The DOE issued a Decision granting 50 Applications for Refund in the Cranston Oil Service, Inc., special refund proceeding. The 50 refund applicants were end-users of Cranston No. 2 heating oil during the Cranston consent order period. Each applicant elected to apply for a refund based upon the presumptions set forth in *Cranston Oil Service Co.*, 14 DOE ¶ 85,499 (1986). The total amount of refunds approved in this determination is $4,339, representing $3,810 in principal and $529 in interest.

Getty Oil Company/Community Gas Company, et al., 11/10/87, RF285–2392, et al

The DOE issued a Decision and Order concerning six Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In all of these cases, the applicants were eligible for a claim below the $5,000 threshold. The sum of the refunds approved in this Decision is $23,056, representing $11,479 in principal and $11,577 in accrued interest.

Getty Oil Company/Meyer Petroleum Service, et al., 11/9/87, RF265–495, et al.

The DOE issued a Decision and Order concerning 19 Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In ten of these cases, the applicants were eligible for a claim below the $5,000 threshold. In the remaining nine cases, the applicants elected to limit their claims to $5,000. The sum of the refunds approved in this Decision is $63,198, representing $31,466 in principal and $32,732 in accrued interest.

Getty Oil Company/Savage Skelly, et al., 11/10/87, RF265–1224, et al.

The DOE issued a Decision and Order concerning 49 Applications for Refund filed by resellers or retailers of products covered by a consent order that the DOE entered into with Getty Oil Company. Each applicant submitted information indicating the volume of its Getty purchases. In 49 of these cases, the applicants were eligible for a claim below the $5,000 threshold. In the remaining ten cases, the applicants elected to limit their claims to $5,000. The sum of the refunds approved in this Decision is $241,928, representing $120,453 in principal and $121,475 in accrued interest.

Gold Kist, Inc., 11/13/87, RF270–2397

The DOE issued a Decision and Order denying an Application for Refund from the Surface Transporters Escrow filed by Gold Kist, Inc., an agricultural cooperative. The DOE found that Gold Kist's receipt of a refund from the Agricultural Cooperative Escrow precluded the firm from also obtaining a refund from the Surface Transporters Escrow, because its sudrafe transportation activities were carried out by the same incorporated entity.

JOC Oil, Inc./Consolidated Edison Company of New York, 11/13/87, RF109–2

Consolidated Edison Company of New York (Con Ed) filed an Application for Refund in the JOC Oil, Inc. special refund proceeding. The refund claim was based upon (i) 418,171 gallons of residual fuel oil which Con Ed purchased from JOC Oil and (ii) 7,478,245 gallons which Con Ed did not purchase from JOC Oil. The latter aspect of the claim involves damages which the New York State Supreme Court ordered Con Ed to pay JOC Oil in connection with a breach of contract suit. Alleging that the damages which it paid JOC were based in part upon the firm's selling prices, including the alleged overcharges, Con Ed argued that an additional volumetric refund based upon a figure of 7,478,245 gallons should be granted to eliminate the alleged overcharges from the damages paid JOC Oil. Based upon the 418,171 gallons of fuel oil which Con Ed purchased, a refund of $33,685.76 in principal and $41,760.96 in accrued interest was approved. With respect to the second part of the claim, the OHA (i) denied a volumetric refund because Con Ed has not purchased the 7,478,245 gallons and (ii) denied any further refund relating to the breach of contract damages because Con Ed did not show that the JOC Oil price upon which the Court ordered damages were based violated any DOE regulations.

Marathon Petroleum Company/Pilot Oil Corporation, 11/9/87, RF250–2383, RF250–2384

The DOE issued a Decision and Order concerning an Application for Refund filed by the Pilot Oil Corporation (Pilot), a Marathon subsidiary, in connection with the Marathon Petroleum Company special refund proceeding. The DOE determined that subsidiaries such as Pilot are not among the class of Marathon applicants for whom the presumptive levels of overcharge injury were intended to apply. The DOE also found that Pilot's injury demonstration was inconclusive. Consequently, the firm's application as denied.

Martin Oil Service, Inc./Koch Refining Company, Atlantic Richfield Company, 11/9/87, RF240–16, RF240–20

The DOE issued a Decision granting two Applications for Refund in the Martin Oil Service special refund proceeding. Each applicant was a reseller of motor gasoline and sought a refund in excess of the $5,000 small claims threshold. However, the applicants failed to provide documentation of injury as required for refunds exceeding $5,000. Accordingly, a refund of $7,145, representing $5,000 in

principal and $2,145 in interest, was granted to each claimant.

Minnesota, Dakota & Western Railway Company, 11/13/87, RF271–238

The Minnesota, Dakota & Western Railway Company (Minnesota) was granted a refund from the Rail and Water Transporters (RWT) Escrow on the basis of purchases of 395,060 gallons of U.S. petroleum products. Minnesota had withdrawn its first RWT claim but was allowed to reinstate that application after the OHA concluded that a valid escrow waiver release, such as that executed by Minnesota in its first RWT claim, could not be withdrawn.

Mobil Oil Corporation/A.R. Kincannon, et al., 11/10/87, RF225–7163, et al.

The DOE issued a Decision granting 49 Applications for Refund filed in the Mobil Oil Corporation special refund proceeding by retailers, resellers, and end-users of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $44,602, representing $36,152 in principal and $8,450 in interest.

Mobil Oil Corp./Ashland Petroleum Company, 11/10/87, RF225–4942

The DOE issued a Decision and Order granting an Application for refund filed by the Ashland Petroleum Company (Ashland), a refiner, in the Mobil Oil Corporation special refund proceeding. Ashland requested a refund on the basis that it was an end-user of 73,916,808 gallons of normal butane, propane and butane-butylene purchased from Mobil. However, Ashland had used these products as blending components in its refining operations and OHA had previously concluded that an applicant making such uses of refined products purchased from a consent order firm should be considered as a reseller and not a end-user. Ashland documented its Mobil purchase volumes but did not make a demonstration of injury in support of its request for a refund in excess of the $5,000 small claims threshold.

Mobil Oil Corporation/Oil Burner Utility Co., et al., 11/10/87, RF225–1213 et al.

The DOE issued a Decision regarding nine Applications for Refund filed by retailers and resellers in the Mobil Oil Corporation special refund proceeding. None of the applicants adequately documented the volumes of products which they claimed to have purchased from Mobil. Accordingly, the applications were denied.

New York Petroleum, Inc./Ashland Oil Inc., 11/9/87, RF49–1

The Ashland Oil Company, Inc. (Ashland) filed an Application for refund in the New York Petroleum, Inc., special refund proceeding. The refund claim was based upon Ashland's purchases of miscertified and illegally priced crude oil from New York Petroleum during the period September 1, 1973 through January 27, 1981. The DOE concluded that a refund was warranted with respect to 35.9 percent of Ashland's total purchases, i.e., those made by Ashland prior to November 1, 1974, the effective date of the Entitlements Program. However, the DOE denied any refund for purchases after that date on the basis that the price equalization effects of the Entitlements Program would have dispersed any injury to Ashland among all participating refiners. Accordingly, Ashland was granted a refund of $45,952 in principal, equivalent to 35.9 percent of its allocable share of the consent order fund, and $21,314 in accumulated interest.

Sun Transport, Inc., 11/9/87, RF271–236

A Decision and Order was issued granting Sun Transport, Inc. (Sun) a refund from the Rail and Water Transporters (RWT) Escrow on the basis of purchases of 41,932,300 gallons of U.S. petroleum products. Sun's claim, which had initially been dismissed, was reinstated after issuance of *Union Pacific Railway Co.*, 16 DOE ¶ 85,526 (1987), in which the DOE concluded that separately incorporated affiliates were entitled to file for refunds from different M.D.L. 378 Escrows.

Texaco Trading and Transportation, Inc., Texaco Refining and Marketing, Inc., 11/10/87, RF270–273, RF270–1314

The DOE issued a Decision and Order concerning the Applications for Refund from the Surface Transporter Escrow filed by Texaco Trading and Transportation, Inc. (Texaco Trading) and by Texaco Refining and Marketing, Inc. (Texaco Refining). Both applicants are affiliates of a separately incorporated firm which filed an unrelated Application for Refund from one of the other M.D.L. 378 Escrows. In accordance with the decision *Union Pacific Railway Co.*, 16 DOE ¶ 85,526 (1987), the DOE found that the filing of an unrelated M.D.L. 378 application by a separately incorporated affiliate did not adversely affect the firms' Surface Transporters refund applications. As Surface Transporters, Texaco Trading will be eligible to receive a refund based on its purchases of 14,707,066 gallons of petroleum products and Texaco Refining will be eligible to receive a refund based on its purchases of 103,717,789 gallons of petroleum products. A per gallon refund amount and the total amount of each firm's refund will be determined after the DOE completes its analysis of all Surface Transporter claims.

Dismissals

The following submissions were dismissed:

Company Name	Case No.
Coastal Transport, Inc.	RF270–2485
Foster's Gulf Service	RF300–425
Ken's Gulf Station	RF300–643
Smith's Gulf Service Station	RF300–467
Vick's Gulf Service Station	RF300–472

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

December 22, 1987.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3307–5]

Solid Waste Disposal; Characterization of Municipal Waste Combustor (MWC) Ashes and Leachates From Municipal Solid Waste (MSW) Landfills, Monofills, and Co–Disposal Sites

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: The U.S. Environmental Protection Agency (EPA) today is announcing the availability of a report entitled, "Characterization of Municipal Waste Combustor Ashes and Leachates from Municipal Solid Waste Landfills, Monofills, and Co-Disposal Sites". This report summarizes the results of six other reports that compile extensive reviews of available literature and data on municipal waste combustion (MWC) ash and leachates. In addition, the report provides chemical characterization data on MWC ash and simulated leachates as well as data on chemical parameters of actual leachate collected from municipal waste landfills, ash monofills, and co-disposal sites. The report includes the results of these analyses and a limited number of conclusions. The Agency intends to utilize this document in the development of an ash management strategy.

ADDRESSES: The report is available from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161; telephone (703) 487–4650. The report is available for reviewing at all EPA libraries and in the EPA RCRA docket room, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays; telephone (202) 475–9327. The public may copy a maximum of 50 pages of material from any one regulatory docket at no cost. Additional copies cost $0.20 per page.

FOR FURTHER INFORMATION CONTACT: For general information, call the RCRA Hotline at (202) 382–3000 or toll free at (800) 424–9346.

SUPPLEMENTARY INFORMATION:

The report titles, NTIS stock number, and prices are:

—"Characterization of MWC Ashes and Leachates from MSW Landfills, Monofills, and Co-Disposal Sites" (Complete seven-volume set)
NTIS Accession Number: PB88–127 951
Paper Copy = $123.00

—"Characterization of MWC Ashes and Leachates from MSW Landfills, Monofills, and Co-Disposal Sites—Summary" (Volume I of VII)
NTIS Accession Number: PB88–127 949
Paper Copy = $19.95, Microfiche = $6.95

—"Leachate Baseline Report—Determination of Municipal Landfill Leachate Characteristics" (Volume II of VII)
NTIS Accession Number: PB88–127 956 Paper Copy = $12.95, Microfiche = $6.95

—"Addendum to Characterization of Municipal Landfill Leachates—A Literature Review" (Volume III of VII)
NTIS Accession Number: PB88–127 964
Paper Copy = $12.95, Microfiche = $6.95

—Characterization of Municipal Waste Combustion Residues and Their Leachates—A Literature Review" (Volume IV of VII)
NTIS Accession Number: PB 88–127 972
Paper Copy = $19.95, Microfiche = $6.95

—"Characterization of Municipal Waste Combustor Residues" (Volume V of VII)
NTIS Accession Number: PB88–127 980
Paper Copy = $25.95, Microfiche = $6.95

—"Characterization of Leachates from Municipal Waste Disposal Sites and Co-Disposal Sites" (Volume VI of VII)
NTIS Accession Number: PB88–127 998
Paper Copy = $32.95, Microfische = $8.95

—"Addendum to Monofill Report" (Volume VII of VII)
NTIS Accession Number: PB88–128 004
Paper Copy = $12.95, Microfiche = $6.95

I. Background

State and local governments charged with municipal solid waste disposal are experiencing a growing shortage of landfill space in many regions of the country. As landfill capacity decreases, jurisdictions increasingly are turning to option such a municipal waste combustion as a means for reducing waste volume. Currently, there are approximately one hundred such combustion facilities operating in the U.S., many with resource recovery capabilities (typically steam or electricity generation).

Increased use of resource recovery (or incineration) has raised public concerns over health and environmental hazards of incineration and the disposal of the resulting ash. Inhalation of the ash derived from incinerator emissions and fugitive dust from handling/disposal operations as well as potential groundwater contamination from leaching of landfilled ash are potential concerns expressed by the public.

EPA is evaluating a broad range of technical and regulatory issues associated with the disposal of municipal waste combustion ash. The objective of these activities is to provide a framework with which strategic decisions regarding Agency policy toward MWC ash can be made.

II. Notice of Availability

As part of EPA's evaluation of current disposal practices for MWC ash, EPA last year began field investigation of four municipal waste combustors, four ash-only landfills, four recent municipal solid waste landfills, and two landfills accepting both municipal waste combustion ash and municipal solid waste. The results of these analyses are summarized in Volume I of the report being made available today: "Characterization of MWC Ashes and Leachates from MSW Landfills, Monofills, and Co-Disposal Sites." Relevant data are summarized in the eight sections of this report. Section one provides the background while section two summarizes available information regarding the chemical characteristics of bottom, fly, and combined (fly and bottom) ash. This characterization includes data on inorganic constituents (including heavy metals), PCBs, dioxin/dibenzofurans, and other organics. Sections three and four detail the major conventional parameters (e.g., TDS, TSS, pH, sulfate, chloride, nitrate, nitrite, phosphate) and inorganic content of leachate found in municipal landfills, co-disposal landfills, and ash monofills. Section five summarizes findings regarding the presence of organic constituents in land disposal facility leachates and laboratory-extracted leachates. In section six, levels of polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans in extracts and in monofill leachates are detailed. Section seven summarizes the report and discusses it's main conclusions. Section eight cites the references utilized for the summary volume.

There are six support volumes to the report:

Volume II. "Leachate Baseline Report—Determination of Municipal Landfill Leachate Characteristics", October 1987; contains the results of a literature survey on the environmental effects of municipal waste disposal sites.

Volume III. "Addendum to Characterization of Municipal Landfill Leachates—A Literature Review," October 1987; contains additional literature review data on the environmental effects of municipal waste disposal sites.

Volume IV. "Characterization of Municipal Waste Combustion Residues and Their Leachates—A Literature Review", October 1987; contains results of a literature review of the environmental effects of municipal waste combustion residues and their leachates.

Volume V. "Characterization of Municipal Waste Combustor Residues", October 1987; details the results of a field and analytical program to investigate municipal waste combustor

VOL 52 ISS 249 DEC 29 1987 UMI

residues at four MWC, and four ash monofills; including ash, field leachate, simulated leachates, quench waters, and ground water.

Volume VI. "Characterization of Leachates from Municipal Waste Disposal Sites and Co-disposal Sites," October 1987; contains the results of a field and analytical program to characterize leachates from four municipal waste disposal sites and two co-disposal sites.

Volume VII. "Addendum to Monofill Report", October 1987; details additional field investigation activities conducted at the four ash monofills in which analyses for selected conventional parameters from leachate samples were completed.

Date: December 21, 1987.

J.W. McGraw,

Acting Assistant Administrator for Solid Waste And Emergency Responses.

Science Advisory Board, Executive Committee, Open Meeting—January 14 and 15, 1988

Under Pub. L. 92-463, notice is hereby given that the Executive Committee of the Science Advisory Board (SAB) will meet from 9:15 a.m. to 4:00 p.m. on January 14 and from 9:15 to 12:00 noon on January 15 at the U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC in the Administrator's Conference Room 1101.

The main issues to be discussed at the meeting are: EPA requests for SAB reviews of re-assessments for inorganic arsenic and dioxin; reports of the Hazard Ranking System Subcommittee; and briefing on the Administrator's Task Force on Technology Transfer and Training.

The meeting is open to the public. Any member of the public wishing to attend or submit written comments should notify Dr. Terry F. Yosie, Director, Science Advisory Board, at 202-382-4126 or Joanna Foellmer by January 8, 1988.

Dated: December 21, 1987.

Terry F. Yosie,

Director, Science Advisory Board.

BILLING CODE 6560-50-M

[FRL-3397-4]

Determination To Prohibit, Deny, or Restrict the Specification of an Area for Use as a Disposal Site; Santa Ysabel Creek, San Diego County, CA

December 17, 1987.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed section 404(c) determination and notice of public hearing.

SUMMARY: Section 404(c) of the Clean Water Act (CWA) (33 U.S.C. 1251 *et seq.*) authorizes the administrator of the EPA to prohibit, deny or restrict the specification or use of any defined area as a disposal site, whenever he determines, after notice and opportunity for public hearing, that the discharge of dredged or fill materials into such an area will have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife, or recreation areas. EPA's procedures for implementing section 404(c) are set forth in 40 CFR Part 231. This notice of proposed 404(c) determination and public hearing is being published by the Regional Administrator of the EPA's Region IX office in San Francisco, California. This notice includes the Regional Administrator's proposed determination covering the discharge of dredged or fill material into waters of the United States, including wetlands, by the San Diego County Water Authority (SDCWA), on lands owned by the City of San Diego, in Santa Ysabel Creek, San Diego County, California. The Regional Administrator is considering whether to recommend that the proposed discharge be prohibited, denied or restricted.

The SDCWA proposes to construct and operate an emergency and dry year supply storage reservoir in Pamo Valley, near Ramona, San Diego County, California. The maximum capacity of the reservoir would be 130,000 acre-feet (AF), making it the largest reservoir in San Diego County. Imported (pumped storage) and local winter runoff would be stored in the reservoir behind a 284-foot concrete dam, that will be constructed across Santa Ysabel Creek at the south end of Pamo Valley (Township 12 South, Range 1 East, Section 27). At maximum storage capacity, the proposed dam would create a reservoir in Pamo Valley that would inundate 1800 acres, including approximately 330 acres of wetlands. In November 1987, the U.S. Army Corps of Engineers, Los Angeles District, gave notice of its intentions to issue a section 404 permit to the SDCWA for construction of the proposed dam across Santa Ysabel Creek.

EPA has reason to believe that the proposed discharge of dredged and/or fill material into Santa Ysabel Creek will result in unacceptable adverse effects on wildlife. In accordance with 40 CFR 231.6, the Regional Administrator finds that it would be in the public interest to hold a hearing on this proposed determination.

Additional Studies: The City of San Diego, the landowner of the proposed reservoir and mitigation sites, is conducting an independent analysis of the proposed project, including studies of alternatives, cost, and mitigation. EPA will evaluate the results of the City of San Diego's analysis of the Pamo Dam Project as part of EPA's 404(c) evaluation. This study is tentatively scheduled to be completed by the end of April 1988.

Purpose of Public Notice: This serves as a notice of proposed section 404(c) determination and initiation of public comment period covering the proposed discharge, as described above. EPA would like to receive data or observations concerning (1) whether or not the proposed discharge in Santa Ysabel Creek would cause an unacceptable adverse effect to wildlife, as described in section 404(c) of the CWA, (2) the vegetative and hydrologic characteristics of the project area and observations of, or information concerning, wildlife utilizing the project area; (3) the availability of less environmentally damaging practicable alternatives to the proposed discharge taking into account cost, logistics, and the overall (basic) project purpose; (4) the adequacy of the proposed mitigation in off-setting project related impacts to wildlife and their habitats; (5) endangered species affected by the proposed project; (6) cumulative impacts of the project; (6) what corrective action, if any, could be taken to reduce the adverse impacts of the discharge and; (7) whether the Regional Administrator should recommend to the Assistant Administrator for Water that he prohibit, deny or restrict the discharge of dredged or fill material, on the site.

Public Hearing: The EPA will conduct a public hearing to obtain comments on EPA's proposal to prohibit, deny or restrict the discharge of dredged and fill material from construction of Pamo Dan. In order to fully consider the findings of the City of San Diego's independent analysis of this project as discussed above under *Additional Studies*, the public hearing will be held within 30 days of EPA's receipt of this analysis. A separate public notice will be published in the **Federal Register** and local newspapers to announce the date and location of this hearing and hearing procedures.

Written comments may be submitted prior to (beginning with the date of publication of the notice in the **Federal Register**) or following the hearing, or presented at the hearing. The hearing record will remain open 30 days after the hearing. The Regional Administrator hereby determines that good cause exists to establish a comment deadline of June 30, 1988 to permit EPA and the public to consider the City of San Diego's analysis of the proposed project. However, the comment deadline may be extended if the Regional Administrator determines there is good cause for an extension. Comments submitted prior to or after the hearing or requests for copies of the proposed determination should be submitted to the EPA Region IX's designated Record Clerk, Mr. Robert Leidy, Wetlands, Oceans and Estuaries Branch (W-7), EPA, 215 Fremont Street, San Francisco, California 94105. Comments should directly address the issues enumerated above under Purpose of Public Notice. All comments will be fully considered in reaching a decision to either withdraw the proposed determination or prepare a recommended determination to either prohibit, deny or restrict the specification or use of all or portions of Pamo Valley as a disposal site for construction of Pamo Dam. The Regional Administrator will either withdraw the proposed determination or forward a final Regional recommendation and the administrative record to the EPA Assistant Administrator for Water in Washington, DC, for review and the final determination. The procedures to be used in making the final determination are specified at 40 CFR 231.6.

Copies of all comments submitted in response to this notice will be available for public inspection during normal working hours (8:00 a.m. to 5:00 p.m.) at the EPA Region IX office.

Supplementary Information and Background

A. *Description of the Section 404(c) Process:* The CWA prohibits the discharge of pollutants, including dredged and fill material, into the waters of the United States (including wetlands) except in compliance with, among other things, section 404, 33 U.S.C. 1344. Section 404 authorizes the Secretary of Army, acting through the Chief of Engineers, to authorize the discharge of dredged or fill material at specified sites through the application of environmental guidelines developed by EPA in conjunction with the Secretary or where warranted by the economics of anchorage and navigation, except as provided in section 404(c). Section 404(c) authorizes the Administrator of EPA, after notice and opportunity for hearing, to prohibit or restrict the use of a defined site for disposal of dredged or fill material where he determines that such use would have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife, or recreational areas.

Regulations published in 40 CFR Part 231 establish the procedures to be followed by EPA in exercising its section 404(c) authority. Whenever the Regional Administrator has reason to believe that use of a site may have an unacceptable adverse effect on the pertinent resources, she may begin the process by notifying the Corps of Engineers and the applicant that she intends to issue a proposed determination under section 404(c). Unless the applicant or the Corps persuades the Regional Administrator within 15 days that no unacceptable adverse effects will occur, the Regional Administrator publishes a notice in the **Federal Register** of her proposed determination, soliciting public comment and offering an opportunity for a public hearing. Today's notice represents this step in the process.

Following the public hearing and the close of the comment period, the Regional Administrator decides whether to withdraw her proposed determination or prepare a recommended determination. A decision to withdraw may be reviewed at the discretion of the Assistant Administrator for Water at EPA Headquarters. If the Regional Administrator prepares a recommended determination, she then forwards it and the complete administrative record compiled in the Region to the Assistant Administrator for Water at EPA's headquarters for a final decision affirming, modifying, or rescinding the recommended determination. The Corps of Engineers and the applicant are provided with another opportunity for consultation before this final decision is made.

B. *Nature of Proposed Discharge:* The SDCWA proposes to discharge dredged or fill material into Santa Ysable Creek for the construction of a 284-foot roller-compacted concrete dam. This discharge of dredged or fill material will result in the inundation of 1800 acres of Pamo Valley when the newly created reservoir is at capacity. EPA is particularly concerned with the direct loss of approximately 330 acres of wetlands from reservoir inundation and potential secondary impacts to an additional 124 acres of wetlands due to reservoir operation.

C. *Characteristics of the Site:* Pamo Valley encompasses approximately 4300 acres, 1800 acres of which would be inundated by the proposed reservoir. There are eight native and naturalized vegetation types in Pamo Valley. The valley supports a minimum of 302 plant species. Wetlands in Pamo Valley total approximately 330 acres. Riparian woodland comprises 174 acres and is most extensive along Santa Ysabel Creek at the southern end of Pamo Valley, and along the creek above the valley and below the proposed dam. In general, the overstory is dominated by western sycamore (*Platanus racemosa*) and arroyo willow (*Salix lasiolepis*), while the second-story canopy includes cottonwood (*Populus fremontii*), black willow (*S. goodingii*) and white alder (*Alnus rhombifolia*). The shrub layer includes canopy tree saplings, mulefat (*Baccharis glutinosa*) and blackberry (*Rubus urinus*). The narrow, ungrazed canyons of Santa Ysabel Creek surrounding Pamo Valley are dominated by mature trees with a dense multi-aged understory. Many small shrubs and herbaceous species are found in the understory, most notaly mugwort (*Artemesia douglasiana*), and spike rush (*Eleocharis* spp.). Riparian woodland distrubed by cattle grazing in upper Pamo Valley along Temescal and Bear Creeks is characterized by widely-spaced cottonwood trees with an open understory dominated primarily by introduced grasses. The incised stream channel of upper Temescal Creek is dominated by dense willow and mulefat thickets under widely scattered cottonwoods.

Emergent wetlands border the main stream channel in upper Pamo Valley and have been disturbed by cattle grazing. This grazing has limited the establishment of riparian shurbs and trees. These areas are seasonally flooded and are dominated by salt grass (*Distichlis spicata*), Bermuda grass (*Cynodon dactylon*), California wild rose (*Rosa californica*), tree tobacco (*Nicotiana glauca*), mulefat, spike rush, brass buttons (*Cotula coronopifolia*) and rush (*Juncus* spp.). Riparian vegetation along Santa Ysabel Creek from Sutherland Reservoir to Pamo Valley forms a narrow, continuous band dominated by sycamores, willows and cottonwoods. Southern oak woodland occurs as a narrow band bordering the riparian woodland with the adjacent

hillsides dominated by chaparral scrub habitat. Pamo Valley provides unusually high quality wildlife habitat. The documentation to date, which is based upon limited filed observations, indicates that Pamo Valley is utilized by approximately 100 species of resident and migratory birds, including the federally-endangered least Bell's vireo (*Vireo bellii pusillus*), 16 species of raptors, 15 species of mammals, four species of amphibians and 13 species of reptiles. The U.S. Fish and Wildlife Service (USFWS) believes that the species diversity is likely higher. The available information further indicates that one bird species and two species of reptiles are candidates for listing on the Federal endangered species list and that 23 bird species and two species of mammals are considered to be species of special concern by federal and state wildlife agencies and public wildlife groups, due to their restricted distribution, recent population declines, and/or unusual scientific or educational value.

D. *Proceedings to Date:* On October 4, 1985, the Corps of Engineers, Los Angeles District, gave public notice (no. 85–021–AA) that the SDCWA had applied for a Section 404 permit to discharge dredge or fill material into Santa Ysabel Creek for the constructon of Pamo Dam and associated facilities. EPA reviewed the proposed project for compliance with EPA's 404(b)(1) Guidelines and concluded from this review that the project failed to comply with these Guidelines in several substantive areas. Furthermore, because of the potentially significant impacts of the project on the environment and because a permit issued for the project would represent a major federal action, EPA concluded that an Environmental Impact Statement (EIS) was required under the National Environmental Policy Act (NEPA; 40 CFR Parts 1500–1508).

In March 1986, the Corps of Engineers determined that an EIS would be required for the proposed project. The draft EIS (DEIS) was completed in October 1986. In a letter dated December 18, 1986, EPA rated the DEIS as Category EO–2, Environmental Objections—Insufficient Information and recommended that a revised DEIS be prepared. The EPA also found that the project failed to comply with the 404(b)(1) Guidelines at 40 CFR 230.10(a), (c) and (d). In January 1987, representatives of the SDCWA and the City of San Diego (the owner of Pamo Valley and the proposed mitigation lands in San Pasqual Valley) met with EPA to discuss the adequacy of the DEIS in addressing unresolved NEPA and section 404 issues. At this meeting, EPA identified several specific less-damaging alternatives that appeared to be practicable and expressed concern about the adequacy of the proposed mitigation plan. In February 1987, the final EIS (FEIS) was completed. The FEIS was not responsive to many of the unresolved issues identified at the January 1987 meeting. As a result, the EPA and the USFWS continued to have concerns regarding the adequacy of the practicable alternatives analysis and biological mitigation plan. EPA continued to recommend that a section 404 permit not be issued for the proposed project. In February and, again, in March 1987, EPA met individually with the SDCWA and with other state and federal agencies to discuss EPA's unresolved section 404 concerns.

In a draft Record of Decision (ROD) dated April 20, 1987, the Los Angeles Corps' District Engineer informally notified EPA of the Corps' intention to issue a 404 permit over EPA's objection for the Pamo Dam and Reservoir Project, as proposed. Subsequently, EPA met with the Los Angeles District Engineer to discuss EPA's unresolved concerns regarding the project's noncompliance with the 404(b)(1) Guidelines. At this meeting the District Engineer notified EPA of his plans to proceed with a notice of intent to issue a permit for Pamo Dam pursuant to EPA's Memorandum of Agreement (MOA) with the Department of the Army under section 404(q) of the CWA [see 404(q) MOA, November 1985]. Section 404(q) directs the Corps of Engineers and EPA to enter into an agreement to coordinate and expediate permit decision making. On May 11, 1987, EPA submitted a document titled "Pamo Dam and Reservoir Project: A section 404 Analysis", to the District Engineer to finalize and communicate EPA's additional views on the proposed section 404 permit for Pamo Dam.

On May 8, 1987, the USFWS, as a result of endangered species concerns, formally requested that the District Engineer reinitiate section 7 consultation, under the Endangered Species Act of 1973, as amended, for the endangered least Bell's vireo. On June 8, 1987, the EPA Regional Administrator, Region IX, met with the Corps' South Pacific Division Engineer in an attempt to address EPA's unresolved concerns with the project. As a result of that meeting, EPA provided the Corps with additional information on EPA's position regarding issuance of a permit for Pamo Dam. On July 10, 1987, EPA received formal notification from the Los Angeles District Engineer, in the form of a final ROD, of his intention to issue a section 404 permit for Pamo Dam over EPA's objection. In August 1987, EPA requested that the Assistant Secretary of the Army for Civil Works (ASACW) review the proposed permit decision under EPA's MOA with the Department of the Army. Subsequently, the ASACW remanded the Pamo permit decision to the Los Angeles District, directing them to re-evaluate project costs, including mitigation.

In November 1987, the ASACW informed EPA of the Corps' intention to issue the permit for Pamo Dam and provided EPA with a revised ROD. Under EPA's MOA with the Army, on November 25, 1987 EPA notified the Corps of its intent to initiate proceedings under section 404(c) of the CWA.

E. *Proposed Determination:* The Regional Administrator is considering a recommendation to prohibit the discharge of dredged or fill material into Santa Ysabel Creek for the construction of the proposed Pamo Dam.

F. *Basis for Proposed Determination:*

1. *Section 404(c) Criteria.* The CWA requires that exercise of the final section 404(c) authority be based on a determination of "unacceptable adverse effect" on municipal water supplies, shellfish beds, fisheries, wildlife or recreational areas. The regulations define "unacceptable adverse effect" in 40 CFR 231.2(e) as:

> Impact on an aquatic or wetland ecosystem which is likely to result in significant degradation of municipal water supplies or significant loss or damage to fisheries, shellfishing, or wildlife habitat or recreation areas. In evaluating the unacceptability of such impacts, consideration should be given to the relevant portions of the Section 404(b)(1) Guidelines (40 CFR Part 230).

The preamble to 40 CFR Part 231 explains that one of the basic functions of section 404(c) is to oversee the application of the section 404(b)(1) Guidelines. Those portions of the Guidelines relating to the availability of less environmentally-damaging practicable alternatives (40 CFR 230.10(a)), impacts to endangered species (40 CFR 230.10(b)), significant degradation of waters of the United States (40 CFR 230.10(c)), minimizing adverse impacts to aquatic resources (40 CFR 230.10(d)), and to the determination of cumulative effects on the aquatic ecosystem (40 CFR 230.11(g)), are of particular importance in the evaluation of the unacceptability of environmental impacts in this case. The 404(b)(1) Guidelines require that no discharge of dredged or fill material shall be permitted if (1) there is practicable alternative to the proposed discharge which would have less adverse impact on the aquatic ecosystem, (2) it would jeopardize the continued existence of species listed as endangered under the the Endangered Species Act of 1973, as amended, (3) it would cause or contribute to significant degradation of the waters of the United States, or (4) the proposed discharge does not include all appropriate and practicable measures to minimize potential harm to the aquatic ecosystem. In addition, the Guidelines state that the permitting authority should collect and solicit information concerning cumulative impacts and document and consider this information during the decision-making process. Thus, it is appropriate under section 404(c) to take into account whether the project will result in significant degradation to aquatic resources, particularly wildlife habitat, or whether the proposed mitigation is adequate to offset project-related impacts to the aquatic environment.

The Administrator's section 404(c) authority may be used to prohibit, deny or restrict a permit which the Corps has determined it would issue (as is the case with the Pamo Dam project). Under the section 404(c) authority, the Administrator may totally prohibit all discharges of dredged or fill material to a defined area or may impose some partial prohibition, such as restriction from a particular activity.

2. *Adverse Impacts of Permit Issuance.* Construction of Pamo Dam would alter drastically the hydrology and ecology of the project area. At a maximum storage capacity of 130,000 acre-feet (AF), Pamo Reservoir would inundate portions of nine vegetation types, totalling 1800 acres. Much of the existing plant communities would be destroyed. Of particular significance is the direct loss of approximately 330 acres of emergent and riparian wetlands. Furthermore, impoundment of the natural runoff from Pamo Valley would reduce runoff in the upper San Pasqual groundwater basin by about 78 percent in an average rainfall year. These flow reductions would reduce the viability of 78 acres of riparian woodland. In addition, operation of Pamo Reservoir would decrease the spill frequency of Sutherland Reservoir resulting in decreases in streamflows available to 46 acres of riparian wetlands in Santa Ysabel Creek above Pamo Reservoir. Without compensating downstream releases, flow reductions of this magnitude may have significant adverse impacts on riparian wetlands in the project area.

As discussed previously under section C, the diverse, high quality habitats found in Pamo Valley are important for many birds, mammals, reptiles and amphibians. Pamo Reservoir would cause the permanent loss of these habitats and the destruction and displacement of many species of resident and migratory wildlife dependent on them. Less mobile species such as small mammals, reptiles and amphibians would be destroyed. Most species displaced to adjacent or new habitats at carrying capacity (equilibrium) would not survive. Those that did survive would do so by displacing resident species, that in turn would not survive. It will be difficult for displaced species that require more than one habitat type or utilize ecotones to find suitable habitat. Habitats similar in quality to that found in Pamo Valley area already scarce and declining in the San Diego Region.

The least Bell's vireo (LBV), a federally-listed endangered species, has recently been found in Pamo Valley within the inundation zone of the proposed reservoir and in San Pasqual Valley below the dam site. Because of this new information on the occurrence of the LBV in the reservoir inundation zone and because of modifications to proposed permit conditions to minimize project impacts to the LBV by the Corps of Engineers, the USFWS requested that the Los Angeles District Engineer reinitiate consultation under Section 7 of the Endangered Species Act. The USFWS maintains that issuance of a permit for Pamo Dam prior to completion of a reinitiated consultation would place the Corps of Engineers in violation of Section 7(a)(2) of the Endangered Species Act for permitting a project that is likely to jeopardize the continued existence of a federally-listed species and for failing to reinitiate consultation, as required by the Act and its implementing regulations (50 CFR, Part 402).

Construction of Pamo Dam would reduce the watershed contributing to San Pasqual valley by 30 percent. Without mitigation, this would result in an average annual decrease (annual supply shortfall) in groundwater supply of 703 AF. Additional decreases in groundwater supply will degrade existing poor water quality in San Pasqual Valley.

The proposed project would result in the incremental loss of several natural habitat types in the Southern California region. Loss of oak and riparian woodland habitats would be significant considering (1) the historical scarcity of these habitats in San Diego County, (2) the continued loss of those habitats from urbanization, and (3) the historical failure of mitigation to offset lost values associated with these habitats. Riparian wetlands in San Diego County account for less than 0.5 percent of the county's total acreage. Recent information developed by the California Department of Fish and Game indicates that San Diego County has lost approximately one-third of its riparian areas since the early 1970's. The direct loss of 300 acres of wetlands, including 172 acres of riparian woodland would further contribute to this trend in the loss of wetlands. Project-related impacts to wetlands would have a significant adverse cumulative impact on the health of the aquatic environment of the San Dieguito River system.

G. *Unresolved EPA Concerns:* To date, EPA has reviewed numerous documents regarding the Pamo Dam project provided by an independent consultant to EPA, the Corps of Engineers, the SDCWA, USFWS, other federal, state, and local agencies, and by private groups and individual citizens. A thorough review of this information has not alleviated the following EPA concerns.

1. *Practicable Alternatives to the Proposed Project.* EPA has identified two practicable alternatives which would potentially achieve the basic project purpose through utilization of, and/or modification to, existing water storage and distribution facilities. The first is the no project alternative (that is, utilizing existing water supplies and storage facilities) The second alternative involves heightening the existing San Vicente Dam to increase reservoir storage capacity combined with the construction of additional water distribution facilities.

2. *Proposed Mitigation Plan.* Concerns remain about the technical aspects of the proposed mitigation plan in San Pasqual Valley. First, EPA has previously stated that the mitigation plan relies heavily on a complex plan of importing and exporting water from several sources to create wetlands hydrology. Second, the plan is proposed for higher terrace floodplain and high salinity soils that may not be suitable for the establishment of willow riparian wetlands. A third and over-riding concern is that the mitigation proposal fails to provide for the habitat requirements of the wildlife species that utilize Pamo Valley. Fourth, because the mitigation plan is of complex design, there is concern that implementation, even if it could be made successful, will take many years and, therefore, the proposed wetlands will be unavailable

to serve the wildlife populations currently inhabiting Pamo Valley. Fifth, EPA continus to have concerns regarding on-going unauthorized sand-mining activities conducted by lessees of land owned by the City of San Diego in San Pasqual Valley and the potential impacts of these activities on the proposed mitigation plan. Finally, the mitigation plan as proposed would require continuous and costly operation and maintenance, monitoring, and on-site management in perpetuity. The Corps of Engineers has estimated that the San Pasqual mitigation proposal would cost $19 million to implement (excluding monitoring and remedial action) yet the SDCWA has alloted only approximately $4 million to finance it.

3. *Endangered Species.* As discussed in Section D the USFWS has requested that the Corps of Engineers reinitiate consultation under section 7 of the Endangered Species At for the least Bell's vireo.

4. *Significant Degradation.* The project would cause or contribute to significant degradation of waters of the United States. The project would result in the direct loss of 330 acres of wetlands, with potential secondary impacts to an additional 124 acres of riparian wetlands. EPA believes this loss of wetlands represents a significant cumulative impact on the regional environment of Southern California.

BILLING CODE 6560-50-M

FEDERAL MARITIME COMMISSION

Truck Detention Charges at West Coast Ports; Enlargement of Time To Reply to Petition for Rulemaking

December 23, 1987.

The Commission on November 30, 1987, 52 FR 45499, published a notice of filing of petition by the Waterfront Rail Truckers Union seeking the promulgation of a truck detention rule applicable at West Coast ports. The notice requested the submission by interested persons on or before January 8, 1988, of views, arguments, or data in response to the petition.

Upon request of interested persons, and good cause appearing, the time for submission of responses to the above-referenced petition is enlarged to and including February 22, 1988.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

December 22, 1987.

Background

On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board of Governors of the Federal Reserve System (Board) its approval authority under the Paperwork Reduction Act of 1980, as per 5 CFR 1320.9, "to approve of and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board under conditions set forth in 5 CFR 1320.9." Board-approved collections of information will be incorporated into the official OMB inventory of currently approved collections of information. A copy of the SF 83 and supporting statement and the approved collection of information instrument will be placed into OMB's public docket files. The following one-time survey of major banking organizations on their stock market lending and related activities, has received Board approval.

Under the terms of OMB's delegation of authority to the Board to review and approve collections of information, the Board is to provide the public, to the extent possible, with a reasonable opportunity to comment on a proposed collection prior to final approval. The Board may, however, institute a collection quickly without providing an opportunity for public comment if the ordinary procedures would defeat the purpose of the collection or substantially interfere with the Board's ability to perform its obligations.

The present survey is being collected in direct response to a Congressional inquiry that must be responded to by January 11, 1988, and there is not enough time between the date of the request for information (December 2, 1987) and the date it is due to collect the data, analyze it, and prepare the appropriate response to allow for the procedure for public comment. Thus, the usual procedure of providing an opportunity for public comment prior to implementation of an information collection is not being followed.

In addition to the direct questions the Board must ask to respond to the Congressional inquiry, the Board will ask some additional questions to improve its understanding of the relationship between banking organizations and the stock market and the attendant risks. The Board requires this information in order to provide a more informed response to the Congressional inquiry and to carry out its statutory responsibilities more effectively. Thus, the same considerations that require prompt action with respect to the first part of the survey apply with equal force to the supplemental questions.

FOR FURTHER INFORMATION CONTACT: A copy of the proposed survey, the request for clearance (SF 83), supporting statement, instructions, and other documents that are being placed into OMB's public docket files may be requested from the agency clearance officer, whose name appears below.

Federal Reserve Board Clearance Office—Nancy Steele—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3822).

Approval Under OMB Delegated Authority of the Implementation of the Following Report

Report title: One-time Survey of Major Banking Organizations on Their Stock Market Lending and Related Activities.

Agency form number: FR 3041.

OMB Docket number:

Frequency: 1.

Reporters: Bank holding companies, foreign banks, and commercial banks.

Annual reporting hours: 75.

Small business are not affected.

General description of report: This information collection is voluntary [12 U.S.C. §§ 225a, 248(a)(2), 244(c), and 3105] and is given confidential treatment [5 U.S.C. § 552(b)(4) and (8)].

The survey would obtain information on stock market lending and other stock market-related activities of these organizations.

Board of Governors of the Federal Reserve System, December 22, 1987.

William W. Wiles,

Secretary of the Board.

[FR Doc. 87-29692 Filed 12-28-87; 8:45 am]

BILLING CODE 6210-01-M

[Docket No. R-0591]

Risks on Large-Dollar Transfer Systems; Automated Clearing House Transactions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Policy statement.

SUMMARY: The Board has adopted the following measures to reduce risk in the automated clearance house ("ACH") service:

(1) Uniform Reserve Bank procedures to monitor ACH credit payments originated by depository institutions in a weak financial position;

(2) Earlier deadlines for returns of ACH debit transactions of $2,500 or greater; and

(3) Uniform float accounting procedures for depository institutions originating ACH credit transactions that settle on nonstandard holidays.

EFFECTIVE DATE: July 18, 1988.

FOR FURTHER INFORMATION CONTACT: Julius F. Oreska, Manager (202/452-3878), Margaret R. Weimer, Senior Analyst (202/452-3341), Division of Federal Reserve Bank Operations; Elaine M. Boutilier, Senior Attorney (202/452-2418), Legal.

Division; for the hearing impaired *only*, Telecommunications Service for the Deaf (202/452-3544), Earnestine Hill or Dorothea Thompson.

SUPPLEMENTARY INFORMATION: On December 19, 1986, the Board of Governors requested public comment on several proposals to reduce risk in the ACH mechanism. Specifically, the Board proposed the following changes: (1) Change the posting times for ACH transactions in the *ex post* monitoring system; (2) amend the Reserve Bank operating circulars concerning the finality of ACH transactions; (3) reduce the return times for large-dollar ACH transactions; (4) charge the accounts of institutions originating ACH credit transactions, when such institutions observe midweek or nonstandard holiday closings on the settlement date; and (5) monitor ACH transactions originated by problem depository institutions.

In general, favorable comments were received on the proposal to reduce the return times for large-dollar ACH debit transactions, the proposal regarding treatment of ACH credit transactions orginated by institutions observing midweek or nonstandard holiday closings, and the proposal to monitor ACH transactions. The other two proposals, regarding posting for the *ex post* monitor and finality of ACH transactions, generated considerable comment and are still being reviewed. It is expected that recommendations will be considered by the Board on *ex post* monitoring procedures and finality by mid-1988.

Risks Relating to ACH Transactions

The ACH is a value-dated electonic payment mechanism, in which transactions may be originated one or two days before the settlement date. In 1986, over 700 million payments were originated with a value of about $2.2 trillion. There are two types of ACH payments—credit transactions and debit transactions.

In an ACH credit transaction, the originator of the payment orders funds to be credited to the receiver's account. Unlike Fedwire transfers, which are irrevocable to receivers, the Reserve Banks reserve the right to reverse credits given for ACH transactions until the close of business on settlement day. The risk to the Federal Reserve in processing ACH credit transactions arises from the potential failure of an originating institution before its obligation has been fully funded and the Reserve Bank's potential inability to reverse all payments that were originated by the closed institution. The risk faced by depository institutions receiving ACH credit transactions is due to the institutions' typical practice of making the funds available to their customers on the day of settlement. Thus, if payments must be reversed as a consequence of an originating institution's failure, the receiving institution may suffer a financial loss, or if the receiving institution has made the funds available to its customers, the customers may suffer the loss.

In ACH debit transactions, funds flow to the originator of the payment from the receiver. Like checks, ACH debit transactions are provisional payments and receiving institutions have the right to return them. The Federal Reserve's risk in handling ACH debit transactions arises from return item processing. The Reserve Banks must reverse debit entries when items are returned by receiving institutions. If the originating institution has failed and the Reserve Bank is unable to recover funds from the originating institution or its customer, the Reserve Bank would absorb the loss.

Institutions receiving ACH debit transactions are exposed to very little risk because they have the right to return the items if their customers do not have sufficient funds to cover the payments. The primary risk faced by the receiving institutions is the operational risk associated with missing the return deadline.

The originators of ACH debit payments usually release funds to their customers on the day of settlement. Returns, however, typically are not received by originating institutions until five or six days following the settlement day. This exposes the originating institutions to temporal risk directly related to the return item process.

1. Monitoring ACH Originations

The commentors on the ACH risk proposals agreed with the concept of real-time monitoring of ACH transactions and noted that they would prefer risk control measures that would minimize the disruption to the ACH payments mechanism and would be focused primarily on those problem participants that pose the greatest risk. Accordingly, the Board has adopted monitoring procedures developed specifically for problem ACH originators, that is, those institutions in greatest risk of failing.

Each Reserve Bank will be responsible for identifying the problem ACH originators in its district. Each problem depository institution that originates ACH credit transactions will be required to notify the payment system risk monitoring staff at its account-holding Reserve Bank of the value of the payments that it plans to originate before submitting them for processing. The institution must specify the value of the credit payments it plans to originate both in the aggregate and by settlement date.

The Reserve Bank will maintain a cumulative total of ACH transactions by processing date and by settlement date. After the ACH payments are processed and delivered to receiving institutions, the value of the credit payments reported by the problem institution will be compared to the actual transactions that were processed. Any discrepancies will be reviewed with the institution's management immediately. In Districts where private ACH processors perform the processing, the details of monitoring the problem institutions' credit originations still will be addressed by the Reserve Banks which may require the private processors to provide additional information to facilitate the monitoring.

The risk monitoring staff will assess the Federal Reserve's exposure resulting from the ACH credit payments originated by the problem instititution. When necessary, the Reserve Bank will require advanced funding or other assurance of payment to cover the value of the payments at the time of deposit as a surety against the inherent risk. If the institution fails to provide adequate funding or other assurance, then the Reserve Banks may refuse to process the ACH transactions.

Debit transactions originated by problem institutions pose little risk to the recipients. This is because debit payments are provisional payments and the receivers are protected by legal rights to return the debit transactions

VOL 52 ISS 249 DEC 29 1987 UMI

within specified time frames. Consequently, no special monitoring procedures are necessary for debit originations. Nevertheless, there may be special concerns that a problem originator will fail with little likelihood that the institution will be merged with or absorbed by a healthy institution. Accordingly, the Board has determined that the Reserve Bank may defer the availability of some or all of the credit from the debit payments the institution has originated. This would parallel § 210.10(b) of Regulation J, which permits Reserve Banks to defer credit for checks. It should be noted, however, that this provision would not fully address the risk to Reserve Banks in instances where the receiving institution returns a debit adjustment entry as late as 45 days after settlement to a failed originating institution. This issue will be considered by the Board together with the recommendations on finality and *ex post* monitoring.

For institutions that are not classified as problem institutions, the Federal Reserve is still exposed to the risk that an institution might unexpectedly be closed or suspended. Consequently, the Reserve Banks continue to reserve the right to reverse credit payments if the originating depository institution fails.

In order to increase their knowledge about ACH originators' activity and to identify unusual trends in ACH originations, the Reserve Banks will review all ACH originations over a two-week reserve accounting period at least once quarterly. This may be done via exception reports that can be generated when average and peak-day origination volumes and dollar value of individual originating institutions exceed a predetermined range, based upon actual origination patterns for each originator. It is expected that this range will be revised at least semiannually.

2. ACH Return Items

To reduce risk to originators of large-dollar debit transactions, the Board changed the deadline for depositing automated ACH debit return items of $2,500 or more at the Reserve Banks from the current deadline of midnight of the business day following settlement or receipt, whichever is later, to the deposit deadlines for the night processing cycle on the business day following settlement or receipt, whichever is later.[1] Presently, ACH returns take five or six days, on average, to reach the originating institutions. Upon implementation of the earliar deadlines, it is expected that the returns will reach the originating institutions by the morning of the second business day following settlement or receipt of the original transaction, whichever is later.

With regard to debit returns of $2,500 or more submitted to the Reserve Banks in paper form, where Reserve Banks must convert the items to electronic form, the Board proposed a return deadline of between 5:00 p.m. and 8:00 p.m. eastern time. This deadline provides the Reserve Bank time to convert the returns in time for processing at night, with delivery to the originating institutions the following morning.

Most of the commenters believed that setting earlier return item deadlines would reduce risk in the ACH mechanism. Therefore, the Board has adopted an 8:00 p.m. (eastern time) deadline for the paper returns and the regular night deposit deadlines for the automated returns.

For those institutions that cannot meet the paper return item deadline, the Board proposed that a telephone return item service be offered at a fee of $6.00 per return item. Most commenters supported the proposal to offer this service, but questioned the fee, believing it should be lower. The costs of implementing this service were reviewed and the Board has determined that the $6.00 fee is appropriate to cover the cost of staff time and equipment that would be needed to implement the service. Therefore, the telephone return service will be implemented for large-dollar return items and the fee will be set initially at $6.00 per return item.

Two other improvements in the return item area proposed by the Board were not well received: (1) To require notification by 3:00 p.m. eastern time, on the business day following settlement or receipt, of any return items of $100,000 or more, and (2) to offer an optional service to segregate return items from regular transactions being delivered to originating institutions that have electronic access to the Reserve Banks.

The commenters' concerns with the large-dollar notification requirement centered primarily on the use of a uniform time nationwide. West Coast institutions believed that the deadline was too early, while a later notification may be too late in the day to be useful to East Coast originating institutions. Also, commenters disagreed on the appropriate dollar cutoff for such a notification requirement. In view of these concerns, and the likelihood that the notification requirement would be of marginal benefit to the originators, the Board did not implement this proposal.

The proposal to provide an optional service to segregate return items from regular transactions and deliver the returns earlier received only 30 comments. In view of the limited response to this proposal, and the automation expense of providing such a service, the Board did not adopt this proposal.

3. Midweek and Nonstandard Holiday Closings

Under current procedures, originators of ACH credit transactions that are closed on the settlement day, because of a nonstandard holiday or midweek closing, are charged for the transactions on the next business day. The cost of the float from crediting the reserve or clearing accounts of the receiving institutions but not charging the closed originating institution is recovered from the originating institution through an as of adjustment or an explicit fee. Because Reserve Banks can reserve ACH credit payments only until the entries are posted on the settlement day, the current procedure of delaying charges to originators of ACH credit transactions increases the Reserve Banks' exposure to the risk of loss compared with settlements occurring on days that the originator is open.

The Board proposed that originating institutions that will be closed on the day credit transactions that they have originated are scheduled to settle be charged for the transactions on the settlement day as though they were open. This policy would apply to both voluntary and mandatory holiday because the institutions making these payments are aware of their obligations one or two days before the settlement date.

A majority of the commenters concurred with this proposal. Most of the commenters agreed with the Board's views that the proposal was equitable, because the originators are aware of their obligation to fund the credit payments in advance of the settlement date. Most of the commenters opposing the proposal wanted the option of being charged on the holiday or deferring the debit and paying for the consequent float through explicit fees. Deferring the debit, however, creates risk for the Federal Reserve because the Reserve Banks may not be able to reverse the credit transactions after they have been posted to the receivers' accounts on the settlement day. Therefore, the Board has adopted the proposal that originating institutions be charged on the settlement date as if they were open.

By order of the Board of Governors of the Federal Reserve System, December 22, 1987.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87-29691 Filed 12-28-87; 8:45 am]

BILLING CODE 6210-01-M

[1] Presently the night cycle deposit deadlines vary depending on whether the payments are interregional or local, unsorted or presorted by receiving Reserve office. They range between 8:00 p.m. for interregional unsorted deposits (with provision for a file remake) to the local deposit deadline of 1:30 a.m. (for files without remake capability). Most files are deposited by the interregional deadline for unsorted deposits (without remake)—11:00 p.m.

Application To Engage in Various Securities Activities; the Bank of Nova Scotia, Toronto, Ontario

The Bank of Nova Scotia, Toronto, Ontario ("Applicant"), has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) ("BHC Act") and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)), to acquire McLeod Young Weir Incorporated, New York, New York, and thereby engage in:

(1) Providing brokerage and investment advisory services to institutional customers on a combined basis;

(2) Providing advice in connection with mergers and acquisitions, divestitures, loan syndications, interest rate swaps, interest rate caps and similar transactions to unaffiliated financial and nonfinancial institutions; and

(3) Providing financial advice to the Canadian federal and provincial governments, such as with respect to the issuance of their securities in the U.S.

Applicant has also applied to engage in providing discount brokerage services to non-institutional customers; furnishing general economic information and advice, general economic statistical forecasting services and industry studies to institutional customers; providing portfolio investment advice and research to institutional customers; and underwriting and dealing in obligations of the United States, general obligations of states and their political subdivisions, and other obligations that state member banks are authorized to underwrite and deal in under 12 U.S.C. 24 and 335. The Board has previously found these latter activities to be generally permissible for bank holding companies. 12 CFR 225.25(b)(15), (4)(iv), (4)(iii) and (16) respectively.

The Board previously has determined that the combined offering of investment advice with securities brokerage services to institutional customers from the same bank holding company subsidiary is a permissible nonbanking activity and does not violate the Glass-Steagall Act. *National Westminster Bank PLC*, 72 Federal Reserve Bulletin 584 (1986) ("*NatWest*"); *Manufacturers Hanover Corporation*, 73 Federal Reserve Bulletin 930 (1987) ("*Manufacturers Hanover*"). That position has been upheld by the U.S. Court of Appeals for the District of Columbia Circuit in its affirmance of the Board's *NatWest* Order. *Securities Industry Ass'n* v. *Board of Governors*, 821 F.2d 810 (D.C. Cir. 1987), *petition for cert. filed*, 56 U.S.L.W. 3303 (U.S. Oct. 5, 1987) (No. 87-562). Applicant has proposed to conduct its brokerage activity in accordance with the limitations approved by the Board in *Manufacturers Hanover* with one exception. In *Manufacturers Hanover*, the Board permitted management interlocks between the securities subsidiary and the holding company but not with the bank affiliates. Applicant has proposed to have management interlocks between Company and its bank affiliate, the Bank of Nova Scotia ("Bank"). Applicant contends that this modification will not result in adverse effects because Bank does not accept insured deposits within the U.S.

Applicant has also proposed to engage in providing advice in connection with financing transactions for non-affiliated financial and nonfinancial institutions, as previously approved by the Board in *Sovran Financial Corporation*, 73 Federal Reserve Bulletin 744 (1987).

The Board has not previously approved Applicant's third activity, providing financial advice to the Canadian federal and provincial governments, such as with respect to the issuance of their securities in the U.S.

Section 4(c)(8) of the BHC Act provides that a bank holding company may engage in any activity which the Board has determined to be "so closely related to banking or managing or controlling banks as to be a proper incident thereto." A particular activity may be found to meet the "closely related to banking" test if it is demonstrated that banks have generally provided the proposed activity; that banks generally provide services that are operationally or functionally so similar to the proposed activity so as to equip them particularly well to provide the proposed activity; or that banks generally provide services that are so integrally related to the proposed activity as to require their provision in a specialized form. *National Courier Ass'n* v. *Board of Governors*, 516 F.2d 1229, 1237 (D.C. Cir. 1975). In addition, the Board may consider any other basis that may demonstrate that the activity has a reasonable or close relationship to banking or managing or controlling banks. Board Statement Regarding Regulation Y, 49 *Federal Register* 806 (1984).

Applicant believes that providing financial advice to the Canadian federal and provincial governments, such as with respect to the issuance of their securities in the U.S., is closely related to banking because of the similarity of this activity to providing financial advice to state and local governments, which the Board has found to be generally permissible for bank holding companies. 12 CFR 225.25(b)(4)(v). In addition, Applicant notes that § 211.5(d)(8) of the Board's Regulation K authorizes the provision of financial advisory services to foreign government entities. 12 CFR 211.5(d)(8).

In determining whether Applicant's proposed activity meets the second, or proper incident to banking test of section 4(c)(8), the Board must consider whether the performance of the activity by an affiliate of a holding company "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Applicant believes that providing financial advice to the Canadian federal and provincial governments will enhance competition and will not result in adverse effects in light of its similarity to the activity of providing financial advice to state and local governments, previously incorporated into Regulation Y as a permissible nonbanking activity. 12 CFR 225.25(b)(4)(v).

Any views or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than January 22, 1988. Any request for a hearing must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, December 22, 1987.

James McAfee,

Associate Secretary of the Board.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

Employee Thrift Advisory Council; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), a notice is hereby given of the following committee meeting:

Name: Employee Thrift Advisory Council.

Time and date: 10:00 a.m., January 12, 1988.

Place: Conference Room 5141-A, General Services Administration Building, 18th & F Streets, NW., Washington, D.C.

Status: Open.

Matters to be considered: Approval of the minutes of the October 13, 1987 meeting; Thrift Savings Plan participation and investment funds; employee survey; participant loan program; and status of proposed legislation.

Any interested person may attend, appear before, or file statements with the Council. For further information contact John J. O'Meara on (202) 653-2573.

Dated: December 23, 1987.

Francis X. Cavanaugh,

Executive Director.

[FR Doc. 87-29791 Filed 12-28-87; 8:45 am]

BILLING CODE 6710-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Request for Nominations for Voting Members on Public Advisory Committee

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is requesting nominations for voting members to serve on the Veterinary Medicine Advisory Committee in FDA's Center for Veterinary Medicine. Five vacancies will occur on the committee on October 31, 1988.

DATE: No cutoff date is established for receipt of nominations.

ADDRESS: All nominations for membership should be submitted to Max L. Crandall (address below).

FOR FURTHER INFORMATION CONTACT: Max L. Crandall, Center for Veterinary Medicine (HFV-4) Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3450.

SUPPLEMENTARY INFORMATION: FDA is requesting nominations of voting members on the Veterinary Medicine Advisory Committee.

The function of the committee is to: (1) Review and evaluate available information concerning the safety and effectiveness of marketed and investigational new animal drugs, feeds, and devices for use in the treatment and prevention of animal disease and increased animal production; and (2) make appropriate recommendations to the Commissioner of Food and Drugs.

Criteria for Members

Persons nominated for membership on the Veterinary Medicine Advisory Committee shall have adequately diversified experience appropriate to the work of the committee in such fields as companion animal medicine, food animal medicine, avian medicine, microbiology, biometrics, toxicology, pathology, pharmacology, animal science, and chemistry. The specialized training and experience necessary to qualify the nominee as an expert suitable for appointment is subject to review, but may include experience in medical practice, teaching, and/or research relevant to the field of activity of the committee. The term of office is 3 or 4 years.

Nomination Procedures

Any interested person may nominate one or more qualified persons for membership on the advisory committee. Nominations shall state that the nominee is willing to serve as a member of the advisory committee and appears to have no conflict of interest that would preclude committee membership. FDA asks potential candidates to provide detailed information concerning such matters as employment, financial holdings, consultancies, and research grants or contracts in order to permit evaluation of possible sources of conflict of interest.

FDA has a special interest in assuring that women, minority groups, and the physically handicapped are adequately represented on advisory committees and, therefore, extends particular encouragement to nominations for appropriately qualified female, minority, and handicapped candidates.

This notice is issued under Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)) and 21 CFR Part 14, relating to advisory committees.

Date: December 22, 1987

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 87F-0398]

University of California (Davis Campus); Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that the University of California (Davis Campus), Cooperative Extension Service has filed a petition proposing that the food additive regulations be amended to provide for using an elemental selenium bolus for beef cattle as a nutritional supplement.

FOR FURTHER INFORMATION CONTACT: Woodrow M. Knight, Center for Veterinary Medicine (HFV-226), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5382.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2209) has been filed by the Cooperative Extension Service, University of California (Davis Campus), Davis, CA 95616.

The petition proposes that 21 CFR 573.920 *Selenium* be amended to provide for the safe use of a bolus containing elemental selenium which is given to beef cattle over 3 months of age as a nutritional selenium supplement.

The potential environmental impact of this action is being reviewed. The environmental assessment prepared by the petitioner may be seen at Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. Comments from the public are invited. Those received within 60 days of this notice will be considered. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the rule in the Federal Register in accordance with 21 CFR 25.40(c).

Dated: December 18, 1987.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of Applications for Permits

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: W. J. Sork, PRT-723747, Metairie, LA.

The applicant requests a permit to import the personal sport-hunted trophy of a bontebok (Damaliscus dorcas dorcas); culled from the herd of Mr. F. W. M. Bowker, Grahamstown, Republic of South Africa, for the purpose of enhancement of propagation.

Applicant: Vance B. Grannis, Jr., PRT-723848, Inver Grove Heights, MN.

The applicant requests a permit to import one pair of Humes bar-tailed pheasants (Syrmaticus humiae), five pairs of white-eared pheasants (Crossoptilon crossoptilon), one male Edwards pheasant (Lophura edwardsi), six pairs of Mikado pheasants (Syrmaticus mikado); one pair of Palawan pheasants (Polypectron emphanum) and one pair of nene geese (Nesochen (-Branta) sandvicensis) for breeding purposes. All birds were captive-hatched in Canada at Sout View Aviaries in Burnaby, British Columbia.

Applicant: Rare Feline Breeding Center, PRT-723932, Center Hill, FL.

The applicant requests a permit to export two female leopards (Panthera pardis) bred in captivity to the Parco Faunistico "La Torbiera", Novara, Italy for the purpose of enhancement of propagation.

Applicant: Gary S. Smith, PRT-724040, Frianger, KY.

The applicant requests a permit to import one captive born male American peregrine falcon (Falco peregrinus anatum) from Mr. John Lefeune, Falcon Farms Ltd., Agassiz, British Columbia, Canada, for captive breeding purposes.

Applicant: Animal Park, Inc., PRT-723752, Gulf Breeze, FL.

The applicant requests a permit to purchase one male lowland gorilla (Gorilla gorilla) that has been held in captivity for 20 years from Benson's Animal Park, Hudson, New Hampshire, for the purpose of conservation education. Semen will be made available for artificial insemination.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 403, 1375 K. Street NW., Washington DC 20005, or by writing to the Director, U.S. Office of Management Authority, P.O. Box 27329, Central Station, Washington, DC 20038-7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Date: December 23, 1987.

Larry La Rochelle,

Acting Chief, Branch of Permits, U.S. Office of Management Authority.

[FR Doc. 87-29783 filed 12-28-87; 8:45 am]

BILLING CODE 4310-55-M

National Park Service

Intention To Negotiate Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965, (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given ninety (90) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Ken Direction Corporation, Inc. authorizing it to continue to provide overnight accommodations, food and beverage, and merchandising operations for the public at Hawaii Volcanoes National Park for a period of twenty (20) years from January 1, 1988 through December 31, 2008.

The contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act, and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfication of the Secretary under an existing contract which expires by limitation of time on June 1, 1988, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the ninetieth (90) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Regional Director, Western Regional Office, 450 Golden Gate Avenue, San Francisco, California 94102, for information as to the requirements of the proposed contract.

A pre-proposal conference will be held Thursday, January 21, 1988, from 9:00 a.m. to 11:00 a.m. at Hawaii Vocanoes National Park. Parties interested in attending the conference should check the bulletin board at the Hawaii Volcanoes National Park Visitor Center that morning where the nearby location of the meeting will be posted.

Date: December 15, 1987.

Stanley T. Albright,

Regional Director, Western Region.

BILLING CODE 4310-70-M

Land and Water Conservation Fund

AGENCY: National Park Service, Interior.

ACTION: Notice: Land and Water Conservation Fund.

SUMMARY: Notice is hereby given that the National Park Service is considering an amendment to its policy regarding the sheltering of recreational facilities on lands assisted under the Land and Water Conservation Fund (L&WCF) Act of 1965, as amended (Pub. L. 88-578). The new policy will be issued as an amendment to sections 640.3 and 675.9 of the L&WCF Grants-in-Aid Manual (NPS-34).

DATES: Comments submitted within 30 days of this announcement will be considered.

ADDRESSES: Copies of the proposed policy revision are available on request from the following location: National Park Service, Recreation Grants Division (775), P.O. Box 37127, Washington, DC 20013-7127.

FOR FURTHER INFORMATION CONTACT: Randolph J. Clement or Michael Rogers of NPS-Recreation Grants Division at the address given above; telephone 202/343-3700; (FTS) 343-3700.

SUPPLEMENTARY INFORMATION: Section 6, L&WCF Act of 1965 as amended: Pub. L. 88-578; 78 Stat. 897; 16 U.S.C. 4601-4, et seq.

Denis P. Galvin

Acting Director.

BILLING CODE 4310-70-M

Cape Cod National Seashore, South Wellfleet, MA; Cape Cod National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. app. 1 s 10), that a meeting of the Cape Cod National Seashore Advisory Commission will be held Friday, January 22, 1988.

The Commission was reestablished pursuant to Pub. L. 99–349, Amendment 24. The purpose of the Commission is to consult with the Secretary of the Interior, or his designee, with respect to matters relating to the development of the Cape Cod National Seashore, and with respect to carrying out the provisions of sections 4 and 5 of the Act establishing the Seashore.

The meeting will convene at Park Headquarters, Marconi Station, South Wellfleet, Massachusetts at 1:00 p.m. for the following reasons:

1. Adoption of Agenda.
2. Approval of Minutes of Previous Meeting.
3. Old Business.
a. Adoption of Rules of Governance.
b. Annual Report Guidelines.
c. Bicycle Trails.
d. North Truro AFS Housing.
4. Superintendent's Report.
5. New Business.
a. Work Program Development.
6. Date and Agenda for Next Meeting.
7. Communications/Public Comment.

The meeting is open to the public. It is expected that 50 persons will be able to attend the session in addition to the Commission members.

Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made to the official listed below at least seven days prior to the meeting. Further information concerning this meeting may be obtained from the Superintendent, Cape Code National Seashore, South Wellfleet, MA 02663.

Herbert S. Cables, Jr.,
Regional Director.
Date: December 21, 1987.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

Proposed Termination of Decree and Order; National Retail Credit Association et al.

Notice is hereby given that Associated Credit Bureaus, Inc. ("ACB"), as the sucessor to National Retail Credit Association and Retail Credit Men's National Association, original defendants in *United States* v. *National Retail Credit Association, Retail Credit Men's National Association*, et al., has filed with the United States District Court for the Eastern District of Missouri, Eastern Division, a motion for an order terminating the Decree of October 6, 1933, and the Order of October 19, 1953, entered in said action; and the Department of Justice ("Department"), in a stipulation also filed with the court, has consented to termination of the Decree and Order, but has reserved the right to withdraw its consent pending receipt of public comments.

The Petition is the case, filed June 12, 1933, alleged that the defendants had conspired to restrain and monopolize interstate trade and commerce in credit reports. The Decree enjoins ACB and its members from allocating exclusive territories. The Order, among other things, enjoined defendants from discriminating against non-ACB member credit bureaus on the basis of service or price in the sale of credit reports.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that termination of the Decree and Order would serve the public interest.

Copies of the Petition, the Decree, the Order, ACB's motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the Court in connection with this motion will be available for inspection in Room 3232, Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone 202-633-2481), and at the Office of the Clerk of the United States District Court for the Eastern District of Missouri, Eastern Division, United States Courthouse, 1114 Market Street, St. Louis, Missouri 63101. Copies of any of these materials may be obtained upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the decree to the Department. Such comments must be received within the sixty day period established by Court order, and will be filed with the Court. Comments should be addressed to Barry Grossman, Chief, Communications and Finance Section, Antitrust Division, Department of Justice, 555 Fourth Street, NW., Washington, DC 20001 (telephone 202-272-4247).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in. Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who want to comment on the recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New Collection

Bureau of Labor Statistics
Survey of Employer Anti-drug Programs
BLS
One-time survey
Business or other for profit; Non-profit institutions; Small business or organizations
6,000 responses; 1375 hours; 2 forms

The Survey of Employer Anti-drug Programs will collect information on the prevalence of drug testing and rehabilitation programs and the number of employees directly affected at establishments across the private sector of the U.S. economy. The results will provide estimates and measures of reliability of these characteristics for limited industry, geography and establishment size detail.

Bureau of Labor Statistics
Feasibility Study
OSHA Form 200; OSHA Form 101
Non-recurring
Selected Private employers
4,500 responses; 4075 hours; 2 forms

The Feasibility Study will examine the ability of employers to submit Occupational Safety and Health Administration Logs and Supplementary Records. The results of the study will be used in improving the Bureau of Labor Statistics' Occupational Safety and Health Statistics Program.

Revision

Employment and Training Administration
1205-0211; ETA 8580
Annually
State or local governments
57 respondents; 364.017 burden hours; 1 form

JTPA Reporting Requirements are necessary for the Secretary to carry out responsibilities specific at sections 106, 165 and 169 of the JTPA.

Reinstatement

Occupational Safety and Health Administration
Occupational Exposure to Toxic Substances in Laboratories, OSHA 271
1218-0131
Recordkeeping; On occasion
Businesses or other for-profit; Non-profit institutions; Small businesses or organizations
0 respondents; 1 burden hour; 0 forms

Proposed records are to provide needed information to employers and employees regarding appropriate work practices and to provide basis for whatever medical follow-up is appropriate when overexposures may have occurred. Also valuable for later determination of health effects. Laboratory operators are affected public.

Signed at Washington, DC this 22nd day of December, 1987.

Paul E. Larson,

Departmental Clearance Officer.

[FR Doc. 87-29701 Filed 12-28-87; 8:45 am]

BILLING CODE 4510-24-M

Employment and Training Administration

Termination of Certification of Eligibility to Apply for Adjustment Assistance; AT&T Information Systems

TA-W-16,732T Kent, WA;
TA-W-16,733T Miami, FL; and
TA-W-16,738T Minneapolis, MN

In accordance with section 223(d) of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-16,732T; TA-W-16,733T and TA-W-16,738T; investigations regarding termination of certification of eligibility to apply for worker adjustment assistance as prescribed in section 223(d) of the Act.

On July 3, 1986, workers engaged in employment related to the warehousing and shipping at the Kent, Washington; Miami, Florida; and Minneapolis, Minnesota service centers locations of AT&T Information Systems were certified as eligible to apply for trade adjustment assistance. The Notice of Certification was published in the **Federal Register** on July 23, 1986 (51 FR 26483).

The investigation regarding termination was initiated on November 20, 1987, to determine whether workers at the subject locations continue to meet the group eligibility requirements of section 222 of the Act. The Notice of Investigation was published in the **Federal Register** on November 30, 1987 (52 FR 45513). No public hearing was requested and none was held.

Whenever it becomes evident that any of the Group Eligibility Requirements of section 222 of the Trade Act of 1974 are no longer met, the certification as issued must be revised to include a termination date.

Without regard as to whether the other criteria are satisfied, the investigation reveals that the third criterion is no longer being met with respect to workers at the Kent, Washington; Miami, Florida; and Minneapolis, Minnesota warehouses.

Subsequent information has revealed that warehouse workers at the subject locations no longer perform storage and shipment functions of domestically produced residential telephone sets. The original certifications of July 3, 1986 were based on the certification of workers at AT&T Information Systems' Shreveport, Louisiana plant (TA-W-16 313). A large percentage of activities at the subject locations was related to Shreveport's production of residential telephone sets. Shreveport's production of such sets ceased in December 1985 and AT&T Information Systems now relies entirely on foreign production for residential telephone sets.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that the total or partial separations of workers performing warehouse and shipping activities at AT&T Information Systems' warehouses in Kent, Washington; Miami, Florida; and Minneapolis, Minnesota are no longer attributable to the conditions specified in section 222 of the Trade Act of 1974.

In accordance with section 223(d) of the Act, I hereby revise the certification of July 3, 1986 as follows:

"All workers engaged in employment related to the repair, refurbishment, warehousing and shipping of telephone sets and related equipment at the following service center locations of AT&T Information Systems who became totally or partially separated from employment on or after and before the dates listed below are eligible to apply for adjusment assistance under section 223 of the Trade Act of 1974."

TA-W-#	Facility location	Impact date		Termination date	
		Shop	Warehouse	Shop	Warehouse
16,732	Kent, WA	9/30/84	9/30/84	5/1/86	12/21/87
16,733	Miami, FL	9/30/84	9/30/84	3/31/86	12/21/87
16,738	Minneapolis, MN	NC	9/30/84	NC	12/21/87

NC=Not Certified.

That portion of the certification relevant to AT&T Information Systems workers at the following service center locations in Dallas, Texas; Phoenix, Arizona; Ballwin, Missouri; Plymouth, Michigan; Milwaukee, Wisconsin; Nashville, Tennessee; Whitestone, New York; and Omaha, Nebraska is not revised.

Signed at Washington, DC, this 17th day of December 1987.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 87-29702 Filed 12-28-87; 8:45 am]

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility to Apply for Worker Adjustment Assistance; Beaumont Co., et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 8, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 8, 1988.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC this 21st day of December 1987.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-19,929]

Negative Determination Regarding Application for Reconsideration; General Motors Corp., CPC Pontiac, Pontiac, MI

After being granted a filing extension, the company requested administrative reconsideration of the Department's negative determination on the subject petition for trade adjustment assistance for workers at General Motors Corporation, CPC Pontiac, Pontiac, Michigan. The denial notice was signed on September 28, 1987 and published in the **Federal Register** on October 23, 1987 (52 FR 9717).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or the law justified reconsideration of the decision.

The company claims that production at the CPC Pontiac plant was integrated with production at the CPC Fiero plant, Pontiac, Michigan whose workers were certified for adjustment assistance on September 23, 1987 (TA-W-19,928).

A review of the data submitted by the company reveals that there is still not sufficient integration of CPC Pontiac production with the CPC Fiero plant to warrant certification. Only a small amount of the Foundry, Press Metal and Engine Plant Operations were integrated with the production at the CPC Fiero plant in Pontiac.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 18th day of December, 1987.

Harold A. Bratt,

Deputy Director, Office of Program Management.

BILLING CODE 4510-30-M

Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance; GTE Communication Systems Corp. et al.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period December 14, 1987—December 18, 1987.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-20,181; GTE Communication Systems Corp., Northlake, IL

TA-W-20,186; General Motors Corp., New Departure—Hyatt Tonawanda Forge, Tonawanda, NY

TA-W-20,216; Producto Machine Co., Bridgeport, CT

TA-W-20,247; Carondolet Coke Corp., St. Louis, MO

TA-W-20,217 and TA-W-20,218; River Cement Co., Selma Plant—Festus, MO, Distribution Terminal—St. Louis, MO

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-20,229; Statomat-Globe, Inc., Dayton, OH

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,187; Marathon LeToureau, Brownsville, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,185; General Motors Corp., Fisher-Guide Elyria Plant, Elyria, OH

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,103; Inland Steel Co., Indiana Harbor Works, East Chicago, IN

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,201; Allied Bendix Aerospace Fluid Power Division, Utica, NY

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,212; Murray Ohio Manufacturing Co., Lawrenceburg, TN

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,245; Beth-Energy Mine Corp., Ebensburg, PA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,228; Motorola, Inc., Communications Sector, Houston, TX

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,224; GFM Restura, Cumberland, MD

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-20,214; NIBCO of Colorado, Inc., Lajunta, CO

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,231; Fox and Jacobs, Inc., A Subsidiary of Centex Real Estate Corp., Carrollton, TX

Increased imports did not contribute importantly to workers separations at the firm.

Affirmative Determinations

TA-W-20,173; Advance Transformer Co., Monona, IA

A certification was issued covering all workers of the firm separated on or after October 5, 1986.

TA-W-20,211; H & H Plastic Co., Inc., Paramount, CA

A certification was issued covering all workers of the firm separated on or after September 1, 1987.

TA-W-20,219; Tioga Foundry Corp., Oswego, NY

A certification was issued covering all workers of the firm separated on or after October 16, 1986.

TA-W-20,190; National Standard Co., Athenia Steel Div., Clifton, NJ

A certification was issued covering all workers of the firm separated on or after October 8, 1986.

TA-W-20,189; Monsanto Chemical Co., Nitro, WV

A certification was issued covering all workers of the firm separated on or after October 8, 1986.

TA-W-20,237; Hatch, Inc., El Paso, TX

A certification was issued covering all workers of the firm separated on or after October 26, 1986.

TA-W-20,163; G.W. Petroleum, Inc., Denver, CO

A certification was issued covering all workers engaged in production of crude oil and gas separated on or after September 28, 1986.

I hereby certify that the aforementioned determinations were issued during the period December 14, 1987—December 18, 1987. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Marvin M. Fooks,

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under the Office of Management and Budget Review

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Comments on this information collection must be submitted on or before January 28, 1988.

ADDRESSES: Send comments to Ms. Ingrid Foreman, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202-786-0233) and Ms. Elaina Norden, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503 (202-395-6880.

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Foreman, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202-786-0233) from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what the form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries are subject to 44 U.S.C. 3504 (h).

Category: Extension

Title: General Programs: Public Humanities Projects/Guidelines and Application Instructions

Frequency of Collection: Twice a year at each deadline

Respondents: Colleges and universities, libraries, private, non-profit organizations, civic and professional groups, or branches of state or local government

Use: Collection of information provides a basis for evaluation of applications in the competitive review process

Estimated Number of Respondents: 82

Estimated Hours for Respondents to Provide Information: 6,580

Susan Metts,

Director of Administration.

Task Force on Women, Minorities and the Handicapped in Science and Technology; Meeting and Public Hearing

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub L. 92-463), notice is hereby given of a meeting of the Task Force on January 13, 1988, followed by a public hearing on January 14, 1988.

Meeting

Name: Task Force on Women, Minorities, and the Handicapped in Science and Technology.

Date: January 13, 1988.

Time: 2:00 p.m. to 5:00 p.m.

Place: California State University, Headquarters Building, 400 Golden Shore, Long Beach, CA 90802-4275.

Type of Meeting: Open.

Purpose: The purpose of the Task Force on Women, Minorities and the Handicapped is to:

—examine the current status of women, minorities and the disabled in science and engineering positions in the federal government and in federally-assisted research programs;
—coordinate existing federal programs designed to promote the employment of women, minorities and physically disabled scientists and engineers;
—suggest cooperative interagency programs for promoting such employment;
—identify exemplary programs in the state, local or private sectors and;
—develop a long-range plan to advance opportunities for women, minorities, and disabled persons in science and technology.

Agenda: Reports will be heard on progress of the subcommittees on Employment, Research, Higher Education, Precollege Education and Social Aspects, as well as other business of the Task Force.

Public Hearing

Name: Task Force on Women, Minorities and the Handicapped in Science and Technology.

Date: January 14, 1988.

Time: 9:30 a.m. to 3:00 p.m.

Place: California State University, Dominguez Hills, Victoria and Avalon, Carson, CA 90747.

Purpose: The Task Force will seek testimony from interested parties on innovative ways to increase opportunities for women, minorities and the handicapped in science and technology in the areas of employment, research, higher education, precollege education and social aspects.

Testimony will be heard in three ways: (1) Scheduled testimony of ten-minute summary presentations accompanied by longer written statements and supporting documents for the record; (2) summary statements from the floor of three-minute duration accompanied by any longer written statements or materials for the record; and (3) written testimony submitted to the Task Force offices from those who cannot be heard because of time constraints or those who cannot attend.

Anyone wishing to testify or submit a statement for the record should write Sue Kemnitzer, Executive Director, Task Force on Women, Minorities and the Handicapped in Science and Technology, 330 C Street, SW., Washington, DC 20201.

The public hearing will be followed by a discussion of the testimony by the Task Force members.

All meetings and public hearings of the Task Force are open to the public and all proceedings will be recorded and will be available at the Task Force offices.

December 7, 1987.

Sue Kemnitzer,

Executive Director.

BILLING CODE 7590-01-M

[Docket No. 50-456 and 50-457]

Commonwealth Edison Co.; Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF-72 and NPF-75, issued to Commonwealth Edison Company (the licensee), for operation of the Braidwood Units 1 & 2 located in Will County, Illinois.

The amendment in accordance with the licensee's application dated December 3, 1987 would modify the DC system technical specifications to address operation of the DC crosstie between units for the following two situations:

With both units operating and one battery charger fails, the DC crosstie may be used, for up to 24 hours, to maintain the DC bus in an operable status while the battery charger is being repaired.

With one unit operating and the other unit shutdown with a battery and its associated battery charger out of service, the DC crosstie may be used for up to seven days, to maintain the DC bus in an operable status.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability of consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

This proposed amendment controls the use of the DC crosstie between opposite unit DC buses. Accidents previously evaluated assume a certain load profile on a DC bus. The DC bus loading, when using the crosstie, will be restricted so the capacity of the operating unit's battery will not be exceeded in the event of a single failure and simultaneous accident and loss of offsite power conditions. A single failure and simultaneous accident and loss of offsite power are the conditions assumed for a DC bus in previously evaluated accidents. As a result, the probability or consequences of accidents previously evaluated are not changed by this proposed amendment.

The only new or different kind of accident which could be created by this proposed amendment would involve an interaction between the two DC buses which are crosstied. However, a breaker exists on either side of the crosstie which would isolate any potential short circuit from either unit. These breakers are coordinated with the DC bus main breaker to assure the crosstie will isolate from the affected DC bus before the battery would be isolated. All of these breakers are Class 1E. For these reasons, a new or different kind of accident will not be created from this proposed amendment.

This proposed amendment will allow use of some margin in the capacity of the batteries which was allocated for future DC loads. However, no design margin in the batteries (i.e., aging or temperature correction factors) has been affected by this proposed amendment. Accordingly, no margin of safety has been reduced.

Based on the preceding assessment, the Commission believes this proposed amendment involves no significant hazards considerations.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of the **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 28, 1988 the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or any Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by § 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first perhearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonably specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witness.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action.

VOL 52 ISS 249 DEC 29 1987 UMI

it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Wester Union operator should be given Datagram Identification Number 3737 and the following message addressed to Daniel R. Muller: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should be sent to the Office of the General Counsel—Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael Miller, Esq., Isham, Lincoln, and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602, attorney for the license.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC., and at the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Dated at Bethesda, Maryland this 23rd day of December 1987.

For the Nuclear Regulatory Commission.

Daniel R. Muller,

Director Project Directorate III–2 Division of Reactor Projects—III, IV, V and Special Projects.

PEACE CORPS

Submission of Public Use Form Review Request to the Office of Management and Budget

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), Peace Corps has submitted to the Office of Management and Budget for review, a request to approve the use of the Request For Information through February 28, 1991. The card is a way for citizens to let Peace Corps know they wish to receive information on the Agency and its programs. The information provided allows Peace Corps to determine what to send to the requester.

Title: Request for Information Card.

Type of Request: Extension.

Frequency of Collection: On Occasion.

General Description of Respondents: Citizens interested in receiving information about the Peace Corps.

Estimated Number of Responses: 55,000.

Estimated Hours for Respondents to Furnish Information: 1,650 (Approximately 1 minute 45 seconds per reponse).

Comments: Comments on this form request should be directed to Francine Picoult, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

A copy of the form may be obtained from Mr. Noel McCaman, Office of Recruitment, Room M–1106, 806 Connecticut Avenue, NW., Washington, DC 20526. Mr. McCaman may be called at (202) 254–6480. This is not a request to which 44 U.S.C. 3504(h) applies. This notice is issued in Washington, DC on December 29, 1987.

Daniel Garcia,

Acting, Associate Director for Management.

Submission of Public Use Form Review Request to the Office of Management and Budget

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), Peace Corps has submitted to the Office of Management and Budget for review, a request to approve the use of the Follow-up and Program Evaluation Guide through February 1, 1991. The Guides are used to call selected persons who have requested an application and information on Peace Corps service, and have voluntarily given us their phone number. The call is placed to: (1) Verify that the information sent was received and met the individual's needs, (2) to encourage the individual submit an application for Peace Corps service, and, (3) to evaluate our communications with the public.

Title: Follow-up and Program Evaluation Guide.

Type of Request: New Collection.

Frequency of Collection: On Occasion.

General Description of Responsents: Citizens who requested and were sent information and an application for Peace Corps service.

Estimated Number of Responses: 5,000.

Estimated Hours for Respondents to Furnish Information: 258.5 hours (a little over 3 minutes per response).

Comments: Comments on this form should be directed to Francine Picoult, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

A copy of the form may be obtained from Mr. Noel McCaman, Office of Recruitment, Room M–1106, 806 Connecticut Avenue, NW., Washington, DC 20526. Mr. McCaman may be called at (202) 254–6480. This is not a request to which 44 U.S.C. 3504(h) applies. This notice is issued in Washington, DC on December 29, 1987.

Daniel Garcia,

Acting, Associate Director for Management.

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Incorporated

December 23, 1987.

The above named national securities exchange has filed appliations with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stocks:

Canandaigua Wine Company
Class A Common Stock, $.01 Par Value (File No. 7–0936)
Canandaigua Wine Company
Class B Common Stock (File No. 7–0937)
CDI Corp.
Common Stock, $.10 Par Value (File No. 7–0938)
Citadel Holding Corp.
Common Stock, $.01 Par Value (File No. 7–0939)
Chambers Development Company, Inc.
Class A Common Stock, $.50 Par Value (File No. 7–0940)
Chambers Development Company, Inc.
Class B Common Stock, $.50 Par Value (File No. 7–0941)
CETEC Corporation
Common Stock, $.01 Par Value (File No. 7–0942)
Central Fund of Canada Limited
Class A Common Stock, No Par Value (File No. 7–0943)
Convest Energy Partners, Ltd.
Units, No Par Value (File No. 7–0944)
Centennial Group
Common Stock, $.01 Par Value (File No. 7–0945)
Central Securities Corp.
Common Stock, $1.00 Par Value (File No. 7–0946)
Citizens First Bancorp, Inc.
Common Stock, No Par Value (File No. 7–0947)
City Gas Company of Florida
Common Stock, Common Stock, $1.00 Par Value (File No. 7–0948)
Cagle's Inc.
Class A Common Stock, $1.00 Par Value (File No. 7–0949)
Cognitronics Corporation
Common Stock, $.20 Par Value (File No. 7–0950)
Chariot Group
Common Stock, $.10 Par Value (File No. 7–0951)
Champion Products Inc.
Common Stock, $1.00 Par Value (File No. 7–0952)
Charter Power Systems, Inc.

BILLING CODE 8010–01–M

[Release No. IC–16184; 811–3263]

Guidance Investments, Inc.; Notice of Application

December 22, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 ("1940 Act").

Applicant: Guidance Investments, Inc.

Relevant 1940 Act Section: Section 8(f).

Summary of Application: Applicant seeks an order declaring that it has ceased to be an investment company.

Filing Date: The application on Form N–8F was filed November 16, 1987, and amended on December 15, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 15, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, D.C. 20549. Applicant, 6605 N. Rustic Oak Ct., Peoria, IL 61614.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney (202) 272–2190 or Brion R. Thompson, Special Counsel (202) 272–3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier which may be

contacted at (800) 321-3282 (in Maryland (301) 258-4300).

Applicant's Representations:

1. Applicant is organized as an Illinois corporation and is registered as an open-end, diversified, management investment company under the 1940 Act.

2. On September 13, 1987, the Applicant's Board of Directors adopted a resolution recommending the dissolution of the Applicant. The dissolution proposal was submitted to Applicant's shareholders in the form of a proxy statement filed with the SEC. On November 1, 1987, at a special meeting of the shareholders, the Applicant's shareholders unanimously approved the dissolution of the Applicant.

3. All securityholders have been redeemed at net asset value with the final redemptions taking place on November 1, 1987. Applicant intends to file its Articles of Dissolution under the Illinois Business Corporation Act, and undertakes to file its Form N-SAR due for the period ending March 31, 1988.

4. Within the last 18 months, Applicant has not transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of Applicant. In addition, Applicant is not a party to any litigation or administrative proceeding, and is not now engaged and does not propose to engage in any business activities other than those necessary for winding up its affairs. The expenses incurred in connection with the liquidation were paid by Applicant, and there are no outstanding debts or liabilities.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-9183]

Issuer Delisting; Notice of Application to Withdraw From Listing and Registration; Harley-Davidson, Inc.

December 23, 1987.

Harley-Davidson, Inc. ("Company") has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified securities from listing and registration on the American Stock Exchange, Inc. ("Annex"). The Company's common stock is also listed on the New York Stock Exchange ("NYSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its common stock on the NYSE and Amex. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for its common stock.

Any interested person may, on or before January 15, 1988, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-6687]

Issuer Delisting; Notice of Application To Withraw From Listing and Registration; Johnston Industries, Inc.

December 23, 1987.

Johnston Industries, Inc. ("Company") has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex"). The Company's common stock is also listed on the New York Stock Exchange ("NYSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its common stock on the NYSE and Amex. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for its common stock.

Any interested person may, on or before January 15, 1988, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Rel. No. IC-16187; 812-6806]

Lomas Mortgage Funding Corporation II; Notice of Application

December 22, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: Lomas Mortgage Funding Corporation II (the "Applicant").

Relevant 1940 Act Sections: Exemption requested under Section 6(c) from all provisions of the 1940 Act.

Summary of Application: Applicant seeks a conditional order exempting the Applicant from all provisions of the 1940 Act in connection with the Applicant's issuance of collateralized mortgage obligations.

Filing Date: The application was filed on July 27, 1987 and amended on December 16, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 15, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, D.C. 20549. Applicant, 2001 Bryan Tower, Suite 3600, Dallas, Texas 75201.

FOR FURTHER INFORMATION CONTACT: Joyce M. Pickholz, Staff Attorney (202) 272-3046, or Curtis R. Hilliard, Special Counsel (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representation

1. The Applicant is a wholly-owned, limited purpose finance subsidiary of Lomas Mortgage Corporation, a publicly-traded real estate investment trust listed on the New York Stock Exchange. The Applicant, a Delaware corporation formed on July 16, 1987, was organized solely for the purpose of issuing collateralized mortgage obligations ("Bonds") in one or more series.

2. The Applicant will issue each series of Bonds under the terms of an indenture ("Indenture") between the Applicant and an independent trustee ("Indenture Trustee"), as supplemented by one or more series supplements. The Indenture will be qualified under the Trust Indenture Act of 1939 unless an appropriate exemption is available. Each series of Bonds will be registered under the Securities Act of 1933 ("1933 Act"), unless offered in a transaction exempt from registration pursuant to Section 4(2) of the Securities Act.

3. The mortgage collateral ("Mortgage Certificates") underlying the Bonds will consist of (1) "fully-modified" pass-through mortgage-backed certificates guaranteed by the Government National Mortgage Association ("GNMA Certificates"), (2) mortgage participation certificates issed by the Federal Home Loan Mortgate Corporation ("FHLMC Certificates"), (3) guaranteed mortgage pass-through securities issued by the Federal National Mortgage Association ("FNMA Certificates"), (4) pass-through certificates and participation certificates which are neither issued nor guaranteed by an agency or instrumentality of the United States and which evidence undivided interests in pools of mortgage loans secured by single family (one-to-four-units) residences ("Private Certificates"), or (5) a combination of such Mortgage Certificates. (GNMA Certificates, FNMA Certificates and FHLMC Certificates collectively, "Agency Certificates").

4. In the case of each series of Bonds: (a) The Applicant will hold no substantial assets other than Mortgage Certificates and cash; (b) the Bonds will be secured by Mortgage Certificates or cash having a collateral value determined under the Indenture, at the time of issuance and following each payment date for such Bonds, equal to or greater than the outstanding principal balance of the Bonds; (c) distributions of principal and interest received on the Mortgage Certificates securing the Bonds and any applicable reserve funds, plus reinvestment income thereon, will be sufficient to pay all interest on the Bonds and to retire each class of Bonds by its stated maturity; and (d) the Mortgage Certificates will be assigned by the Applicant to the Indenture Trustee and will be subject to the lien of the related Indenture. Applicant does not anticipate that the Mortgage Certificates securing any series of Bonds will have a collateral value which exceeds 120% of the aggregate principal amount of the related Bonds.

5. Neither the Applicant nor the Indenture Trustee will be able to impair the security afforded by the Mortgage Certificates to the holders of the Bonds. That is, without the consent of each Bondholder to be affected, neither the Applicant nor the Indenture Trustee will be able to: (1) Change the stated maturity on any Bonds; (2) reduce the principal amount or the rate of interest (or the formula by which such rate is computed) on any Bonds; (3) change the priority of payment on any class of any series of Bonds; (4) impair or adversely affect the Mortgage Certificates securing a series of Bonds; (5) permit the creation of a lien ranking prior to or an parity with the lien of the related Indenture with respect to the Mortgage Certificates; or (6) otherwise deprive the Bondholders of the security afforded by the lien of the Indenture.

6. Except to the extent permitted by the limited rights to substitute collateral, it will not be possible for the Applicant to alter the collateral initially pledged to secure a series of Bonds, and in no event will such right to substitute collateral result in a diminution in the value or quality of such collateral. Although it is possible that any collateral substituted for collateral initially pledged may have a different prepayment experience than the original collateral, the interests of the Bondholders will not be impaired because: (a) The prepayment experience of any collateral will be determined by market conditions beyond the control of the Applicant which market conditions are likely to affect all mortgage certificates of similar payment terms and maturities in a similar fashion; and (b) the interests of the Applicant are not likely to be greatly different from those of the Bondholders with respect to collateral prepayment experience.

Applicant's Legal Conclusions

The requested order is necessary and appropriate in the public interest because: (a) The Applicant should not be deemed to be an entity to which the provisions of the 1940 Act were intended to be applied; (b) the Applicant may be unable to proceed with its proposed activities if the uncertainties concerning the applicability of the 1940 Act are not removed; (c) the Applicant's activities are intended to serve a recognized and critical public need; and (d) granting of the requested order will be consistent with the protection of investors because they will be protected during the offering and sale of the Bonds by the registration or exemption provisions of the 1933 Act and thereafter by the Indenture Trustee representing their interests under the Indenture.

Applicant's Conditions

Applicant agrees that if an order is granted it will be expressly conditioned on the following conditions:

A. Conditions relating to the Bonds.

1. Each Series of Bonds will be registered under the 1933 Act, unless offered in a transaction exempt from registration pursuant to Section 4(2) thereof.

2. The Bonds will be "mortgage-related" securities" within the meaning of Section 3(a)(41) of the Securities Exchange Act of 1934. In addition, the mortgage collateral underlying the Bonds will be limited to GNMA Certificates, FNMA Certificates, FHLMC Certificates or Private Certificates.

3. If new Mortgage Certificates are substituted, the substitute certificates will: (i) Be of equal or better quality than the collateral replaced; (ii) have similar payment terms and cash flow as the collateral replaced; (iii) be insured or guaranteed to the same extent as the collateral replaced; and (iv) meet the conditions set forth in paragraphs (2), (4) and (6). In addition, new collateral may not be substituted for more than 40% of the aggregate face amount of the Mortgage Certificates initially pledged as collateral. In no event may any new Mortgage Certificate collateral be substituted for any substitute Mortgage

VOL 52 ISS 249 DEC 29 1987 UMI

Certificate collateral. New Private Certificates may be substituted for Private Certificates initially pledged as Mortgage Collateral only in the event of default, late payment or defect in the Mortgage Collateral being replaced.

4. All Mortgage Certificates, funds, accounts or other collateral securing a series of Bonds will be held by the Indenture Trustee, or on behalf of the Indenture Trustee by an independent custodian. Neither the custodian nor the Indenture Trustee will be an affiliate (as the term "affiliate" is defined in Rule 405 under the 1933 Act, 17 CFR 230.405) of the Applicant or of the master servicer of originating lender of any mortgages underlying the Motgage Certificates. The Indenture Trustee will be provided with a first priortiy perfected security or lien interest in and to all collateral securing each series of Bonds.

5. Each series of Bonds will be rated in the highest bond rating category by at least one nationally recognized statistical rating organization that is not affiliated with the Applicant. The Bonds will not be considered "redeemable securities" with the meaning of Section 2(a)(32) of the 1940 Act.

6. The master servicer of any mortgages underlying Private Certificates that are pledged as mortgage collateral may not be an affiliate of the Indenture Trustee. If there is no master servicer, no servicer of such mortages may be an affiliate of the Indenture Trustee. The master servicer and servicer of such mortgages will be approved by FNMA or FHLMC as an "eligible seller/servicer" of conventional, residential mortgage loans. The agreement governing the servicing of such mortgages shall obligate the servicer to provide substantially the same services with respect to those mortgages as it is then currently required to provide in connection with the servicing of mortgage loans insured by FHA, guaranteed by VA or eligible for purchase by FNMA or FHLMC.

7. No less often than annually, an independent public accountant will audit the books and records of the Applicant and, in addition, will report on whether the anticipated payments of principal and interest on the Mortgage Certificate collateral continue to be adequate to pay the principal and interest on the Bonds in accordance with their terms. Upon completion, copies of the auditor's reports will be provided to the Indenture Trustee.

B. Additional Conditions relating to variable-rate bonds

1. Bonds bearing interest at a variable rate will be subject to maximum interest rates ("interest rate caps") or to minimum interest rates in the case of inverse variable rate Bonds. The maximum and minimum interest rates for a series of Bonds may vary from period to period, and always will be specified in the related prospectus supplement.

2. The cash flow generated by the related Mortgage Certificates securing the Bonds (together with other collateral) plus income received thereon at the assumed reinvestment rate specified in the related prospectus supplement will be sufficient to provide for the full and timely payment of the Bonds of such series (even if the interest rates on variable rate Bonds were the maximum applicable interest rates for each specified period).[1]

3. No Mortgage Certificates may be released from the lien of the Indenture prior to retirement in full of all Bonds of any series except to the extent permitted by the limited right to substitute collateral as described herein.

C. Conditions relating to REMICs

1. Any pool of collateral subject to an election to be treated as a REMIC will provide for the payment of administrative fees and expenses by one or more of the methods set forth in the application.

2. With respect to each series of Bonds, Applicant will ensure that the anticipated level of fees and expenses will be more than adequately provided for, regardless of the method which is selected to provide for the payment of such fees and expenses.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[1] In the case of a series of Bonds that contains a class or classes of adjustable or floating rate Bonds, a number of mechanisms exist to ensure that this representation will be valid notwithstanding subsequent potential increases in the interest rate applicable to the adjustable or floating rate Bonds. Procedures that have been identified to date for achieving this result include the use of (i) interest rate caps for the adjustable or floating rate Bonds; (ii) "inverse" floating rate Bonds (which pay a lower rate of interest as the rate increases on the corresponding "normal" floating rate Bonds); (iii) floating rate collateral (such as adjustable rate GNMA Certificates) to secure the Bonds; (iv) interest rate swap agreements (under which the issuer of the Bond would make periodic payments to the counterparty at a fixed rate of interest based on a stated principal amount such as the principal amount of Bonds in the floating rate class, in exchange for receiving corresponding periodic payments from the counter-party at a floating rate of interest based on the same principal amount) and (v) hedge agreements (including interest rate futures and option contracts, under which the issuer of the Bonds would realize gains during periods of rising interest rates sufficient to cover the higher interest payments that would become due during such periods on the floating rate class of Bonds). It is expected that other mechanisms may be identified in the future. Applicant will give the staff of the Division of Investment Management (the "Staff") notice by letter of any such additional mechanisms before they are utilized, in order to give the Staff an opportunity to raise any questions as to the appropriateness of their use. In all cases, these mechanisms will be adequate to ensure the accuracy of the representation and will be adequate to meet the standards acquired for a rating of the Bonds in one of the two highest bond rating categories, and no Bonds will be issued for which this is not the case.

DEPARTMENT OF STATE

Bureau of Public Affairs

[Public Notice 1043]

Guidelines for Access to Records of United Nations War Crimes Commission (UNWCC)

The Department of State will apply the following guidelines in considering for transmission to the United Nations applications for access to certain records of the UNWCC by United States nationals and permanent residents engaged in bona fide research into the history and work of the UNWCC and into war crimes:

1. United States nationals and permanent residents seeking access to UNWCC records may obtain application forms from either the United Nations Archives or from the Office of the Historian, Bureau of Public Affairs, Department of State. These forms require applicants to undertake to observe the terms on which access is granted, and provide that payment of fees, as from time to time established by the United Nations, will be required to cover the administrative costs and services involved.

2. Completed application forms must be submitted to the Office of the Historian, Bureau of Public Affairs, Department of State at the address listed below.

3. Each application form must be accompanied by an appropriate introduction from an institution of higher learning or research or from a relevant professional society.

DATES: This notice is effective as of December 17, 1987.

ADDRESSES: To obtain application forms, contact either:

United Nations Archives, 345 Park Avenue South, 12th Floor, New York, NY 10010, Tel. No. (212) 963-8683

or

Office of the Historian (PA/HO), Bureau of Public Affairs, Department of State, Washington, DC 20520, Tel. No. (202) 663-1122

Submit completed application forms and accompanying letters of introduction to: Office of the Historian (PA/HO), Bureau fo Public Affairs, Department of State, Washington, DC 20520, Tel. No. (202) 663-1122.

FOR FURTHER INFORMATION CONTACT: Neal H. Petersen or David H. Herschler of the Office of the Historian.

Date: December 17, 1987.

Neal H. Petersen,

Deputy Records Historian.

BILLING CODE 4710-11-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

[Docket No. IRA-42]

California Department of Motor Vehicles Application for Inconsistency Ruling

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Extension of comment period.

SUMMARY: On November 16, 1987, the Research and Special Programs Administration (RSPA) published a Public Notice and Invitation to Comment (52 FR 43830) concerning an application of the California Department of Motor Vehicle (DMV) for an inconsistency ruling under the Hazardous Materials Transportation Act (HMTA). RSPA is extending the period for comments and rebuttal comments on that application.

DATES: Comments received on or before February 29, 1988, and rebuttal comments received on or before April 18, 1988, will be considered before an administrative ruling is issued by the Director of the Office of Hazardous Materials Transportation. Rebuttal comments may discuss only those issues raised by comments received during the initial comment period and may not discuss new issues.

ADDRESSES: The application and any comment received may be reviewed in the Docket Unit, Research and Special Programs Administration, Room 8426, Nassif Building, 400 7th Street SW., Washington, DC 20590. Comments and rebuttal comments on the application may be submitted to the Dockets Unit at the above address, and should include the Docket Number, IRA-42. Three copies are requested. A copy of each comment and rebuttal comment must also be sent to Mr. A.A. Pierce, Director, California Department of Motor Vehicles, P.O. Box 932328, Sacramento, CA 94232-3280, and that fact certified to at the time comment is submitted to the Dockets Unit. (The following format is suggested: "I hereby certify that copies of this comment have been sent to Mr. Pierce at the address specified in the Federal Register.")

FOR FURTHER INFORMATION CONTACT: Edward H. Bonekemper III, Office of the Chief Counsel, Research and Special Programs Administration, 400 7th Street SW., Washington, DC 20590, telephone 202-366-4401.

SUPPLEMENTARY INFORMATION: The Public Notice and Invitation to Comment, on the consistency of California's DMV's regulations on training requirements for operators of vehicles carrying hazardous materials, established a comment period ending December 31, 1987, and a rebuttal comment period ending February 19, 1988.

On December 11, 1987, RSPA received a December 10, 1987, letter from Clifford H. Harvison, President of the National Tank Truck Carriers, Inc. (NTTC), requesting an extension of the comment period. That letter, in part, stated:

> The Administrator has established December 31, 1987, as the deadline for filing comments. Most recently, however, the Department's Office of Motor Carriers, Federal Highway Administration, has announced that final rules regarding driver licensing qualification and testing standards will be published on or about December 15, 1987.
>
> NTTC believes that it is reasonable to anticipate that many of FHWA's "final" rules will impact RSPA's decision-making in IR-42. Simply stated, those of us who intend to file comments will need more time to analyze FHWA's new rules and seek counsel from our membership.
>
> Therefore, please accept this letter as a request to postpone the deadline for filing comments in Application for Inconsistency Ruling (IR-42) from December 31, 1987, to February 29, 1988.

On December 11, 1987, the Federal Highway Administration (FHWA) did publish a proposed regulation concerning "Commercial Driver Testing and Licensing Standards" (52 FR 47328). That FHWA notice contains proposals relating to testing and qualifications of persons who operate or expect to operate a commercial motor vehicle carrying a hazardous material.

However, the FHWA proposed regulations under statutory authority other than the HMTA, and its ultimate promulgation of regulations, if any, under such authority has no direct effect on preemption issues arising under the HMTA.

The FHWA proposals, however, are likely to generate increased interest in the California DMV regulations and the HMTA inconsistency proceeding concerning them.

Therefore, RSPA is granting the NTTC's request for an extension of the comment period in this inconsistency proceeding to February 29, 1988. In addition, the rebuttal comment period is extended to April 18, 1988.

Alan I. Roberts,

Director, Office of Hazardous Materials Transportation.

Issued in Washington, DC on December 22, 1987.

BILLING CODE 4910-60-M

[Inconsistency Ruling No. IR-22; Docket IRA-40A]

City of New York Regulations Governing Transportation of Hazardous Materials; Correction

AGENCY: Office of Hazardous Materials Transportation (OHMT), Research and Special Programs Administration, DOT.

ACTION: Inconsistency Ruling No. IR-22; correction.

SUMMARY: OHMT is correcting errors in the text of Inconsistency Ruling No. IR-22, concerning City of New York regulations governing transportation of hazardous materials, which was published in the Federal Register on December 8, 1987 (52 FR 46574).

FOR FURTHER INFORMATION CONTACT: Edward H. Bonekemper III, Senior Attorney, Office of Chief Counsel, Research and Special Programs Administration, Department of Transportation, Washington, DC 20590 (Tel. (202) 366-4362).

SUPPLEMENTARY INFORMATION: The following corrections are made in Inconsistency Ruling No. IR-22:

1. On page 46574, in the first column, in the paragraph entitled "Ruling:", in the second line, "Protection" should be "Prevention".

2. On page 46575, in the second column, in the first full paragraph, on the seventh line, the word "purpose" should be "purposes".

3. On the same page, same column, in the third full paragraph, in the eighth line from the bottom, a comma should precede "which".

4. On the same page, same column, in the last full paragraph, on the seventh line, the word "*Coating*" should be "*Coatings*".

5. On page 46576, in the second column, in the last full paragraph, on the

seventh line, "pending" should be "pendency".

6. On page 46580, in the first column, in the third full paragraph, on the sixth line, "set" should be "sets".

7. On page 46581, in the second column, in the first paragraph, on the fifth line from the bottom, "states" should be "stated".

8. On page 46582, the second, fifth, seventh and eighth paragraphs should be in large type because they are not parts of quotations.

9. On page 46584, in the third column, on the second line, "Protection" should be "Prevention".

Alan I. Roberts,

Director, Office of Hazardous Materials Transportation.

Issued in Washington, DC, on December 22, 1987.

BILLING CODE 4810-25-M

Sunshine Act Meetings

Federal Register
Vol. 52, No. 249
Tuesday, December 29, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Thursday, December 17, 1987, the Corporation's Board of Directors determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration in open session and the addition to the agenda for consideration at the Board's closed meeting to be held at 2:30 p.m. the same day, on less then seven days' notice to the public, of the application of Beverly Bank, Chicago, Illinois, for consent to establish a facility at 19312 South Cicero Avenue, Oak Lawn, Illinois.

By the same majority vote, the Board also determined that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application of Chaves Industrial Bank, an operating noninsured industrial bank located at 501 Lincoln Street, Denver, Colorado, for Federal deposit insurance.

Memorandum and resolution regarding contracts for the FDIC loose-leaf reporting service and its index.

By the same majority vote, the Board also determined that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 47,152-NR Franklin National Bank, New York, New York.

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter moved from open session to closed session in a meeting open to public observation; and that the matter moved from open session to closed session could be considered in a closed meeting by authority of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: December 21, 1987.

Federal Deposit Insurance Corporation.

Margaret M. Olsen,

Deputy Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Thursday, December 17, 1987, the Corporation's Board of Directors determined, on motion of Chairman L. William Seidman, seconded by Director C. C. Hope, Jr. (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency) , that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Requests for financial assistance pursuant to section 13(c) of the Federal Deposit Insurance Act.

Memorandum regarding an assistance agreement pursuant to section 13(c) of the Federal Deposit Insurance Act.

The Board further detemined, by the same majority vote, that no earlier notice of these changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation: and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

43 CFR Parts 2920 and 9260

Leases, Permits and Easements and Criminal Law Enforcement; Amendment To Provide Procedures for Action for Unauthorized Use of the Public Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking provides procedures for dealing with authorized use of the public lands for agricultural, industrial, residential, or commercial purposes where the user has not obtained a lease, license, or easement authorizing such use. These procedures will protect the public lands and their resources from unauthorized use, which deprives the United States of a fair return for the use of its lands.

EFFECTIVE DATE: January 28, 1988.

ADDRESS: Any inquiries or suggestions should be sent to: Director (320) Bureau of Land Management Room 3643, Main Interior Bldg. 1800 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Ralph Conrad, (202) 343-8693.

SUPPLEMENTARY INFORMATION: A proposed rulemaking amending 43 CFR Parts 2920 and 9260 was published in the Federal Register on July 27, 1987 (52 FR 28024), with a 30-day comment period. During the comment period, comments were received from 10 sources, seven from Federal agencies, two from law firms, and one from an association.

The comments were not negative, but raised specific questions concerning the proposed rulemaking. As an example, one comment expressed a view that the rulemaking should not diminish individual rights. The proposed rulemaking was aimed at controlling unauthorized uses of the public lands and, therefore, does not infringe on legitimate uses of the public lands.

Another comment suggested that the final rulemaking amend the proposed rulemaking to make it clear that persons cited for civil penalties under the provisions of the rulemakings have the right to appeal that citation under 43 CFR Part 4. The right of appeal of a decision by an official of the Bureau of Land Management is available to any adversely affected party, including a person determined to have made an authorized use of the public lands. However, in order to clarify this point, the final rulemaking has adopted a provision setting forth this right of appeal. This same comment also suggested that the final rulemaking contain language differentiating between civil and criminal penalties. The final rulemaking has been amended to provide this differentiation. This amendment of the final rulemaking also will answer several comments regarding when civil or criminal penalties would be applicable.

One of the comments recommended that the final rulemaking include definitions of the terms "occupancy," "resources," and "nuisance." This recommended change would have the effect of broadening the scope of the rulemaking beyond those uses which are currently authorized under 43 CFR Part 2920 by including littering, resource destruction, etc., as violations that will be subject to penalty under the provisions of this final rulemaking. The recommendation has not been adopted because it would broaden the scope of the final rulemaking beyond the uses authorized by 43 CFR Part 2920.

One comment recommended that the final rulemaking amend the proposed rulemaking to provide for injunctions against unauthorized use, occupancy, or development of the public lands. Both the proposed and final rulemakings cite section 303 of the Federal Land Policy and Management Act as authority. Section 303 authorizes the use of an injunction proceeding in connection with unauthorized use of the public lands. Therefore, this process is already available to the authorized officer who deems its use appropriate. This recommendation has not been adopted by the final rulemaking.

One comment suggested that the final rulemaking amend the proposed rulemaking to allow the waiver of damages and administrative costs in those situations where the unauthorized user either vacates the public lands or accepts a land use authorization under the provisions of 43 CFR Part 2920. The Department of the Interior must comply with the provisions of the Federal Claims Collection Act in waiving or compromising debts owed the United States. Therefore, this suggested change cannot be adopted by the final rulemaking because the basis for waiving or compromising a claim resulting from an unauthorized use is set by the Federal Claims Collection Act.

Three comments raised questions about the use of the phrase "not timely resolved," in the proposed rulemaking and it was suggested that the phrase be defined for clarity. The final rulemaking has not adopted the suggestion that the phrase "not timely resolved" be defined. The phrase is used in an effort to give the Bureau of Land Management official responsible for dealing with an unauthorized use the broadest possible discretion in resolving that unauthorized use on a fair and equitable basis. The ultimate decision on whether or not an unauthorized use has been resolved in a timely manner will lie with the appropriate State Director.

Two comments on the proposed rulemaking suggested that damages be substituted for fair market value rental by the final rulemaking. The comments felt that the process under which fair market rental is established after the deduction of credits for water, insurance, fertilizer, seed, and other costs does not give the United States an adequate return for the use of the public lands. The comments made the point that in their opinion the use of fair market value rental as the standard for payment deprives the United States, an unwilling landlord, of adequate compensation for the use of the public lands. Fair market value rental is determined pursuant to established appraisal procedures, whereas damages are non-definitive and open to broad interpretation. The final rulemaking has not adopted this suggestion and action will be taken after this final rulemaking becomes effective to standardize the appraisal methods that are used to determine fair market value rental, thereby providing the United States with adequate reimbursement for the unauthorized use of the public lands.

One comment suggested that the penalty provisions of the proposed rulemaking should be expanded by the final rulemaking to permit termination of any Bureau of Land Management authorization that is discretionary when it has been determined that there has been an unauthorized use of the public lands. This suggestion has not been adopted by the final rulemaking because of the view of the Bureau that the proposed and final rulemakings provide sufficient deterrence.

One of the comments suggested that Federal-private landownership patterns and the topography of the lands frequently lead to use of the public lands either out of necessity or as a convenience. This comment went on to suggest that the Bureau of Land Management not be "hard-nosed" in its pursuit of these types of unauthorized uses of the public lands. The Bureau is aware of the problems presented in the comment and will endeavor to work out administrative solutions that are appropriate to the circumstances.

The provisions of this final rulemaking are applicable only to activities authorized under 43 CFR Part 2920 and have no impact on other activities, e.g., grazing trepass, mineral trespass, timber trespass.

The principal author of this final rulemaking is Ralph Conrad, Division of Lands, Bureau of Land Management, assisted by the staff of the Division of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The rulemaking provides procedures for use by the Bureau of Land Management in carrying out its responsibility to protect the public lands and their resources from unauthorized use. The procedures are equally applicable to all entities, regardless of size, found to be making an unauthorized use of the public lands and their resources.

There are no new information collection requirements in this final rulemaking that require the approval of the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects

43 CFR Part 2920

Public lands, Reporting and recordkeeping requirements.

43 CFR Part 9260

Continental shelf, Forest and forests products, Law enforcement, Penalties, Public lands, Range management, Recreation and recreation areas, Wildlife.

Under the authority of sections 302, 303, and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1733, 1740), Part 2920, Group 2900, Subchapter B, and Part 9260, Group 9200, Subchapter I, both of Chapter II of the Code of Federal Regulations, are amended as set forth below.

November 10, 1987.

J. Steven Griles,

Assistant Secretary of the Interior.

PART 2920—[AMENDED]

1. The authority citation for Part 2920 is revised to read:

Authority: 43 U.S.C. 1732, 1733 and 1740.

2. Section 2920.0-3 is revised to read:

§ 2920.0-3 Authority.

Sections 302, 303 and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1733, 1740) authorize the Secretary of the Interior to issue regulations providing for the use, occupancy, and development of the public lands through leases, permits, and easements.

3. Section 2920.0-5 is amended by adding a new paragraph (m) to read:

§ 2920.0-5 Definitions.

* * * * * *

(m) "Knowing and willful" means that a violation is "knowingly and willfully" committed if it constitutes the voluntary or conscious performance of an act which is prohibited or the voluntary or conscious failure to perform an act or duty that is required. The terms does not include performances or failures to perform which are honest mistakes or which are merely inadvertent. The term includes, but does not require, performances or failures to perform which result from a criminal or evil intent or from a specific intent to violate the law. The knowing or willful nature of conduct may be established by plain indifference to or reckless disregard of the requirements of law, regulations, orders, or terms of a lease. A consistent pattern of performance or failure to perform also may be sufficient to establish the knowing or willful nature of the conduct, where such consistent pattern is neither the result of honest mistake or mere inadvertency. Conduct which is otherwise regarded as being knowing or willful is rendered neither accidental nor mitigated in character by the belief that the conduct is reasonable or legal.

4. Section 2920.1 is revised and §§ 2920.1-1 and 2920.1-2 are added to read:

§ 2920.1 Uses.

§ 2920.1-1 Authorized use.

Any use not specifically authorized under other laws or regulations and not specifically forbidden by law may be authorized under this Part. Uses which may be authorized include residential, agricultural, industrial, and commercial, and uses that cannot be authorized under title V of the Federal Land Policy and Management Act or section 28 of the Mineral Leasing Act. Land use authorizations shall be granted under the following categories:

(a) Leases shall be used to authorize uses of public lands involving substantial construction, development, or land improvement and the investment of large amounts of capital which are to be amortized over time. A lease conveys a possessory interest and is revocable only in accordance with its terms and the provisions of § 2920.9-3 of this title. Leases shall be issued for a term, determined by the authorized officer, that is consistent with the time required to amortize the capital investment.

(b) Permits shall be used to authorize uses of public lands for not to exceed 3 years that involve either little or no land improvement, construction, or investment, or investment which can be amortized within the term of the permit. A permit conveys no possessory interest. The permit is renewable at the discretion of the authorized officer and may be revoked in accordance with its terms and the provisions of § 2920.9-3 of this title. Permits shall be issued on a form approved by the Director, Bureau of Land Management, that has been filed by the applicant with the appropriate Bureau of Land Management office.

(c) Easements may be used to assure that uses of public lands are compatible with non-Federal uses occurring on adjacent or nearby land. The term of the easement shall be determined by the authorized officer. An easement granted under this Part may be issued only for purposes not authorized under title V of the Federal Land Policy and Management Act or section 28 of the Mineral Leasing Act.

(d) No land use authorization is required under the regulations in this Part for casual use of the public lands.

§ 2920.1-2 Unauthorized use.

(a) Any use, occupancy, or development of the public lands, other than casual use as defined in § 2920.0-5(k) of this title, without authorization under the procedures in § 2920.1-1 of this title, shall be considered a trespass. Anyone determined by the authorized officer to be in trespass on the public lands shall be notified of such trespass and shall be liable to the United States for:

(1) The administrative costs incurred by the United States as a consequence of such trespass; and

(2) The fair market value rental of the lands for the current year and past years of trespass; and

(3) Rehabilitating and stabilizing the lands that were the subject of such trespass, or if the person determined to be in trespass does not rehabilitate and stabilize the lands determined to be in trespass within the period set by the authorized officer in the notice, he/she shall be liable for the costs incurred by the United States in rehabilitating and stabilizing such lands.

(b) In addition, the following penalties may be assessed by the authorized officer for a trespass not timely resolved under paragraph (a) of this section and where the trespass is determined to be:

VOL 52 ISS 249 DEC 29 1987 UMI

(1) Nonwillful, twice the fair market rental value which has accrued since the inception of the trespass, not to exceed a total of 6 years; or

(2) Knowing and willful, three times the fair market rental value which has accrued since the inception of the trespass, not to exceed a total of 6 years.

(c) For any person found to be in trespass on the public lands under this section, the authorized officer may take action under § 2920.9–3 of this title to terminate, revoke, or cancel any land use authorization issued to such person under this Part.

(d) Failure to satisfy the liability and penalty requirements imposed under this section for unauthorized use of the public lands may result in denial of:

(1) A use authorization under this Part; and

(2) A request to purchase or exchange public lands filed under Subparts 2711 and 2201 of this title.

(e) Any person who knowingly and willfully violates the regulations in this Part by using the public lands without the authorization required by this part, in addition to the civil penalties provided for in this part, may be subject to a fine of not more than $1,000 or imprisonment of not more than 12 months, or both under Subpart 9262 of this title.

(f) Any person adversely affected by a decision issued under this section, may appeal that decision under the provisions of Part 4 of this Title.

PART 9260—[AMENDED]

5. The authority citation for Part 9260 continues to read:

Authority: 16 U.S.C. 433; 16 U.S.C. 460 1–6a; 16 U.S.C. 670 g–n; 16 U.S.C. 1241–1249; 16 U.S.C. 1331 et seq.; 18 U.S.C. 3410; 18 U.S.C. 1851–1853; 43 U.S.C. 315 et seq.; 43 U.S.C. 315(a); 43 U.S.C. 315(c); 43 U.S.C. 1061–1064; 43 U.S.C. 1334; 43 U.S.C. 1701 et seq.; 43 U.S.C. 1733.

6. Part 9260 is amended by adding Subpart 9262 to read:

Subpart 9262—Land Resource Management

§ 9262.0–3 Authority.

The provisions of this subpart are issued under sections 302, 303 and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1733, 1740).

§ 9262.1 Penalties for unauthorized use of public lands.

Any person who knowingly and willfully violates the regulations in Part 2920 of this title by using the public lands without the authorization required by that part may be required to appear before a designated United States magistrate and may be subject to a fine of not more than $1,000 or imprisonment of not more than 12 months, or both.

Part III

The President

Memorandum for the Counsel to the President

Counsel to the President

Waiver Under 18 U.S.C. 208(b)(2) for Members of the Presidential Task Force on Market Mechanisms

Presidential Documents

Memorandum of December 23, 1987

Waiver Under 18 U.S.C. §208(b)(2) for Members of the Presidential Task Force on Market Mechanisms

Memorandum for the Counsel to the President

By Executive Order 12614 on November 5, 1987, I established the Presidential Task Force on Market Mechanisms in order to obtain knowledgeable analysis and recommendations concerning the current and long-term financial condition of the nation's securities markets. In order to obtain the specialized expertise in the several technical aspects of the securities markets that is necessary to the Task Force's central purpose, and to enable the Task Force to conclude their report within a very short period of time, I selected persons for the Task Force from among working professionals who deal with these markets on a daily basis. For the same reason, it was my intention that the Task Force members would themselves select staff personnel who are familiar with the intricacies of the financial markets and who are involved with the markets on an ongoing basis, either through their own financial dealings or those of organizations with which they are affiliated.

In order to permit members of the Task Force and its staff to carry out their functions, there is hereby delegated to you the authority of the President under section 208(b)(2) of Title 18, United States Code, to publish in the Federal Register a general exemptive rule applicable to members of the Task Force and its staff, and to do so without approval, ratification, or other action by the President.

Ronald Reagan

The White House,
Washington, December 23, 1987.

Billing code 3195-01-M

Counsel to the President

Waiver Under 18 U.S.C. § 208(b)(2) for Members of the Presidential Task Force on Market Mechanisms

This general rule is issued pursuant to the authority in Title 18, United States Code, section 208(b)(2).

Section 208(a) of Title 18 prohibits officers and employees of the Executive branch who have financial interests that could be affected by their official acts from participating in any "judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest, or other particular matter" through, among other means, "the rendering of advice." Certain legal interpretations of section 208(a) include as "particular matters" to be avoided general policy recommendations which, if implemented, could have very broad impact on economic interests.

Subsection (b)(2) of section 208 provides a standard for determining when it is appropriate to issue an exemptive general rule or regulation waiving financial interests from the coverage of section 208(a). According to this standard, a general waiver may be granted whenever the financial interests of officers or employees are too remote or too inconsequential to "affect the integrity of [their] services."

The President created the Presidential Task Force on Market Mechanisms by Executive Order 12614 on November 5, 1987, in order to obtain knowledgeable analysis and recommendations concerning the current and long-term financial condition of the nation's securities markets. Section 2 of the Executive Order provides that the Task Force shall review relevant analyses of the current and long-term financial condition of the markets; identify problems that may threaten the short-term liquidity or long-term solvency of the markets; analyze potential solutions to such problems; and provide appropriate recommendations to the President, to the Secretary of the Treasury, and to the Chairman of the Board of Governors of the Federal Reserve System.

In order to provide the specialized expertise in the several technical aspects of the securities markets that was necessary to the Task Force's central purpose, and particularly because the President wished the Task Force members to conclude their report within a very short period of time, the President selected persons for the Task Force from among working professionals who deal with these markets on a daily basis. For the same reason, the President contemplated that the Task Force members would themselves select staff personnel who are familiar with the intricacies of the financial markets and who are involved with the markets on an ongoing basis, either through their own financial dealings or those of organizations with which they are affiliated. Pursuant to the direction of the President, members of the Task Force and its staff include representatives of investment banks and securities brokers/dealers; investment portfolio managers; mutual fund managers; corporate issuers; commodity futures trading participants; members of corporate boards of directors and management, and consultants thereto; and business academic institutions.

By virtue of their backgrounds, current positions, and in some cases, financial holdings, it is therefore conceivable that actions that each of the members of the Task Force and its staff may take in particular matters could be deemed to be actions by officers or employees of the Executive branch that have a direct and predictable effect on financial interests they possess.

Because the Executive Order requires the Task Force to analyze and provide recommendations concerning the overall condition of the nation's securities markets, rather than concerning particular financial interests of individuals that may be indirectly affected by the general condition or performance of such markets, and in view of the necessity of staffing the Task Force with persons intimately familiar with the day-to-day functioning of various aspects of the markets, it is hereby established by general rule that the financial interests of each member of the Task Force and its staff, and of any organization with which such a member may be affiliated, are too remote or too inconsequential to affect the integrity of the services of such persons to the Task Force. The provisions of subsection (a) of section 208 shall not, therefore, apply to any such financial interests of such persons or their spouses, minor children, partners, or organizations in which they are serving as officers, directors, trustees, partners, or employees.

This waiver is granted in light of the purpose and functions of the Task Force set forth in the Executive Order, with the expectation that the Task Force report will not include specific recommendations that would particularly rather than generally affect a financial interest of members of the Task Force or its staff. However, should the Task Force consider recommendations directed specifically to a particular organization in which a member of the Task Force or its staff is serving as an officer, director, trustee, partner, or employee, or in which such person or his or her spouse, minor child, or partner has a direct financial interest, then such member shall not act in the matter.

Arthur B. Culvahouse, Jr.,
Counsel to the President.

Part IV

Department of Education

34 CFR Part 671
Foreign Periodicals Program; Proposed Rulemaking

DEPARTMENT OF EDUCATION

34 CFR Part 671

Foreign Periodicals Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes regulations to govern the Foreign Periodicals Program. These proposed regulations would be needed to implement additions to Title VI of the Higher Education Act of 1965 (HEA), as amended by the Higher Education Amendments of 1986, Pub. L. 99-498, in the event funds are appropriated. The proposed regulations provide the framework for strengthening specialized library collections dealing with foreign languages, area studies, and world affairs.

DATES: Comments must be received on or before February 12, 1988.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Joseph F. Belmonte, Center for International Education, U.S. Department of Education, 400 Maryland Avenue SW. (Room 3054, ROB-3), Washington, DC 20202.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Joseph F. Belmonte: Telephone (202) 732-3304.

SUPPLEMENTARY INFORMATION: Under the Foreign Periodicals Program, the Secretary awards grants to institutions of higher education, public or nonprofit private library institutions, or consortia of these institutions. To receive a grant, an applicant must have an established library with strengths in specific geographic world areas or in particular fields or issues in world affairs that concern one or more countries, and the applicant must demonstrate a commitment to share the resources of its collection.

Grant funds may be used: (1) To acquire periodicals published outside the United States which are not commonly held by American academic libraries and which are of scholarly or research importance, (2) to preserve those periodicals, (3) to make those periodicals available to researchers and scholars, and (4) to maintain bibliographic information on periodicals acquired in machine-readable form and to enter that information into one or more of the widely available bibliographic data bases.

At this time no funds have been appropriated for the activities and none have been requested by the Department.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. Respondents to this program are major higher education institutions with enrollments of well over 500 and major specialized libraries. They are not defined as small entities.

Paperwork Reduction Act of 1980

Sections 671.10 and 671.21 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these proposed regulations to the Office of Management and Budget for its review.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, OMB, Room 3002, New Executive Office Building, Washington, DC 20503; Attention: Jim Houser.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection during and after the comment period, in Room 3054, Regional Office Building No. 3, 7th and D Streets SW., Washington, DC 20202, between the hours of 8:30 a.m. and 4:00 p.m., Monday throught Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 671

Colleges and universities, Education, Grant program, Libraries, Reporting and recordkeeping requirements, Research.

Dated: November 16, 1987.

William J. Bennett,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number has not been assigned)

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 671 to read as follows:

PART 671—FOREIGN PERIODICALS PROGRAM

Subpart A—General

Sec.

671.1 What is the Foreign Periodicals Program?
671.2 Who is eligible for an award?
671.3 What activities may the Secretary fund?
671.4 What regulations apply?
671.5 What definitions apply?

Subpart B—How Does the Secretary Make an Award?

671.10 How does the Secretary evaluate an application?
671.11 What selection criteria does the Secretary use?
671.12 What priorities may be Secretary establish?

Subpart C—What Conditions Must Be Met by a Grantee?

671.20 What costs are allowable?
671.21 What are the limitations on allowable costs?

Authority: 20 U.S.C. 1125a, unless otherwise noted.

Subpart A—General

§ 671.1 What is the Foreign Periodicals Program?

Under the Foreign Periodicals Program, the Secretary awards grants to selected institutions of higher education, public or nonprofit private library institutions, or consortia of these institutions for the purpose of—

(a) Acquiring periodicals published outside the United states that are not commonly held by American academic libraries and that are of scholarly or research importance;

(c) Making those periodicals available to researchers and scholars; and

(d) Maintaining bibliographic information on periodicals acquired in machine-readable form and entering that information into one or more of the widely available bibliographic data bases.

(Authority: 20 U.S.C. 1125a)

§ 671.2 Who is eligible for an award?

An institution of higher education, a public or nonprofit private library institution, or a consortium of these institutions is eligible to receive a grant under this part if the institution or consortium—

(a) Has an established library with strengths in either—

(1) Specific geographic world areas; or

(2) Particular fields or issues in world affairs that concern one or more countries; and

(b) Demonstrates a commitment to share the resources of its library collection with researchers and scholars.

(Authority: 20 U.S.C. 1125a)

§ 671.3 What activities may the Secretary fund?

Grants awarded under this part may be used to—

(a) Acquire periodicals produced and published outside the United States that are not commonly held by American academic libraries and that are of scholarly or research importance;

(b) Preserve the periodicals described in paragraph (a) of this section;

(c) Make the periodicals described in paragraph (a) of this section available to researchers and scholars; and

(d) Maintain bibliographic information on periodicals acquired in machine-readable form and to enter that information into one or more of the widely avaiable bibliographic data bases.

(Authority: 20 U.S.C. 1125a)

§ 671.4 What regulations apply?

The following regulations apply to the Foreign Periodicals Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), 34 CFR Part 75 (Direct Grant Programs), 34 CFR Part 77 (Definitions That Apply To Department Regulations), and 34 CFR Part 78 (Education Appeal Board).

(b) 34 CFR Part 655.

(c) The regulations in this part 671.

(Authority: 20 U.S.C. 1125a)

§ 671.5 What definitions apply?

The following definitions apply to this part:

(a) The definitions is 34 CFR 655.4.

(b) "Foreign periodical" means a periodical published outside the United States.

(Authority: 20 U.S.C. 1125a)

Subpart B—How Does the Secretary Make an Award?

§ 671.10 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application under this part under the criteria in § 671.11.

(b) The Secretary awards up to 100 possible points for the criteria contained in § 671.11.

(c) The Secretary may award up to 20 additional points under the priority criterion in § 671.11(i).

(d) The maximum possible points for each criterion are indicated in parentheses after the heading for the criterion.

(Authority: 20 U.S.C. 1125a)

§ 671.11 What selection criteria does the Secretary use?

The Secretary uses the following criteria in evaluating applications under this part:

(a) *Plan of operation.* (15) (See 34 CFR 655.31(a)).

(b) *Quality of key personnel.* (1) (See 34 CFR 655.31(b)).

(c) *Budget and cost-effectiveness.* (5) (See 34 CFR 655.31(c)).

(d) *Evaluation plan.* (5) (See 34 CFR 655.31(d)).

(e) *Adequacy of resources.* (10) (See 34 CFR 655.31(e)).

(f) *Commitment to the subject area on which the project focuses.* (25) The Secretary reviews each application to determine—

(1) The strength of the institution's library in the area on which the project focuses; and

(2) The extent to which the institution provides financial and other support to the project, adequate staffing, and services for researchers and scholars in fields related to the project.

(g) *Need and potential impact.* (15) The Secretary reviews each application to determine—

(1) The extent to which the proposed activities serve national needs;

(2) The extent to which an improved collection will be available at the applicant institution at the termination of the grant period; and

(3) The potential impact of the proposed project in improving the knowledge of languages, areas, or international studies at the national level.

(h) *Dissemination activities.* (15) The Secretary reviews each application to determine the quality of the services the project would provide to researchers and scholars.

(i) *Degree to which priorities are serviced.* (20) If, under the provisions of § 671.12, the application notice lists specific priorities for this program, the Secretary determines the degree to which those priorities are serviced.

(Authority: 20 U.S.C. 1125a)

§ 671.12 What priorities may the Secretary establish?

(a) The Secretary may each year select as priorities the collection of periodicals dealing with—

(1) Specific countries or geographic regions, such as Mexico, or South Asia; or

(2) Specific fields or issues in world affairs, such as business, energy, environmental affairs, military and security problems, or development issues, or any combination.

(b) The Secretary announces any priorities in the application notice published in the **Federal Register.**

(Authority: 20 U.S.C. 1125a)

Subpart C—What Conditions Must Be Met by a Grantee?

§ 671.20 What costs are allowable?

Grant funds may be used for—

(a) The acquisition of periodicals published outside the United States;

(b) The salaries of staff needed to acquire, process, preserve and circulate these periodicals; and

(c) The purchase of equipment and supplies and the cost of travel to carry out the purposes of this part.

(Authority: 20 U.S.C. 1125a)

§ 671.21 What are the limitations on allowable costs?

(a) Equipment costs exceeding five percent of the grant are not allowable.

(b) Grant funds may not be used to supplant funds normally used by applicants for the purpose of this part.

(Authority: 20 U.S.C. 1125a)

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Adjustment of Quotas; Tungsten From China

SUMMARY: Pursuant to authority delegated by the President in Proclamation No. 5718 of October 2, 1987, the United States Trade Representative (the USTR) hereby adjusts the quotas specified in the Annex to Proclamation 5718 in accordance with subparagraph (d) of headnote 11 of subpart A, part 2 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202).

EFFECTIVE DATE: December 29, 1987.

FOR FURTHER INFORMATION CONTACT: Bernard Ascher, (202) 395–4510; John Kingery, (202) 395–6800.

SUPPLEMENTARY INFORMATION: On October 2, 1987, the President proclaimed, under sections 203, 406 and 604 of the Trade Act of 1974, certain measures to implement an Agreement for Orderly Trade in Ammonium Paratungstate and Tungstic Acid Between the Governments of the United States and the People's Republic of China. The Proclamation also states that "the USTR is authorized to make any changes to part 2 of the appendix to the TSUS that may be necessary to carry out the agreement. . . ."

Subparagraph (d) of new headnote 11 to subpart A, part 2 of the Appendix to the Tariff Schedules of the United States, as provided by the Annex to Proclamation 5718, states: "To the extent that imports of the tungsten articles provided for herein exceed 1.7 million pounds tungsten content for calendar year 1987, the specified limits for subsequent periods will be reduced according to the following schedule: the 1988 calendar year specified limit shall be reduced by 50 percent of the excess; the specified limit for the 1989 calendar year period shall be reduced by 30 percent of the excess; and the specified limit of 1990 shall be reduced by 20 percent of the excess."

Imports of the tungsten articles subject to the Agreement and Proclamation consisted of 3,425,093 pounds tungsten content for calendar year 1987. Thus, the amount in excess of 1.7 million pounds tungsten content is 1,725,093 pounds. Accordingly, the Tariff Schedules of the United States are modified to reflect the necessary adjustments as set forth in the Annex hereto.

Statistical corrections are anticipated. As soon as information becomes available to make such corrections, it will be published in a subsequent **Federal Register** notice.

This determination shall be published in the **Federal Register**.

Michael B. Smith,

Deputy U.S. Trade Representative.

Annex

Subpart A of part 2 of the Appendix to the Tariff Schedules of the United States (TSUS) is modified:

(a) By deleting from the title of the column entitled "Specified Limit (in million pounds tungsten content)" the words "in million pounds" and inserting in lieu thereof "in pounds of"; and

(b) By deleting the quantities from that column, and by inserting in lieu thereof the quantities set forth below opposite the enumerated TSUS item numbers:

926.30	425,000
926.31	947,453
926.32	1,422,427
926.33	1,704,981
926.34	1,500,000

LIST OF PUBLIC LAWS

Last List December 28, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 1994/Pub. L. 100-205

To amend the boundaries of Stones River National Battlefield, Tennessee, and for other purposes. (Dec. 23, 1987; 101 Stat. 1433; 1 page) Price: $1.00

H.R. 2416/Pub. L. 100-206

To establish the Jimmy Carter National Historic Site and Preservation District in the State of Georgia, and for other purposes. (Dec. 23, 1987; 101 Stat. 1434; 4 pages) Price: $1.00

H.R. 3700/Pub. L. 100-207

To designate the Federal building located at 600 West Madison, Chicago, Illinois, as the "Harold Washington Social Security Center". (Dec. 23, 1987; 101 Stat. 1438; 1 page) Price: $1.00

H.R. 3712/Pub. L. 100-208

To designate the United States Livestock Insects Laboratory in Kerrville, Texas, as the "Knipling-Bushland Research Laboratory". (Dec. 23, 1987; 101 Stat. 1439; 1 page) Price: $1.00

H.J. Res. 376/Pub. L. 100-209

To designate the Clarks Hill Dam, Reservoir, and Highway transversing the Dam on the Savannah River, Georgia and South Carolina, as the J. Strom Thurmond Dam, Reservoir, and Highway. (Dec. 23, 1987; 101 Stat. 1440; 1 page) Price: $1.00

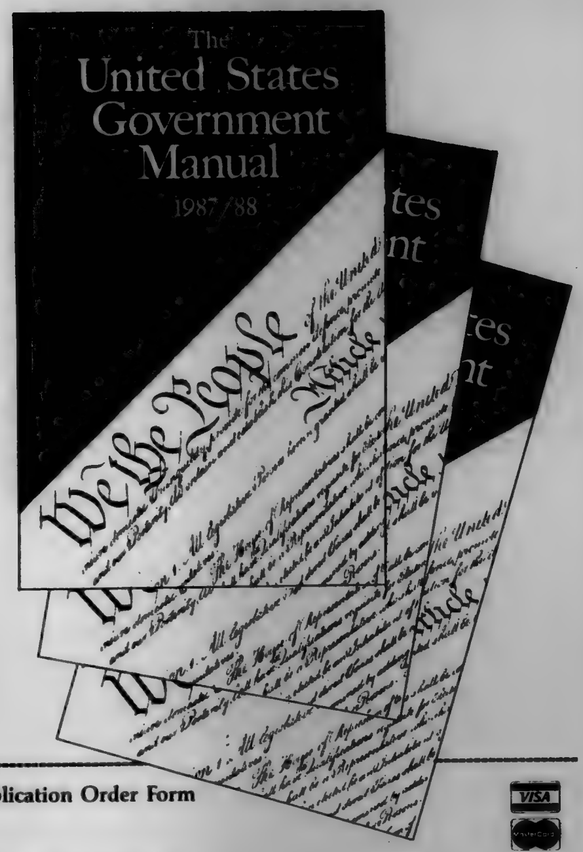
The United States Government Manual 1987/88



As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and subject/agency indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Title 3—

The President

Proclamation 5758 of December 24, 1987

Amending the Generalized System of Preferences

By the President of the United States of America

A Proclamation

1. Pursuant to subsections 502(b)(7), 502(c)(7), and sections 504 and 604 of the Trade Act of 1974, as amended (the Trade Act) (19 U.S.C. 2462, 2464 and 2483), I have determined that it is appropriate to provide for the suspension of preferential treatment under the Generalized System of Preferences (GSP) for articles that are currently eligible for such treatment and that are imported from Chile. Such suspension is the result of my determination that Chile has not taken and is not taking steps to afford internationally recognized worker rights, as defined in section 502(a)(4) of the Trade Act, as amended (19 U.S.C. 2462(a)(4)).

2. Subsections 502(b)(7) and (c)(7) of the Trade Act provide that a country that has not taken or is not taking steps to afford such internationally recognized worker rights is ineligible for designation as a beneficiary developing country for purposes of the GSP. Section 504 authorizes the President to withdraw, suspend, or limit the application of duty-free treatment under the GSP with respect to any article or with respect to any country upon consideration of the factors set forth in sections 501 and 502(c) of the Trade Act (19 U.S.C. 2461 and 2462(c)).

3. Section 604 of the Trade Act authorizes the President to embody in the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) the substance of the relevant provisions of that Act, of other acts affecting import treatment, and of actions taken thereunder.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States of America, including but not limited to sections 502, 504, and 604 of the Trade Act, do proclaim that:

(1) General headnote 3(e)(v)(A) to the TSUS is modified by striking out "Chile" from the enumeration of independent countries whose products are eligible for benefits under the GSP.

(2) No article the product of Chile and imported into the United States after the effective date of this Proclamation shall be eligible for preferential treatment under the GSP.

(3) This Proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the sixtieth (60th) day following the date of the publication of this Proclamation in the **Federal Register**.

VOL 52 ISS 250 DEC 30 1987 UMI

IN WITNESS WHEREOF, I have hereunto set my hand this 24th day of Dec., in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Proclamation 5759 of December 24, 1987

Increasing the Rates of Duty on Certain Products of the European Community

By the President of the United States of America

A Proclamation

1. I have determined, pursuant to section 301(a) of the Trade Act of 1974, as amended (the Act) (19 U.S.C. 2411), that the "Council Directive Prohibiting the Use in Livestock Farming of Certain Substances Having a Hormonal Action" (the Directive), adopted in December 1985 by the European Community (EC), is inconsistent with the provisions of, or otherwise denies benefits to the United States under, a trade agreement; or is unjustifiable or unreasonable and constitutes a burden or restriction on United States commerce. Unless European Community member states are allowed derogations to continue their present importation practices, the Directive will prohibit imports into the European Community of any meat produced from animals treated with growth hormones, effective January 1, 1988, thereby severely disrupting exports of United States meat to the European Community. The need for such a prohibition is not supported by valid scientific evidence. Accordingly, the United States considers that the Directive constitutes a disguised restriction on international trade.

2. Section 301(a)(1) of the Act (19 U.S.C. 2411(a)(1)) authorizes the President to take all appropriate and feasible action within his power to enforce the rights of the United States under any trade agreement, and to respond to any act, policy, or practice of a foreign government or instrumentality that he determines is inconsistent with the provisions of, or otherwise denies benefits to the United States under, a trade agreement, or is unjustifiable, unreasonable, or discriminatory and burdens or restricts United States commerce. Section 301(b) of the Act (19 U.S.C. 2411(b)) authorizes the President to suspend, withdraw, or prevent the application of benefits of trade agreement concessions with respect to, and to impose duties or other import restrictions on, the products of such foreign government or instrumentality for such time as he determines appropriate. Pursuant to section 301(a)(2) of the Act (19 U.S.C. 2411(a)(2)), such actions can be taken on a nondiscriminatory basis or solely against the foreign government or instrumentality involved. Section 301(d)(1) of the Act (19 U.S.C. 2411(d)(1)) authorizes the President to take action on his own motion.

3. I have decided, pursuant to subsections 301(a), (b), and (d) (1) of the Act, to increase United States imported duties on certain articles the product of the European Community, as described in the Tariff Schedules of the United States and set forth in Annex A to this Proclamation. In the event that the Tariff Schedules of the United States are superseded by the Harmonized Tariff Schedule of the United States, I have decided to increase United States import duties on the articles listed in Annex B that are the product of the European Community. I have further determined to suspend the application of increased duties so long as the European Community member states continue their present importation practices with respect to United States exports of relevant meat products.

VOL 52 ISS 250 DEC 30 1987 UMI

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including but not limited to subsections 301(a), (b), and (d) (1) and section 604 of the Act (19 U.S.C. 2483), do proclaim that:

(1) Subpart B of part 2 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is modified as set forth in Annex A to this Proclamation.

(2) In the event that the Tariff Schedules of the United States are superseded by the Harmonized Tariff Schedule of the United States, the latter shall be modified as set forth in Annex B to this Proclamation as of the effective date of that Schedule.

(3) The United States Trade Representative is authorized to suspend, modify, terminate, or terminate the suspension of the increased duties imposed by this Proclamation, upon publication in the **Federal Register**, of his determination that such action is in the interest of the United States.

(4) This Proclamation, including the imposition of increased duties and their immediate suspension, shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after January 2, 1988.

IN WITNESS WHEREFOF, I have hereunto set my hand this 24th day of Dec., in the year of our Lord nineteen hundred and eighty-seven, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

ANNEX A

Subpart B of part 2 of the Appendix to the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) is modified by inserting the following new items and superior heading thereto, with the material inserted in the columns entitled "Item", Articles", "Rates of Duty 1", and "Rates of Duty 2":

	"Articles the product of the European Community (Belgium, Denmark, France, the Federal Republic of Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, and the United Kingdom)		
946.40	Beef, without bone (except offal), fresh, chilled, or frozen (provided for in item 106.10, part 2B, schedule 1)	100% ad val.	No change
946.41	Pork hams and shoulders, prepared or preserved, not boned and cooked and packed in airtight containers (provided for in item 107.30, part 2B, schedule 1)	100% ad val.	No change
946.42	Tomatoes (except paste), whether or not reduced in size, packed in salt, in brine, or otherwise prepared or preserved (provided for in items 141.65 and 141.66, part 8C, schedule 1)	100% ad val.	No change
946.43	Soluble or instant coffee extracts, essences, and concentrates (containing no admixture of sugar, cereal, or other additive) (provided for in item 160.20, part 11A, schedule 1)	100% ad val.	No change
946.44	Fruit juices not specially provided for, concentrated or not concentrated, whether or not sweetened, not mixed and not containing over 1.0 percent of ethyl alcohol by volume (provided for in item 165.55, part 12A, schedule 1)	100% ad val.	No change
946.45	Other fermented alcoholic beverages, containing less than 7 percent alcohol by volume (provided for in item 167.50, part 12C, schedule 1)	100% ad val.	No change
946.46	Pet food packaged for retail sale, of by-products obtained from the milling of grains, mixed feeds, and mixed-feed ingredients (provided for in item 184.70, part 15C, schedule 1)	100% ad val.	No change
946.47	Intestines, weasands, bladders, tendons, and integuments, not specially provided for (except sheep, lamb, and goat), prepared for use as sausage casings (provided for in item 190.58, part 15F, schedule 1)	100% ad val.	No change"

ANNEX B

Subchapter III of chapter 99 of the Harmonized Tariff Schedule of the United States (HTS) (19 U.S.C.) is modified by inserting the following new subheadings and superior description, with the material inserted in the columns entitled "Heading/Subheading", "Article Description", "Rates of Duty 1 General" and Rates of Duty 2", respectively:

	"Articles the product of the European Community (Belgium, Denmark, France, the Federal Republic of Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, and the United Kingdom)		
9903.23.00	Beef, without bone (except offal), fresh, chilled, or frozen (provided for in subheadings 0201.30.60, and 0202.30.60)	100% ad val.	No change
9903.23.05	Pork hams and shoulders (except those that have been boned and cooked and packed in airtight containers), processed or otherwise prepared or preserved (provided for in subheadings 0210.11.00, 1602.41.90, and 1602.42.40)	100% ad val.	No change
9903.23.10	Intestines, weasands, bladders, tendons and integuments, not specially provided for (except sheep, lamb and goat), prepared for use as sausage casings (provided for in subheading 0504.00.00)	100% ad val.	No change
9903.23.15	Tomatoes, prepared or preserved otherwise than by the processes specified in chapters 7 or 11 or in heading 2201 (provided for in subheadings 2002.10.00, 2002.29.00, nad 2103.20.40)	100% ad val.	No change
9903.23.20	Soluble or instant coffee extracts, essences and concentrates (containing no admixture of sugar, cereal, or other additive) (provided for in subheading 2101.10.20)	100% ad val.	No change
9903.23.25	Other fermented alcoholic beverages, containing less than 7 percent alcohol by volume (provided for in subheading 2206.00.90)	100% ad val.	No change
9903.23.30	Fruit juices not specially provided for, concentrated or not concentrated, whether or not sweetened, not mixed and not containing over 0.5 percent of ethyl alcohol by volume (provided for in subheading 2209.80.60)	100% ad val.	No change
9903.23.35	Pet food packaged for retail sale, of byproducts obtained from the milling of grains, mixed feeds, and mixed-feed ingredients (provided for in subheadings 2309.10.00)	100% ad val.	No change"

Memorandum of December 24, 1987

Action Concerning the Generalized System of Preferences

Memorandum for the United States Trade Representative

Pursuant to subsections 502(b)(7), 502(c)(7), and section 504 of the Trade Act of 1974, as amended (the Act) (19 U.S.C. 2462(b)(7), 2462(c)(7) and 2464), I am hereby acting to modify the application of duty-free treatment under the Generalized System of Preferences (GSP) currently being afforded to Chile.

Specifically, after considering various private sector requests for review concerning worker rights in Chile, and in accordance with section 502(b)(7) of the Act, I have determined that Chile, which was previously designated as a beneficiary country, is not taking steps to afford internationally recognized worker rights. Therefore, I intend to notify the Congress of the United States and the Government of Chile of my intention to suspend indefinitely the GSP eligibility of Chile.

This determination shall be published in the **Federal Register**.

Memorandum of December 24, 1987

Determination Under Section 301 of the Trade Act of 1974

Memorandum for the United States Trade Representative

I have determined, pursuant to section 301(a) of the Trade Act of 1974, as amended (the Act) (19 U.S.C. 2411), that the "Council Directive Prohibiting the Use in Livestock Farming of Certain Substances Having a Hormonal Action" (the Directive), adopted in December 1985 by the European Community (EC), is inconsistent with the provisions of, or otherwise denies benefits to the United States under, a trade agreement; or is unjustifiable or unreasonable and constitutes a burden or restriction on United States commerce. I have also determined, pursuant to subsections 301(a), (b), and (d)(1) of the Act, to increase U.S. customs duties on certain products of the European Community. I am taking this action to enforce United States rights under a trade agreement and to respond to unjustifiable or unreasonable acts, policies, and practices of the European Community that burden or restrict United States commerce. However, I have determined to suspend the application of increased duties so long as the EC permits its member states to continue their present importation practices with respect to United States exports of relevant meat products.

Statement of Reasons

The European Community adopted the Hormone Directive in December 1985. It is scheduled to become effective with respect to imports on January 1, 1988. Unless EC member states are allowed derogations to continue their present importation practices, implementation of the Directive will prohibit imports into the European Community of any meat produced from animals treated with growth hormones, thereby severely disrupting exports of U.S. meat to the European Community. Such a prohibition is not supported by valid scientific evidence. Accordingly, the United States considers that the imposition of import restrictions under the Directive constitutes a disguised restriction on international trade.

The United States has repeatedly protested the Directive both bilaterally and within the framework of the Agreement on Technical Barriers to Trade ("Standards Code") of the General Agreement on Tariffs and Trade (GATT). In January 1987, the United States requested consultations with the EC under Article 14.1 of the Standards Code. These consultations were held in February and April without satisfactory results. On April 29, 1987, the United States requested the GATT Committee on Technical Barriers to Trade to investigate the matter. The Committee met in May, June, July, and September. That investigation failed to yield a solution because of EC insistence, against the weight of scientific evidence, that consumption of meat from animals treated with growth hormones is dangerous to human health. On July 15, 1987, the United States asked for the formation of a Technical Experts Group (TEG) under Article 14.9 of the Standards Code, in order to examine the scientific basis, if any, for the EC claim. The EC blocked, and continues to block, the formation of such a group of experts. Additional consultations have failed to yield meaningful progress on the underlying issue. Accordingly, it is appropriate to proclaim countermeasures.

However, the European Community has provided assurances that all member states will be permitted to continue, and will continue, their present practices with regard to the importation of U.S. meat products for an additional 12 months. Therefore, I am suspending the application of those measures so long as the EC member states continue their present importation practices with respect to United States exports of relevant meat products. I expect the European Community to allow appropriate dispute settlement procedures to proceed expeditiously.

On November 25, 1987, I announced my intention to raise customs duties to a level of 100 percent ad valorem on as much as $100 million in EC exports to the United States in response to the implementation of the Directive. I also announced that the products against which retaliatory action would be taken would be selected after a comment period ending on December 11, 1987. Finally, I announced that the sanctions would be effective soon after January 1, 1988, unless the EC had acted by that time to ensure that the Directive does not impede United States meat exports.

This determination shall be published in the **Federal Register.**

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

1 CFR Part 305

Recommendations Regarding Administrative Practice and Procedure

AGENCY: Administrative Conference of the United States.

ACTION: Recommendations.

SUMMARY: The Administrative Conference of the United States, at its Thirty-fifth Plenary Session, adopted seven recommendations.

Recommendation 87-6, State-Level Determinations in Social Security Disability Cases, encourages the Social Security Administration to continue its demonstration projects with face-to-face hearing procedures for state-level disability determinations.

Recommendation 87-7, A New Role for the Social Security Appeals Council, sets forth steps the Social Security Appeals Council should take to decrease its caseload to enable it to play a more significant role in developing and implementing adjudicatory principles and decisional standards for the disability determination process.

Recommendation 87-8, National Coverage Determinations Under the Medicare Program, urges the Health Care Financing Administration (HCFA) (in the Department of Health and Human Services) to publicize its procedures and criteria for making nationally applicable determinations on what medical procedures and technologies are covered by the Medicare program. The Conference also urges HCFA to provide for some opportunity for the public to comment on all national determinations and to specify the types of coverage determinations that will be left to Medicare contractors and regional offices. Finally, the Conference urges Congress to consider modifying statutory limitations on administrative and judicial review of national coverage determinations.

Recommendation 87-9, Dispute Procedures in Federal Debt Collection, offers advise to agencies on integrating effective debt collection with the requirements of procedural due process, and seeks to reduce uncertainty over the relationship of the Debt Collection Act to the Contract Disputes Act.

Recommendation 87-10, Regulation by the Occupational Safety and Health Administration, recommends a variety of procedures (including generic rulemaking) which OSHA should use to increase the effectiveness of its regulation. In addition, the recommendation sets forth statutory changes that Congress should consider making if OSHA's administrative reforms do not achieve effective regulation.

Recommendation 87-11, Alternatives for Resolving Government Contract Disputes, calls on Congress, the Executive, boards of contract appeals, and major contracting agencies to take steps to create an atmosphere in which alternative means of dispute resolution can be readily employed, and it further offers advice on using ADR methods, locating neutrals, and training relevant personnel.

Recommendation 87-12, Adjudication Practices and Procedures of the Federal Bank Regulatory Agencies, recommends steps the federal bank regulatory agencies should take to increase the consistency of, and otherwise improve, their decisions in enforcement adjudications.

Recommendations of the Administrative Conference are published in full text in the **Federal Register** upon adoption. Complete lists of recommendations and statements, together with the texts of those deemed to be of continuing interest, are published in the *Code of Federal Regulations* (1 CFR Parts 305 and 310).

DATES: These recommendations were adopted December 17-18, 1987, and issued December 23, 1987.

FOR FURTHER INFORMATION CONTACT: Jeffrey S. Lubbers, Research Director (202-254-7065).

SUPPLEMENTARY INFORMATION: The Administrative Conference of the United States was established by the Administrative Conference Act, 5 U.S.C. 571-576. The Conference studies the efficiency, adequacy, and fairness of the administrative procedures used by federal agencies in carrying out administrative programs, and makes recommendations for improvements to the agencies, collectively or individually, and to the President, Congress, and the Judicial Conference of the United States (5 U.S.C. 574(1)).

At its Thirty-fifth Plenary Session, held December 17-18, 1987, the Assembly of the Administrative Conference of the United States adopted seven recommendations, the texts of which are set out below. These texts will be transmitted to the affected agencies and, if so directed, to the Congress of the United States. The Administrative Conference of the United States has advisory powers only, and the decision on whether to implement the recommendations must be made by each body to which the various recommendations are directed.

The transcript of the Plenary Session will be available for public inspection at the Conference's offices at Suite 500, 2120 L Street, NW., Washington, DC.

PART 305—RECOMMENDATIONS OF THE ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

1. The authority citation for Part 305 continues to read as follows:

Authority: 5 U.S.C. 571-576.

2. The table of contents to Part 305 of Title 1 CFR is amended to add the following new sections:

Sec.
305.87-6 State-Level Determinations in Social Security disability cases
305.87-7 A new role for the Social Security Appeals Council
305.87-8 National coverage determinations under the Medicare Program
305.87-9 Dispute procedures in Federal debt collection
305.87-10 Regulation by the Occupational Safety and Health Administration
305.87-11 Alternatives for resolving Government contract disputes
305.87-12 Adjudication practices and procedures of the Federal Bank Regulatory Agencies

3. New §§ 305.87-6 through 305.87-12 are added to Part 305 to read as follows:

VOL 52 ISS 250 DE 30 1987 UMI

§ 305.87-6 State-Level Determinations in Social Security disability cases.

In Fiscal Year 1986, nearly two and one half million individuals applied for disability benefits under two federal programs administered by the Social Security Administration: Retirement, Survivors, Disability and Health Insurance (RSDHI), and Supplemental Security Income (SSI). Payments made annually to their seven million beneficiaries totalled twenty-nine billion dollars during that period. Certain aspects of this enormous benefit program have recently been subject to close scrutiny to determine whether greater efficiency is possible.

In order to be eligible for either program, a claimant must meet medical and other criteria. The RSDHI program operates as an insurance plan. A worker qualifies by earning a sufficient amount of wages for a required period of time. By contrast, the SSI program is a welfare program whose non-medical criteria are met by a demonstration of need.

If a claimant meets the criteria for either plan, he or she must then meet the medical criteria for disability in order to establish eligibility for benefits. The basic statutory test is identical for both RSDHI and SSI:

"Inability to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 42 U.S.C. §§ 423(d)(1)(A); 1382c(a)(3)(A). [See also 43 U.S.C. § 423(d)(2)(A) which liberalizes the work requirement somewhat.]"

Claimants begin the application process by filing an application at a Social Security Administration office. If a claimant meets the non-medical criteria, the file is then forwarded to a federally-funded and SSA-regulated state Disability Determination Service (DDS) for a determination as to disability. A two-person team consisting of a "disability examiner" and medical consultant (a physician employed by DDS) reviews the medical evidence and reaches its decision. The claimant is not present at any time during the process.

A claimant who is dissatisfied with the initial determination (about 60% are denials) has 60 days in which to seek a reconsideration. Reconsiderations are also performed at the state DDS level, and are essentially a repeat of the initial determination process, but with different personnel acting as decisionmakers. The record may be supplemented at this time, but as with the initial determination process, the claimant does not appear. In FY 1986, about 40% of denied claimants (totalling 380,000) sought reconsideration and about 17% of those received favorable re-determinations.

Further review is available at the ALJ and Appeals Council stages. See Recommendation 87-7 for a description of these later review stages.

Several areas pertaining to the disability determination, hearing and review process have been subject to criticism. First, the current system, with its four tiers of successive review, often results in the replacement of one decisionmaker's determination with that of the next, but without necessarily improving the quality of any of the actual decisions. Second, because there is little cost to filing an administrative appeal (and everything to gain in doing so), there is correspondingly little incentive for a claimant to accept any unfavorable determination as final. Accordingly, there is a wide stream of cases all the way to the end of the process. Moreover, claimants whose cases are decided without a personal appearance before the decisionmaker (as is the case in three of the four review stages) frequently feel dissatisfied with the process, that they have not received their "day in court."

In addition, courts, members of Congress, and the system's clients have all indicated that their confidence in the system has deteriorated to the point that its integrity has suffered. The public's faith in the institution is essential to its success in the long run.

In efforts to improve the administration of the state-level determination process, the stage at which the caseload stream is the widest, Congress and SSA have engaged in some modifications of the system as well as some experimental procedures. By 1983, a large increase in appeals from terminations of benefits in continuing disability review (CDR) cases had begun to flood the system. In such cases SSA performs reviews on existing beneficiaries to determine whether the disability still exists. If the determination is negative, a notice of termination is sent, triggering the above-described review process. Congress reacted to this by passing Pub. L. 97-455, which gave the option to claimants of an "evidentiary hearing" at the reconsideration stage in all CDR cases. Although a moratorium in CDR cases slowed the institution of this procedure, it is now in place and specially trained hearing officers are conducting these relatively formal proceedings.

In 1984 (Pub. L. 98-460), Congress mandated demonstration projects in selected DDS offices to try a one-step proceeding, allowing a personal interview but eliminating the reconsideration step. In five states, the interview was to be used in initial determinations, and in five other states it was to be used in place of the evidentiary hearing in CDR cases. These demonstration projects are currently underway, and results are limited. Although preliminary, the experience with evidentiary hearings and the demonstration projects with personal interviews give rise to the following conclusions:

—Face-to-face procedures are more satisfactory to claimants than are paper reviews, resulting in claimants feeling that they received a fair hearing;

—Face-to-face procedures are helpful to decisionmakers, in many instances providing them with evidence not ascertainable from the paper file.

If the final results of the demonstration projects are consistent with these initial findings, it is probable that by implementing some kind of a face-to-face proceeding at the state level, awards of benefits that ultimately would be made later in the system will be made at the outset. This will have the effect of decreasing the caseload at later levels, both for ALJs and the Appeals Council, and for federal courts. Overall costs to the system would thereby be reduced as well.

At the request of the Social Security Administration, the Administrative Conference has undertaken a preliminary review of the disability determination process at the state level. The Conference makes the following Recommendations, based on that study.

Recommendation

The Conference supports Congressional and Social Security Administration (SSA) efforts to improve the procedure by which initial and reconsidered disability determinations are made by state Disability Determination Service (DDS) offices. Although existing experience with use of evidentiary hearings at reconsideration is sparse, and experiments using a single-step determination (after a personal interview, but without reconsideration) are at an early stage, some preliminary suggestions can be made to SSA:

1. Experiments and demonstration projects concerning use of face-to-face procedures at the initial determination stage should be continued and encouraged. SSA should conduct thorough and careful evaluations of both the evidentiary hearing procedure now used in continuing disability review (CDR) cases and the personal interviews now being tried in selected state demonstration projects and should make prompt reports to Congress.

2. Full implementation of evidentiary hearings (for other than CDR cases) or personal interviews (either at the initial or reconsideration stage) should await the final report on the current experiments by the Department of Health and Human Services (HHS).

3. HHS's reports concerning the use of face-to-face procedures should include consideration of the cost of full implementation of evidentiary hearings or personal interviews at the initial or reconsideration stage. Should cost considerations militate against full implementation of such hearings or interviews, SSA should consider the feasibility and fairness of permitting some kind of a hearing or interview on a discretionary basis subject to appropriate published guidelines where either the claimant's file, type of medical condition or the opinion of the examiner indicates that such a procedure would be of significant assistance to the ultimate determination.

4. In analyzing the results of the procedures and the ongoing experiments at the DDS level, SSA should develop accurate measures of efficiency and associated record-keeping requirements. Specifically, such measures of processing time should take into account post-interview time expended waiting for third party responses to requests for additional case development. Any measures of efficiency adopted by SSA should not serve to discourage the use of comprehensive interviews.

5. In analyzing the procedures and ongoing experiments (and in any future analyses), SSA should review the reasonableness of variations between DDS offices in their award rates and other aspects of case handling, in light of state-by-state variables that can affect the disability determination process.

6. SSA should proceed with caution before taking the position that face-to-face hearings or interviews at the DDS level would be an adequate substitute for the opportunity for an adjudicatory hearing before a SSA administrative law judge (ALJ). Rather, such modifications to the DDS process should be seen as a possible way of reducing the number of appeals to the later stages of the process.

7. Close scrutiny should be given to any legislative or other proposals to completely eliminate the reconsideration stage, taking into account the impact of that step on overall processing costs, and on the caseload at the ALJ stage. Any such proposals to convert the two DDS stages into a single stage should consider the need to allow some type of a face-to-face proceeding at that stage, as provided for in the demonstration projects.

8. Before instituting evidentiary hearings (for other than CDR cases) or personal interviews in all DDS offices, SSA should consider (a) decentralization of DDS offices into decisional units to minimize travel costs and (b) the need to select and train a sufficient number of personnel qualified to conduct such hearings or interviews.

9. The record in disability appeals should not be closed until completion of the ALJ stage—that point in the process at which claimants now are more likely to be represented by attorneys or other advocates.

10. SSA should conduct a study of: (a) The reference sources of claimants (e.g., referrals from state welfare agencies, private insurance carriers, etc.) to determine whether such referrals are a source of excessive numbers of claims that are later determined to be unmeritorious, (b) the nature of "dropouts," claimants who fail to pursue their appeal rights, to determine why this occurs, and (c) the number of claimants who reapply in lieu of appealing, and the reasons therefor.

§ 305.87-7 A New role for the Social Security Appeals Council.

The Social Security disability system is described generally in Recommendation 87-6 which focuses on the initial determination process at the state-level Disability Determination Service (DDS) offices. This Recommendation addresses the later stages of review by the Social Security Administration (SSA).[1]

The first stage of review by federal decisionmakers is the third step in the process for disability claimants. Claimants disappointed after state-level initial and reconsideration determinations may then demand a hearing before an administrative law judge (ALJ) employed by the Social Security Administration. About 65% of such claimants do so. This is the first time in the process (except in certain demonstration projects or cases involving the termination of benefits) that a claimant has a face-to-face encounter with the decisionmaker. The hearings are de novo, and generally follow Administrative Procedure Act guidelines. Approximately 50% of appeals taken to an ALJ hearing result in the award of benefits.

The fourth, and final, level of administrative review is to the Social Security Appeals Council. This twenty member body, created by regulation, and chaired by the Associate Commissioner for Hearings and Appeals, disposes of a staggering 50,000 cases annually. (About 40% of claimants who lose at the ALJ stage appeal.) In addition to appeals from ALJ decisions, the Appeals Council reviews, on its "own motion," selected cases where there has been a grant of benefits. The Appeals Council relies on analysts in its companion unit, the Office of Appeals Operations (OAO), to screen cases and make recommendations concerning disposition of the cases. Council members hold the same salary grade level as SSA ALJs. They perform purely a paper review on cases that are forwarded to them by OAO and assigned to them individually based on the geographical origin of the case. The Appeals Council acts on each appeal, although in most cases the request for review is summarily denied or dismissed. Because of the demands on each member (up to 500 cases per member per month), a typical case is likely to receive less than 15 minutes of paper review by the member. The Council almost never sits in panels or conducts oral arguments. In recent years, approximately 5% of the cases reviewed result in reversals (i.e., awards of benefits), and another 7 to 15% are remanded to the ALJ.

After exhaustion of state and federal administrative remedies, a claimant may seek judicial review in the federal district court. In the years 1981 to 1986 the number of new SSA disability cases filed in the courts ranged from 9,000 to 26,000 per year.

In past years, the Appeals Council has to some extent played a policy-relevant role. Yet, as its caseload increased, it was by necessity limited to a narrow case correction function. Accordingly, its members had little time to devote to policy matters. Recently, the Appeals Council has come under attack from many fronts, including Congress, claimants and their representatives, and academicians, who have questioned both the Appeals Council's usefulness as an additional step in the adjudicative chain and the resulting delays caused to claimants who wish to proceed to court.

Critics have complained that the rate of reversals is so low that it fails to compensate for the additional delay caused to claimants who wish to seek judicial review. The Conference's study noted that because its members are so driven by the "tyranny of the caseload," it has failed to take advantage of its unique position as the final administrative review body—one that sees a diverse number of disability cases, and accordingly, can detect emerging problems, and identify new issues to be resolved and policies to be developed. Thus, any capabilities it should have in promoting consistency of lower-level decisionmaking, and policy integrity throughout the system, are thwarted, and it is left with little more than a case-handling role.

The Social Security Administration requested the Administrative Conference to study and analyze the operation of the Appeals Council.

Serious consideration was given to recommending outright abolition of the Appeals Council. This view was premised on the Appeals Council's present inability to do little more than add one more layer to the already-lengthy review bureaucracy. (This criticism was not intended as a denigration of Appeals Council members, whom the study found to be competent, dedicated, and cooperative.) Before recommending such a drastic, and irreversible step, however, the Conference felt that an attempt should be made to use the unique perspective and expertise of the Appeals Council to help correct the existing problem. The Conference believes that fundamental changes are needed to reduce the Council's caseload to a more manageable volume, so that individual cases can be given more attention and the Council can be a significant contributor to agency policymaking. Accordingly, to implement a system-reform function for the Appeals Council, the Conference makes the following Recommendations for modification of its structure, purpose and operations.

While the recommendation anticipates a reduced volume of cases for the Appeals Council, the Conference believes that improved fact-finding will result from the changes in initial determinations (*see* Recommendation 87-6), and that this will compensate for diminished factual review at the Appeals Council stage.

Recommendation

1. The Social Security Administration (SSA) should, as soon as feasible, restructure the Appeals Council in a fashion that redirects the institution's goals and operation from an exclusive focus on processing the stream of individual cases and toward an

[1] The Conference has previously addressed elements of the Social Security appeals process (focusing primarily on the ALJ hearing stage) in Recommendation 76-2, Procedures for Determining Social Security Disability Claims, 1 CFR 305.76-2.

BEST COPY AVAILABLE

emphasis on improved organizational effectiveness. To that end, the Appeals Council should be provided the authority to reduce significantly its caseload and also be given, as its principal mandate, the responsibility to recommend and, where appropriate, develop and implement adjudicatory principles and decisional standards for the disability determination process. In particular, SSA should adopt the following structural reforms to improve the Appeals Council's ability to perform its new function.

a. *Focus on System Improvements.* SSA should make clear that the primary function of the Appeals Council is to focus on adjudicatory principles and decisional standards concerning disability law and procedures and transmit advice thereon to SSA policymakers and guidance to lower-level decisionmakers. Thus the Appeals Council should advise and assist SSA policymakers and decisionmakers by:

(1) Conducting independent studies of the agency's cases and procedures, and providing appropriate advice and recommendations to SSA policymakers; and

(2) Providing appropriate guidance to agency adjudicators (primarily ALJs, but conceivably DDS hearing officers in some cases) by: (a) Issuing, after coordination with other SSA policymakers, interpretive "minutes" on questions of adjudicatory principles and procedures, and (b) articulating the proper handling of specific issues in case review opinions to be given precedential significance. The minutes and opinions should be consistent with the Commissioner's Social Security Rulings. Such guidance papers should be distributed throughout the system, made publicly available, and indexed.

b. *Control of its Caseload.* On order to fulfill its responsibility to develop, and to encourage utilization of, sound decisional principles and practices throughout SSA, the Appeals Council must be empowered to exercise its review sparingly, so that it may concentrate its attention on types of cases identified in advance by the Appeals Council. These types of cases might include a small sample of random cases or categories identified by the Secretary of Health and Human Services from time to time. To that end, the Secretary should direct the Appeals Council to design a new review process, subject to the Secretary's approval, that would continue to be part of the available administrative remedy for a claimant dissatisfied with an administrative law judge's (ALJ's) initial decision, but that would enable the Appeals Council to deny a petition for review if the issues it sought to raise are deemed inappropriate for the Appeals Council's attention. If a petition for review is denied, the ALJ's decision should be deemed to be final agency action.

c. *Improved Review of Individual Cases.* The Appeals Council, given a reduced caseload, should upgrade its handling of individual cases. In particular the Council should:

(1) Work more collaboratively, including as appropriate, considering cases en banc or in panels;

(2) Encourage claimant's representatives to submit briefs (including *amicus* briefs) on selected issues and evaluate the benefits of encouraging oral arguments in appropriate cases (utilizing existing authority to reimburse participants as necessary);

(3) Write more elaborate opinions, providing better reasoning and legal analysis and relying less on boilerplate and verbatim recitation of records;

(4) Avoid substitution of judgment on ALJ factual determinations; [2]

(5) Significantly reduce the time needed to initiate or deny review of cases and issue a final decision in most cases within 90 days of accepting review, unless an extension or delay request by a claimant is granted for good cause; and

(6) Specify that once the period for accepting review has passed, ALJ decisions should be deemed to be final agency action, and should be subject to reopening by the Appeals Council only in accordance with existing standards.

d. *Enhancement of Status of Appeals Council.* SSA should improve the status of the Appeals Council and insure high caliber appointment by:

(1) Reducing the size of the Council so that the Council can meet and act more collegially;

(2) Upgrading the salary level of members so that it is one level above SSA ALJs;

(3) Providing the members, by regulation, with the same civil service protections as accorded to career service personnel and by providing ALJs who agree to serve on the Council with assurances that they will receive reappointment to their former position upon completion of service; and

(4) Establishing merit selection criteria for appointment to the Appeals Council, giving preference to prior experience as an ALJ.

e. *Enhancement of Support Systems.* SSA should improve the support system provided to its Appeals Council by reorganizing the Office of Appeals Operations, providing law clerks to assist members, and updating production and communication systems.

f. *Enhance the Appeals Council's Visibility.* The Appeals Council should enhance its visibility both inside and outside the agency by reinstating the "visiting ALJ" program,[3] instituting exchange programs with other SSA components, seeking publication of precedent by a recognized reporter service, and encouraging other outreach and bar-related activities.

2. If the reconstituted Appeals Council does not result in improved policy development or case-handling performance within a certain number of years (to be determined by Congress and SSA), serious consideration should be given to abolishing it.

§ 305.87–5 National coverage determinations under the Medicare Program.

In 1986, the Administrative Conference undertook a broad overview of the administrative procedures employed by the federal government (primarily the Health Care Financing Administration within the Department of Health and Human Services) in administering and deciding appeals under the Medicare program. Recommendation 86–5, *Medicare Appeals*, 1 CFR 305.86–5, urged the Health Care Financing Administration (HCFA) to improve its system for publishing, updating, and making accessible the standards, guidelines and procedures used in making coverage and payment determinations in the Medicare program. The recommendation also suggested some improvements in the administrative appeals system and listed some fruitful areas for further research.

This recommendation builds on Recommendation 86–5 by focusing on a major aspect of the Medicare program: the making of policy concerning what aspects of medical care are covered by, and therefore reimbursable by, the Medicare program. Implementation determinations must be made every day on a case-by-case basis by Medicare contractors (peer review organizations, carriers and fiscal intermediaries such as Blue Cross). In most of these cases the coverage question involves a determination of whether an item or service was medically necessary for the individual or was furnished in the appropriate setting. Typically, the Medicare contractor has considerable discretion in ruling on individual claims although that discretion is bounded by policy pronouncements made in various ways by HCFA. If an individual claim for reimbursement is denied by the Medicare contractor, the claimant (whether a beneficiary or provider of care) may appeal the denial of claims over $500 to an administrative law judge and then further appeal to a federal district court for claims over $1,000. Recent legislative restrictions, however, have further limited claimant's opportunities to challenge coverage determinations in court or before an ALJ, and it is difficult for equipment manufacturers to participate in or challenge national coverage determinations even though their financial stakes can be significant.

HCFA makes coverage policy in a number of ways.[1] In some cases Medicare contractors refer questions about new medical procedures or technologies to the HCFA regional or national office which makes an informal judgment for application in that case. In other cases HCFA makes "national coverage determinations" which apply in all future similar cases. Since the beginning of the program HCFA (and its predecessor agency) have made about 200 such national determinations on medical procedures and technologies, and the number made each year is growing. However, in its recent Federal Register notice, HCFA stated that a "national coverage determination" included any coverage policy published in any HCFA manual. Such rulings are published either in the Federal Register or the *Medicare Coverage Issues Manual*, although many other coverage policies are published in other manuals that are less widely available, and are not designated as national coverage determinations.

Although the making of these national coverage determinations constitutes rulemaking, HCFA does not use a notice-and-comment procedure in most cases. HCFA's Bureau of Eligibility, Reimbursement and Coverage normally simply makes rulings on coverage determinations referred from contractors unless it determines that a medical question is presented. In such cases the question is referred to the in-house HCFA Physicians Panel which meets in private to decide on these referrals. The Physicians Panel may recommend a further referral to the Public Health Service's Office of Health Technology Assessment (OHTA). Most referrals to OHTA are in the form of informal inquiries, without public notice, after which OHTA simply conducts in-house investigations and reports back to HCFA. Requests for full OHTA assessments, on the other hand, usually result in a Federal Register notice, and widespread consultation with affected groups. In either event OHTA makes a recommendation to HCFA which then makes and publishes the determination. Only then are the OHTA findings disclosed.

Except in these "formal OHTA assessments," beneficiaries, providers and manufacturers have no opportunity to participate in this policymaking process. Nor are the criteria used by HCFA and the Medicare contractors in making this policy identified or published. Moreover, once the policy is announced, opportunities to challenge it have been severely circumscribed by the 1986 Omnibus Budget Reconciliation Act. (Pub. L. 99–509, 9341; 42 U.S.C.A. 1395ff(b)(3) (1987)). The Act provides that administrative law judges may not review national coverage determinations in administrative appeals. It also limits judicial review by providing that national coverage determinations may not be held unlawful on the grounds of violation of the AP or lack of opportunity for public comment, and further provides that reviewing courts cannot overturn a denial based on coverage determinations without first remanding to HHS for supplementation of the record.

In Recommendation 86–5, the Conference recommended that HHS "introduce more openness and regularity" into these important determinations through "(1) [d]evelopment of published decisional criteria; (2) providing for notice and inviting comments in such cases, both in HCFA's decisionmaking process and in the process by which [OHTA] supplies recommendations to HCFA; and (3) providing for internal administrative review or reconsideration of such decisions." The Conference commends the recent HCFA notice and request for comments on its procedures as a good first step, but urges that further steps be taken to open up the decisional criteria and procedure to public participation and also urges Congress to consider modifying the statutory limitations on the review of the reasonableness and the procedural fairness of such national coverage determinations.

Recommendation

1. Publication of Procedures and Criteria Through Rulemaking

The Health Care Financing Administration (HCFA) should continue its recent steps toward describing and seeking comments upon the procedures it uses for making national coverage determinations in the Medicare program. HCFA should follow its recent informational notice with a notice-and-comment rulemaking proceeding setting forth the procedures as well as all decisional criteria for making national coverage determinations.

2. Elements of the National Coverage Determination Process

HCFA's proposed and final rule on national coverage determinations procedures and criteria should:

(a) Specify the procedure by which HCFA selects coverage questions that will be considered in this process;

(b) Identify and describe what categories of coverage issues will be left to the decision of Medicare contractors and HCFA regional offices; and address the extent to which, and the manner in which, significant coverage determinations made by contractors and regional offices can be identified and disseminated more widely;

(c) Provide for the opportunity for public comment prior to promulgation (or if that is infeasible, an opportunity for comment after adoption)[4] of *all* national coverage policies whether or not the determination is referred to the HCFA Physicians Panel or to the Office of Health Technology Assessment;

(d) Establish internal management controls to facilitate the timely processing of requests from Medicare contractors and petitions filed by beneficiaries, providers and other affected persons for initiation of a national coverage determination;[5]

(e) Develop techniques to encourage the HCFA Physicians Panel, the Office of Health Technology Assessment, and the Public Health Service to respond expeditiously to referrals; and

(f) Identify all publications in which coverage policy will be published, and the method by which those publications will be made reasonably accessible to beneficiaries and other affected groups.

3. Use of Negotiated Rulemaking

In addition to providing for a national coverage decisionmaking process that accords beneficiaries, providers, equipment manufacturers and other interested parties an opportunity to have input into the formulation of specific national coverage determinations; HCFA should in appropriate cases also consider use of elements of a negotiated rulemaking procedures.[6]

4. Modification of Recent Legislative Restrictions on Administrative and Judicial Review

Congress should reconsider and, at minimum clarify its intent,[7] with regard to the recent restrictions it placed upon administrative and judicial review of national coverage determinations. In so doing, Congress should:

(a) Consider whether to clarify the restriction against administrative law judge review of national coverage

---

[1] HCFA's procedures for making national coverage policy had not been published until April 29, 1987, when under court order, the agency issued a notice in the Federal Register describing its process (though not its criteria) and sought comments.

[2] In conjunction with this reliance on the record below, the Appeals Council should not permit new evidence to be introduced without good cause, although motions to remand to the hearing stage should be permitted. See Recommendation 76–2, ¶ (c)(1); 1 CFR 305.76–2(c)(1).

[3] The visiting ALJ program allowed for one-month temporary duty by an ALJ on the Appeals Council. SSA should consider longer intra-agency details in the future.

[4] The agency should then re-evaluate the policy after receiving comments. See ACUS Recommendation 76–3, *Interpretive Rules of General Applicability and Statements of General Policy*, 1 CFR 305.76–6.

[5] See ACUS Recommendation 86–6, *Petitions for Rulemaking*, Para. 2(d), 1 CFR 305.86–6(2)(d).

[6] See ACUS Recommendations 82–4 and 85–5, *Procedures of Negotiating Proposed Regulations*, 1 CFR 305.82–4, 85–5.

[7] In particular, Congress should, for the purposes of these restrictions, clarify its definition of "national coverage determination" and explain whether or not policies other than those concerning medical procedures and technologies and published in the Federal Register or *Medicare Coverage Issues Manual* are included.

determinations [42 U.S.C.A. 1395ff(b)(3)(A)] by (i) making clear that administrative law judges may review the application of such determinations to claimants and (ii) Specifying that this limitation only applies to those national coverage determinations that are properly published and indexed, and that have been issued after an adequate opportunity for public comment.

(b) Consider repealing 42 U.S.C.A. 1395ff(b)(3)(B), which restricts judicial review of procedures used in promulgating national coverage determinations.

(c) Eliminate the provision [42 U.S.C.A. 1395ff(b)(3)(C)] that limits reviewing courts' ability to review the validity of a national coverage determination applied in a particular case without first remanding the case to the agency for supplementation of the record.

§ 305.87-9 Dispute Procedures in Federal Debt Collection

The Debt Collection Act of 1982 (DCA)[1] was passed in response to concern over the vast amount of delinquent debt owed to the federal government and the haphazard collection record of many agencies. While Congress appears to have been concerned mainly with various mass loan and loan guarantee programs, most conspicuously the student loan programs, the effects of the Act extend well beyond such programs. The Act included about a dozen provisions designed to facilitate collection, in many instances by removing obstacles created by other federal statues and case law. It also contained provisions authorizing the use of collection agencies,[2] charging of interest and penalty fees, reporting of delinquent debtors to credit bureaus, and use of IRS information to locate debtors.

While the purpose of the DCA was to enhance collection efforts, Congress was also concerned about the due process rights of debtors against whom the government was to take action. In adopting provisions for collection by offset against salaries and other money owed by the federal government, Congress provided for pre-offset opportunities for debtors to contest the relevant debts. Agencies implementing the offset authority under the DCA have used advantageously the latitude afforded under the DCA to develop a range of procedures. The Act provides two basic forms of debt collection by offset—"salary" offset and "administrative" offset—with differing procedures for each. A proceeding with an independent decisionmaker and adversary factfinding has been required in most salary offsets, and by a few agencies elsewhere. A range of less formal models, in which collection offices simply reconsider their decisions based on debtor-supplied data and other available information, has been employed in administrative offsets, i.e., those not involving the salaries of government employees.

The framework for offset dispute resolution established by the DCA, Federal Claims Collection Standards (issued jointly by the General Accounting Office and Department of Justice), and the Office of Personnel Management's Pay Administration Standards make possible reasonably adequate evaluation of disputes without seriously impeding collection of general government debts. No major changes are needed. However, the procedural requirements of the DCA and the OPM Standards are overly burdensome when applied to routine pay adjustments. Moreover, some advice to agencies on implementing their dispute processes, reducing uncertainty over the relationship of the DCA to other statutes (e.g., the Contract Disputes Act) affecting government claims, and some other issues raised by the DCA's attempt to integrate due process with effective debt collection, may be useful as agencies make greater use of their authority to collect debts.

Recommendation

1. Agency Procedures Under the Debt Collection Act

a. In connection with salary offsets, the General Accounting Office and Department of Justice should amend the Federal Claims Collection Standards[3] and the Office of Personnel Management should amend the Pay Administration Standards[4] so as to reduce the formality of procedures for handling routine adjustments of pay and travel allowances. Informal forms of review, including review on a "class" basis where a single error has a broad effect, should suffice in most cases involving computer errors, simple miscalculations, and similar kinds of mistakes or adjustments.

b. In connection with administrative offset, informal types of intra-agency review procedures appear consistent with the purposes of the DCA, and can provide a satisfactory balance between protecting debtors and assuring effective collection.[5] However, agencies should ensure, where possible, that the reviewer does not participate in the initial claims determination, particularly where a dispute involves substantive issues that go beyond allegations of mechanical or other simple kinds of error.

c. Procedures with an independent decisionmaker and adversarial factfinding may occasionally be desirable in administrative offset cases where a debtor raises relatively complex legal or factual issues or where assessments of credibility are required. However, these procedures may be needlessly burdensome for agencies even in some procedurally complex situations, such as where other proceedings with respect to the claim may be occurring and preservation of the government's flexibility is necessary. Taking into account these factors, agencies should consider whether to make use of such procedures even though apparently not required to do so by the DCA.

d. Agencies should take steps to enhance the awareness of, and access to, offset dispute procedures by debtors with limited ability to present a case in writing or otherwise cope with offset procedures. These steps may appropriately be confined to measures that are inexpensive and do not significantly interfere with efficient collection activity. Examples might include follow-up telephone calls to debtors with vague or inadequate written submissions, review of agency records to see if they support debtor allegations, and use of telephone hearings. In connection with salary offset disputes, these steps should be taken by independent hearing officials (or persons associated with them) as well as by collection staff. Experience should be monitored to see if measures to enhance accessibility of the dispute process in fact result in more debtors asserting meritorious defenses.

e. Some techniques that have been employed and should be considered to keep offset procedures expeditious and efficient are:

(i) Adoption of objective criteria to assist in making decisions respecting hardship and other potentially nebulous matters; and

(ii) Avoiding the need for oral hearings on issues of credibility by treating debtors' factual allegations as proven where

(a) Circumstances do not give rise to significant doubts as to reliability and

(b) Either the amount in dispute is small or the issue of credibility is not critical to the disputed facts.

[2] The Act was later amended to authorize, on an experimental basis, contracting with private attorneys to bring collection actions.

[3] 4 CFR Parts 101–105

[4] 5 CFR 550.1101–1106

[5] This recommendation should not be read as detracting from the procedures for resolving disputes relating to federal grants that were recommended by the Conference in Recommendation 82-2, 1 CFR 305.82-2. Where administrative offset issues are addressed at the same time as post-award grant disputes, the proceedings should include a notice, an impartial decisionmaker, an opportunity to present significant evidence and argument, and a written decision, as called for in Recommendation 82-2.

2. Clarifying the Act's Relation to Offsets in Government Contracts

a. Congress should clarify the applicability of the DCA provision on administrative offset (31 U.S.C. 3718) to make clear that government acquisition contracts are not covered, but that the government retains the right of offset to collect debts in such cases. At the same time, Congress should ensure that, under relevant agency procedures, before a contracting officer's decision can serve as the basis for offset under any other authority,

(i) The contractor receives notice of the proposed government claims and the basis for them and an informal opportunity to present its position, and

(ii) The decision is informally reviewed by an agency official not directly connected with administering the contract.

b. The withholding of funds in connection with a single contract, where final payment has not occurred, should continue to be governed by existing law.

§ 305.87-10 Regulation by the Occupational Safety and Health Administration.

This is the second of two recommendations adopted by the Administrative Conference this year on Occupational Safety and Health Administration (OSHA) regulation. In its first recommendation,[1] the Conference recommended that OSHA make specific changes in its management of rulemaking and its process for establishing regulatory priorities. At that time, the Conference accepted OSHA's request that it continue to study possible broader changes in its regulatory process, including alternatives to the traditional hazard-by-hazard[2] regulation.

Having completed this study, the Conference recommends more extensive procedural changes to assist OSHA in fulfilling its statutory mandate of assuring adequate safeguards for American workers. OSHA has promulgated a small number of safety and health standards each year using the traditional hazard-by-hazard approach.[3] But the task before the agency is overwhelming existing processes. OSHA is responsible for regulating dangerous chemicals included in the tens of thousands of chemicals in the nation's workplaces, to which approximately one thousand new chemicals are added each year. OSHA also is charged with enforcing safety standards in American workplaces.

The Conference, therefore, recommends that OSHA undertake rulemaking to develop generic or class standards, including updating the 1971 national consensus standards, where appropriate. In addition, the Conference recommends a regulatory planning process and use of other procedures to supplement its traditional rulemaking process. It is important to add, however, that the Conference has found no alternative regulatory approach that is always appropriate or better than the traditional regulation. Rather, this recommendation identifies factors or conditions that favor the use of the various alternative regulatory approaches.

One uncertainty clouding OSHA's use of generic or class rulemaking is whether OSHA can obtain the information it needs to meet the burden of proof required by the Occupational Safety and Health Act ("Act") for safety and health standards. As interpreted by the courts, OSHA is required to show that a hazard poses a "significant risk" to workers and, if so, to set the standard at a level that assures "to the extent feasible" that no employee will suffer "material impairment of health or functional capacity." If OSHA is unable to obtain the information needed for its risk and feasibility determinations, the use of generic rulemaking, as well as other internal reforms, is not likely to lead to a more efficient regulatory process.

Experience with generic or class rulemaking may show that statutory changes are required to enable OSHA to adopt this procedure. The Conference, therefore, recommends amendments of the Occupational Safety and Health Act that Congress should consider if OSHA's administrative efforts to promulgate generic standards are not successful. One recommendation is that Congress provide an expedited procedure for updating the 1971 Table Z national consensus standards. The Conference also recommends that Congress reconsider the Act's regulatory standard in light of its judicial construction and agency experience. Specifically, Congress should consider giving OSHA greater flexibility in fashioning remedies to correspond to the level of workplace risks. Congress, for example, could allow OSHA to regulate some hazards to a level of "best available technology," as the Environmental Protection Agency is allowed to do under various statutes. The Conference also recommends that the Act's rigid statutory deadlines and detailed restrictions on advisory committees be removed. A final recommendation is that Congress replace the Act's "substantial evidence" judicial review standard with a standard that reflects the nature of rulemaking decisions.

Recommendation

1. *Updating the 1971 Consensus Standards.* The Occupational Safety and Health Administration, as an interim step, should continue to update the Table Z national consensus standards adopted in 1971 if updating can be accomplished by an expedited rulemaking procedure (*e.g.*, including more concise preambles) appropriate to the nature of the revised Table. OSHA should update the 1971 standards on a generic basis (*i.e.*, include multiple standards in one proceeding) when consensus recommendations are available, which are generally accepted by employers and workers in the affected industries, and when the new standards can be evaluated on the basis of risk and feasibility information reasonably available to the agency. This interim step should not interfere with OSHA's continuing responsibility to promulgate and modify safety and health standards.

2. *Rulemaking to Develop Generic or Class Standards.* OSHA should expand its use of generic or class standards regulating multiple health and safety hazards where appropriate and consistent with its legal mandate.

a. *Industry-wide standards.* OSHA should consider the following criteria when deciding if industry-wide generic standards will be more efficient and effective than hazard-by-hazard regulation: (1) Whether hazards are in an industry that can be discretely defined, (2) whether most of the hazards to be regulated are unique to the industry to be regulated, (3) whether the hazards in the industry are relatively static over time, and (4) whether industry-wide rulemaking will impose lower aggregate compliance costs on the regulated industry than rulemaking on a hazard-by-hazard basis.

b. *Multi-hazard standards.* OSHA should consider adopting multi-hazard standards whenever scientific knowledge and policy judgment make it possible to use the same or a similar risk assessment for a group of included hazards and the feasibility analysis can be simplified or expedited because standard abatement techniques are available.

c. *Generic work-practice standards.* OSHA should consider adopting work-practice standards (*e.g.*, training, worker protective devices, and engineering controls) applicable to multiple industries when the following factors are present: (1) A similar hazard exists in the industries that can be regulated by one rule, (2) the same or a similar work-practice requirement would be effective in all such industries, and (3) generic risk and feasibility findings are appropriate.

3. *Regulatory Alternatives and Procedures.* In addition to generic or class rulemaking, OSHA should adopt the following rulemaking alternatives and procedures as appropriate:

a. *Performance standards.* OSHA should generally use performance standards (*i.e.*, standards that prescribe

---

[1] ACUS Recommendation 87-1, Priority Setting and Management of Rulemaking by the Occupational Safety and Health Administration, 52 FR 23629 (1987).

[2] As used in this recommendation, the term "hazard" without further modification refers to both safety hazards and health hazards (*e.g.*, exposure to toxic substances).

[3] During its first sixteen years, OSHA promulgated eighteen new health standards (setting permissible exposure limitations for twenty-three substances) and twenty-six safety standards.

the regulatory result to be achieved) whenever they will provide equivalent protection as that provided by design standards (*i.e.*, standards that prescribe a specific technology or precise procedure for compliance). In deciding which type of standard to employ, OSHA also should consider whether the standard can be readily understood and monitored and whether it may lower industry compliance costs.

b. *Information disclosure.* OSHA should continue to approve information disclosure requirements as a complement to regualtory standards.

c. *Negotiated rulemaking.* OSHA should continue to experiment with negotiated rulemaking procedures; [4] in so doing it should develop methods (such as specific deadlines for termination of any negotiation) to assure that the negotiated rulemaking procedure is discontinued in a timely manner if it is not working.

d. *Advisory committees.* OSHA should reactivate rulemaking advisory committees for difficult scientific and technological questions. The scientific orientation in such committees should be assured by including a high proportion of independent and government scientists on committees. In addition, questions assigned to such committees should be limited so that current statutory deadlines can be met. (*See also* section 5.c. below.) OSHA also should require its advisory committees to submit written reports which include the committee's evaluation of relevant data.

e. *Advance notice of proposed rulemaking.* OSHA should not routinely use advance notices of proposed rulemaking as an information-gathering technique; it should use an advance notice when information that is not available through other vehicles is likely to be forthcoming in response to such notice.

f. *Interagency coordination.* OSHA should continue to cooperate with other health and safety agencies and OMB to coordinate where possible the testing, evaluation, and regulation of potential health hazards.[5]

4. *Developing a Regulatory Plan.* OSHA should periodically develop and review regulatory plans which specify how the agency intends to regulate hazards on its priority lists, including identification of potential candidates for generic rulemaking, negotiated rulemaking, use of advisory committees and other regulatory approaches or techniques. To avoid duplication, OSHA should coordinate its regulatory plans with any submission required by the Office of Management and Budget.

a. *Regulatory planning committee.* OSHA should assign the initial responsibility for developing regulatory plans to an internal regulatory planning committee that includes representatives from all appropriate department and agency offices.

b. *Public availability.* OSHA should make a synopsis of the results of regulatory planning committee meetings available to the public after the Assistant Secretary has had an opportunity to review any proposed committee recommendations. In addition, OSHA should periodically provide an opportunity for public comment on its regulatory plan.

5. *Statutory Change.* OSHA should include in its periodic reports to Congress the status of its implementation of the administrative changes recommended in paragraphs 1 through 4 above. If statutory impediments or judicial decisions inhibit efficient and effective regulation, Congress should consider amendments of the Occupational Safety and Health Act, including the following:

a. *Consensus standards update.* Congress should amend the Act to provide an expedited procedure for the generic updating of the permissible exposure levels in Table Z, incorporated into OSHA standards at 29 CFR 1910.1000. This procedure, while not including all the steps specified in 29 U.S.C. 655(b) as construed by the courts, should afford an opportunity for public comment.

b. *Regulatory standard.* Congress should amend the Act to give OSHA greater flexibility in regulating workplace hazards. Following its experience in envioronmental regulation,[6] Congress should consider establishing a classification scheme that would vary OSHA's burden of justification for safety and health standards to correspond to the degree of risk posed by a hazard and the level of control to be required by the OSHA standard.

c. *Rulemaking deadlines.* Congress should amend the Act to replace the existing statutory deadlines for various stages of rulemaking with a provision requiring OSHA to set timetables or deadlines for each rulemaking proceeding.[7]

d. *Advisory committees.* Congress should amend 29 U.S.C. 656(b) to replace the detailed restrictions on standard-setting advisory committee membership with a general provision authorizing use of advisory committees subject only to the Federal Advisory Committee Act, 5 U.S.C. App.

e. *Judicial review standard.* Congress should amend the standard of judicial review for OSHA safety and health standards, 29 U.S.C. 655(f), so that agency policy judgments are subject to the traditional standard of "arbitrariness" and the factual premises on which they are based are subject to a standard of "substantial support in the administrative record viewed as a whole." [8]

[4] The Conference has previously provided guidance to agencies on the use of negotiated rulemaking, see ACUS Recommendations 82-4 and 85-5, Procedures for Negotiating Proposed Regulations, 1 CFR 305.82-4, 85-5 (1987).

[5] The need for interagency coordination of federal regulation of cancer-causing chemicals is addressed in Part II of ACUS Recommendation 82-5, 1 CFR 305.82-5 (1987).

[6] Under the Federal Water Pollution Control Act, 33 U.S.C. 1251-1376 (1982), and the Clean Air Act, 42 U.S.C. 7401-7642 (1982), Congress has authorized different classes of regulation, specified an initial designation, established a lower burden of proof for regulation that is less strict, and has indicated that the agency is to receive deference for its final choice of which class of regulation to apply. A similar approach is used for Food and Drug Administration regulation under the Medical Devices Amendments to the Food, Drug, and Cosmetic Act, 21 U.S.C. 360c-360k (1982).

[7] *See* ACUS Recommendation 76-3, Time Limits on Agency Actions, 1 CFR 305.76-3 (1987).

[8] The recommended standard follows ACUS Recommendation 74-4, 1 CFR 305.74-4, ¶¶ 3, 4 (1987). It is also consistent with the Restatement of the Scope of Review Doctrine adopted by the Administrative Law Section of the American Bar Association.

§ 305.87-11 Alternatives for Resolving Government Contract Disputes.

Government procurement is a major component of federal spending. It now comprises an important part of the nation's economy. The recent expansion of government contracting has been matched, perhaps exceeded, by the rise in disputes between agencies and contractors. Increasingly, management problems are handed over to lawyers and accountants to be resolved contentiously by criteria that are often only marginally relevant. Causal factors include increased regulatory requirements; reduced authority of agency contracting officers; a greater willingness among contractors to resort to litigation; an expanding government contracts bar; broadened notions of due process; enhanced congressional oversight that can discourage settlement; and the establishment (or expansion) of offices of inspector general and intra-agency audit offices.

Most knowledgeable government officials, contractors and attorneys agree that government contract appeals have become too onerous, too expensive and too time-consuming. Despite Congress' goals in enacting the Contract Disputes Act of 1978 ("CDA") to provide an expeditious alternative to court litigation and to encourage negotiated settlements, most appeals are not now resolved either promptly or inexpensively. Agency boards of contract appeals ("BCAs"), originally intended to be alternatives to courts, have become "judicialized," with depositions, discovery and lenghty opinions common.

The system established by the CDA [1] begins with the contracting officer ("CO"), an agency official whose function is to enter into and administer government contracts. Any claim arising out of a contract is to be presented to the CO. The CO has a dual role: to represent the government as a party to the contract, and also to make initial decisions on claims subject to certain procedural safeguards. If the dispute is not amicably resolved, the CDA requires the CO to issue a brief written decision stating his or her reasons. A contractor dissatisfied with a CO's decision may appeal either to an agency BCA or directly to the United States Claims Court. The proceedings become considerably more formal at this stage. While agency boards and their rules are hardly uniform, they typically involve written notice of appeal and complaint, discovery, depositions, subpoenas, hearings that result in transcripts, and board decisions signed by three-member panels. "Accelerated" procedures are available for claims under $50,000, and a more streamlined "expedited" process for claims under $10,000.

A variety of remedies have been prescribed for the growing cost, delay, and other problems encountered in federal disputes. They range from marginal revisions of the boards (e.g., enlargement of BCA resources), to increased professionalization of COs, to structural changes in the ways agencies do business. While a number of these proposals have merit, the Conference is focusing herein only on the cluster of methods that have come to be known as alternative means of dispute resolution ("ADR").[2] These methods are consistent with the CDA's goals, and have proven efficient and fair. They serve to involve decisionmakers, rather than their representatives, in the conflict resolution process. ADR methods have regularly aided private parties to resolve disputes similar to those decided by BCAs.

Several ADR methods are particularly appropriate to resolving many government contract claims, and a few agencies have begun to experiment successful with them. The Conference urges all major contracting agencies, and persons who deal with them, to explore seriously the potential uses for ADR and to begin creating an atmosphere in which these methods can be readily employed.[3]

[1] 41 U.S.C. 601,613; 5 U.S.C. 5108 (c)(3); 28 U.S.C. 1346(a) (2), 149(a) (2), 2401(a), 2414, 2510, 2517; 31 U.S.C. 1304(a)(3)(C) (1982); enacted November 1, 1978 by Pub. L. No. 95-563, 92 Stat. 2383.

[2] These include arbitration, factfinding, minitrial, mediation, facilitation, convening, conciliation, and negotation.

[3] The Conference has repeatedly recommended that agencies employ ADR. Recommendation 86-3 calls on agencies to make greater use of mediation, negotiation, minitrials, and other "ADR" methods to reduce the delay and contentiousness accompanying many agency decisions. *Agencies' Use of Alternative Means of Dispute Resolution*, 1 CFR 305.86-3. The Conference has previously called for using mediation, negotiations, informal conferences and similar innovations to decide certain kinds of disputes more effectively. E.g., *Procedures for Negotiating Proposed Regulations*, 1 CFR 305.82-4, 85-5; *Negotiated Cleanup of Hazardous Waste Sites Under CERCLA*, 1 CFR 305.84-4; *Resolving Disputes under Federal Grant Programs*, 1 CFR 305.82-2.

[4] Such arbitration authority should be consistent with the procedures and safeguards set forth in Conference Recommendations 86-3, *id.* and 87-5, *Assuring the Fairness and Acceptability of Arbitration in Federal Programs*, 1 CFR 305.87-5.

[5] 48 CFR Part 7

This recommendation offers advice on the application of commonly used ADR methods to post-award contract disputes before agency boards of contract appeals.

Recommendation

1. Agencies' ADR Policies and Practices

a. Congress should amend the Contract Disputes Act (1) to make indisputably clear that the contractor and the government may agree to use arbitration [4] or any other mutually agreeable ADR procedures for resolving claims relating to agency contracts and (2) to encourage COs to make all reasonable efforts to resolve a claim or dispute consensually, either prior to issuance of a CO decision or subsequently.

b. The President should promulgate an Executive Order that encourages voluntary use of ADR procedures to resolve contract disputes at the CO and BCA levels.

c. The Office of Federal Procurement Policy should issue a policy statement, and the Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council should amend the Federal Acquisition Regulation,[5] to encourage COs, before issuing a decision likely to be unacceptable to a claimant, to recommend to the parties and their representatives that they seek to explore the use of ADR to resolve their differences. The policy statement and FAR should also encourage agencies to adopt policies or rules concerning ADR, as set forth below.

d. Agencies should adopt policies encouraging voluntary use of ADR in contract disputes. The policies should place the responsibility for implementing ADR with contracting officers, government counsel, and BCA judges. These policies should make clear that superior agency officials will support reasonable settlements reached by means of properly selected ADR methods. The policy should also provide for systematic review of all cases for susceptibility to ADR, specify who has authority to approve the selection of case for ADR, and set forth guidance on documenting the negotiation processes or justifying settlements. Agencies should also consider, as a matter of general policy, offering certain forms of ADR to contractors in specified kinds of disputes (e.g., those involving less than a stated maximum amount).

e. Agencies should adopt regulations that (1) authorize agency officers to make use of ADR in contract disputes; (2) make provisions for automatically alerting the parties, both at the CO level and as soon as an appeal is filed, that one or more ADR methods is available; (3) authorize BCA judges to encourage ADR use and to require the attendance, at any conference held for the purpose of proposing or implementing ADR, of at least one representative of each party who has authority to negotiate concerning the resolution of all issues in controversy; (4) briefly describe the alternative procedures; (5) authorize the parties to agree to vary any procedural rule in their case; and (6) insure confidentiality of communications made during use of ADR methods.

f. Agency boards of contract appeals should:

(1) Routinely include in docketing notices an announcement indicating the availability of ADR, describing the available methods, and telling how interested persons can follow up to explore potential ADR use in their cases.

(2) Amend their procedural rules to provide explicitly for conferences to consider the possible use of ADR in each case to help dispose of any or all issues in dispute.

g. Presiding and chief judges at BCAs should regularly review their dockets and suggest use of a settlement judge, mediation, minitrial, or other ADR methods whenever appropriate.

2. Employing Alternatives in Contract Disputes

a. Finding Neutrals [6]

(1) To facilitate the parties' choice of appropriate neutrals, the Administrative Conference, in consultation with the Federal Mediation and Conciliation Service and other knowledgeable groups, should establish a central roster of minitrial advisors and other neutrals available to help resolve government contract disputes. Use of the list, however, should not be mandatory. The list should include, at a minimum:

(a) All persons who have experience as neutral advisors in government contracts minitrials;

[6] In Recommendation 86-8 *Acquiring the Services of "Neutrals" for Alternative Means of Dispute Resolution*, 1 CFR § 305.86-8, the Conference addressed issues involving neutrals' availability, qualifications and acquisition. The present Recommendation seeks to elaborate on 86-8 in the specific context of contract appeals.

VOL 52 ISS 250 DEC 30 1987 UMI

(b) Any BCA judges and administrative law judges who wish to serve as neutral advisors for disputes within their own agency, another agency, or both. (Some safeguards to ensure interagency reciprocity and to assure no other involvement with the dispute may be necessary); and

(c) Any retired federal or state court judges, BCA judges, and administrative law judges who are interested.

(2) Each BCA should take steps to make available its judges to serve as settlement judges, minitrial advisors, or other neutrals to help resolve disputes before other agencies' BCAs.

b. Minitrials

(1) Agencies should develop and distribute minitrial guidelines that include sections dealing with criteria for identifying appropriate cases; contents of minitrial agreements; rules as to any discovery; roles of the participants, including any neutral; authority of the principals; exchange of position papers, audit reports, quantum submissions, and other documents and exhibits; procedure and format of the hearing; possible time limit on the negotiations; fees and expenses; and procedures for ensuring the confidentiality of the proceedings. The guidelines, which should be used only as procedural suggestions, should also give each party the right to terminate the minitrial procedure at any time for any reason. Any guidelines acceptable to the parties, together with other provisions relevant to the resolution of the dispute, should be incorporated.

(2) In selecting principals to represent the agency in a minitrial, agencies should ensure that principals in the minitrial agreement:

(a) Are of sufficient rank in the agency to negotiate, and successfully defend, a binding settlement.

(b) Have authority to bind their organizations in the dispute at hand, or at least to make recommendations that will be accorded substantial weight.

(c) Ideally have little prior involvement with the case so as to be able to evaluate objectively the issues and the agency's potential liability.

(d) Have enough background to grasp the main issues quickly.

(e) Not be at such a high level that his or her involvement will detract in a major way from the agency's operations.

Agencies should meet the concerns by, among other things, tailoring the rank of the principal to suit the magnitude of the case and by encouraging ADR use earlier in the case (e.g., the CO level).

(3) Agencies should take steps to make participation as a principal an attractive career step and encourage or provide training in negotiation and mediation skills among groups of potential principals.

(4) Principals should generally have access to technical, legal, accounting, or other advice from agency staff during the hearings and negotiations so as to produce a more well-informed, defensible resolution, enhance accountability, and build intra-organizational support for any settlement. Unless secrecy in especially important, it will ordinarily be unwise to sequester most minitrial witnesses, particularly experts, since a looser format may encourage dialogs or exchanges that can help focus issues and sometimes promote agreement.

(5) Once the principals have had a chance to assess the strengths and weaknesses of both sides' positions, their negotiations should take place promptly and should be final and binding. The responsible principals ordinarily should have authority to resolve all issues before them without seeking further agency approval following the close of negotiations.

(6) While the "neutral advisor" who helps the principals at a minitrial assess the merits of a case can be quite useful, the parties should consider foregoing such aid in cases where the principals already have a good working relationship, where issues are simple or amounts small, or, conversely, where complex technical issues predominate to such an extent that it would be futile to waste time trying to educate a neutral. Neutrals probably will also be less needed where the minitrial occurs early on—for instance, at the CO level—when positions may be less rigid, formal procedures not yet invoked, and fewer parts of the agency involved. In those cases, the CO might well serve as a sort of presider-principal.

(7) A neutral advisor's role should be defined by the parties (at least tentatively) prior to the hearing by the principals. Any shift during the proceeding should be only with the concurrence of the principals.

(8) Where minitrial neutral advisors are used, the parties should consider whether to seek their assistance in any of the following ways:

(a) Presiding over the hearing;

(b) Serving as a source of information, responding to technical legal questions, or offering insights and observations on issues in controversy;

(c) Posing questions at the hearing so as to ensure that the basic facts are ascertained;

(d) Suggesting novel approaches to presenting relevant information;

(e) Working actively during the principals' negotiation sessions to aid settlement, as by advising each side on the strengths and weaknesses of its case, relevant legal principles, and how the law might apply to the facts established;

(f) Serving as a mediator;

(g) Suggesting that certain advisors or staff members be brought into the negotiations or briefed; or

(h) Providing a written, nonbinding opinion to the principals, or helping them prepare a justification for the settlement agreed on.

c. Mediation

Agency boards of contract appeals should establish mediation programs in which parties can be required to attend an initial session with a mediator. The boards should require parties to be represented at the session by a person with authority to negotiate concerning the resolution of all issues in controversy. The boards may wish to exclude from these programs certain kinds of cases. Counsel should be required, where appropriate, to provide specified documents to the mediator, and to prepare short position papers.

d. Settlement Judges

(1) Agency boards of contract appeals should institute a procedure under which a settlement judge—not the presiding judge in the case—may be appointed to preside over settlement conferences or negotiations, assess settlement potential, and work with the parties to explore possible settlement of a dispute. The settlement judge device should be capable of being invoked at the discretion of the chief judge on his or her own motion or that of any participant or the presiding judge. An order appointing a settlement judge should specify whether, and to what extent, the proceeding is suspended during the settlement negotiations and may define the scope of any negotiations to specified issues. The order may also expressly limit the period for settlement negotiations and require a brief report from the settlement judge. Each party should have the right to refuse to use the process, or to withdraw at any time.

(2) The settlement judge should be deemed to have the power to suggest privately what concessions a party should consider, to confer privately as to the reasonableness of each party's case or settlement position, and to require that representatives with authority to negotiate concerning resolution of all issues in controversy be present at the settlement conference. The settlement judge shall be prohibited from discussing the merits of a case with any other BCA judge or other person, and shall not be called as a witness in the case.

3. Documentation and Oversight

a. Agencies should offer guidance to their personnel on the degree of documentation that is appropriate to justify settlements that have been reached via ADR; the guidance should emphasize the needs for flexibility without undermining accountability. For instance, the guidance could require the principal representing the agency in negotiations or his advisor to set down cost and other factors taken into consideration, the principal elements of the negotiation, likelihood of success at trial, and other significant facts or considerations justifying any significant differences between prenegotiation objectives and negotiated result; in short, a reflection of the thought process or rationale of officials who agreed to the settlement. This documentation should not exceed what would ordinarily be used to justify negotiated settlements of contract disputes, and should generally be written after the fact so that ongoing negotiations are not jeopardized or delayed. A neutral advisor who has helped the parties resolve a potentially serious case may be asked to help draw up the justification memo, or offer a brief advisory decision.

b. Since the effectiveness of expanded reliance on ADR will depend in part on the degree of support or opposition from congressional committees and offices of inspector general, agencies should seek to document, and furnish periodically to relevant committees and oversight offices information on, the relative costs and benefits of ADR methods in cases where they have been used. Documentation should include case results, estimated savings, identities of principals and advisors, and nature of processes used.

4. Training and Outreach

a. Agencies should give priority attention to offering training in negotiation and other ADR skills to BCA judges, government attorneys, COs, and others involved in contract appeals. Training courses or seminars should be developed by agencies jointly or in cooperation with the Administrative Conference, Federal Mediation and Conciliation Service, Board of Contract Appeals Judges Association, American Bar Association, or other professional organizations. Agencies should also work with other interested groups to sponsor similar programs or outreach sessions for contractors and their representatives, and seek to incorporate materials on ADR into the training curricula for COs and project managers.

b. Agencies should designate an employee to serve as an ADR specialist in connection with contract disputes, and should consider retaining the services of a trained mediator or similar professional to review cases for susceptibility to ADR, advise BCA judges, and mediate selected cases.

§ 305.87-12 Adjudication practices and procedures of the Federal Bank Regulatory Agencies.

The five federal agencies that regulate the activities of depository institutions [1] have broad statutory enforcement authority, including the power to issue cease-and-desist orders, impose civil money penalties, or order the suspension and removal of officers. Such enforcement actions ordinarily allow the target of the proposed sanction to request a formal APA hearing before an administrative law judge.

In recent years, enforcement actions taken by the bank regulatory agencies have increased markedly, although the preponderance of these actions are taken without a formal hearing—based on consent agreements or waivers of formal hearing. The current level of formal hearings has, however, reached the point where attention should be paid to the procedures and practices of the bank regulatory agencies in this regard.

Three basic concerns have emerged from an evaluation of the formal hearing procedures of the bank regulatory agencies, which may be summarized as the need for: (1) Consistency and greater uniformity in the agencies' implementation of shared statutory reponsibilities, (2) greater accessibility of agency decisions and the basis for decisions, and (3) more efficient use of administrative law judges.

Although the Conference study did not specifically address the need for change in the division of regulatory responsibilities among the five agencies, it did conclude that the interpretation of identical or similar regulatory authorities does not appear to be inconsistent. By contrast, the formal hearing procedures of the agencies vary significantly, both in their specific provisions and in their level of detail. Moreover, all of the regulations are lacking in detail on rules concerning prehearing practice, discovery and evidence. Given the similar statutory bases for these enforcement actions, the five agencies jointly should be able to develop substantially similar rules of procedure and practice for formal enforcement proceedings.

There is currently limited publication or public dissemination of the bank regulatory agencies' enforcement decisions. This hinders counsel in advising and representing clients and makes it difficult for administrative law judges (who currently are all on loan from other agencies) to apply the complicated statutes and regulations that are involved. This situation would be remedied by improved availability or publication of appropriately redacted agency decisions. Such publication would heighten public awareness of enforcement actions which now are described only in aggregate data published in annual reports. This may be especially beneficial because the agencies have not regularly supplemented or clarified their enforcement policies through interpretive rules or policy statements.

None of the five agencies employs administrative law judges (ALJs) to hear enforcement cases. Rather, they rely exclusively on the interagency ALJ loan program administered by the Office of Personnel Management (OPM) to furnish them with needed ALJs. OPM has attempted to accommodate agency concerns by providing lengthier loan periods and repeat loans. Nevertheless, the system seems to produce needless discontinuity and inefficiency. To improve this situation, the bank regulatory agencies should, in consultation with OPM, consider the advisability of an arrangement by which a pool of administrative law judges could handle all bank regulatory agencies' formal adjudications—subject to an agency's decision to have its own ALJs, should the caseload warrant. If so, ways should be explored to effect such an arrangement. For example, one or more full-time judges could be hired by one of the agencies, which would then serve as the lending agency for the others.

Finally, the Conference urges the agencies to explore whether a pre-complaint procedure (modeled on that used by the Securities and Exchange Commission) would be appropriate in their individual circumstances and should be established. This would enable targets of enforcement investigations to file a submission to the agency head or other agency official charged with the responsibility to initiate formal enforcement proceedings, before such an action is initated.

Recommendation

The bank regulatory agencies should take the following actions to improve their formal adjudicatory processes, with respect to regulatory enforcement actions:

1. *Uniform Rules of Procedures.* The agencies should develop, so far as feasible, a uniform set of rules of practice and procedure for formal adjudications, including more explicit provisions covering prehearing practice

[1] The term "depository institutions" refers to commercial banks, savings banks and savings and loan associations, and credit unions. The five agencies are the Office of the Comptroller of the Currency (in the Department of the Treasury), the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board (including the Federal Savings and Loan Insurance Corporation), and the National Credit Union Administration. In the aggregate they will be referred to as the "bank regulatory agencies."

VOL 52 ISS 250 DEC 30 1987 UMI

and discovery rules [2] and the receipt of evidence.[3]

2. *Availability of Decisions.* The agencies should make available through regular publication, or other accessible means of dissemination, the appropriately redacted decisions and accompanying opinions issued in formal enforcement adjudications.

3. *Policy Articulation.* The agencies should supplement and periodically clarify enforcement policies set forth in adjudicative opinions by regularly articulating their enforcement policies through rules of general applicability (including interpretive rules) and policy statements.

4. *Administrative Law Judges.* The agencies, in consultation with the Office of Personnel Management, should consider the advisability of an arrangement by which a pool of administrative law judges could handle all bank regulatory agencies' enforcement adjudications required to be conducted according to the Administrative Procedure Act, and, if so, should explore ways to develop such an arrangement.

5. *Precomplaint Notice.* The agencies should explore, in their circumstances, the utility of establishing a formal or informal procedure to allow targets of investigations an opportunity to file a submission with the appropriate agency official before official action is taken to initiate an enforcement proceeding.

Jeffrey S. Lubbers,
Research Director.

Dated: December 23, 1987.

BILLING CODE 6110-01-M

OFFICE OF MANAGEMENT AND BUDGET

5 CFR Part 1303

Freedom of Information Reform Act of 1986; Revision of Fee Schedule, Fee Waiver Policy, and Law Enforcement Exemption

AGENCY: Office of Management and Budget.

ACTION: Final rule.

SUMMARY: The Office of Management and Budget (OMB) amends its Freedom of Information Act (FOIA) regulations to conform with provisions of the Freedom of Information Reform Act of 1986 (Pub. L. 99-570) regarding fees, fee waivers, and law enforcement records. As required by the Reform Act, OMB has developed these amendments pursuant to and in conformity with the Uniform Freedom of Information Act Fee Schedule and Guidelines (Fee Schedule and Guidelines) promulgated by OMB, 52 FR 10012 (March 27, 1987).

EFFECTIVE DATE: January 29, 1988.

FOR FURTHER INFORMATION CONTACT: Robert Damus, Office of General Counsel, Office of Management and Budget, Telephone (202) 395-5600.

SUPPLEMENTARY INFORMATION: The Freedom of Information Reform Act amended FOIA (5 U.S.C. 552) by modifying exemption 7 (pertaining to law enforcement records) and by adding new provisions relating to the charging and waiving of fees. In order to assist agencies in the task of amending their FOIA regulations to conform with these changes, the Reform Act specifically required OMB to develop, for the agencies' use, both a schedule of fees and guidelines for applying certain provisions of the Reform Act. After public notice and comment, OMB issued the Fee Schedule and Guidelines on March 27, 1987 (52 FR 10012).

On August 19, 1987 (52 FR 31036), OMB published for notice and comment proposed amendments to OMB's own FOIA regulations (5 CFR 1303). At the end of the comment period, September 1, 1987, OMB had received 2 comments, both of which addressed exclusively the proposed fee provisions.

The comments primarily focused upon the proposed definitions of "commercial use request," "educational institution," and "representative of the news media," as well as the proposed rules governing (1) the calculation of computer search time for construing the Reform Act's automatic waiver of fees for the first two hours of search time, (2) charges for unsuccessful searches and (3) advance payment of fees. See §§ 1303.30(g)(h)(j); 1303.40(b)(3); 1303.60(b), (d). These definitions and rules are taken verbatim, in all material respects, from the OMB Fee Schedule and Guidelines (sections 6g, h, j; 7f; 9b, d; see 52 FR at 10017-20), to which the Reform Act requires agencies to conform their FOIA regulations. See 5 U.S.C.A. 552(a)(4)(A)(i) (1987 Pocket Part). Accordingly, OMB's adoption of these provisions requires no further explanation. In any event, OMB addressed these issues at length when promulgating the Fee Schedule and Guidelines. See 52 FR at 10013-17.

The only remaining comment questioned whether the proposed duplication charge of $.25 per page exceeded OMB's "reasonable direct costs of making such copies," under the governing standard in Section 7d of the Fee Schedule and Guidelines, 52 FR at 10018. Upon further examination, we have concluded that the reasonable direct duplication cost per page is $.175. For administrative efficiency, however, we will charge only $.15 per page. Section 1303.40(d) incorporates this change.

Finally, OMB had deleted from the final rule proposed § 1303.70(b):

> Fees otherwise chargeable in connection with a request for disclosure of a record shall be waived or reduced where—
> * * * * *
> (b) It is determined that the cost of collection would be equal to or exceed the amount of such fees.

The deletion has no substantive effect, but is intended merely for clarity. As amended by the Reform Act, the FOIA prohibits the charging of fees in the circumstances described in paragraph (b) above. See 5 U.S.C.A. 552(a)(4)(A)(iv)(II) (1987 Pocket Part). As a result, such fees are *not* "otherwise chargeable," see § 1303.40(b) below, and therefore cannot be "waived or reduced."

Accordingly, for reasons set forth in the preamble, 5 CFR Part 1303 is amended as follows:

PART 1303—[AMENDED]

1. The authority citation for Part 1303 is revised to read as follows:

> **Authority:** 5 U.S.C. 552, as amended by Pub. L. 93-502 and Pub. L. 99-570.

2. Section 1303.20(c)(7) is revised to read as follows:

> **§ 1303.20 Inspection, copying, and exceptions.**
> * * * * *
> (c) * * *
> (7) Records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information:
> (i) Could reasonably be expected to interfere with enforcement proceedings;
> (ii) Would deprive a person of a right to a fair trial or an impartial adjudication;
> (iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;
> (iv) Could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution that furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source;
> (v) Would disclose techniques and procedures for law information investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; or
> (vi) Could reasonably be expected to endanger the life or physical safety of any individual.

3. Section 1303.30 is revised, and §§ 1303.40, 1303.50, 1303.60 and 1303.70 are added to read as follows:

> **§ 1303.30. Definitions.**
> For the purpose of these regulations:
> (a) All the terms defined in the Freedom of Information Act apply.
> (b) A "statute specifically providing for setting the level of fees for particular types of records" (5 U.S.C. 552(a)(4)(A)(vi)) means any statute that specifically requires a government agency, such as the Government Printing Office (GPO) or the National Technical Information Service (NTIS), to set the level of fees for particular types of records, in order to:
> (1) Serve both the general public and private sector organizations by conveniently making available government information;
> (2) Ensure that groups and individuals pay the cost of publications and other services that are for their special use so that these costs are not borne by the general taxpaying public;
> (3) Operate an information dissemination activity on a self-sustaining basis to the maximum extent possible; or
> (4) Return revenue to the Treasury for defraying, wholly or in part, appropriated funds used to pay the cost of disseminating government information.
>
> Statutes, such as the User Fee Statute, which only provide a general discussion of fees without explicitly requiring that an agency set and collect fees for particular documents do not supersede the Freedom of Information Act under section (a)(4)(A)(vi) of that statute.
> (c) The term "direct costs" means those expenditures that OMB actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, and heating or lighting the facility in which the records are stored.
> (d) The term "search" includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. OMB employees should ensure that searching for material is done in the most efficient and least expensive manner so as to minimize costs for both the agency and the requester. For example, employees should not engage in line-by-line search when merely duplicating an entire document would prove the less expensive and quicker method of complying with a request. "Search" should be distinguished, moreover, from "review" of material in order to determine whether the material is exempt from disclosure (see paragraph (f) of this section). Searches may be done manually or by computer using existing programming.
> (e) The term "duplication" refers to the process of making a copy of a document necessary to respond to a FOIA request. Such copies can take the form of paper copy, microform, audio-visual materials, or machine readable documentation (e.g., magnetic tape or disk), among others. The copy provided must be in a form that is reasonably usable by requesters.
> (f) The term "review" refers to the process of examining documents located in response to a request that is for a commercial use (see paragraph (g) of this section) to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure, *e.g.*, doing all that is necessary to excise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.
> (g) The term " 'commercial use' request" refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester properly belongs in this category, OMB must determine the use to which a requester will put the documents requested. Moreover, where an OMB employee has reasonable cause to doubt the use to which a requester will put the records sought, or where that use is not clear from the request itself, the employee should seek additional clarification before assigning the request to a specific category.
> (h) The term "educational institution" refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education, that operates a program or programs of scholarly research.
> (i) The term "non-commercial scientific institution" refers to an institution that is not operated on a "commercial" basis (as that term is referenced in paragraph (g) of this section), and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry.
> (j) The term "representative of the news media" refers to any peson actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive. Moreover, as traditional methods of news delivery evolve (*e.g.*, electronic dissemination of newspapers through telecommunications services), such alternative media would be included in this category. In the case of "freelance" journalists, they may be regarded as working for a news organization if they can demonstrate a solid basis for expecting publication through that organization, even though not actually employed by it. A publication contract would be the clearest proof, but OMB may also look to the past publication record of a requester in making this determination.
>
> **§ 1303.40 Fees to be charged—general.**
> OMB should charge fees that recoup the full allowable direct costs it incurs. Moreover, it shall use the most efficient and least costly methods to comply with requests for documents made under the FOIA. When documents that would be responsive to a request are maintained for distribution by agencies operating statutory-based fee schedule programs (see definition in Sections 1303.30(b)), such as the NTIS, OMB should inform

VOL 52 ISS 250 DE 30 1987 UMI

requesters of the steps necessary to obtain records from those sources.

(a) *Manual searches for records.* OMB will charge at the salary rate(s) (*i.e.*, basic pay plus 16 percent) of the employee(s) making the search.

(b) *Computer searches for records.* OMB will charge at the actual direct cost of providing the service. This will include the cost of operating the central processing unit (CPU) for that portion of operating time that is directly attributable to searching for records responsive to a FOIA request and operator/programmer salary apportionable to the search.

(c) *Review of records.* Only requesters who are seeking documents for commercial use may be charged for time spent reviewing records to determine whether they are exempt from mandatory disclosure. Charges may be assessed only for the initial review; *i.e.*, the review undertaken the first time OMB analyzes the applicability of a specific exemption to a particular record or portion of a record. Records or portions of records withheld in full under an exemption that is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The costs for such a subsequent review is assessable.

(d) *Duplication of records.* Records will be duplicated at a rate of $.15 per page. For copies prepared by computer, such as tapes or printouts, OMB shall charge the actual cost, including operator time, of production of the tape or printout. For other methods of reproduction or duplication, OMB will charge the actual direct costs of producing the document(s). If OMB estimates that duplication charges are likely to exceed $25, it shall notify the requester of the estimated amount of fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such a notice shall offer a requester the opportunity to confer with agency personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(e) *Other charges.* OMB will recover the full costs of providing services such as those enumerated below when it elects to provide them:

(1) Certifying that records are true copies;

(2) Sending records by special methods such as express mail.

(f) Remittances shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the order of the Treasury of the United States and mailed or delivered to the Deputy Assistant Director for Administration, Office of Management and Budget, Washington, DC 20503.

(g) A receipt for fees paid will be given upon request. Refund of fees paid for services actually rendered will not be made.

(h) *Restrictions on assessing fees.* With the exception of requesters seeking documents for a commercial use, OMB will provide the first 100 pages of duplication and the first two hours of search time without charge. Moreover, OMB will not charge fees to any requester, including commercial use requesters, if the cost of collecting a fee would be equal to or greater than the fee itself.

(1) The elements to be considered in determining the "cost of collecting a fee" are the administrative costs of receiving and recording a requester's remittance, and processing the fee for deposit in the Treasury Department's special account.

(2) For purposes of these restrictions on assessment of fees, the word "pages" refers to paper copies of "8½ x 11" or "11 x 14." Thus, requesters are not entitled to 100 microfiche or 100 computer disks, for example. A microfiche containing the equivalent of 100 pages or 100 pages of computer printout, does meet the terms of the restriction.

(3) Similarly, the term "search time" in this context has as its basis, manual search. To apply this term to searches made by computer, OMB will determine the hourly cost of operating the central processing unit and the operator's hourly salary plus 16 percent. When the cost of search (including the operator time and the cost of operating the computer to process a request) equals the equivalent dollar amount of two hours of the salary of the person performing the search, *i.e.*, the operator, OMB will begin assessing charges for computer search.

§ 1303.50 Fees to be charged—categories of requesters.

There are four categories of FOIA requesters: commercial use requesters; educational and non-commercial scientific institutions; representatives of the news media; and all other requesters. The specific levels of fees for each of these categories are:

(a) *Commercial use requesters.* When OMB receive a request for documents for commercial use, it will assess charges that recover the full direct costs of searching for, reviewing for release, and duplicating the record sought. Requesters must reasonably describe the records sought. Commercial use requesters are not entitled to two hours of free search time nor 100 free pages of reproduction of documents. OMB may recover the cost of searching for and reviewing records even if there is ultimately no disclosure of records (see § 1303.60(b)).

(b) *Educational and non-commercial scientific institution requesters.* OMB shall provide documents to requesters in this category for the cost of reproduction alone, excluding charges for the first 100 pages. To be eligible for inclusion in this category, requesters must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research. Requesters must reasonably describe the records sought.

(c) *Requesters who are representatives of the news media.* OMB shall provide documents to requesters in this category for the cost of reproduction alone, excluding charges for the first 100 pages. To be eligible for inclusion in this category, a requester must meet the criteria in § 1303.10(j), and his or her request must not be made for a commercial use. In reference to this class of requester, a request for records supporting the news dissemination function of the requester shall not be considered to be a request that is for a commercial use. Requesters must reasonably describe the records sought.

(d) *All other requesters.* OMB shall charge requesters who do not fit into any of the categories above fees that recover the full reasonable direct cost of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search time shall be furnished without charge. Moreover, requests for records about the requesters filed in OMB's systems of records will continue to be treated under the fee provisions of the Privacy Act of 1974 which permit fees only for reproduction. Requesters must reasonably describe the records sought.

§ 1303.60 Miscellaneous fee provisions.

(a) *Charging interest—notice and rate.* OMB may begin assessing interest charges on an unpaid bill starting on the 31st day following the day on which the billing was sent. The fact that the fee has been received by OMB within the thirty day grace period, even if not processed, will suffice to stay the accrual of interest. Interest will be at the rate prescribed in section 3717 of Title 31 of the United States Code and will accrue from the date of the billing.

(b) *Charges for unsuccessful search.* OMB may assess charges for time spent searching, even if it fails to locate the records or if records located are determined to be exempt from disclosure. If OMB estimates that search charges are likely to exceed $25, it shall notify the requester of the estimated amount of fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. Such a notice shall offer the requester the opportunity to confer with agency personnel with the object of reformulating the request to meet his or her needs at a lower cost.

(c) *Aggregating requests.* A requester may not file multiple requests at the same time, each seeking portions of a document or documents, solely in order to avoid payment of fees. When OMB reasonably believes that a requester or, on rare occasions, a group of requesters acting in concert, is attempting to break a request down into a series of requests for the purpose of evading the assessment of fees, OMB may aggregate any such requests and charge accordingly. One element to be considered in determining whether a belief would be reasonable is the time period over which the requests have occurred.

(d) *Advance payments.* OMB may not require a requester to make an advance payment, *i.e.*, payment before work is commenced or continued on a request, unless:

(1) OMB estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250. Then, OMB will notify the requester of the likely cost and obtain satisfactory assurance of full payment where the requester has a history of prompt payment of FOIA fees, or require an advance payment of an amount up to the full estimated charges in the case of requesters with no history of payment; or

(2) A requester has previously failed to pay a fee charged in a timely fashion (*i.e.*, within 30 days of the date of the billing). Then, OMB may require the requester to pay the full amount owed plus any applicable interest as provided above or demonstrate that he or she has, in fact, paid the fee, and to make an advance payment of the full amount of the estimated fee before the agency begins to process a new request or a pending request from that requester.

When OMB acts under paragraph (d)(1) or (2) of this section, the administrative time limits prescribed in the FOIA, 5 U.S.C. 552(a)(6) (*i.e.*, 10 working days from receipt of initial requests and 20 working days from receipt of appeals from initial denial, plus permissible extensions of these time limits) will begin only after OMB has received fee payments described above.

(e) *Effect of the Debt Collection Act of 1982 (Pub. L. 97-365).* OMB should comply with provisions of the Debt Collection Act, including disclosure to consumer reporting agencies and use of collection agencies, where appropriate, to encourage repayment.

§ 1303.70 Waiver or reduction of charges.

Fees otherwise chargeable in connection with a request for disclosure of a record shall be waived or reduced where it is determined that disclosure is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the Government and is not primarily in the commercial interest of the requester.

James C. Miller III,
Director.

Animal and Plant Health Inspection Service

9 CFR Part 77

[Docket No. 87-144]

Tuberculosis in Cattle and Bison; State Designations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: We are amending the regulations governing the interstate movement of cattle and bison because of tuberculosis by raising the designation of Kentucky from a modified accredited state to an accredited-free state. This action is necessary because we have determined that Kentucky meets the criteria for designation as an accredited-free state.

DATES: Interim rule effective December 30, 1987. Consideration will be given only to comments postmarked or received on or before March 1, 1988.

ADDRESS: Send an original and two copies of written comments to Steven B. Farbman, Assistant Director, Regulatory Coordination, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Specifically refer to Docket Number 87-144. You may review these comments at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Mondy through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Ralph L. Hosker, Senior Staff Veterinarian, Domestic Programs Support Staff, VS, APHIS, USDA, Room 815, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-8438.

SUPPLEMENTARY INFORMATION:

Background

The "Tuberculosis" regulations (contained in 9 CFR Part 77 and referred to below as the regulations) regulate the interstate movement of cattle and bison because of tuberculosis. The requirements of the regulations concerning the interstate movement of cattle and bison not known to be affected with, or exposed to, tuberculosis are based on whether the cattle and bison are moved from jurisdictions designated as accredited-free states, modified accredited states, or nonmodified accredited states. The criteria for determining the status of states (the term state is defined to mean any state, territory, the District of Columbia, or Puerto Rico) or portions of states are contained in a document captioned "Uniform Methods and Rules-Bovine Tuberculosis Eradication", 1985 edition, which has been made part of the regulations by incorporation by reference. The status of either states or portions of states is based on the rate of tuberculosis infection present and the effectiveness of a tuberculosis control and eradication program.

Before publication of this interim rule, Kentucky was designated in § 77.1 of the regulations as a modified accredited state. However, Kentucky now meets the requirements for designation as an accredited-free state. Therefore, we are amending the regulations by removing Kentucky from the list of modified accredited states in § 77.1 and adding it to the list of accredited-free states in that section.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based

enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle and bison moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the status of the state of Kentucky may affect the marketability of cattle and bison from that state since some prospective cattle and bison buyers prefer to buy cattle and bison from accredited-free states. This may result in some beneficial economic impact on some small entities. However, based on our experience in similar designations of other states, the impact should not be significant.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This interim rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with state and local officials. (See 7 CFR Part 3015, Subpart V.)

Emergency Action

Dr. Donald L. Houston, Administrator of the Animal and Plant Health Inspection Service, has determined that an emergency situation exists, which warrants publication of this interim rule without prior opportunity for public comment. It is necessary to change the regulations so that they can accurately reflect the current tuberculosis status of Kentucky as an accredited-free state and thereby provide prospective cattle and bison buyers with accurate and up-to-date information, which may affect the marketability of cattle and bison since some prospective cattle and bison buyers prefer to buy cattle and bison from accredited-free states.

Since prior notice and other public procedures with respect to this interim rule are impracticable and contrary to the public interest under these emergency conditions, there is good cause under 5 U.S.C. 553 for making this interim rule effective less than 30 days after publication of this document in the **Federal Register**. We will consider comments postmarked or received within 60 days of publication of this interim rule in the **Federal Register**. Any amendments we make to this interim rule as a result of these comments will be published in the **Federal Register** as soon as possible following the close of the comment period.

List of Subjects in 9 CFR Part 77

Animal diseases, Bison, Cattle, Transportation, Tuberculosis.

PART 77—TUBERCULOSIS

Accordingly, 9 CFR Part 77 is amended as follows:

1. The authority citation for Part 77 continues to read as follows:

Authority: 21 U.S.C. 111, 114, 114a, 115–117, 120, 121, 134b, 134f; 7 CFR 2.17, 2.51, and 371.2(d).

§ 77.1 [Amended]

2. In § 77.1, the definition for "Modified accredited state" paragraph (2) is amended by removing "Kentucky".

3. In § 77.1, the definition for "Accredited-free state" paragraph (2) is amended by adding "Kentucky" immediately after "Kansas".

Done in Washington, DC, this 23rd day of December 1987.

Donald L. Houston,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 87-29921 Filed 12-29-87; 8:45 am]

BILLING CODE 3410-34-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 346

Foreign Banks; Country Exposures Concentration

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Final rule.

SUMMARY: Section 346.23 of the FDIC Rules and Regulations specifies that country exposures by insured branches of foreign banks operating as such on November 19, 1984 must be within prescribed limits by January 22, 1988. The Board of Directors is extending the time for compliance with these limits until June 14, 1988.

EFFECTIVE DATE: December 17, 1987.

FOR FURTHER INFORMATION CONTACT: Charles V. Collier, Assistant Director, Division of Bank Supervision, (202) 898-6850, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: On November 19, 1984, the FDIC amended Part 346 of its regulations. Section 346.23 of those amended regulations requires compliance, by insured branches operating as such on November 19, 1984, with country exposure limitations of 200 percent of the amount required in the capital equivalency ledger account to the foreign bank parent's home country and 100 percent of that amount to any other single country. Any excess exposures were to be reduced by January 22, 1988. In acting on a petition by the Institute of International Bankers, Inc., to extend this deadline, the Board of Directors has extended the deadline for compliance for 180 days, until June 14, 1988. (A corresponding amendment has been made in regard to petitions for relief in extraordinary circumstances.) During this period, the FDIC expects to complete the review which is currently being conducted of Part 346 of its regulations, including the country exposure limitations. In accordance with 5 U.S.C. 553, the FDIC has found that prior notice and a delayed effective date with respect to this amendment are unnecessary, as the amendment delays the imposition of requirements that are already imposed by existing regulation. Since the amendment only provides for an extension of time for compliance with certain portions of the regulation and imposes no burden upon banks or the public, it is not subject to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) or the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

List of Subjects in 12 CFR Part 346

Bank deposit insurance, Foreign banks, banking, Banks, banking, Reporting and recordkeeping requirements.

In consideration of the foregoing, the FDIC hereby amends Part 346 of title 12 of the Code of Federal Regulations as follows:

PART 346—FOREIGN BANKS

1. The authority citation for Part 346 continues to read as follows:

Authority: Secs. 5, 6, 13, Pub. L. 95-369, 92 Stat. 613, 614, 624 (12 U.S.C. 3103, 3104, 3108); Secs. 5, 7, 9, 10, Pub. L. 797, 64 Stat. 876, 877, 881, 882 (12 U.S.C. 1815, 1817, 1819, 1820).

2. Part 346 is amended by revising the third and fourth sentences of § 346.23 to read as follows:

§ 346.23. Country exposure concentrations.

* * * Insured branches operating as such on November 19, 1984 will be given until June 14, 1988 to reduce any existing excess exposure, including commitments. In extraordinary circumstances, an insured branch operating as such on November 19, 1984, may petition the Board of Directors for approval of concentrations in excess of the prescribed limits which extend beyond the stated period. * * *

By Order of the Board of Directors.

Dated at Washington, DC, this 17th day of December, 1987.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 116

[Docket No. RM83-39-000; Order No. 484]

List of Property for Use in Accounting for the Addition and Retirement of Reactor Plant Equipment; Suspension of Effective Date

Issued: December 24, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; notice of suspension of effective date of order.

SUMMARY: The Federal Energy Regulatory Commission (Commission) issued a final rule regarding list of property for use in accounting for the addition and retirement of reactor plant equipment in Docket No. RM83-39-000 (52 FR 45167 (Nov. 25, 1987)) on November 18, 1987. This notice suspends the rule's effective date of December 28, 1987, for 30 days in order to provide the Office of Management and Budget (OMB) additional time to review the final rule's information collection provisions.

EFFECTIVE DATE: The final rule in this docket is effective January 27, 1988.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lane, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Phone: (202) 357-8530.

SUPPLEMENTARY INFORMATION: OMB has requested additional time to review the information collection provisions in Order No. 484, List of Property for Use in Accounting for the Addition and Retirement of Reactor Plant Equipment. The Commission, therefore, suspends the effective date of Order No. 484 until January 27, 1988.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3307-8]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: USEPA is approving revisions to the Ohio State Implementation Plan (SIP) for ozone. The revisions incorporate into the ozone SIP (1) Specific statewide volatile organic compound (VOC) emission limits and requirements for petroleum dry cleaning facilities, polystyrene resin manufacturing, leaks from process units that produce organic chemicals, and air oxidation processes that produce organic chemicals, and (2) general requirements which apply to the specific VOC emission requirements. Ohio's statewide ozone SIP is based upon Rule 3745-21-01, Definitions; Rule 3745-21-04, Attainment Dates and Compliance Time Schedules; Rule 3745-21-09, Control of Emissions of Organic Compounds from Stationary Sources; and Rule 3745-21-10, Compliance Test Methods and Procedures of Chapter 21 of the Ohio Administrative Code. These emission limits fulfill Ohio's commitment to adopt reasonably available control technology for these (Group III) VOC sources and contribute towards the attainment of the Ozone National Ambient Air Quality Standards.

EFFECTIVE DATE: This final rulemaking becomes effective on January 29, 1988.

ADDRESSES: Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Delores Sieja, at (312) 886-6038, before visiting the Region V Office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604

Ohio Environmental Protection Agency, Office of Air Pollution Control, 1800 WaterMark Drive, P.O. Box 1049, Columbus, Ohio 43266-0149

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street S.W., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT: Delores Sieja, Air And Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

SUPPLEMENTARY INFORMATION: Section 172 of the Clean Air Act allowed USEPA to grant attainment date extensions to those States that could not demonstrate attainment of the ozone standard by December 31, 1982, if certain conditions were met by the State in revising its air pollution control program. The revised programs had to include additional reasonably available control technology (RACT) emission limits for various types of volatile organic compound (VOC) sources located in the areas needing the extension. The extension, if granted by USEPA, obligated the State to develop RACT regulations for those sources addressed by Group III Control Technique Guidelines (CTGs) (these Group III CTG sources are referred to as RACT III sources).

The USEPA published CTGs in order to assist the States in determining RACT. The CTGs provide information on available air pollution control technology techniques and provide recommendations on what the USEPA calls the "presumptive norm" for RACT. During the period 1982-1984, the USEPA released, among others, the following four Group III CTGs:

1. "Volatile Organic Emissions from Large Petroleum Dry Cleaners", October 6, 1982 (47 CFR 44155).

This CTG covers large dry cleaning facilities that use petroleum solvent.

2. "Control of Volatile Organic Compound Emissions from Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins", November 14, 1983 (48 FR 51848).

This CTG covers high-density polyethylene plants using a slurry process, polypropylene plants using a liquid phase process, and polystyrene plants using a continuous process.

3. "Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical and Polymer Manufacturing Equipment", April 10, 1984 (49 FR 14181).

This CTG covers equipment leaks from synthetic organic chemical and polymer manufacturing plants.

4. "Volatile Organic Compound Emissions from Air Oxidation Processes in the Synthetic Organic Chemical Manufacturing Industry", December 20, 1984 (49 FR 50442).

VOL 52 ISS 250 DEC 30 1987 UM!

This CTG covers air oxidation processes.

There are three areas in Ohio where RACT III regulations are currently required: Cleveland, Cincinnati, and Akron. The State of Ohio could not demonstrate attainment of the ozone National Ambient Air Quality Standard (NAAQS) in the Cities of Cleveland and Cincinnati by the required date of December 31, 1982, so the State requested, and received, an extension to December 31, 1987. The Akron area is a State Implementation Plan (SIP) "call" area. Because the State did not demonstrate attainment of the ozone standard by December 31, 1982, for the Akron area (Summit and Portage Counties), the USEPA on February 24, 1984, issued a notice of SIP inadequacy to the Governor of the State of Ohio under section 110(a)(2)(H) of the Clean Air Act. The notice of SIP inadequacy obligated the State to correct the inadequacies and demonstrate attainment of the ozone standard by December 31, 1987. Additionally, the State is required to implement RACT III regulations in the Akron area at this time.

On April 9, 1986, to meet the extension and SIP call area obligations for its RACT III VOC sources located in the Cleveland, Cincinnati, and Akron areas, and based largely upon the above four CTGs, the State of Ohio submitted revisions to USEPA for its statewide ozone SIP. Ohio's statewide ozone strategy is based upon Rule 3745–21–01, Definitions; Rule 3745–21–04, Attainment Dates and Compliance Time Schedules; Rule 3745–21–09, Control of Emissions of Organic Compounds from Stationary Sources; and Rule 3745–21–10, Compliance Test Methods and Procedures, of Chapter 21 of the Ohio Administrative Code (OAC). The specific RACT III requirements, i.e., emission limitations, are contained in Rule 09. General applicability requirements, i.e., definitions, attainment dates and compliance time schedules, and compliance test methods and procedures, that pertain to the specific requirement are contained in Rules 01, 04, 09, and 10. Although the RACT III regulations are only required in the Cleveland, Cincinnati, and Akron areas, the State has chosen to make these regulations applicable statewide.

On April 8, 1987 (52 FR 11288), USEPA proposed to approve the RACT III revisions because they were generally consistent with the model regulations found in the CTG and they contribute towards the attainment of the ozone NAAQS. Because the April 8, 1987, notice of proposed rulemaking contains a detailed evaluation of the RACT III regulations, they will not be discussed in this notice. We refer you to the April 8, 1987, notice for the detailed discussion.

Interested parties were given until May 8, 1987, to submit comments on the April 8, 1987, proposed rulemaking. USEPA received a comment from the Standard Oil Chemical Company in Cleveland, Ohio. At this time USEPA will respond to the comment:

Comment: Standard Oil Chemical Company operates an air oxidation unit at Lima, Ohio. To meet the requirements of Rule 3745–21–09(EE) Standard Oil must install an incinerator that will ensure that the applicable emission limitation is met by the compliance deadline of December 31, 1987. Standard Oil has two concerns regarding this requirement.

(1) Standard Oil believes it is not necessary to install controls on their off-gas stack because they are located in an attainment area and, because of their distance from the closest nonattainment areas, their emissions have no effect on those areas.

(2) Standard Oil states that it has insufficient time to install an incinerator by the compliance deadline of December 31, 1987. Based upon an estimated date of permit issuance of June 1, 1987, compliance could be achieved by December 31, 1988. In, addition, Standard Oil added the following:

"We have requested that the State develop and approve a compliance schedule with these dates included. However, to date, this action has not occurred. Therefore, we request that you change the compliance deadline for an oxidation process that produces organic chemicals from December 31, 1987, to December 31, 1988. To our knowledge, ours is the only air oxidation process in the State of Ohio that must install an incinerator to comply with OAC 3745–21–09 (EE)."

Response: (1) USEPA agrees that the area where Standard Oil is located is presently designated attainment (49 FR 24124, June 12, 1984). However, it is left to the discretion of the State to determine the applicability of their regulations.

(2) USEPA cannot unilaterally change the compliance date in a proposed SIP revision. USEPA is limited to approving or disapproving any proposed SIP revision which is submitted to it. However, USEPA will consider Standard Oil's comments if Ohio submits as a revision to its SIP, a revised compliance date for Standard Oil.

Final Action on Ohio's RACT III Rules

USEPA takes final action today to approve the Ohio RACT III regulations.

The Office of Management and Budget (OMB) has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from publication). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

Administrative Practice and Procedure; Basic Time Computation

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Section 1.4 of the rules has been revised to clarify the basic time computation procedures contained in this rule. Section 1.4 governs the procedures to be followed for computing filing dates in proceedings before the Commission and is used for computing filing dates for reconsideration and judicial review of Commission decisions. Minor revisions to § 1.429 have also been made with regard to computation of time procedures.

EFFECTIVE DATE: December 30, 1987.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: David H. Solomon, Office of the General Counsel, Federal Communications Commission, (202) 632–6990.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, FCC 87–838, adopted December 7, 1987, and released December 15, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Report and Order

1. In this *Report and Order* the Commission amends § 1.4 to reorganize and clarify, with the addition of hypothetical examples, the basic time computation procedures. In addition, in order to give all parties equal opportunity to file for judicial review, the Commission has clarified that, when the date of "public notice" ordinarily would fall on a Saturday or other holiday, "public notice" is deemed to occur at 3 p.m. Eastern Time on the subsequent business day. New § 1.4(b)(3) clarifies the date of public notice for rule makings of particular applicability. Further, because the date of mailing often is not indicated on government postmarks, the language of § 1.4(b)(5) has been amended to state that for documents that are neither published in the **Federal Register** nor released, and for which a descriptive "Public Notice" is not released, the controlling date is the date that appears on the face of the document, rather than the date mailed. Finally, § 1.429 (e) and (f) have been amended to clarify that the time computation provisions of § 1.4 apply to petitions for reconsideration.

2. Accordingly, it is ordered, that the attached modifications to §§ 1.4 and 1.429 of the Rules, 47 CFR 1.4 and 1.429, are adopted.

3. It is further ordered that Part 1 of the Commission's Rules as modified herein shall become effective immediately upon publication in the **Federal Register.**

List of Subjects in 47 CFR Part 1

Practice and procedure.

William J. Tricarico,

Secretary.

Appendix

Part 1—[Practice and Procedure] of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 1—[AMENDED]

1. The authority citation for Part 1 continues to read:

Authority: Sections 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303.

2. Section 1.4 is revised to read as follows:

§ 1.4 Computation of time.

(a) *Purpose*—The purpose of this Rule Section is to detail the method for computing the amount of time within which persons or entities must act in response to deadlines established by the Commission. It also applies to computation of time for seeking both reconsideration and judicial review of Commission decisions.

(b) *General Rule—Computation of Beginning Date When Action is Initiated by Commission or Staff.* Unless otherwise provided, the first day to be counted when a period of time begins with an action taken by the Commission, Review Board, an Administrative Law Judge or by members of the Commission or its staff pursuant to delegated authority is the *day after the day* on which public notice of that action is given. *See* § 1.4(b) (1)–(5), below. Unless otherwise provided, all Rules measuring time from the date of the issuance of a Commission document entitled "Public Notice" shall be calculated in accordance with this section. *See* § 1.4(b)(4) for a description of the "Public Notice" document. Unless otherwise provided in §§ 1.4 (g) and (h), it is immaterial whether the first day is a "holiday." *See* § 1.4(e)(1) for definition of "holiday."

Note: For purposes of this section, when the date of "public notice" falls on a holiday, "public notice" shall be deemed to occur at 3 p.m. Eastern Time on the next business day. The term "public notice" means the date of the day, commencing at 3 p.m. Eastern Time, after any of the following dates:

(1) For documents in notice and comment rule making proceedings, including summaries thereof, the date of publication in the **Federal Register.**

Example 1: A document in a Commission rule making proceeding is published in the **Federal Register** on Wednesday, May 6, 1987. Public notice commences at 3 p.m. Eastern Time on Thursday, May 7, 1987. The first day to be counted in computing the beginning date of a period of time for action in response to the document is Friday, May 8, 1987, the "day after the day" of public notice.

Example 2: A Notice of Proposed Rule Making is released to the public on Wednesday, July 1, 1987, but not published in the **Federal Register** until Friday, July 10, 1987. Since "the day after the day" of **Federal Register** publication falls on a Saturday, public notice is deemed to occur at 3 p.m. Eastern Time on the next business day, which is Monday, July 13, 1987. The first day to be counted in computing filing periods is Tuesday, July 14, 1987.

Example 3: Section 1.429(e) provides that when a petition for reconsideration is timely filed in proper form, public notice of its filing is published in the **Federal Register.** The time for filing oppositions runs from the publication date of the notice. Section 1.429(f) provides that oppositions to a petition for reconsideration shall be filed within 15 days after public notice of the petition's filing in the **Federal Register.** Public notice of the filing of a petition for reconsideration is published in the **Federal Register** on Wednesday, June 10, 1987. For purposes of computing the filing period for an opposition, the first day to be counted is Friday, June 12, 1987, which is the day after the date of public notice. Therefore, oppositions to the reconsideration petition must be filed by Friday, June 26, 1987, 15 days later.

(2) For non-rulemaking documents released by the Commission or staff, whether or not published in the **Federal Register,** the release date. A document is "released" by making the full text available to the press and public in the

VOL 52 ISS 250 DEC 30 1987 UMI

Commission's Office of Public Affairs. The release date appears on the face of the document.

Example 4: The Chief, Mass Media Bureau, adopts an order on Thursday, April 2, 1987. The text of that order is not released to the public until Friday, April 3, 1987. Since the "day after the day" of release falls on a Saturday, in accordance with § 1.4(b), public notice of this decision is given at 3 p.m. Eastern Time, Monday, April 6, 1987. Tuesday, April 7, 1987, is the first day to be counted in computing filing periods.

(3) For rule makings of particular applicability, if the rule making document is to be published in the **Federal Register** and the Commission so states in its decision, the date of public notice will commence at 3 p.m. Eastern Time on the day following the **Federal Register** publication date. If the decision fails to specify **Federal Register** publication, the date of public notice will commence at 3 p.m. Eastern Time on the day following the release date, even if the document is subsequently published in the **Federal Register**. *See Declaratory Ruling*, 51 FR 23059 (June 25, 1986).

Example 5: An order establishing an investigation of a tariff, and designating issues to be resolved in the investigation, is released on Wednesday, April 1, 1987, and is published in the **Federal Register** on Friday, April 10, 1987. If the decision itself specifies **Federal Register** publication, the date of public notice is 3 p.m. Eastern Time on Monday, April 13, 1987; because public notice would be on a Saturday, it is deemed to occur on the following Monday. If this decision itself does not specify **Federal Register** publication, public notice occurs at 3 p.m. Eastern Time on Thursday, April 2, 1987, and the first day to be counted in computing filing periods is Friday, April 3, 1987.

(4) If the full text of an action document is not to be released by the Commission, but a descriptive document entitled "Public Notice" describing the action is released, the date on which the descriptive "Public Notice" is released.

Example 6: At a public meeting the Commission considers an uncontested application to transfer control of a broadcast station. The Commission grants the application and does not plan to issue a full text of its decision on the uncontested matter. Five days after the meeting, a descriptive "Public Notice" announcing the action is publicly released. The date of public notice commences at 3 p.m. Eastern Time on the day after the release date.

Example 7: A Public Notice of petitions for rulemaking filed with the Commission is released on Wednesday, September 2, 1987; public notice of these petitions is given at 3 p.m. Eastern Standard Time September 3, 1986, the day after release. The first day to be counted in computing filing times is Thursday, September 4, 1987.

(5) If a document is neither published in the **Federal Register** nor released, and if a descriptive document entitled "Public Notice" is not released, the date appearing on the document sent (*e.g.*, mailed, telegraphed, etc.) to persons affected by the action.

Example 8: A Bureau grants a license to an applicant, or issues a waiver for non-conforming operation to an existing licensee, and no "Public Notice" announcing the action is released. The date of public notice commences at 3 p.m. Eastern Time on the day following the date appearing on the license mailed to the applicant or appearing on the face of the letter granting the waiver mailed to the licensee.

Note: *See Memorandum Opinion and Order, Gen. Docket No. 80-488*, 85 FCC 2d 618, 627-28 (1981), for further examples of effective date and time computation.

(c) *General Rule—Computation of Beginning Date When Action is Initiated by Act, Event or Default.* Commission procedures frequently require the computation of a period of time where the period begins with the occurrence of an act, event or default and terminates a specific number of days thereafter. Unless otherwise provided, the first day to be counted when a period of time begins with the occurrence of an act, event or default is the day after the day on which the act, event or default occurs.

Example 9: Commission Rule § 21.39(d) requires the filing of an application requesting consent to involuntary assignment or control of the permit or license within thirty days after the occurrence of the death or legal disability of the licensee or permittee. If a licensee passes away on Sunday, March 1, 1987, the first day to be counted pursuant to § 1.4(c) is the day after the act or event. Therefore, Monday, March 2, 1987, is the first day of the thirty day period specified in § 21.39(d).

(d) *General Rule—Computation of Terminal Date.* Unless otherwise provided, when computing a period of time the last day of such period of time is included in the computation, and any action required must be taken on or before that day.

Example 10: Subsection 1.4(b)(1) provides that "public notice" in a notice and comment rule making proceeding begins at 3 p.m. Eastern Time on the "day after the day" of **Federal Register** publication. Subsection 1.4(c) provides that the first day to be counted in computing a terminal date is the "day after the day" on which public notice occurs. Therefore, if the Commission allows or requires an action to be taken 20 days after public notice in the **Federal Register**, the first day to be counted is the second day after the date of the **Federal Register** publication. Accordingly, if the **Federal Register** document is published on Thursday, July 23, 1987, public notice is given at 3 p.m. Eastern Time on Friday, July 24, and the first day to be counted in computing a 20 day period is Saturday, July 25, 1987. The 20th day or terminal date upon which action must be taken is Thursday, August 13, 1987.

Example 11: Commission Rule § 22.30 requires competing applicants to file a petition to deny within 30 days after the date of public notice of the acceptance for filing of a license application. 47 CFR 22.30(a)(4). A document entitled "Public Notice" announcing acceptance of the license application of Acme Communications Corporation is issued on Friday, August 7, 1987. "Public notice" commences at 3 p.m. Eastern Time on Saturday, August 8, 1987. However, since this is a holiday, public notice is deemed to commence at 3 p.m. Eastern Standard Time on the next business day, which is Monday, August 10, 1987. The first "day to be counted in computing the petition to deny deadline is Tuesday, August 11, 1987 (the day after the day" of public notice). Therefore, the 30th day is Wednesday, September 9, 1987.

(e) Definitions for purposes of this section:

(1) The term "holiday" means Saturday, Sunday, officially recognized federal legal holidays and any other day on which the Commission's offices are closed and not reopened prior to 5:30 p.m. For example, a regularly scheduled Commission business day may become a "holiday" if its offices are closed prior to 5:30 p.m. due to adverse weather, emergency or other closing.

Note: As of August 1987, officially recognized federal legal holidays are New Year's Day, January 1; Martin Luther King's Birthday, third Monday in January; Washington's Birthday, third Monday in February; Memorial Day, last Monday in May; Independence Day, July 4; Labor Day, first Monday in September; Columbus Day, second Monday in October; Veterans Day, November 11; Thanksgiving Day, fourth Thursday in November; Christmas Day, December 25. If a legal holiday falls on Saturday or Sunday, the holiday is taken, respectively, on the preceding Friday or the following Monday. In addition, January 20, (Inauguration Day) following a Presidential election year is a legal holiday in the metropolitan Washington, DC area. If Inauguration Day falls on Sunday, the next succeeding day is a legal holiday. *See* 5 U.S.C. 6103; Executive Order No. 11582, 36 FR 2957 (Feb. 11, 1971). The determination of a "holiday" will apply only to the specific Commission location(s) designated as on "holiday" on that particular day.

(2) The term "business day" means all days, including days when the Commission opens later than the time specified in Rule section 0.403, which are not "holidays" as defined above.

(3) The term "filing period" means the number of days allowed or prescribed by statute, rule, order, notice or other Commission action for filing any document with the Commission. It does not include any additional days allowed for filing any document pursuant to paragraphs (g), (h) and (j) of this section.

(4) The term "filing date" means the date upon which a document must be filed after all computations of time authorized by this section have been made.

(f) Except as provided in § 0.401(b) of the Rules, all petitions, pleadings, tariffs or other documents not required to be accompanied by a fee and which are hand-delivered must be tendered for filing in complete form before 5:30 p.m. in the Office of the Secretary, either in Washington or Gettysburg, as directed by the Rules. The Secretary will determine whether a tendered document meets the pre-5:30 deadline.

(g) If the filing period is less than 7 days, intermediate holidays shall not be counted in determining the filing date.

Example 12: A reply is required to be filed within 5 days after the filing of an opposition in a license application proceeding. The opposition is filed on Wednesday, June 10, 1987. The first day to be counted in computing the 5-day time period is Thursday, June 11, 1987. Saturday and Sunday are not counted because they are "holidays." The document must be filed with the Commission on or before the following Wednesday, June 17, 1987.

(h) If a document is required to be served upon other parties by statute or Commission regulation and the document is in fact served by mail (see § 1.47(f)), and the filing period for a response is 10 days or less, an additional 3 days (excluding holidays) will be allowed for filing a response. This subsection (§ 1.4(h)) shall not apply to documents filed pursuant to §§ 1.89, 1.120(d), 1.315(b) or 1.316.

Example 13: A reply to an opposition for a petition for reconsideration must be filed within 7 days after the opposition is filed. 47 CFR 1.106(h). The rules require that the opposition be served on the person seeking reconsideration. 47 CFR 1.106(g). If the opposition is served on the party seeking reconsideration by mail and the opposition is filed with the Commission on Monday, November 9, 1987, the first day to be counted is Tuesday, November 10, 1987 (the day after the day on which the event occurred, § 1.4(b)), and the seventh day is Monday, November 16. An additional 3 days (excluding holidays) is then added at the end of the 7 day period, and the reply must be filed no later than Thursday, November 19, 1987.

(i) If both subsections (g) and (h) of this section are applicable, make the subsection (g) computation before the subsection (h) computation.

Example 14: Section 1.45(b) requires the filing of replies to oppositions within five days after the time for filing oppositions has expired. If an opposition has been filed on the last day of the filing period (Friday, July 10, 1987), and was served on the replying party by mail, § 1.4(i) specifies that the subsection (g) computation should be made before the subsection (h) computation. Therefore, since the specified filing period is less than seven days, subsection (g) is applied first. The first day of the filing period is Monday, July 13, 1987, and Friday, July 17, 1987 is the fifth day (the intervening weekend was not counted). Subsection (h) is then applied to add three days for mailing (excluding holidays). That period begins on Monday, July 20, 1987. Therefore, Wednesday, July 22, 1987, is the date by which replies must be filed, since the intervening weekend is again not counted.

(j) If the filing date falls on a holiday, the document shall be filed on the next business day. *See* § 1.4(e)(1) above.

Example 15: The filing date falls on Friday, December 25, 1987. The document is required to be filed on the next business day, which is Monday, December 28, 1987.

(k) Where specific provisions of Part 1 conflict with this section, those specific provisions of Part 1 are controlling. *See, e.g.*, §§ 1.45(d), 1.773(a)(3) and 1.773(b)(2).

3. Section 1.429 is amended by revising paragraphs (e) and (f) to read as follows:

§ 1.429 Petition for reconsideration.

* * * * *

(e) Except as provided in § 1.420(f), petitions for reconsideration need not be served on parties to the proceeding. (However, where the number of parties is relatively small, the Commission encourages the service of petitions for reconsideration and other pleadings, and agreements among parties to exchange copies of pleadings.) When a petition for reconsideration is timely filed in proper form, public notice of its filing is published in the **Federal Register**. The time for filing oppositions to the petition runs from the date of public notice. *See* § 1.4(b).

(f) Oppositions to a petition for reconsideration shall be filed within 15 days after the date of public notice of the petition's filing and need be served only on the person who filed the petition. *See* § 1.4(b). Oppositions shall not exceed 25 double-spaced typewritten pages.

BILLING CODE 4712-01-M

47 CFR Part 73

[MM Docket No. 87-3; FCC 87-345]

Presunrise Service; Authorizations for Daytime Only AM Stations

AGENCY: Federal Communications Commission.

ACTION: Final Rule.

SUMMARY: This action executes the directive in Pub. L. 99-359 Section 2(d)(1) to afford some relief to daytime only AM radio broadcast stations, whose operations were adversely affected by the statutory extension of daylight saving time from the last Sunday in April to the first Sunday of that month, by amending our rules that authorize presunrise operations. By establishing a 10 watt minimum and permitting maximum powers that protect only the 0.5 mV/m groundwave contour of full time and clear channel stations, this rule diminishes the adverse effects on the affected stations and allows them to operate from 6:00 am to local sunrise.

EFFECTIVE DATE: January 22, 1988.

ADDRESS: Federal Communications Commission, Washington, DC, 20554.

FOR FURTHER INFORMATION CONTACT: Vicki Assevero, Mass Media Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order in MM Docket No. 87-3, adopted October 30, 1987 and released December 8, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 23), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Report and Order

1. In this *Report and Order* (R&O), we are considering the proposal made by the Clear Channel Broadcasting Service to allow daytime only AM stations to use a minimum of 10 watts of power between the first Sunday and the last Sunday in April as an exceptional presunrise authorization which would protect only the 0.5mV/m groundwave contour instead of both the skywave and groundwave. We had previously considered other forms of relief pursuant to our original Notice adopted January 16, 1987. There, we asked for comments as to how to best execute the statutory directive of Pub. L. 99-359's (which extended daylight saving time) Section 2(d)(1) requiring us to adjust the hours of operation of daytime only AM stations to compensate for the fact that the start of their operations would be delayed by one hour. The Notice proposed a 50 watt minimum power for the daytimers.

VOL 52 ISS 250 DEC 30 1987 UMI

2. In the First Report and Order adopted March 24, 1987, both the comments and our determination that more importance should be attached to the capacity of daytime only stations to provide local service than to the preservation of service by clear channels at very great distances from their principal communities led us to adopt an interim 10 watt minimum power authorizatin for the daytimers pending the development of a more comprehensive record pursuant to our Further Notice, which specifically asked for comment on CCBS proposal.

3. We acknowledge in the R&O that even the 10 watt minimum causes interference to protected skywave service over vast areas in the presunrise period. However, given the unpredictability of the service, the Congressional directive, the relatively short period of 3–4 weeks during which the interference will be tolerated and most particularly the exceptional tolerance of the clear channel stations for this solution, we find it appropriate to enact a permanent rule protecting the 0.5mV/m groundwave contour of the clear channel stations.

4. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 604, a final regulatory flexibility analysis has been prepared. It is available for viewing as part of the full text of this decision which may be obtained from the Commission or its copy contractor.

5. The rule contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection or record keeping labeling, disclosure or record retention requirements; and will not increase or decrease burden hours on the public.

Ordering Clauses

6. Authority for this rulemaking is contained in Pub. L. 99–359 Section 2(d)(1) and in 47 U.S.C. 154 and 303. The Communications Act of 1934 as amended.

7. Accordingly it is ordered that Part 73 of the Commission's rules is amended effective January 22, 1988, as shown below. It is further ordered that this proceeding is terminated.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

47 CFR Part 73 is amended as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

2. 47 CFR 73.99 is amended by redesignating paragraphs (c) through (k), as paragraphs (d) through (l), by adding a new paragraph (c), and by revising newly redesignated paragraphs (f)(1) and (j) to read as follows:

§ 73.99 Pre-sunrise service authorization (PSRA) and post-sunset service authorization (PSSA).

* * * * *

(c) Extended Daylight Saving Time Pre-Sunrise Authorizations:

(1) Between the first Sunday in April and the end of the month of April, Class II and Class III daytime-only AM stations will be permitted to conduct pre-sunrise operation beginning at 6:00 a.m. local time with a maximum power of 500 watts (not in excess of the station's regular daytime or critical hours power), reduced as necessary to comply with the following requirements:

(i) Full protection is to be provided as specified in applicable international agreements.

(ii) Domestic protection is to be provided to the 0.5 mV/m groundwave signals of co-channel Class I–A and Class I–B stations, but protection to the 0.5 mV/m 50% skywave of these stations is not required.

(iii) In determining the protection to be provided, the effect of each interfering signal will be evaluated separately. The presence of interference from other stations will not reduce or eliminate the required protection.

(iv) Notwithstanding the requirements of paragraph (c)(1) (ii) and (iii) of this section, the stations will be permitted to operate with a minimum power of 10 watts unless a lower power is required by international agreement.

(2) The Commission will issue appropriate authorizations to Class II or Class III daytime-only stations not previously eligible to operate during this period. Class II or Class III daytime-only station already authorized to operate during this pre-sunrise period may continue to operate under their current authorization.

* * * * *

(f) * * *

(1) Class II stations operating in accordance with paragraphs (b)(1), (b)(2), (d)(1) and (d)(2) of this section are required to protect the nighttime 0.5 mV/m 50% skywave contours of co-channel Class I stations. Where a 0.5 mV/m 50% skywave signal is not produced, the 0.5 mV/m groundwave contour will be protected.

* * * * *

(j) The Commission will periodically recalculate maximum permissible power and times for commencing PSRA and PSSA for each Class II and Class III station. For each Class II or III daytime only station operating in accordance with paragraph (c) of this section, the Commission will calculate the maximum power at which each individual station may conduct presunrise operations during extended daylight saving time and shall issue conforming authorizations. These original notifications and subsequent notifications should be associated with the station authorization. Upon notification of new power and time of commencing operation, affected stations will make necessary adjustments within 30 days.

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 642

[Docket No. 70605–7141]

Coastal Migratory Pelagic Resources of Gulf of Mexico and South Atlantic

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Secretary of Commerce (Secretary) closes the commercial fishery in the exclusive economic zone (EEZ) for king mackerel from the Gulf migratory group in the eastern zone. The Acting Regional Director, Southeast Region, NMFS, has determined that the commercial quota of 0.46 million pounds for the eastern zone will be reached on December 28, 1987. This closure is necessary to protect the overfished king mackerel resource.

EFFECTIVE DATE: Closure is effective at 0001 hours, local time, December 29, 1987, until 2400 hours, local time, June 30, 1988.

FOR FURTHER INFORMATION CONTACT: Mark F. Godcharles, 813–893–3722.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf of Mexico and the South Atlantic (FMP), as amended, was developed by the South Atlantic and Gulf of Mexico Fishery Management Councils (Councils) under authority of the Magnuson Fishery Conservation and Management Act, and is implemented by regulations at 50 CFR Part 642. Amendment 1 to the FMP established separate allocations for the Gulf and Atlantic migratory groups of king mackerel. Regulations effective June 30, 1987 (52 FR 23836, June 25, 1987) implemented catch limits recommended by the Councils for the Gulf migratory group for the fishing year (July 1, 1987, through June 30, 1988). Those regulations set the commercial allocation at 0.7 million pounds, divided into quotas of 0.48 million pounds for the eastern zone and 0.22 million pounds for the western zone (52 FR 25012, July 2, 1987, corrected at 52 FR 33594, September 4, 1987). From November 1 through March 31, the management area for the Gulf migratory group of king mackerel extends from the Mexico/United States border to a line extending directly east from the Volusia/Flagler County, Florida, boundary (29°25' N. latitude). From April 1 through October 31, the management area extends from the Mexico/United States border to a line extending directly west from the Monroe/Collier County, Florida, boundary (25°48' N. latitude). The boundary between the eastern and western zones is a line extending directly south from the Florida/Alabama boundary (87°3'06" W. longitude). (See 50 CFR Part 642, Appendix A, Figure 2.)

The Secretary is required under § 642.22 to close any segment of the king mackerel fishery when its allocation or quota has been reached or is projected to be reached by publishing a notice in the Federal Register. The Acting Regional Director has determined that the quota of 0.48 million pounds for the eastern zone of the Gulf migratory group of king mackerel will be reached on December 28, 1987. Hence, the commercial fishery for Gulf migratory group king mackerel from the eastern zone is closed effective 0001 hours, local time, December 29, 1987. The closure will remain in effect through June 30, 1988, the end of the fishing year.

The Acting Regional Director previously determined that the commercial quota of 0.22 million pounds of king mackerel for the western zone would be reached on November 1, 1987, and closed this segment of the fishery on November 2, 1987 (52 FR 42296, November 4, 1987). He also previously determined that the recreational allocation of 1.5 million pounds for Gulf migratory group king mackerel would be reached on December 15, 1987. The recreational bag limit for this group was reduced to zero on December 16, 1987 (52 FR 47224, December 16, 1987).

With closure of the commercial fishery in the eastern zone, all commercial and recreational fisheries for Gulf migratory group king mackerel in the EEZ are closed through June 30, 1988. During the closure, Gulf migratory group king mackerel may not be harvested from or possessed in the EEZ and may not be purchased, bartered, traded, or sold. The latter prohibition does not apply to trade in king marckerel harvested, landed, and bartered, traded, or sold prior to the closure and held in cold storage by a dealer or processor.

Other Matters

This action is required by 50 CFR 642.22(a) and complies with E.O. 12291.

Authority: 16 U.S.C. 1801 *et seq.*

Proposed Rules

Federal Register
Vol. 52, No. 250
Wednesday, December 30, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 851-0091]

Florence Multiple Listing Service, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a Florence, SC firm to make membership in the multiple listing service reasonably available to all firms on a nondiscriminatory basis. Respondent also would no longer require new members to have owned and operated a business for six months before application for membership and would no longer insist on a vote of FMLS members as a condition of membership.

DATE: Comments must be received on or before February 29, 1988.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/S-3115, Elizabeth Gee, Washington, DC 20580. (202) 326-2756.

SUPPLEMENTARY INFORMATION: Pursuant to section 8(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Multiple listing service, Real estate, Trade practices.

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission, having initiated an investigation of certain acts and practices of the Florence Multiple Listing Service, Inc., and it now appearing that the Florence Multiple Listing Service, Inc., hereinafter sometimes referred to as the proposed respondent or "FMLS," is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between the Florence Multiple Listing Service, Inc., by its duly authorized officer and its attorney, and by counsel for the Federal Trade Commission that:

1. Proposed respondent is organized, existing, and doing business under and by virtue of the laws of the State of South Carolina, with its offices and principal place of business located at 121 South Warley Street, in the City of Florence, State of South Carolina.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of the complaint here attached.

3. Proposed respondent waives:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

c. All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

d. Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definitions

For the purposes of this order, the following definitions shall apply:

1. "Multiple listing service" shall mean a clearinghouse through which members, real estate brokerage firms exchange information on listings of real estate properties and share sales commissions with members who locate purchasers.

2. "Listing" shall mean any agreement between a real estate broker and a property owner for the provision of real estate brokerage services.

3. "Exclusive agency listing" shall mean any listing under which a property owner appoints a broker as exclusive agent for the sale of the property at an agreed commission, but reserves the right to sell the property personally to a direct purchaser (one not procured in any way through the efforts of any broker) at an agreed reduction in the commission or with no commission owed to the agent broker.

4. "FMLS" shall mean the Florence Multiple Listing Service, Inc. and its successors, assigns, officers, directors, committees, agents, representatives, members or employees.

I

It is ordered that respondent FMLS, directly, indirectly or through any device, in or in connection with the operation of a multiple listing service in or affecting commerce, as "commerce" is defined in section 4 of the Federal Trade Commission Act, as amended, 15 U.S.C. 44, shall cease and desist from:

(A) Adopting, maintaining or enforcing any bylaw, rule, regulation, policy, agreement or understanding, or taking any other action that has the purpose or effect of:

(1) Conditioning membership in FMLS or use of its multiple listing service on the length of time any applicant has owned, operated or maintained a real estate brokerage firm or other business;

(2) Requiring as a condition of FMLS membership or use of its multiple listing service that applicants who satisfy FMLS' other conditions of membership receive the approval by vote of any portion of FMLS members; or

(3) Conditioning membership in FMLS or use of its multiple listing service on any person's refraining or withdrawing from ownership, operation or other association with any lawful business.

(B) Forbidding publication through respondent FMLS's multiple listing service of any exclusive agency listing, or restricting such publication in any way other than by requiring designation of the listing as one granting an exclusive agency or by imposing terms applicable to all listings accepted for publication by the FMLS multiple listing service.

II

It is further ordered that FMLS shall:

(A) Within ninety (90) days after this order becomes final, amend its policies, bylaws, guidelines, rules and regulations, and any other of its instructive or suggestive materials to conform to the provisions of this order.

(B) For a period of five (5) years after this order becomes final:

(1) Provide to any applicant who has been denied membership prompt and clear written notice of the denial, specifying the membership requirements not met and explaining in what manner the requirements are not met; and

(2) Maintain in one separate file, segregated by the names of the applicants, all documents and correspondence that discuss, refer, or relate to any denied or approved. application.

(C) For a period of three (3) years after this order becomes final furnish promptly, by first-class mail, a copy of the announcement in the form shown in Appendix A to any person who inquires about, or who submits an application for, membership in the FMLS.

(D) For a period of three (3) years after this order becomes final furnish promptly, by first-class mail, a copy of this order to any person who requests a copy.

III

It is further ordered that FMLS shall:

(A) Within thirty (30) days after this order becomes final, mail an announcement in the form shown in Appendix A, and a copy of the Complaint and Decision and Order to each member of FMLS.

(B) Within ninety (90) days after this order becomes final, submit a written report to the Federal Trade Commission setting forth in detail the manner and form in which FMLS has complied and is complying with this order.

(C) Notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in FMLS, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any change in its incorporation that may affect compliance obligations arising out of this order.

Appendix A.—Announcement

As you may be aware, the Florence Multiple Listing Service, Inc. ("FMLS") has entered into a consent agreement with the Federal Trade Commission that has now become final. Acceptance of this agreement is for settlement purposes and does not constitute an admission that the FMLS has violated the law. The following is a brief summary of the provisions of the order issued pursuant to the consent agreement:

1. *Eligibility for membership:* The FMLS no longer requires, as a condition of membership, that a broker have owned and operated a business for a six-month period or any other time period. In addition, the FMLS no longer requires that any applicant or member who satisfies FMLS, other conditions of membership receive the approval by vote of any portion of FMLS members. Specific eligibility or membership requirements are set forth in official FMLS bylaws and policies. If any membership application is denied, the FMLS promptly will provide to the applicant a written explanation of the specific reasons for the denial.

2. *Property listings that limit or differ from an exclusive right to sell arrangement:* The FMLS will not prohibit members from entering exclusive agency listings—listings in which the broker and owner contract that the owner will owe a reduced commission or no commission to the agent broker if the owner locates the purchaser entirely independent of the services of any real estate broker. The FMLS will publish all listings of this type but may give notice that the listing is an exclusive agency listing rather than an exclusive right to sell listing.

3. *Broker's development of or participation in organizations, services, businesses or ventures that compete with one another or with the MLS:* The FMLS will not prohibit members from operating or joining any lawful business.

The FTC does not endorse any practice of the FMLS. For more specific information, you should refer to the FTC order itself. [A copy of the proposed order is attached.] [1]

President,
Florence Multiple Service, Inc.

Florence Multiple Listing Service, Inc.; Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed

[1] The sentence enclosed in brackets is required to be included in this Announcement only when the Announcement is sent to members of respondent Florence Multiple Listing Service as required by Part III(A) of the proposed order to which this Announcement is attached as an appendix.

consent order from the Florence Multiple Listing Service, Inc. ("FMLS"), which is located in Florence, South Carolina. The agreement would settle charges by the Commission that the proposed respondent violated Section 5 of the Federal Trade Commission Act by maintaining bylaws and engaging in practices that excluded certain licensed real estate brokers and restricted competition among FMLS members.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

The complaint prepared for issuance by the Commission along with the proposed order alleges that FMLS and its members have engaged in various acts and practices that have unreasonably excluded from the respondent's multiple listing service certain licensed real estate brokers in the Florence area (*i.e.*, the northern and central portions of Florence County, and its environs including the City of Florence, and the City of Darlington). The complaint also alleges that FMLS and its members have restrained price and service competition among residential real estate brokers in the Florence, South Carolina area. The complaint alleges that FMLS members have conspired through the FMLS unlawfully to:

(1) Deny or delay FMLS membership to applicants that have not owned a real estate business for at least six months;

(2) Deny or delay FMLS membership to applicants that fail to receive an affirmative vote for admission from two-thirds of the FMLS members who choose to vote on the question;

(3) Restrict member participation in any organization that competes with FMLS's multiple listing service;

(4) Restrict the publication on FMLS of "exclusive agency contracts;" and

(5) Restrict member participation in ventures and services that compete with real estate brokerage, such as ventures that assist homeowners to market their homes without the full array of traditional brokerage services.

The complaint alleges that these acts and practices violate section 5 of the Federal Trade Commission Act.

According to the complaint, the FMLS provides a multiple listing service for member real estate brokerage firms doing business in the Florence, South Carolina, area. As described in the complaint, the multiple listing service is a clearinghouse through which competing firms exchange information on "listings" (*i.e.*, brokerage service contracts) of residential real estate for sale and share commissions when other members locate purchasers. The FMLS charges a service fee to members for each listing published on the FMLS.

According to the complaint, access to FMLS services provides a valuable competitive advantage to member firms, as it significantly reduces the costs of obtaining current, comprehensive information on listings and sales that is important to compete effectively. The complaint states that the FMLS provides the only multiple listing service serving the Florence area and that about 65 percent of real estate firms in the Florence area are FMLS members. The complaint also states that, for 1985, sales of FMLS published listings accounted for about 75 percent of the dollar volume of all sales of Florence area residences involving a broker.

As explained in the complaint, the FMLS permits members to publish on its multiple listing service, only "exclusive right to sell" listings, *i.e.*, brokerage service contracts where the property owner agrees to pay a commission if the property is sold, regardless of who locates the purchaser. The FMLS prohibited any member from publishing an "exclusive agency" listing. As described in the complaint, an "exclusive agency" listing is a brokerage service contract where the property owner agrees to pay a commission if the property is sold through a broker, but not if the owner locates the purchaser independently of any broker. The complaint challenges the FMLS's refusal to publish such listings on its multiple listing service.

The complaint alleges that the purposes or effects of the challenged acts or practices have been unreasonably to:

A. Restraining or deterring the entry of new brokerage firms, and of new joint ventures or shared brokerage or multiple listing services, in competition with the FMLS multiple listing service;

B. Limit consumers ability to choose among a variety of brokerage firms competing on the basis of price, contract terms, and services;

C. Restrain competition among brokerage firms based on their willingness to offer or accept different contract terms that may be attractive and beneficial to consumers, such as terms that allow the property owner to pay a reduced commission or no commission if the owner sells the property through means alternative to a broker's services;

D. Limit the ability of consumers to negotiate lower prices for brokerage services or brokerage contract terms that may be more advantageous for them than an exclusive right to sell listing;

E. Limit the ability of residential property sellers to compete with real estate brokers in locating purchasers.

The Proposed Consent Order

Part I of the order describes the conduct prohibited by the order. Subsection (1) of Part I(A) prevents the proposed respondent from conditioning membership in FMLS or use of its multiple listing service on the length of time any applicant (who must be a licensed real estate broker under South Carolina law) has owned, operated, or maintained a real estate brokerage firm or other business.

Subsection (2) of Part I(A) would prevent the FMLS from requiring, as a condition of membership or use of its multiple listing service, that applicants who satisfy FMLS's other conditions of membership receive approval by vote of any portion of FMLS members. This provision prohibits FMLS from subjecting applicants to a vote of the existing members in which they may be rejected regardless of their already having met the FMLS's objective conditions for membership.

Subsection (3) of Part I(A) would prohibit the FMLS from conditioning membership in FMLS or use of its multiple listing service on any person's refraining or withdrawing from ownership, operation, or other association with any lawful business. This subsection prohibits the FMLS from attempting to limit the range and scope of real estate brokerage or other business activities of its members.

Part I(B) would prohibit the FMLS from establishing any policy or practice that would forbid the publication through the FMLS of any exclusive agency listing, or would restrict such publication in any way other than by requiring designation of the listing as one granting an exclusive agency or by imposing terms applicable to all listings accepted for publication by the FMLS.

Part II(A) requires the FMLS to amend its bylaws to conform them with the terms of the order within 90 days of the final date of the order. Part II(B) requires, for 5 years, that the FMLS maintain special procedures with respect to applicants who are denied membership. Part II(C) requires, for three years, the FMLS to submit a copy of a notice providing a brief summary of the provisions of the order to any person inquiring or applying for membership. Part II(D) requires, for three years, the FMLS to furnish a copy of the order to each person who requests it.

The remainder of the order's provisions pertain to the filing of compliance reports and notification of changes of the MLS's corporate form, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any change in its incorporation that may affect compliance obligations arising out of the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and is not intended to constitute an official interpretation of the agreement and proposed order or to modify their terms in any way.

This proposed consent order has been entered into for settlement purposes only and does not constitute an admission by the respondent that the law has been violated as alleged in the complaint.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 6750-01-M

16 CFR Part 13

[File No. 851-0106]

Multiple Listing Service Mid County Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Brooklyn, N.Y. real estate firm from participating in various practices that have allegedly restrained price and service competition among residential real estate brokers. Respondent would be prohibited from: requiring that any applicant or member operate a full time office; fixing, maintaining or recommending any division of commission between selling and listing brokers; adopting any policy that has the purpose or effect of exclusive agency listings; requiring any member to inform Mid County or any of its members of the commission agreed to between any listing broker and homeowner; and adopting any policy having the purpose or effect of delaying the solicitation of a listing agreement.

DATE: Comments must be received on or before February 29, 1988.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Alfred J. Ferrogari, Federal Trade Commission, 2243 Federal Bldg., 26 Federal Plaza, New York, NY 10278. (212) 264-8855.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Multiple listing service, Real estate, Trade practices.

Agreement Containing Consent Order To Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Multiple Listing Service Mid County Inc., a corporation, and it now appearing that Multiple Listing Service Mid County Inc., hereinafter sometimes referred to as proposed respondent or "Mid County," is willing to enter into an agreement containing an order to cease and desist from the acts and practices being investigated,

It is hereby agreed by and between Mid County, by its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

(1) Proposed respondent Mid County is a corporation organized, existing, and doing business under and by virtue of the laws of the State of New York, with its office and principal place of business located at 1706 Flatbush Avenue, Brooklyn, New York 11210.

(2) Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint attached hereto.

(3) Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

(4) This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information with respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

(5) This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint attached hereto.

(6) This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint attached hereto and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public with respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement

may be used to vary or contradict the terms of the order.

(7) Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definitions

For purposes of this order, the following definitions shall apply:

(1) "Multiple listing service" shall mean a clearinghouse through which member real estate brokerage firms regularly and systematically exchange information on listings of real estate properties and share commissions with other members.

(2) "Broker" shall mean any person, firm, or corporation that, for another and for a fee or commission, lists for sale, sells, exchanges, or offers or attempts to negotiate a sale, exchange, or purchase of an estate or interest in real estate.

(3) "Applicant" shall mean any owner or co-owner of a real estate brokerage firm who is duly licensed as a real estate broker within the State of New York and who has applied on behalf of his or her firm for membership in respondent's multiple listing service.

(4) "Member" shall mean any real estate brokerage firm that is entitled to participate in the multiple listing service offered by Mid County.

(5) "Listing agreement" shall mean any agreement between a real estate broker and a property owner for the provision of real estate brokerage services.

(6) "Listing broker" shall mean any broker who lists a real estate property with a multiple listing service pursuant to a listing agreement with the property owner.

(7) "Selling broker" shall mean any broker, other than the listing broker, who locates the purchaser for a listed property.

(8) "Exclusive agency listing" shall mean any listing under which a property owner appoints a broker as exclusive agent for the sale of the property at an agreed commission, but reserves the right to sell the property personally to a direct buyer (one not procured in any way through the efforts of any broker) at an agreed reduction in the commission or with no commission owed to the agent broker.

(9) "Exclusive right to sell listing" shall mean any listing under which a property owner appoints a broker as exclusive agent for the sale of the property and agrees to pay the broker an agreed commission if the property is sold, whether the purchaser is located by the broker or any other person, including the owner.

I

It is ordered that respondent Mid County, its successors and assigns, and its directors, officers, committees, agents, representatives, and employees, directly or indirectly, or through any corporation, subsidiary, division, or other device, in connection with respondent's operation of a multiple listing service in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

(A) Requiring, urging, recommending or suggesting that any applicant or member:

(1) Operate an office full-time or during customary or specified hours;

(2) Derive any particular amount or portion of income from real estate brokerage; or

(3) Engage in real estate brokerage full-time or during customary or specified hours;

provided, however, that nothing contained in this subpart shall prohibit respondent from adopting or enforcing any reasonable and nondiscriminatory policy to assure that its members are actively engaged in real estate brokerage and that listings published on respondent's multiple listing service are adequately serviced.

(B) Adopting any policy or taking any other action that has the purpose or effect of unreasonably discriminating against any prospective applicant, applicant or member that is a new entrant in the market or new to respondent's multiple listing service.

(C) Fixing, establishing, maintaining, recommending or suggesting any rate, range or amount of any division or split of commission or other fees between any selling broker and any listing broker;

(D) Adopting or maintaining any policy or taking any other action that has the purpose or effect of restricting any homeowner's participation in the determination of the division or split of commission or other fees between any listing broker and any selling broker.

(E) Restricting or interfering with:

(1) Any broker's offering or accepting any exclusive agency listing; or

(2) The publication on respondent's multiple listing service of any exclusive agency listing of a member;

provided, however, that nothing contained in this subpart shall prohibit respondent from: (a) Including a simple designation, such as a code or symbol, that a published listing is an exclusive agency listing; or (b) applying reasonable terms and conditions equally applicable to the publication of any listing, whether exclusive agency or exclusive right to sell.

(F) Requiring any member to publish or otherwise distribute to or among members of respondent, or to respondent, the rate or amount of commission agreed to between any listing broker and any property owner; provided, however, that nothing contained in this subpart shall prohibit respondent from publishing or otherwise distributing to or among members of respondent the rate or amount of commission to be paid.

(G) Adopting or maintaining any policy, or taking any other action that has the purpose, capacity, tendency or effect of prohibiting, discouraging or delaying the solicitation of a listing agreement for any property; provided, however, that nothing contained in this subpart shall prohibit respondent from adopting or enforcing any reasonable and nondiscriminatory policy that prohibits any member from using information provided to it by Mid County that pertains to a specific listed property in the solicitation of a listing agreement for that property.

II

It is further ordered that respondent Mid County shall:

(A) Within thirty (30) days after this order becomes final, furnish an announcement in the form shown in Appendix A to each member of Mid County.

(B) Within sixty (60) days after this order becomes final, amend its by-laws, rules and regulations, and other of its materials to conform to the provisions of this order and provide each member with a copy of the amended by-laws, rules and regulations, and other materials.

(C) For a period of three (3) years after this order becomes final, furnish an announcement in the form shown in Appendix A to each new member of Mid County within thirty (30) days of the new member's admission.

III

It is further ordered that respondent Mid County shall:

(A) Within ninety (90) days after this order becomes final, submit a verified written report to the Federal Trade Commission setting forth in detail the manner and form in which respondent has complied and is complying with this order.

(B) In addition to the report required by Paragraph III(A), annually for a period of three (3) years on or before the anniversary date on which this order becomes final, and at such other times as the Federal Trade Commission or its staff may by written notice to respondent require, file a verified written report with the Federal Trade Commission setting forth in detail the manner and form in which respondent has complied and is complying with this order.

(C) For a period of five (5) years after this order becomes final, maintain and make available to the Commission staff for inspection and copying, upon reasonable notice, all documents that relate to the manner and form in which respondent has complied with this order.

(D) Notify the Federal Trade Commission at least thirty (30) days prior to any proposed change in respondent, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in respondent that may affect compliance obligations arising out of this order.

Appendix A

[Respondent's Regular Letterhead]

As you may be aware, the Federal Trade Commission has entered into consent decrees with several multiple listing services in order to halt certain multiple listing service practices. To avoid litigation, Multiple Listing Service Mid County has entered into such a consent agreement. The agreement is not an admission that Mid County or any of its members has violated any law. For your information, the substantive provisions of the consent decree are reproduced below:

Order

I

It is ordered that respondent Mid County, its successors and assigns, and its directors, officers, committees, agents, representatives, and employees, directly or indirectly, or through any corporation, subsidiary, division, or other device, in connection with respondent's operation of a multiple listing service in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

(A) Requiring, urging, recommending or suggesting that any applicant or member:

(1) Operate an office full-time or during customary or specified hours;

(2) Derive any particular amount or portion of income from real estate brokerage; or

(3) Engage in real estate brokerage full-time or during customary or specified hours;

provided, however, that nothing contained in this subpart shall prohibit respondent from adopting or enforcing any reasonable and nondiscriminatory policy to assure that its members are actively engaged in real estate brokerage and that listings published on respondent's multiple listing service are adequately serviced.

(B) Adopting any policy or taking any other action that has the purpose or effect of unreasonably discriminating against any prospective applicant, applicant or member that is a new entrant in the market or new to respondent's multiple listing service.

(C) Fixing, establishing, maintaining, recommending or suggesting any rate, range or amount of any division or split of commission or other fees between any selling broker and any listing broker.

(D) Adopting or maintaining any policy or taking any other action that has the purpose or effect of restricting any homeowner's participation in the determination of the division or split of commission or other fees between any listing broker and any selling broker.

(E) Restricting or interfering with:

(1) Any broker's offering or accepting any exclusive agency listing; or

(2) The publication on respondent's multiple listing service of any exclusive agency listing of a member;

provided, however, that nothing contained in this subpart shall prohibit respondent from: (a) Including a simple designation, such as a code or symbol, that a published listing is an exclusive agency listing; or (b) applying reasonable terms and conditions equally applicable to the publication of any listing, whether exclusive agency or exclusive right to sell.

(F) Requiring any member to publish or otherwise distribute to or among members of respondent, or to respondent, the rate or amount of commission agreed to between any listing broker and any property owner; provided, however, that nothing contained in this subpart shall prohibit respondent from publishing or otherwise distributing to or among members of respondent the rate or amount of commission to be paid.

(G) Adopting or maintaining any policy, or taking any other action that has the purpose, capacity, tendency or effect of prohibiting, discouraging or delaying the solicitation of a listing agreement for any property; provided, however, that nothing contained in this subpart shall prohibit respondent from adopting or enforcing any reasonable and nondiscriminatory policy that prohibits any member from using information provided to it by Mid County that pertains to a specific listed property in the solicitation of a listing agreement for that property.

Mid County previously revised several of its policies in response to concerns expressed by the Federal Trade Commission staff. Further, Mid County has now made additional changes to certain of its by-laws, rules, and regulations to comply with the consent agreement.

Multiple Listing Service Mid County Inc.; Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Multiple Listing Service Mid County Inc. ("Mid County"). The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint

A complaint prepared for issuance by the Commission along with the proposed order alleges that Mid County, acting as a combination of its members, has engaged in various acts and practices that have unreasonably restrained price and service competition among residential real estate brokers in the territory within which Mid County operates. The complaint alleges that these acts and practices violate Section 5 of the Federal Trade Commission Act.

According to the complaint, Mid County provides a multiple listing service for member residential real estate brokers. As described in the complaint, the multiple listing service is a clearinghouse through which competing firms exchange information on listings, *i.e.*, agreements for the provision of brokerage services. Each commission earned is split between the broker that obtained the listing and the broker that located the purchaser of the property.

The complaint states that membership in Mid County is of substantial

competitive value, significantly increasing opportunities for brokers to procure listings and significantly reducing the costs of obtaining current listings and sales information. The multiple listing of properties through Mid County, the complaint continues, generally is considered to be the most effective means of marketing residential property located within the area served by Mid County.

The complaint alleges that Mid County unlawfully denied membership to any firm not operating a full-time brokerage office. According to the complaint, the purpose or effect of this denial was to impede entry into the brokering of residential real estate in the area served by Mid County.

The complaint further alleges that Mid County fixed the maximum share of the commission that could be retained by listing brokers when sales were co-brokered. No more than 40% of the commission could be retained on the sale of residential real estate subject to an "exclusive right to sell" listing, *i.e.*, a listing under which the homeowner agrees to pay the listing broker an agreed commission on the sale of the property, irrespective of who procures the sale. No more than 30% of the commission could be retained by the listing broker on the sale of a property subject to an "exclusive agency" listing, *i.e.*, a listing under which the homeowner may sell the property to a buyer located without the assistance of any broker at a reduced commission or no commission to the listing broker. The purpose or effect of these limitations, according to the complaint, has been to deprive consumers of the advantages of competition in the listing and selling of residential real estate in the area served by Mid County.

The complaint also alleges that Mid County adopted a rule that may be construed to exclude homeowners from any role in the determination of commission splits between listing and selling brokers. The tendency or effect of this rule, the complaint states, is to deprive homeowners of the competitive advantages of negotiating with the listing broker the division of commissions.

The complaint recites that a provision of Mid County's Code of Ethics may be construed as discouraging broker acceptance of exclusive agency listings. According to the complaint, the tendency or effect of this provision is to deprive consumers of the advantages of competition among Mid County members with respect to the types of brokerage services offered.

The complaint further states that Mid County requires its members to disclose, to other members or to Mid County, the total commission or the split of commission agreed to between listing brokers and property owners. The purpose or effect of this disclosure requirement, the complaint alleges, is to reduce the likelihood of discounting and to fix commission rates among Mid County members.

The complaint also indicates that Mid County prohibited members, other than the listing broker, from soliciting the relisting of any property already subject to a published listing agreement until the prior listing has expired. The complaint alleges that the purposes or effects of this prohibition are to restrain competition among Mid County members for relistings of residential properties, stabilizing the price of brokerage services in Mid County's service area and depriving homeowners of price and service competition.

The complaint concludes that the unlawful conduct alleged may continue or recur unless the requested relief is granted.

The Proposed Order

The proposed order would prohibit Mid County from requiring or recommending that any applicant or member operate an office or otherwise engage in real estate brokerage full-time or during customary or specified hours. In addition, it would prohibit Mid County from requiring or recommending that any applicant or member derive any particular amount or portion of income from real estate brokerage. The purpose of these provisions is to prevent the creation of barriers to participation in the multiple listing service that may injure competition among real estate brokers within the area served by Mid County. The proposed order would not prevent Mid County from adopting reasonable and non-discriminatory policies to ensure that members adequately service the listings published on Mid County's multiple listing service. However, the proposed order would prohibit Mid County's adoption of any policy having the purpose or effect of unreasonably discriminating against brokerage firms new to the area serviced by Mid County or new to the multiple listing service.

The proposed order also would prohibit Mid County from fixing, maintaining, or recommending any rate, range, or amount of any division of commission between selling and listing brokers. Further, the proposed order would prohibit Mid County's adoption of any policy that has the purpose or effect of restricting homeowner participation in the determination of the division of commissions. The purpose of these provisions is to prevent Mid County from interfering with the determination of the division of commissions by market forces—including negotiations among prospective listing brokers and homeowners.

The proposed order would bar Mid County from interfering with brokers' offering, accepting, and publishing of exclusive agency arrangements. The purpose of this provision is to restrain Mid County from interfering with homeowner choice as to the type of listing arrangement selected, *i.e.*, exclusive agency or exclusive right to sell listing. The proposed order would not prohibit Mid County from designating a published listing as an exclusive agency listing, thus enabling each prospective selling broker to understand the terms under which its sales effort is invited. Further, the proposed order would not prohibit Mid County from applying reasonable terms and conditions equally applicable to exclusive right to sell and exclusive agency agreements.

In addition, the proposed order would prohibit Mid County from requiring any member to inform Mid County or any of its members of the commission agreed to between any listing broker and any homeowner. The purpose of this provision is to bar Mid County from requiring the disclosure of information that would identify, and thereby discourage, discounting by member brokers. The proposed order would not prohibit Mid County from requiring members to disclose the commission to be paid to the selling broker. Moreover, to the extent that any listing broker voluntarily informs Mid County of the commission agreed to between it and any homeowner, the proposed order would not prohibit Mid County's distribution of that information.

The proposed order also would proscribe Mid County's adoption of any policy having the purpose or effect of delaying the solicitation of a listing agreement. The purpose of this provision is to prevent Mid County from restraining member competition for the relisting of any property already subject to a listing agreement. The proposed order would not prohibit Mid County from adopting any reasonable and non-discriminatory policy to prevent the use of its information regarding a listed property in the solicitation of a listing agreement for that particular property.

The proposed order would require Mid County to provide a copy of the announcement shown in Appendix A to the consent order to each of its members within thirty (30) days after the order becomes final. The announcement contains a verbatim recitation of the substantive provisions of the order. In addition, for a period of three (3) years, Mid County would be required to furnish a copy of the announcement to each new member within thirty (30) days of the new member's admission. The proposed order also would require Mid County to conform its by-laws and rules to the order within sixty (60) days after the order becomes final.

The proposed order also would require Mid County, within ninety (90) days after the order becomes final and then annually for a period of three years, to file a report with the Federal Trade Commission setting forth the manner of its compliance. For a period of five years, Mid County would be required to maintain and make available to the Commission staff all documents that relate to the manner of its compliance with the order. Finally, Mid County would be required to give the Federal Trade Commission thirty (30) days advance notice of any change in Mid County that may affect its compliance obligations under the order, such as dissolution or sale.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: George T. LaRocca, Product Manager (PM) 15, Registration Division (TS-767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 204, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2400.

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of January 29, 1987 (52 FR 2960), that Hoechst-Roussel Agri-Vet Co., acting as U.S. Agent for Roussel Uclaf of Paris, France, Route 202-206 North, Somerville, NJ 08876, had submitted food additive petition (FAP) 7H5522 to the Agency proposing to amend 21 CFR Part 193 by establishing a regulation permitting combined residues of the insecticide deltamethrin ((1*R*,3*R*(2,2-dibromovinyl) 2,2-dimethylcyclopropanecarboxylic acid (*S*)-alpha-cyano-3-phenoxybenzylester) and its major metabolite, *trans*-deltamethrin, in tomato products at 0.2 part per million (ppm).

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicity and other relevant data on this insecticide are included in a related proposed rule [PP 2E2663/P432], which is published elsewhere in this issue of the Federal Register and proposes establishing a tolerance in or on the raw agricultural commodity tomatoes.

Based upon the review of residue data, EPA is proposing that the level of 0.2 ppm in or on tomato products be set at 1.0 ppm. This increase in the food additive tolerance is necessary to adequately cover potential concentrations of residues in tomato products.

The pesticide is considered useful for the purpose for which the tolerance is sought. Based on the above information, the Agency has determined that the proposed tolerance for tomato products would protect the public health.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 7H5522/P435]. All comments filed in response to this proposed rulemaking will be available in the Product Manager's Office, Registration Division, at the address given above from 8 a.m. to 4 p.m., Monday through Firday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new food or feed additive levels, or conditions for safe use of additives, or raising such food or feed additive levels, do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 346(c)(1)))

List of Subjects in 21 CFR Part 193

Animal feeds, Pesticides and pests.

Dated: December 17, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, it is proposed that 21 CFR Part 193 be amended as follows:

PART 193—[AMENDED]

1. The authority citation for Part 193 continues to read as follows:

Authority: 21 U.S.C. 348.

2. New § 193.478 is added to read as follows:

§ 193.478 Deltamethrin.

A regulation is established permitting combined residues of the insecticide

deltamethrin [(1*R*,3*R*)-3(2,2-dibromovinyl)-2, 2-dimethylcyclopropanecarboxylic acid (*S*)-alpha-cyano-3-phenoxybenzyl ester] and its major metabolite, *trans*-deltamethrin, in or on the following food commodity:

Food	Part per million
Tomato products (concentrated)	1.0

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 46

Administration of Adult Education Program

November 3, 1987.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Proposed rule.

SUMMARY: The Bureau of Indian Affairs is publishing proposed regulations that will establish standardized administrative procedures for operating and administering an educational program for Indian adults. The new regulations will apply to adult education programs within the Bureau and tribally contracted adult education programs. The Office of Inspector General has recommended that regulations be developed to govern the administration of the adult education programs. These proposed regulations are in response to the recommendation of the Office of Inspector General.

DATES: Comments must be recieved on or before February 29, 1988.

ADDRESSES: Mail or hand carry written comments to: Wilson Babby, Deputy to the Assistant Secretary/Director—Indian Affairs (Indian Education Programs), Bureau of Indian Affairs, Department of the Interior, 18th & C Streets, NW., Room 3512, Main Interior, Washington, DC 20245.

FOR FURTHER INFORMATION CONTACT: Esther Whalen, Office of Indian Eduction Programs, Bureau of Indian Affairs, Department of the Interior, 18th & C Streets, Main Interior, NW., Washington, DC 20245, telephone number (202) 343-4871.

SUPPLEMENTARY INFORMATION: This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8. Adult education monies have been appropriated, identified, and allotted to the Bureau of Indian Affairs since Fiscal Year 1955. These proposed rules are being prepared to give guidance and direction to the administration of these funds. The rules will ensure that the Bureau of Indian Affairs Adult Education Program shall provide educational opportunities and learning experiences to enable Indian adults to acquire basic literacy skills, continue their education to at least the level of completion of secondary school, and to gain the skills needed to improve their functioning as individuals and as members of families and communities. The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding proposed rules to the location identified in the address section of this preamble. Comments must be received on or before February 29, 1988.

The primary author of this document is Esther Whalen, Branch Chief, Bureau of Indian Affairs, Office of Indian Education Programs, Washington, DC 20245, telephone number (202) 343-4871.

The Department of the Interior has determined that this document is not a major rule and does not require a regulatory analysis under Executive Order 12291. This rule does not constitute a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969. The proposed regulations do not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 606 *et seq*). These proposed regulations will only effect the delivery of audit education services to eligible individual Indian adults, and will not have an impact on small entities as defined in the Act.

The information collection requirements contained in §§ 46.5, 46.9, and 46.10 have been submitted to the Office of Management and Budget for approval as requried by 44 U.S.C. 3501 *et seq*. The collection of this information will not be required until the collection form has been approved by the Office of Management and Budget.

The Bureau of Indian Affairs previously defined all applicants for assistance under the Adult Education Program to mean a person who is recognized as a member of an Indian tribe by the Secretary of the Interior, and who has at least one-fourth degree Indian blood, Alaska Native, Eskimo or Aleut blood (Alaska Native). However, the U.S. Court of Appeals for the Ninth Circuit has ruled that such one-fourth blood requirement is not in accordance with the authorizing statute, Zarr v. Barlow, No. 85-2170 (September 30, 1986). Therefore, the quarter blood requirement is being removed. Comments are especially desired on this section of eligibility.

List of Subjects in 25 CFR Part 46

Indians, Adult education programs.

It is proposed to add a new Part 46 to Subchapter E, Chapter I of Title 25, of the Code of Federal Regulations to read as follows:

PART 46—ADMINISTRATION OF THE ADULT EDUCATION PROGRAM

Sec.
46.1 Purpose and scope.
46.2 Definitions.
46.3 Information collection. [Reserved]
46.4 Eligible activities.
46.5 Education program plan requirements.
46.6 Approval of education program plans.
46.7 Maximum program participation.
46.8 Eligible students.
46.9 Application form.
46.10 Program records and reporting requirements.

Authority: 43 U.S.C. 1457; 25 U.S.C. 2, 9, and 13, and the Reorganization Plan No. 3 of 1950 (65 Stat. 1262); 209 DM 8.

§ 46.1 Purpose and scope.

This Part governs the program parameters and expenditure of funds appropriated for the Adult Education Programs funded by the Bureau of Indian Affairs. It sets forth the requirements to administer Bureau operated and tribally contracted Adult Education Programs. The adult education program is designed to help raise the level of education for Indian adults and to enhance their opportunities for self-dependence, to improve their ability to benefit from occupational training and otherwise increase their opportunites for more productive and profitable employment, and to enhance their capabilities in meeting their responsibilities.

§ 46.2 Definitions.

As used in this part: "Adult Basic Education [ABE]" means education for adults whose inability to speak, read, or write the English language constitutes a substantial impairment of their ability to obtain or retain employment commensurate with their real ability.

"Adult education" means educational instruction below the college level, for Indian adults sixteen years of age or older who are not enrolled in a formalized school education program or postsecondary education program, which is intended to enhance self-dependence, improve ability to benefit from occupational training or otherwise increase their opportunities for more productive and profitable employment, and/or otherwise to enhance abilities to fulfill responsibilities.

"Assistant Secretary" means the Assistant Secretary—Indian Affairs, Department of the Interior or his/her authorized representative.

"Community service courses" means the non-credit short courses, seminars or workshops planned to meet the adult education needs of the community.

"Continuing Education Unit (CEU)" means course work in which credit may be earned but not counted toward a postsecondary degreed program. One CEU represents ten contact hours of participation in an organized educational experience under responsible sponsorship, capable direction and qualified instruction.

"Director" means the Deputy to the Assistant Secretary/Director—Indian Affairs (Indian Education Programs), Bureau of Indian Affairs or his/her authorized representative.

"General Educational Development Test (GED)" means the test taken to obtain a high school equivalency diploma.

"Indian" means a person who is a member of an Indian tribe and is eligible to receive services from the Secretary of the Interior.

"Indian adult student" means an Indian who has attained 16 years of age or is beyond the age of compulsory school attendance under State or tribal law and is not currently enrolled in a formal secondary or postsecondary education program.

"Indian priority system" means the Bureau of Indian Affairs budget formulation process that allows direct tribal government involvement in the setting of relative priorities for the local operating programs.

"Indian tribe" means any Indian tribe, band, nation, rancheria, pueblo, colony, or community including any Alaska Native village which is Federally recognized by the United States Government through the Secretary for special programs and services provided by the Secretary to Indians because of their status as Indians.

"Life coping skills" means (1) everyday basic skills leading to self-sufficiency in such areas as seeking employment, social responsibilities, budgeting, money management, filling out applications, consumer awareness, and (2) instructional information services from Federal, state, and tribal programs (i.e., medicare, Social Security, filing of federal and state taxes, per capita entitlements, and real estate and trust services).

"Program administrator" means an individual who is directly responsible for the operation of a Bureau or tribally contracted Adult Education Program.

"Program officer" means the officer administering funds appropriated to the Bureau for the Adult Education Program.

"Public Law 93-638" means the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 (88 Stat. 2203)).

"Secretary" means the Secretary of the Interior or his/her authorized representative.

"Service area" means the geographic area served by an Adult Education Program.

"Supportive services" means recruitment, child care, transportation and follow-up services for Indian adult participants.

"Tribal contractor" means an Indian tribe or organization which has contracted with the Bureau of Indian Affairs for the administration of the Adult Education Program under the authority of Public Law 93-638.

§ 46.3 Information collection [reserved].

§ 46.4 Eligible activities.

(a) Funds appropriated for Adult Education Programs may be used for:

(1) Programs of instruction (including costs of developing and planning these programs) for Indian adults for the purpose of enabling these adults to become productive members of society. These programs of instruction may include preparation for the General Educational Development test, Adult Basic Education, community service courses, and life coping skills courses.

(2) Programs of instruction in Adult Basic Education or preparation for the GED designed to operate in conjunction with existing Federal and non-Federal programs and activities to develop occupational and related skills for Indian adults, particularly programs authorized under the Job Training Partnership Act (29 U.S.C. 1501 *et seq.*), the Vocational Education Act of 1963, as amended (20 U.S.C. 2301), or under the Older Americans Act of 1965 (42 U.S.C. 3001 *et seq.*).

(3) Programs providing educational support services that meet the needs of Indian adults, including but not limited to—

(i) Tutoring, and

(ii) Guidance and counseling with regard to educational opportunities.

(4) Special instructional programs for elderly Indians designed to equip such elderly persons to deal successfully with practical problems in their everyday living, including the making of purchases, meeting their transportation and housing needs, and complying with governmental requirements such as those Indian Trust Services, public assistance, social security benefits, and housing.

(b) The Adult Education Program Officer may not use adult education funds for purposes that duplicate available State, local or other Federal programs or services.

§ 46.5 Education program plan requirements.

(a) For each fiscal year covered by programs under this Part, each program office shall develop and implement an educational plan based on the funding level established for adult education in the formulation of the budget under the Indian Priority System.

(b) These plans shall be updated every other year to reflect the current needs of the Indian adults in the service area.

(c) The educational plan shall include, but not be limited to the following information:

(1) Assessment of adult education needs of the target population;

(2) A description of programs of instruction planned in response to this assessment, which may not duplicate activities or services available under State, local or other Federal programs;

(3) A statement of goals and measurable objectives for each program of instruction planned;

(4) Procedures, organization and methods to be used to accomplish the goals and objectives for each program of instruction;

(5) A description of the evaluation procedures to be used to measure achievement of objectives;

(6) A budget showing the amount and sources of funding and other resources required for the program;

(7) Findings, supported by an evaluation of expected program accomplishments, that the program is cost effective;

(8) A staffing plan, including position qualifications to be used in the program and including requirements that program personnel be experienced and trained in fields related to the program activities;

(9) An indentification of the facilities to be used and certification that they are adequate to support the planned activities; and

(10) Criteria for the course work is established prior to the beginning of the activity if Continuing Education Units (CEU) are to be awarded to students.

§ 46.6 Approval of education program plans.

Program plans for each Adult Education Program are subject to the approval of the appropriate Agency Superintendent for Education (ASE) or of the Area Education Programs Administrator (AEPA) based on the criteria set forth in § 46.5.

§ 46.7 Maximum program participation.

To assure maximum program participation, adult education funds expended under this Part may be used for recruitment, child care, student transportation, staff development and follow-up, provided that no more than 15 percent of the program allocation is used for these activities.

§ 46.8 Eligible students.

To be eligible for assistance from funds appropriated to the Bureau for adult education, an applicant must:

(a) Be an Indian as defined in § 46.2;

(b) Be sixteen years of age or beyond the age of compulsory school attendance under State or tribal law; and

(c) Be currently not enrolled in a formal secondary or postsecondary education program.

§ 46.9 Application form.

The "Bureau of Indian Affairs Adult Education Application" shall be used by all applicants participating in adult education programs under this Part in accordance with the requirements of the Paperwork Reduction Act, section 3504(h) of Pub. L. 96–511. Such forms shall be available at Bureau Agency and Area Offices, and tribal offices administering this program under Pub. L. 93–638 contract.

§ 46.10 Program records and reporting requirements.

(a) Each program officer shall annually submit by December 1, a report on the previous fiscal year's activities to the Deputy to the Assistant Secretary/Director—Indian Affairs (Indian Education Programs) through the appropriate ASE or AEPA by December 1 of each year. The report shall include the following information:

(1) Number of program participants by instructional area (i.e., ABE, GED preparation, community service classes, life coping skills) and records of program completion; and information regarding duration of course hours;

(2) Number of participants that earned high school equivalency diplomas;

(3) Listing of courses offered as community service courses, life coping skills classes, special courses for the elderly, etc. along with data on the total number of participants in each course offered and those who completed the program;

(4) Narrative statements, including the financial statement, describing how all fiscal year Bureau funds were used for the adult education program;

(5) Narrative statements providing description of program accomplishments, facts, suggestions recommendations, newsletters, (if applicable) pictures (if applicable) and highlights.

(b) Each adult education program officer shall maintain records necessary to identify all transactions involving Bureau funds available under this Part. Such records shall include:

(1) Student files that identify each adult student and his/her status;

(2) Student files that show attendance, courses taken, and placement test results;

(3) Adequate documentation to demonstrate the eligibility of every student assisted by the program;

(4) Information regarding the number of participants served by the programs and the number of participants that earned high school equivalency diplomas; and

(5) Documentation of program expenditures.

Ross O. Swimmer

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 7E3549/P439; FRL 3308–7]

Pesticide Tolerance for 2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio)-propyl]-3-hydroxy-2-cyclohexene-1-one

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the herbicide 2-[1-(ethoxyimino)-butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexene-1-one and its metabolites (referred to in this document as "sethoxydim") in or on the raw agricultural commodity artichokes. The regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 7E3549/P439], should be received on or before January 29, 1988.

ADDRESS: By mail, submit written comments to: Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part of all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, submitted pesticide petition 7E3549 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Station of California.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the herbicide 2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexene-1-one and its metabolites containing the 2-cyclohexene-1-one moiety (calculated as the herbicide) in or on the raw agricultural commodity artichokes at 3.0 parts per million (ppm). The petitioner proposed that use of sethoxydim on artichokes be limited to California based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include:

1. A 6-month dog feeding study with a no-observed-effect level (NOEL) of 2 milligrams (mg)/kilogram (kg)/day (equivalent to 60 ppm).

2. A 2-year chronic feeding/oncogenicity study in rats with a NOEL equal to or greater than 360 ppm (equivalent to 18 mg/kg/day, highest does tested) and no oncogenic effects observed under the conditions of the study at all dose levels tested (40, 120, and 360 ppm).

3. A 2-year chronic feeding/oncogenicity study in mice with a NOEL of 120 ppm (equivalent to 18 mg/kg/day) and no oncogenic effects observed under the conditions of the study at all dose levels tested (0, 40, 120, 360, and 1,080 ppm).

4. A two-generation reproduction study in rats with a NOEL of 360 ppm (equivalent to 18 mg/kg/day).

5. A teratology study in rats with no observed teratogenic effects at 250 mg/kg/day (highest dose tested) and a NOEL of 40 mg/kg/day for maternal toxicity.

6. A teratology study in rabbits with a NOEL for teratogenic effects and maternal toxicity at 160 mg/kg/day.

7. Mutagenicity studies including recombinant assays and forward mutations in *B. subtilis, E. coli,* and *S. typhimurium* (negative at concentrations of chemical to 100 percent), and a host-mediated assay (mouse) with *S. typhimurium* (negative at 2.5 grams (gms)/kg/day of chemical).

8. A metabolism study in rats which showed negligible accumulation and extremely rapid excretion of the chemical.

The acceptable daily intake (ADI), based on the 6-month dog feeding study NOEL of 2 mg/kg/day and using a 100-fold safety factor, is calculated to be 0.02 mg/kg of body weight/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 1.2 mg/day. The theoretical maximum residue contribution(TMRC) from existing tolerances for uses of sethoxydim is calculated to be 0.006874 mg/kg/day. The current action will increase the TMRC by 0.000010 mg/kg/day (0.14 percent). Published tolerances utilize 34.37 percent of the ADI, and the current action will utilize an additional 0.05 percent.

The nature of the residues is adequately understood, and an adequate analytical method, gas-liquid chromatography using a flame photometric detector, is available for enforcement purposes. Analytical enforcement methods are currently available in the Pesticide Analytical Manual (PAM), Volume II. There are currently no actions pending against the continued registration of this chemical.

No secondary residues in meat, milk, poultry, or eggs are expected since artichokes are not considered a livestock feed commodity. Based on the information and data considered, the Agency concludes that the tolerance will protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the Federal Register that this rulemaking proposal be referred to an advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 7E3549/P439]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: December 17, 1987.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.412 is amended by designating the current paragraph and list of tolerances as paragraph (a) and by adding new paragraph (b) to read as follows:

§ 180.412 2-[1-(Ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexene-1-one; tolerances for residues.

* * * * *

(b) Tolerances with regional registration, as defined in § 180.1(n), are established for the combined residues of the herbicide 2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexene-1-one and its metabolites containing the 2-cyclohexene-1-one moiety (calculated as the herbicide) in or on the following raw agricultural commodities:

Commodities	Parts per million
Artichokes	3.0

Pesticide Tolerance for Fluazifop-butyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the herbicide fluazifop-butyl in or on the raw agricultural commodity rhubarb. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 7E3527/

P436], must be received on or before January 29, 1988.

ADDRESS: By mail, submit written comments to:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 7E3527 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Stations of Maryland and New Jersey.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide (R)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy] propanoic acid (resolved isomer of fluazifop), both free and conjugated and of butyl[R]-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]-oxy]phenoxy] propanoate (resolved isomer of fluazifop-P-butyl), all expressed as fluazifop, in or on the raw agricultural commodity rhubarb at 0.5 part per million (ppm). The petitioner proposed that use on this commodity be limited to Maryland and New Jersey based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contract the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include:

1. A 2-year chronic feeding/oncogenicity study in rats which was negative for oncogenic potential under the conditions of the study at 3.0 milligrams (mg) per kilogram (kg) of body weight (bw) per day (equivalent to 60 ppm highest dose tested) and a systemic no-observed-effect level (NOEL) of 1 mg/kg/day.

2. A 90-day rat feeding study with a NOEL of 0.5 mg/kg/day (equivalent to 10 ppm).

3. A 90-day dog feeding study with a NOEL of 25 mg/kg/day (equivalent to 1,000 ppm).

4. A rat oral lethal dose LD_{50} of 3,300 mg/kg.

5. A rat teratology study with a teratogenic and maternal toxicity NOEL of 10 mg/kg/day (equivalent to 200 ppm) and a NOEL for fetotoxicity of 1 mg/kg/day.

6. A rabbit teratology study with no teratogenic effect at 90 mg/kg/day (highest dose tested) and a NOEL for fetotoxicity of 10 mg/kg/day (equivalent to 330 ppm).

7. A two-generation rat reproduction study with a NOEL of 1 mg/kg/day.

8. A 1-year dog feeding study with a NOEL of 5 mg/kg/day.

9. An 18-month mouse chronic feeding/oncogenicity study with no observed oncogenic potential under the conditions of the study at 3.0 mg/kg/day (highest dose tested) and a NOEL for systemic toxicity of 1.0 mg/kg/day (equivalent to 7 ppm).

10. An Ames test (negative), a rat cytogenetic study (negative), and an *in-vitro* transformation assay (negative).

11. An acute delayed neurotoxicity study in hens (negative).

The acceptable daily intake (ADI), based on the 2-year rate feeding study (NOEL of 1.0 mg/kg/day) and using a 100-fold safety factor, is calculated to be 0.01 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.6 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.001712 mg/kg/day; the current action will increase the TMRC by 0.000002 mg/kg/day (0.12 percent). Published tolerances utilize 17.1 percent of the ADI; the current action will utilize an additional 0.02 percent.

The nature of the residues is adequately understood, and an adequate analytical method, high pressure liquid chromatography using an ultraviolet detector, is available in Pesticide Analytical Manual, Volume II (PAM–II), for enforcement purposes.

Based on the above information considered, the Agency concludes that the tolerance established by amending 40 CFR 180.411 will protect the public health. No secondary residues in meat, milk, poultry, or eggs are expected since rhubarb is not considered a livestock feed commodity.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 7E3527/P436]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Pesticide Tolerance for Deltamethrin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the insecticide deltamethrin and its major metabolite, *trans*-deltamethrin, in or on the raw agricultural commodity tomatoes. The proposed regulation to establish a maximum permissible level for residues of the insecticide was requested, pursuant to a petition, by Hoechst-Roussel Agri-Vet Co., acting as Registered U.S. Agent for Roussel Uclaf of Paris, France.

DATE: Comments must be received on or before January 29, 1988.

ADDRESS: By mail, submit written comments to: Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Room 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Room 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: George T. LaRocca, Product Manager (PM) 15, Registration Division (TS–767C), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 204, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2400.

SUPPLEMENTARY INFORMATION: The Hoechst-Roussel Agri-Vet Co., acting as Registered U.S. Agent for Roussel Uclaf of Paris, France, Route 202–206 North, Somerville, NJ 08876, submitted pesticide petition 2E2663 to the EPA. The petition requests that the Administrator propose that 40 CFR Part 180 be amended by establishing a tolerance for the combined residues of the insecticide deltamethrin [(1*R*,3*R*)-3(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylic acid (*S*)-alpha-cyano-3-phenoxybenzyl ester) and its major metabolite, *trans*-deltamethrin, in or on the raw agricultural commodity tomatoes imported from Mexico at 0.2 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include a rat chronic feeding/oncogenicity study which was negative for oncogenic effects under the conditions of the study up to and including 50 ppm, the highest dose tested (HDT). The no-observed-effect level (NOEL) for this study was 20 ppm. At the highest dose level tested (50 ppm) there were decreases in body weight gain. Other studies include a 2-year dog chronic feeding study with a NOEL of 40 ppm (HDT); a mouse oncogenicity study which showed no oncogenic or other effects under the conditions of the study at 100 ppm (HDT); mouse and rat teratology studies which showed no teratogenic effects up to and including 10.0 milligrams per kilogram per day (mg/kg/day) (HDT); a rabbit teratology study which showed no teratogenic effects up to and including 16 mg/kg/day (HDT); a rat three-generation reproduction study which had a NOEL of 50 ppm (HDT); a delayed neurotoxicity study with hens which was negative at doses up to and including 5,000 mg/kg; mutagenicity—*E. coli* (Slater and Bridges test) in which deltamethrin was not mutagenic up to and including 5,000 µg/milliliter; two mutagenicity [Ames test) which were negative with or without metabolic activation with strains TA98, TA100, TA1535, TA1537, and TA1538; a dominant lethal test with mice which did not show mutagenic effects; and microsomal metabolism studies *in vitro* (rat liver, housefly, cabbage looper) in which oxidative and hydrolytic enzyme metabolism was studied and metabolites identified.

The acceptable daily intake (ADI) is calculated to be 0.01 mg/kg/day based on a 2-year rat chronic feeding study with a NOEL of 20.0 ppm (1 mg/kg/day) and a hundredfold safety factor. The maximum permissible intake is calculated to be 0.6 mg/day for a 60-kg person. Establishment of this tolerance, based on the Tolerance Assessment System analysis, which estimated the average U.S. population dietary exposure, will result in a theoretical maximum residue contribution of 0.0002 mg/kg/day.

Data desirable but currently lacking from the petitioner are additional mutagenicity tests in accordance with Subpart F of the Agency's Guidelines. The petitioner has been informed of these date requirements and has agreed to submit the data by March of 1989.

There are no regulatory actions pending against registration of the insecticide, nor are there any other relevant considerations involved in establishing the proposed tolerance. The metabolism of deltamethrin and its major metabolite, *trans*-deltamethrin, is adequately understood for this use, and an adequate analytical method (the same methodology used for (1*R*,3*S*)3[(1′*RS*)(1′,2′,2′,2′-tetrabromoethyl)]-2,2-dimethylcyclo-

propanecarboxylic acid (*S*)-*alpha*-cyano-3-phenoxybenzyl ester (40 CFR 180.422)), gel permeation chromatography and gas liquid chromatography with an electron capture detector, is available in the FDA Pesticide Analytical Manual, vol. II, for enforcement purposes.

Imported tomatoes are not processed into dried tomato pomace for animal feed; therefore, there is no reasonable expectation of secondary residues in eggs, meat, milk, or poultry.

The pesticide is considered useful for the purpose for which the tolerance is sought. Based on the above information, the Agency has determined that the proposed tolerance for residues of the pesticide in or on tomatoes will protect the public health.

Any person who has registered or submitted an application for registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, which contains any of the ingredients listed herein may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments in the proposed regulation. Comments must bear a notation indicating the document control number. [PP 2E2663/P432]. All comments filed in response to this proposed rulemaking will be available in the Product Manager's Office, Registration Division, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Date: November 13, 1987.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. New § 180.435 is added to read as follows:

§ 180.435 Deltamethrin; tolerances for residues.

A tolerance is established for residues of the insecticide deltamethrin [(1*R*,3*R*)-3(2,2-dibromovinyl)-2,2-dimethylcyclopropanecarboxylic acid (*S*)-alpha-cyano-3-phenoxybenzyl ester] and its major metabolite, *trans*-deltamethrin, in or on the following raw agricultural commodity:

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[Common Carrier Docket No. 87-530; FCC 87-363]

Private Networks and Private Line Users of Exchange Access

AGENCY: Federal Communications Commission (FCC).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to reexamine the access charge rules as they apply to private networks and private line users of exchange access. This action is necessary to determine whether a more rational approach to the assessment charges is possible.

DATES: Comments are due by February 29, 1988, and reply comments by March 30, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Judith Wish, (202) 632-4047.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rulemaking in Common Carrier Docket 87-530, FCC 87-363, Adopted November 24, 1987, and Released December 15, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rulemaking

1. In a series of orders in CC Docket No. 78-72, the Commission adopted a comprehensive access charge plan for the recovery by local exchange carriers (LECs) of the costs associated with the origination and termination of interstate telecommunications.[1] A primary objective of the plan was to reduce or eliminate discrimination or preferences in charges for telecommunications services. Thus, the plan applied switched access charges to most interstate services that use local exchange switches and common line facilities for access, including MTS, WATS, and MTS/WATS-equivalent services, as well as those that combine interstate private line service with these facilities, such as FX, CCSA, and CCSA-equivalent services.

2. However, in attempting to implement an access charge plan in which all interstate traffic that traversed the local exchange would receive the same treatment, the Commission encountered two obstacles: The "leaky PBX" phenomenon and "rate shock." The leaky PBX phenomenon arises because most private line users who terminate their lines in PBXs can interconnect those lines to local exchange subscriber lines to route interstate calls through the local exchange switch to another subscriber line. Because these interstate calls appear to the LEC as local calls, the LEC was unable to identify the interstate calls for purpose of applying access charges.

3. The leaky PBX problem arises with any device that can interconnect private lines with local exchange subscriber lines, including Centrex equipment. In drafting the present access charge rules the Commission treated Centrex leakage like PBX leakage because of concern that Centrex raised the same measurement problems that PBX did. In addition, the Commission seemed to be concerned that, because Centrex and PBX competed directly with one another, treating them differently for access charge purposes would have serious competitive impacts.

4. "Rate shock" refers to the Commission's concerns that immediate application of switched access charges to certain interstate services that use local exchange switches and common line might unduly burden, or even disrupt, their operations. In response to these concerns, the Commission granted temporary exemptions from payment of such charges to certain resellers, enhanced service providers, and sharers. Recently, the Commission eliminated the exemption for resale carriers,[2] and on July 17, 1987, initiated a rulemaking to consider whether to eliminate the exemption for enhanced service providers.[3]

5. While the Commission did not apply switched access charges to leaked interstate PBX traffic and other exempt traffic, it developed a surrogate charge—the special access surcharge—applicable to all special access lines that terminate in a PBX or any other device that can interconnect special access lines with subscriber lines, and that do not fall within certain specified exceptions. The Commission recognized at the time that there were notable limitations on the surcharge as an effective substitute for switched access charges, and the Commission indicated that it expected that superior methods of dealing with the leaky PBX problem would be developed.

6. Thus, in their present form, the access charge rules create a substantial dichotomy in the charges applied to private networks and private lines depending or whether they access the local exchange facilities via (a) CCSA or equivalent switching services, or (b) PBX or equivalent devices, including Centrex.

7. Since the Commission adopted the access charge plan, there have been significant developments in switch technology and increasing competition in the private line and private network market. Thus, the more sophisticated switches available today enable certain Centrex and PBX equipment to distinguish and measure interstate traffic "leaked" into the local exchange. Moreover, competition is increasing in the private network market as functionally similar interstate private network switching services are being provided interexchange carriers, local exchange carriers, and CPE. Thus, Centrex-Electronic Tandem Switching (Centrex-ETS) service, and similarly sophisticated ETS-like PBX devices, largely unknown in their present form in 1983, have become increasingly and directly competitive with CCSA switching services. Yet, the Commission's rules and orders do not define CCSA-equipment or list its characteristics. Neither do the rules and orders specifically mention Centrex-ETS or PBX-ETS service, or indicate whether the Commission intended them to be considered CCSA-like or PBX-like services.

8. The Bell Atlantic Declaratory Ruling Order, adopted along with this *NPRM*,[4] considers the appropriate access charge treatment of Centrex-ETS for the first time. The Commission there concluded that Centrex-ETS, although something of a "hybrid" service—combining both CCSA-like and PBX-like characteristics—is functionally and competitively so similar to CCSA service that under the present access charge rules it should be treated as a CCSA-equivalent service. That result raises questions regarding discrimination, efficiency, and enforcement, since it treats off-network interstate private network traffic switched by Centrex-ETS switches differently from such traffic switched by PBX-ETS, conventional Centrex, and conventional PBX systems.

9. In light of these developments, the Commission has decided to reexamine the present access charge rules to determine whether a more technically and economically rational approach to the assessment of charges for private network access that better promotes the goals of the access charge plan is possible. Specifically, the *NPRM* proposes to reexamine and seeks comment on the following issues relating to the application of the access charge rules to private networks and private line users:

a. *Centrex-ETS:* The *NPRM* seeks comment on whether Centrex-ETS service should continue to be treated as a CCSA-equivalent for access charge purposes. Specifically, the *NPRM* tentatively concludes that Centrex-ETS is functionally similar to CCSA, competes for the same business as CCSA, and, in most, if not all, cases, can identify and measure interstate private network traffic switched off the private network (off-net). The *NPRM* seeks comment on these conclusions. In addition, the *NPRM* indicates that certain problems may arise if Centrex-ETS continues to be treated differently from conventional Centrex, and requests comment on the potential definitional problems and possible network inefficiencies that might arise.

b. *Conventional Centrex:* The *NPRM* tentatively concludes that conventional Centrex is functionally distinct from Centrex-ETS and CCSA-type service, and seeks comments on that conclusion and on whether that distinction should affect the access charge treatment of conventional Centrex service. In addition, the *NPRM* seeks comment on whether and, if so, the extent to which conventional Centrex switches can identify and measure interstate traffic switched into and out of the local exchange. The *NPRM* also seeks comment on whether the Commission should, to further its goal of having all interstate users of local exchange switches pay similar access charges for similar use, require application of switched access charges whenever measurement is possible. Finally, the *NPRM* asks commenters to consider the likely competitive effects of applying switched access charges to conventional Centrex service, but not to conventional PBX switches.

c. *PBX-ETS:* The *NPRM* tentatively concludes that PBX-ETS is functionally equivalent to Centrex-ETS and CCSA, and is being used interchangeably with those services in large, nationwide private networks. The *NPRM* asks commenters to provide data on the growth of the private network market, the switching devices that are part of it, and the ways in which that growth might be affected by changes in the access charge rule that would treat all electronic tandem switching devices—CCSA, Centrex-ETS, and PBX-ETS—the same. The *NPRM* points out that while equal treatment may be desirable, the LEC may not be able to measure the interstate usage by the PBX-ETS; it seeks comment on the LEC's capability to do so. The *NPRM* requests comment on whether PBX-ETS private networks now use, or should be required to use, dedicated off-network access lines (ONALS) for off-net access, over which measurement would presumably be possible. Alternatively, the *NPRM* seeks comment on whether the Commission

VOL 52 ISS 250 DEC 30 1987 UMI

should require PBX–ETS users to measure their own leakage and report that leakage to the LEC, and on the difficulties inherent in such an approach. Finally, the *NPRM* indicates that problems may arise if PBX–ETS is treated differently from conventional PBX, and requests comment on the potential definitional problems and possible network inefficiencies that might arise.

d. *Conventional PBX:* The *NPRM* concludes that conventional PBX, like conventional Centrex, is functionally distinct from PBX–ETS, Centrex-ETS, and CCSA-type interstate private network switching services, and seeks comment on that conclusion. The *NPRM* also seeks comment on the measurement capability of conventional PBX switches in use now. If measurement is possible on some, or all, such switches, the *NPRM* asks whether they should be subject to switched access charges. Finally, the *NPRM* seeks comment on how such a requirement might be implemented.

10. In those cases where the Commission concludes that it is not possible or desirable to impose switched access charges on certain private networks and private line users, the *NPRM* suggests that a surrogate charge—like the special access surcharge—may continue to be the best way of ensuring that private line users contribute in some way to the local exchange facilities they use in originating and terminating interstate calls through the public switched network. At the time the Commission adopted the special access surcharge in 1983, it recognized that the surrogate charge contained many defects, and anticipated that it would soon be replaced. In 1984, the Commission issued a Notice of Proposed Rulemaking to consider modifications and/or elimination of the special access surcharge.[5] The record developed in the proceeding has been made part of this docket. Based on the comments and reply comments filed in that proceeding and in view of the changes in switch technology since 1983, the *NPRM* proposes the following possible modifications to the special access surcharge, and seeks comment on each:

a. *Eliminate the self-certification exemption to the special access surcharge.* The *NPRM* seeks comment on whether the Commission should eliminate the surcharge exemption for private line subscribers who certify that they have implemented hardware or software restrictions to disable their PBX or similar device from leaking. The *NPRM* points out that many commenters, in response to the earlier Notice, assert that the exemption has been abused, and is difficult for the LECs to enforce; or the other hand, the exemption may have reduced leakage and discouraged facilities bypass. The *NPRM* seeks comment on the effects and value of the exemption, and on whether it should be eliminated.

b. *Reduce the surcharge to reflect the decrease in CCL charges.* The present surcharge was computed as a surrogate for both end office access charges and CCL charges for interstate use of the local exchange. The CCL charge has decreased since 1983. The *NPRM* invites specific proposals for a mechanism that would, in applying the existing surcharge formula, either simply reduce the surcharge amount by some factor to reflect decreases in the CCL charge, or adjust the surcharge amount to take account of other factors.

c. *Modified measurement approach.* The *NPRM* invites comment on a proposed modified measurement approach to replace the present surcharge, consisting of the following: Each LEC would be required to develop a measurement-based charge, involving actual measurement or a representative sampling of leakage through conventional Centrex equipment. That charge would then be applied to special access lines connected to all Centrex and PBX switches that are subject to the surcharge. The *NPRM* also seeks comment on variations or improvements in this proposal.

d. *Maintain the existing surcharge.* The *NPRM* seeks comment on whether, in view of the problems that might arise with respect to the proposed modifications in the surcharge, no other surcharge mechanism would be more effective than the present one or would better serve the public interest.

1. Finally, the *NPRM* considers the appropriate access charge treatment for entities that share private lines and private networks. As noted, the access charge rules initially exempted resale carriers, enhanced service providers, and sharers from switched access charges because of rate shock concerns. The resellers' exemption has been eliminated, and the Commission recently proposed to eliminate the exemption for enhanced service providers. MCI filed a Petition for Clarification in CC Docket No. 86–1 requesting the Commission to clarify that in eliminating the exemption for resellers it also intended to eliminate the exemption for entities that share private networks and systems. The Commission, in an Order adopted along with the *NPRM*,[6] denied the petition, stating that the reseller order does not extend to sharers. However, in view of these actions, the *NPRM* concludes that it is no longer appropriate to maintain a switched access charge exemption for entities that share private lines and private networks to the extent they use the local network in the same way as resellers and other users of private networks and private line services. The *NPRM* tentatively concludes that switched access charges should apply to private line sharers in the same way that they apply to all private users of the local exchange, and seeks comment on that tentative conclusion and on potential implementation problem with it.

Procedural Matters

12. Pursuant to 47 U.S.C. 154(i), 154(j), 201–05, 218, and 403, and 5 U.S.C. 553, notice is hereby given of proposed adoption of new or modified rules.

13. All interested persons may file comments on the issues and proposals discussed herein not later than February 29, 1988, and replies may be filed not later than March 30, 1988. In accordance with the provisions of § 1.419, an original and five copies of all statements, briefs, comments, or replies shall be filed with the Federal Communications Commission, Washington, DC, 20054, and all such filings will be available for public inspection in the Docket Reference Room at the Commission's Washington, DC office. In addition, two copies of each pleading should be filed with the Policy and Program Planning Division, Common Carrier Bureau, 1919 M Street NW., Washington, DC 20554. A copy of all filings should also be sent to the Commission's contractor for public records duplication, International Transcription Service, Inc., 2100 M Street NW., Suite 140, Washington, DC 20037, (202) 857–3800. In reaching its decision, the Commission may consider information and ideas not contained in filings, provide that such information is reduced to writing and placed in the public file, and provided that the fact of the Commission's reliance on any such information or ideas is noted in the Order.

14. For purposes of this nonrestricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* presentations are

[5] MTS and WATS Market Structure, Notice of Proposed Rulemaking, 49 FR 50,413 (1984).

[6] WATS-Related and Other Amendments of Part 69 of the Commission's Rules, CC Docket No. 86–1, FCC 87–362 (released Dec. 15, 1987).

permitted except during the Sunshine Agenda period. *See generally* § 1.1206(a). The Sunshine Agenda period is the period of time which commences with the release of a public notice that a matter has been placed on the Sunshine Agenda and terminates when the Commission (1) releases the text of a decision or order in the matter; (2) issues a public notice stating that the matter has been deleted from the Sunshine Agenda; or (3) issues a public notice stating that the matter has been returned to the staff for further consideration, whichever occurs first. Section 1.1202(f). During the Sunshine Agenda period, no presentations, *ex parte* or otherwise, are permitted unless specifically requested by Commission or staff for the clarification or adduction of evidence or the resolution of issues in the proceeding. Section 1.1203.

15. In general, an *ex parte* presentation is any presentation directed to the merits or outcome of the proceeding made to decision-making personnel which (1) if written, is not served on the parties to the proceeding, or (2) if oral, is made without advance notice to the parties to the proceeding and without opportunity for them to be present. Section 1.1202(b). Any person who submits a written *ex parte* presentation must provide on the same day it is submitted a copy of same to the Commission's Secretary for inclusion in the public record. Any person who makes an oral *ex parte* presentation that presents data or arguments not already reflected in that person's previously-filed written comments, memoranda, or filings in the proceeding must provide on the day of the oral presentation a written memorandum to the Secretary (with a copy to the Commission or staff member involved) which summarizes the data and arguments. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. Section 1.1206.

BILLING CODE 6712–01–M

---

47 CFR Part 73

[MM Docket No. 87–563, RM–6078]

Radio Broadcasting Services; Dyersburg, Tennessee; Jonesboro, Hoxie, and Newport, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Dr Pepper Pepsi-Cola Bottling Company of Dyersbury, Inc., proposing the substitution of Class C2 Channel 261 for Channel 261A at Dyersburg, as that community's first wide coverage area FM station. The proposal requires a site restriction of 18.8 kilometers (11.7 miles) northwest of Dyersburg. In order to accomplish the substitution at Dyersburg, substitutions must also be made at Jonesboro, Arkansas, Channel 262A for 261A (Station KDEZ(RM)); Newport, Arkansas, Channel 264A for 288A (Station KOKR(FM)); and at Hoxie, Arkansas, Channel 287A for 263A, where there is an outstanding construction permit.

DATES: Comments must be filed on or before February 8, 1988, and reply comments on or before February 23, 1988.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Edward S. O'Neill, Esquire, Peggy Kobacker Shiffrin, Esquire, Bryan, Cave, McPheeters and McRoberts, Suite 1000, 1015 Fifteenth Street NW., Washington, DC 20005 (Counsels for petitioner).

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87–563, adopted December 2, 1987, and released December 18, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 25, 1987.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Forest Service

Intent To Prepare Significant Amendment to Grand Mesa, Uncompahagre and Gunnison National Forests Land and Resource Management Plan

The Department of Agriculture, Forest Service has concluded the major portion of the re-analysis of the Grand Mesa, Uncompahagre and Gunnison National Forests Plan as required by Deputy Assistant Secretary of Agriculture, Douglas W. MacCleery's decision of July 31, 1985. Re-analysis of the Forest Plan has resulted in a decision to prepare a "significant amendment" to the Forest Plan. The Forest Supervisor is now in the process of developing a significant amendment to the Forest Plan. This process also will result in supplementing the Forest Plan Environmental Impact Statement to present additional information requested by Deputy Assistant Secretary MacCleery.

A Notice of Intent to Reanalyze the Forest Plan appeared in the October 3, 1986 **Federal Register**. This Re-analysis of the Forest Plan was prompted by a review of the Chief's decision on an appeal of the EIS and Plan by the Natural Resource Defense Council, and by important changes taking place in demand for wood products from these National Forests. The analysis concentrated on the following issue areas:

1. USDA decision of July 31, 1985;
2. Below cost timber sales;
3. Timber demand; and
4. Aspen management.

The re-analysis has resulted in a determination that there is a need to change the Forest Plan. Needed changes affect the Forests' timber management program with possible effects on the water, wildlife and range resources of these National Forests. The needed changes are "significant changes" according to the guidelines laid down in 36 CFR 219.10 (f). Consequently, a "Significant Amendment" to the Forest Plan is being developed to reflect the changes needed in the Forests' timber management program.

The Forest Supervisor has been communicating with interested and affected members of the public to determine the scope of the needed changes since October 1986. In continuation of this process, the National Forests will hold a series of nine "open houses" to inform the public and encourage public participation in the Forest Plan amendment process. All open houses will be held from 1:00 PM to 8:00 PM, and will take place in the following locations:

1/19/88 Montrose: BLM District Office, 2465 S. Townsend Ave, Montrose, CO,
Norwood: U.S. Forest Service Office, 1760 Grande, Norwood, CO,
1/20/88 Denver: Executive Towers Inn, 1405 Curtis, Denver, CO,
Delta: U.S. Forest Service Office, 2250 Highway 50, Delta, CO,
1/21/88 Grand Junction: Forest Service Office, 764 Horizon Dr., Grand Junction,
Gunnison: U.S. Forest Service Office, 216 N. Colorado, Gunnison, CO,
1/22/88 Paonia; Paonia City Hall, 214 Grande Ave, Paonia, CO.

The draft amendment to the Forest Plan and supplement to the Environmental Impact Statement are expected to be available for public review and comment in April 1988. The final amendment and supplement are scheduled to be completed in September 1988. Gary E. Cargill, Regional Forester, Rocky Mountain Region, is the responsible official.

Date: December 17, 1987.

Raymond J. Evans,
Forest Supervisor.

DEPARTMENT OF COMMERCE

International Trade Administration

Export Trade Certificate of Review

Action: Notice of Issuance of an Amended Export Trade Certificate of Review, Application #85–A0015.

Summary: The Department of Commerce has issued an amendment to the export trade certificate of review granted to California Dried Fruit Export Trading Company ("CDFETC") January 27, 1986 (51 FR 3996, January 31, 1986).

FOR FURTHER INFORMATION CONTACT: John E. Stiner, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97–290) authorizes the Secretary of Commerce to issue Export Trade certificates of review. The regulations implementing Title III are found at 15 CFR Part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a certificate in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

The export trade certificate of review, Application No. 85–00015, issued January 27, 1986, is amended as follows:

The section captioned "Members" is amended to add "Fresno Cooperative Raisin Growers, Inc.; Madera Raisin Sales Co.; and West Coast Growers and Packers, Inc."

Effective Date: September 28, 1987.

A copy of the certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Dated: December 22, 1987.

John E. Stiner,
Director, Office of Export Trading Company Affairs.

[Docket No. 71144–7244]

Foreign Availability Assessment; Isopropyl N-(3-chlorophenyl) carbamate

AGENCY: Export Administration, International Trade Administration.

ACTION: Notice of finding of foreign availability assessment.

SUMMARY: the Office of Foreign Availability (OFA) of Export Administration is required by sections 5 (f) and (h) of the Export Administration Act of 1979, as amended (EAA), to initiate and review claims of foreign availability on items controlled for national security purposes.

OFA has completed an assessment on isopropyl N-(3-chlorophenyl) carbamate, an alkyl carbamate, controlled under ECCN 4707B on the Commodity Control List. Based on such assessment, the Department of Commerce has found foreign availability for this commodity.

FOR FURTHER INFORMATION CONTACT: Jo-Anne A. Jackson, Office of Foreign Availability, Department of Commerce, Telephone: (202) 377–5953.

SUPPLEMENTARY INFORMATION:

Background

The Office of Foreign Availability has completed an assessment on the foreign ability of isopropyl N-(3-chlorophenyl) carbamate. This substance is a synthetic organic agricultural chemical controlled for national security purposes under

BEST COPY AVAILABLE

ECCN 4707B on the Commodity Control List.

The Office of Foreign Availability has completed its assessement of the availability of the above described chemical from non-U.S. sources and has determined the existence of foreign availability as defined by law.

Therefore, Export Administration will publish regulations removing the national security controls on isopropyl N-(3-chlorophenyl) carbamate. Isopropyl N-(3-chlorophenyl) carbamate will be controlled only for foreign policy reasons and accordingly will be added to the list of chemicals requiring an individual validated license under ECCN 6799G.

If OFA receives substantive new evidence affecting this foreign availability determination, the assessment will be reevaluated. Inquiries concerning the scope of this assessment may be directed to the Office of Foreign Availability at the above adress.

Dated: December 23, 1987.

Irwin M. Pikus,

Director, Office of Foreign Availability.

Minority Business Development Agency

Business Development Center Program Applications; Connecticut

AGENCY: Minority Business Development Agency.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate a MBDC for a three (3) year period, subject to available funds. The cost of performance for the first twenve months is estimated at $217,700 for the project performance of June 1, 1988 to May 31, 1989. The MBDC will operate in the Connecticut Standard Metropolitan Statistical Area (SMSA). The first year cost for the MBDC will consist of $217,700 in Federal funds and a minimum of $38,418 in Non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services).

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, non-profit and for-profit organizations, local and state governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firms proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's satisfactory performance, the availability of funds, and Agency priorities.

Closing Date: The closing date for applications is February 1, 1988. Applications must be postmarked on or before February 1, 1988.

ADDRESS: New York Regional Office, Minority Business Development Agency, Jacob K. Javits Federal Building, Room 3720, New York, New York 10278, (212) 264-3262.

FOR FURTHER INFORMATION CONTACT: Gina A. Sanchez, Regional Director New York Regional Office at (212) 264-3262.

National Oceanic and Atmospheric Administration

Evaluation of State/Territorial Coastal Management Programs, Coastal Energy Impact Programs and National Estuarine Research

AGENCY: National Oceanic and Atmospheric Administration, National Oceanic Service, Office of Ocean and Coastal Resource Management, Commerce.

ACTION: Corrected Notice of Availability of Evaluation Findings.

Federal Register Notice Doc. 87-28604, published December 14, 1987, incorrectly lists several states as having recent evaluation findings indicating adherence to their coastal management and estuarine research reserve programs.

Notice is hereby given that the evaluation findings for the California Coastal Management Program indicate that the State did not comply with the provisions of the California Coastal Management Program and the underlying requirements of the CZMA and its implementing regulations. Evaluation findings for the State of Georgia and the Commonwealth of Puerto Rico indicate that they are not adhering to the terms and intent of section 315 of the Coastal Zone Management Act of 1972, as amended, and to the National Estuarine Sanctuary Program Regulations. A copy of the assessment and detailed findings for these programs may be obtained on request from: John H. McLeod, Evaluation Officer, Policy Coordination Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 1825 Connecticut Avenue NW., Washington, DC 20235 (telephone: 202/673-5104).

BILLING CODE 3510-08-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Levels and Guaranteed Access Levels for Certain Cotton, Man-Made Fiber and Other Vegetable Fiber, Textile Products from Jamaica, Effective on January 1, 1988

December 24, 1987.

The Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, and the President's February 20, 1986 announcement of a Special Access Program for textile products assembled in participating Caribbean Basin beneficiary countries from fabric formed and cut in the United States, and pursuant to the requirements set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information, contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption, or withdrawal from warehouse for consumption, of certain cotton, man-made fiber and other vegetable fiber textiles and textile products, produced or manufactured in Jamaica and exported during 1988, in excess of the designated twelve-month levels.

In addition, the Commissioner is also directed to establish guaranteed access levels for certain properly certified cotton, man-made fiber and other vegetable fiber textiles and textile products which are assembled in Jamaica from fabric formed and cut in the United States and exported during the same twelve-month period.

Background

Under the terms of Section 204 of the Agricultural Act of 1956, as amended, and the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Textile Agreement of August 27, 1986, as amended, between the Governments of the United States and Jamaica, and as translated to the new category system, CITA will establish designated consultation levels for Categories 331/631, 347/348/647/648, 352/652 and 632 and specific limits for Categories 338/339/638/639, 340/640, 341/641, 345/845 and 445/446, produced or manufactured in Jamaica and exported during the agreement year which begins on January 1, 1988 and extends through December 31, 1988. The limit for Categories 341/641 has been adjusted for carryforward used in 1987.

In addition to the designated consultation levels, the bilateral agreement also establishes guaranteed access levels for properly certified

textile products assembled in Jamaica from fabric formed and cut in the United States within Categories 331/631, 338/339/638/639, 340/640, 341/641, 345/845, 347/348/647/648, 349/469, 352/642 and 632, exported from Jamaica during the agreement year which begins on January 1, 1988 and extends through December 31, 1988.

Textile products in Categories 331/631, 338/339/638/639, 340/640, 341/641, 345/845, 347/348/647/648, 349/649, 352/652 and 632 which are exported from Jamaica on or after January 1, 1988, qualifying for the Special Access Program for entry under TSUSA 807.0010, must be accompanied by a properly completed CBI Export Declaration (Form ITA–370P).

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 28622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1988).

The letter to the Commissioner and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

William J. Dulka,

Acting Chairman, Committee for the Implementation of Textile Agreements.

December 24, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 27, 1986, as amended, between the Governments of the United States and Jamaica; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption or withdrawal from warehouse for consumption of cotton, wool, man-made fiber and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Jamaica and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the following designated levels:

Category and Twelve-Month Restraint Level

331/631—350,000 dozen pairs
338/339/638/639—575,000 dozen
340/640—325,000 dozen of which not more than 275,000 dozen shall be in shirts made from fabrics with two of more colors in the warp and/or the filling (Categories 340pt./640pt.—only TSUSA numbers 381.0522, 381.3132, 381.3142, 381.3152, 381.5500, 381.5610, 381.5625, 381.5637, 381.5660, 381.9535, 381.9547 and 381.9550
341/641—388,850 dozen
345/845—100,700 dozen
347/348/647/648—653,000 dozen
352/652—100,000 dozen
445/446—47,470 dozen
632—100,000 dozen pairs

To the extent that trade which now falls in the foregoing categories is within a category limit for the period which began, in the case of Categories 331/631, 338/339/638/639, 340/640 and 347/348/647/648 on September 1, 1986; in the case of Categories 341/641 and 345/845 on January 1, 1987; and in the case of Categories 352/652, 445/446 and 632 on June 1, 1987 and extends through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

In accordance with the provisions of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), you are directed to establish guaranteed access levels for properly certified cotton, man-made fiber and other vegetable fiber textile products in the following categories which are assembled in Jamaica from fabric formed and cut in the United States and exported to the United States from Jamaica during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

Category and Guaranteed Access Level

331/631—1,320,000 dozen pairs
338/339/638/639—795,000 dozen
340/640—200,000 dozen
341/641—200,000 dozen
345/845—50,000 dozen
347/348/647/648—1,250,000 dozen
349/649—2,200,000 dozen
352/652—1,350,000 dozen
632—2,000,000 dozen pairs

Any shipment for entry under TSUSA 807.0010 which is not accompanied by a valid and correct certification and CBI Export Declaration in accordance with the provisions of the certification requirements established in the directive of February 19, 1987 shall be denied entry unless the Government of Jamaica authorizes the entry and any charges to the appropriate designated consultation levels or specific limits. Any shipment which is declared as TSUSA 807.0010 but found not to qualify for the Special Access Program may be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for compensation to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

William J. Dulka,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcing Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Malaysia

December 24, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port of call (202) 343–6496. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States from Malaysia for consumption, or withdrawal from warehouse for consumption, of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Malaysia and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the designated restraint limits.

Background

During consultations held on November 5, 1987 between the Governments of the United States and Malaysia, agreement was reached to further amend their Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement between the Governments of the United States and Malaysia, effected by exchange of notes dated July 1 and 11, 1985, as amended. The agreement, as translated to the new category system, establishes specific limits for cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Categories 200, 218, 219, 220, 225–227, 300/301, 313–315, 317, 326, 331/631, 333/334/335/835, 336/636, 337/637, 338/339, 340/640, 341/641, 342/642/842, 345, 347/348, 351/651, 363, 369–S, 435, 438–W (women's knit shirts and blouses), 442, 445/446, 604, 613/614/615/617, 634/635, 638/639, 645/646 and 647/648, produced or manufactured in Malaysia and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988. The agreement also establishes a group limit for certain cotton and man-made fiber fabric (Categories 218, 219, 220, 225–227, 313, 314, 315, 317, 326 and 613/614/615/617 as a group), with sublimits within the group, and Group II (Categories 201, 222–224, 229, 239, 330, 332, 349, 350, 352–354, 359–262, 369–O, 400–434, 436, 438–O, 440, 443, 444, 447, 448, 459, 464–469, 600–603, 606, 607, 611, 618–622, 624–630, 632, 633, 643, 644, 649, 650, 652–654, 659, 665–670, 831–834, 836, 848, 840 and 843–859, as a group).

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 28622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

William J. Dulka,

Acting Chairman, Committee for the Implementation of Textile Agreements

Committee for the Implementation of Textile Agreements

December 24, 1987.

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement, effected by exchange of notes dated July 1 and 11, 1985, as amended, between the Governments of the United States and Malaysia; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Malaysia and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988, in excess of the following restraint limits:

Category and Twelve-Month Restraint Limit

218, 219, 220, 225–227, 313–315, 317, 326, 613/614/615/617, as a group—70,000,000 square yards equivalent

Sublevels within the group

218—4,500,000 square yards
219—21,800,000 square yards
220—21,800,000 square yards
225—21,800,000 square yards
226—21,800,000 square yards
227—21,800,000 square yards
313—26,000,000 square yards
314—28,000,000 square yards
315—21,800,000 square yards
317—21,800,000 square yards
326—3,000,000 square yards
613/614/615/617—21,800,000 square yards

Other Specific Limits

200—349,800 pounds
300/301—3,710,000 pounds
331/631—1,155,405 dozen pairs
333/334/335/835—132,500 dozen of which not more than 66,250 dozen shall be in Category 333, not more than 66,250 dozen shall be in Category 334, not more than 66,250 dozen shall be in Category 335 and not more than 66,250 dozen shall be in Category 835
336/636—245,002 dozen
337/637—213,484 dozen
338/339—607,418 dozen
340/640—742,901 dozen
341/641—962,827 dozen of which not more than 343,489 dozen shall be in Category 341
342/642/842—230,618 dozen
345—88,433 dozen
347/348—248,744 dozen
351/651—143,100 dozen
363—4,240,000 numbers
369–S [1]—1,012,364 pounds
435—13,847 dozen
438–W [2]—11,333 dozen
442—16,877 dozen
445/446—26,788 dozen
604—1,626,753 pounds
634/635—449,379 dozen of which not more than 196,100 dozen shall be in Category 635
638/639—264,719 dozen
645/646—202,473 dozen
647/648—952,813 dozen of which not more than 666,969 dozen shall be in Category 647–K [3] and not more than 666,969 dozen shall be in Category 648–K [4]

Group II

201, 222–224 229, 239, 330, 332, 349, 350, 352–354, 359–362, 369–O [5], 400–434, 436, 438–O [6], 440, 443, 444, 447, 448, 459, 464–469, 600–603, 606, 607, 611, 618–622, 624–630, 632, 633, 643, 644, 649, 650, 652–654, 659, 665–670, 831–834, 836, 838, 840 and 843–859, as a group—28,317,367 square yards equivalent

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the limits set forth in this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of July 1 and 11, 1985, as amended, between the Governments of the United States and Malaysia which provide, in part, that: (1) specific limits or sublimits may be exceeded by not more than 5 percent, provided a corresponding reduction in equivalent square yards is made in one or more other specific limits during the same agreement year; (2) specific limits may be adjusted for carryover and carryforward up to 11 percent of the applicable category limits; and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry into the United States for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

---

BILLING CODE 3510-DR-M

Announcing Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Singapore

December 24, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 535-6736. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, or certain cotton, wool and man-made fiber textiles and textile products in Groups I and II and which are in excess of the designated limits.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 31 and June 5, 1986, as amended, between the Governments of the United States and Singapore, and as translated to the new category system, establishes specific limits for cotton, wool and man-made fiber textile products in Categories 239, 331, 334, 335, 337, 338/339, 340, 341, 342, 347/348, 435, 604, 631, 634, 635, 638, 639, 640, 641, 645/646, 647 and 648 in Group I, produced or manufactured in Singapore and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988. The agreement also include a Group II limit for cotton, wool and man-made fiber textile products in Categories 200-229, 300/301, 313-330, 332, 333/633, 336, 345, 349, 350, 351/651, 352/652, 353/354/653/654, 359-369, 400-434, 436, 442-444, 445/446, 447, 448, 459-469, 600-603, 606, 607, 611-630, 632, 636, 637, 642-644, 649, 650, parts of 659, 665-670 and individual categories within the group, produced or manufactured in Singapore and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

William J. Dulka,
Acting Chairman, Committee for the Implementation of Textile Agreements.

December 24, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated May 31 and June 5, 1986, as amended, between the Governments of the United States and Singapore; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Singapore and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988, in excess of the following levels of restraint:

Category and Twelve-Month Restraint Limit

Group I

239—725,000 pounds
331—324,480 dozen pairs
334—54,262 dozen
335—163,223 dozen
337—62,733 dozen
338/339—814,449 dozen of which not more than 475,971 dozen shall be in Category 338 and not more than 529,220 dozen shall be in Category 339
340—569,993 dozen
341—143,325 dozen
342—88,200 dozen
347/348—763,848 dozen of which not more than 477,405 dozen shall be in Category 347 and not more than 371,315 dozen shall be in Category 348
435—6,200 dozen
604—1,506,478 pounds
631—330,750 dozen pairs
634—207,166 dozen
635—212,000 dozen
638—760,883 dozen
639—2,863,220 dozen
640—121,517 dozen
641—198,208 dozen
645/646—116,999 dozen
647—410,000 dozen
648—1,392,125 dozen

Group II

200-229, 300/301, 313-330, 332, 333/633, 336, 345, 349, 350, 351/651, 352/652, 353/354/653/654, 359-369, 400-434, 436, 442-444, 445/446, 447, 448, 459-469, 600-603, 606, 607, 611-630, 632, 636, 637, 642-644, 649, 650, 659-S [1], 659-V [2], 659-O [3] 665-670, as a group—45,000,000 square yards equivalent

Sublevels Within Group II

200—555,556 pounds
201—571,429 pounds
218—2,000,000 square yards
219—2,000,000 square yards
220—2,000,000 square yards
222—373,134 pounds
223—263,158 pounds
224—2,000,000 square yards
225—2,000,000 square yards
226—2,000,000 square yards
227—2,000,000 square yards
229—270,270 pounds
300/301—434,783 pounds
313—2,000,000 square yards
314—2,000,000 square yards
315—2,000,000 square yards
317—2,000,000 square yards
326—2,000,000 square yards
330—1,176,471 dozen
332—434,783 dozen pairs

[1] In Category 659-S, only TSUSA numbers 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353.

[2] In Category 659-V, only TSUSA numbers 381.2836, 381.3332, 381.9224, 381.9837, 384.2250, 384.2251, 384.2863, 384.2864, 384.8677, 384.9472 and 384.9473.

[3] In Category 659-O, all TSUSA numbers except 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353 (659-S); 381.2836, 381.3332, 381.9224, 381.9837, 384.2250, 384.2251, 384.2863, 384.2864, 384.8677, 384.9472 and 384.9473 (659-V).

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

Imports in categories 352/652 shall be converted to square yard equivalent at the rate of 13.5 square yards equivalent per dozen.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement, effected by exchange of notes dated May 31 and June 5, 1986, as amended, between the Governments of the United States and the Republic of Singapore, which provide, in part, that: (1) Specific limits may be exceeded by certain designated percentages; (2) specific limits may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustment under the provisions of the bilateral agreement, referred to above, will be made to you by letter.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,
William J. Dulka,
Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Textile and Apparel Categories; Changes in Visa Arrangements To Coincide With the Onset of the New Category System

December 24, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Kathy Davis, International Trade Specialist, Office of Textiles & Apparel, United States Department of Commerce, (202) 377-4212.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to change the visa requirements for certain cotton, wool, man-made fiber, vegetable fiber other than cotton, and silk blend textiles and textile products to conform with the new categtory system. The letter contains both a general section, applicable to all countries, and a country specific section, for visa changes by country, that are not generally applicable.

Background

Pursuant to its authority under Section 204 of the Agricultural Act of 1956, as amended, CITA is amending the visa requirements for imports to the United States of certain cotton, wool, man-made fiber, vegetable fiber, other than cotton, and silk blend textiles and textile products. These changes will be effective for products exported to the United States on and after January 1, 1988. These changes are due to the new category system, or coincide with the advent of that new system (see 52 FR 47745 of December 16, 1987).

Interested persons are advised to take all necessary steps to ensure that cotton, wool, man-made fiber, vegetable fiber, other than cotton, and silk blend textiles and textile products that are affected by the changes in the accompanying letter to the Commissioner of Customs, that are exported on and after January 1, 1988, and are to be entered or withdrawn from warehouse for consumption in the United States, will meet the requirements set forth in the notice.

William J. Dulka,
Acting Chairman, Committee for the Implementation of Textile Agreements.
BILLING CODE 3510-DR-M

UNITED STATES DEPARTMENT OF COMMERCE
International Trade Administration
Washington D C 20230

December 24, 1987

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Commissioner of Customs
Department of the Treasury
Washington, D.C. 20229

Dear Mr. Commissioner:

Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to make the changes shown below in the current visa requirements with all countries with which visa arrangements are in place, effective for goods exported to the United States from the respective countries of origin on and after January 1, 1988.

GENERAL SECTION:

For all countries, the following categories and part categories will no longer be valid, nor will any part categories within these categories and part categories, nor will any combined whole and/or part category combinations that include these be valid.

310, 311, 312, 316, 317-S 1/, 317-T 2/, 318, 319, 320, 359-I 3/, 369-W 4/, 411, 425, 429, 601, 602, 605, 610, 612, 614-W 5/, 614-P 6/, 659-I 7/, 669-F 8/

For all countries for which there is a correct category visa requirement, and for which a visa is currently required for shipments of cotton, wool and man-made fiber textiles and textile products in categories 300-369, 400-469, and 600-669 (or 600-670, as applicable), the following new categories will be required.

200, 201, 218, 219, 220, 222, 223, 224, 225, 226, 227, 229, 239, 326, 414, 606, 607, 615, 617, 618, 619, 620, 621, 622, 624, 628, and 629

For all countries, part and/or combined category visa requirements, if not addressed in either the General or the Country Specific Sections of this letter, remain unchanged.

1/ In Category 317-S, only TSUSA numbers 320.— through 331.—, with statistical suffixes 50, 87 and 93.
2/ In Category 317-T, only TSUSA numbers 320.— through 331.—, with statistical suffixes 51, 52, 83, 85, 89, 91 and 95.
3/ In Category 359-I, only TSUSA numbers 384.0439, 384.0441, 384.0442, 384.0444, 384.0805, 384.0810, 384.0815, 384.0820, 384.0825, 384.5162, 384.5163, 384.5167, 384.5169, 384.5172, 384.3451, 384.3452, 384.3453 and 384.3454.
4/ In Category 369-W, only TSUSA number 303.2040.
5/ In Category 614-W, only TSUSA numbers 338.1000, 338.1505, 338.1508, 338.1511, 338.1525, 338.1528, 338.1531, 338.1552, 338.1554, 338.1556, 338.1558, 338.1562, 338.1564, 338.1568 and 338.1572.
6/ In Category 614-P, only TSUSA numbers 338.5040, 338.5045, 338.5051, 338.5056, 338.5061, 338.5065, 338.5069, 338.5072, 338.5075, 338.5079, 338.5084, 338.5087, 338.5092, 338.5095 and 338.5098.
7/ In Category 659-I, only TSUSA numbers 384.2105, 384.2115, 384.2120, 384.2125, 384.2646, 384.2647, 384.2648, 384.2649, 384.2652, 384.8651, 384.8652, 384.8653, 384.8654, 384.9356, 384.9357, 384.9358, 384.9359 and 384.9365.
8/ In Category 669-F, only TSUSA numbers 355.4520 and 355.4530.

COUNTRY SPECIFIC SECTION:

For the following countries, the changes listed have not been addressed by the General Section above. Where the coverage of a specific country visa system is unique, whether changed or not, the category coverage to be effective for exports on and after January 1, 1988 is also listed in this section. Part and/or combined category visa requirements, if not already addressed in the General Section, and if not addressed in the Country Specific Section, remain unchanged.

BRAZIL:
There is still no correct category requirement, but coverage now includes the 200 series categories. Total coverage, then, becomes 200-239, 300-369 and 600-669.

CHINA:
The following new combined categories will be valid:

317/326	(will be valid for all products in 317/326, except those in 326, which must have a 326 visa)
338/339	(will be valid for products in categories 338/339, except for those in 338-S/339-S 1/)
338-S/339-S	(will be required)
638/639	

The following new part categories will be required:

341-Y 2/	(category 341 will be valid for all products within category 341, except those in 341-Y)
410-A 3/	
410-B 4/	
440-M 5/	(category 440 will be valid for all products within category 440, except those in 440-M)

Because part category 317-S will no longer be valid, part category 317-O will no longer be valid. All products in category 317 will require either a 317/326 visa, or a 317 visa.

Because part category 359-I will no longer be valid, part category 359-O 6/ becomes all TSUSA numbers in category 359 except those in part categories 359-C and 359-V

Because part category 600-Y will no longer be valid, 600-O will no longer be valid. All products in category 600 will require a whole category 600 visa.

Because part category 659-I will no longer be valid, part category 659-O 7/ becomes all TSUSA numbers in category 659 except those in part categories 659-C, 659-H, and 659-S.

The following part categories will no longer be valid:
338-X
338-O
613-C
613-R
613-O

1/ In Category 338-S/339-S only TSUSA numbers 381.0240, 381.0425, 381.3516, 381.4020, 381.4130, 381.4337, 381.6610, 381.8506, 381.9924, 384.0216, 384.0223, 384.0229, 384.0232, 384.2818, 384.2930, 384.2970 and 384.3437 in Category 338; and 384.0212, 384.0214, 384.0217, 384.0225, 384.0227, 384.0230, 384.0231, 384.0233, 384.0235, 384.0330, 384.0461, 384.2704, 384.2815 384.2816, 384.2821, 384.2934, 384.2935, 384.2950, 384.2980, 384.3439, 384.3441, 384.3462, 384.5404, 384.7704 and 384.9517 in Category 339.

2/ In Category 341-Y only TSUSA numbers 384.0505, 384.0511, 384.0512, 384.4608, 384.4610, 384.4612 and 384.4788.

3/ In Category 410-A only TSUSA numbers 335.5500, 336.1505, 336.1540, 336.5000, 336.6210, 336.6270, 336.6275, 336.6410, 336.6470, 336.6475, 337.5030, 337.5055, 337.5090, 337.5500, 339.0500, 363.1500 and 363.7000.

4/ In Category 410-B only TSUSA numbers 336.1000, 336.1510, 336.2000, 336.2500, 336.3000, 336.3500, 336.4000, 336.5500, 336.6205, 336.6260, 336.6265, 336.6405, 336.6460, 336.6465 and 377.5080.

5/ In Category 440-M only TSUSA numbers 381.1730, 381.3532, 381.6942, 381.7830, 381.8340, 381.8646, 381.9948, 384.1515, 384.6505 and 384.7010.

6/ In category 359-O all TSUSA numbers except 381.0822, 381.6510, 384.0928, 384.5222 (359-C), 381.0258, 381.0554, 381.3949, 381.5800, 381.5920, 384.0451, 384.4300, 384.4421, 384.4422, 384.0648, 384.0650, 384.0651, 384.3449 and 384.3450 (359-V)

7/ In category 659-O all TSUSA numbers except 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607, 384.9310 (659-C), 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640, 703.1650 (659-H), 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353 (659-S)

HONG KONG:
The following new combined categories will be valid:
225/317/326
226/313

For Hong Kong, with the exception of made-to-measure suits of wool, man-made fiber, silk blend and vegetable fibers other than cotton, not accompanying the traveller, all textile and apparel products including bona fide gifts valued at U.S.$50 or less, shipped for the personal use of the importer, and not for resale, regardless of value; and properly marked commercial sample shipments valued at U.S.$250 or less, shall not be subject to visa requirements. Made-to-measure suits of wool, man-made fiber, silk blend and vegetable fibers, other than cotton, not accompanying the traveller, will require the following visas: 443/643/843(1) or 444/644/844(1)

INDONESIA:
The following new combined categories will be valid:
317/326/617
338/339
613/614/615
625/626
638/639

INDIA:
The following part category is amended:
341-Y 1/

1/ In Category 341-Y, only TSUSA numbers 384.0505, 384.0511, 384.0512, 384.4608, 384.4610, 384.4612 and 384.4788.

JAPAN:
There is still no correct category requirement, but coverage now includes the 200 series categories. Total coverage, then, becomes 200-239, 300-369, 400-469, 600-670, and 800-899

KOREA:
The following new combined categories will be valid:
317/326
613/614
619/620
625-629 (for combined categories 625/626/627/628/629)

The following new part categories will be required:
229-F 1/
229-O 2/

Because part category 669-F will no longer be valid, the coverage of category 669-O 3/ becomes all TSUSA numbers in category 669 except those in part categories 669-P, 669-T and 669-C

Part Categories 640-DO 4/, 640-DY 5/, 640-OO 6/, 640-OY 7/, 641-Y 8/ and 641-O 9/ are amended.

1/ In Category 229-F, only TSUSA numbers 355.4520 and 355.4530.
2/ In Category 229-O, all TSUSA numbers except 355.4520 and 355.4530.
3/ In Category 669-O, all TSUSA numbers except 385.5300 in Category 669-P; 386.1105 and 389.6210 in Category 669-T; and 348.0065, 348.0075, 348.0565 and 348.0575 in Category 669-C.
4/ In Category 640-DO, only TSUSA numbers 381.3134, 381.3558, 381.6972, 381.8666, 381.9540 and 381.9968.
5/ In Category 640-DY, only TSUSA numbers 381.3132 and 381.9535.
6/ In Category 640-OO, only TSUSA numbers 381.3144, 381.3154, 381.3333, 381.9305, 381.9400, 381.9549, 381.9844, 384.2313 and 384.9127.
7/ In Category 640-OY, only TSUSA numbers 381.3142, 381.3152, 381.9547, 381.9550 and 384.2306.
8/ In Category 641-Y, only TSUSA numbers 384.2302, 384.2304, 384.2307, 384.9110 and 384.9120.
9/ In Category 641-O, all TSUSA numbers in Category 641 except 384.2302, 384.2304, 384.2307, 384.9110 and 384.9120.

Because part category 614-W will no longer be valid, 614-O will no longer be valid, and only whole category 614 visas will be accepted for 1988 exports in category 614.

MALAYSIA:
The following new combined categories will be valid:
613/614/615/617
331/631
336/636

Because part category 369-W will no longer be valid, 369-O 1/ becomes all TSUSA numbers in category 369 except those in 369-S.

1/ In Category 369-O, all TSUSA numbers except 366.2840 in Category 369-S.

Because part category 317-S will no longer be valid, 317-O will no longer be valid. All products in category 317 will require a whole category 317 visa.

MEXICO:
Excludes cotton balls in category 223 (only TSUSA number 355.0200).

The following new combined categories will be valid:
300/301
336/636
337/637
338/339/638/639
340/640
341/641 1/ (for cotton and man-made fiber not knit blouses except those in 341-Y/641-Y)
341-Y/641-Y 2/ (for cotton and man-made fiber blouses made with two or more colors in the warp and/or the filling)
342/642
349/649
352/652

The following new part categories will be required:
359-C 3/
359-O 4/
604-A 5/
604-O 6/
659-C 7/
659-H 8/
659-O 9/

1/ In Category 341/641 all TSUSA numbers except 384.4608, 384.4610, 384.4612, 384.0505, 384.0511, 384.0512, 384.2302, 384.2304, 384.2307, 384.9110, 384.9120 and 384.4788.
2/ In Category 341-Y/641-Y, only TSUSA numbers 384.4608, 384.4610, 384.4612, 384.0505, 384.0511, 384.0512, 384.2302, 384.2304, 384.2307, 384.9110, 384.9120 and 384.4788.
3/ In Category 359-C, only TSUSA numbers 381.0822, 381.6510, 384.0928 and 384.5222.
4/ In Category 359-O, all TSUSA numbers except 381.0822, 381.6510, 384.0928 and 384.5222.
5/ In Category 604-A, only TSUSA numbers 310.5049 and 310.6045.

6/ In Category 604-O, all TSUSA numbers except 310.5049 and 310.6045.
7/ In Category 659-C, only TSUSA numbers 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607 and 384.9310.
8/ In Category 659-H, only TSUSA numbers 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650.
9/ In Category 659-O, all TSUSA numbers except 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607, 384.9310 in Category 659-C; and 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650 in Category 659-H.

PAKISTAN:
The following new combined categories will be valid:
633/833
645/646/845/846
642/842
643/843
644/844
650/850
651/851
652/852

The following part categories will no longer be valid:
613-B 1/
613-S 2/
613-P 3/
613-O 4/

1/ In Category 613-B, only TSUSA numbers 338.5039, 338.5042, 338.5047, 338.5053, 338.5058, 338.5059, 338.5060, 338.5067, 338.5081 and 338.5089.
2/ In Category 613-S, only TSUSA numbers 338.5043, 338.5044, 338.5054, 338.5055, 338.5077, 338.5078, 338.5082 and 338.5083.
3/ In Category 613-P, only TSUSA numbers 338.5048, 338.5049 and 338.5050.
4/ In Category 613-O, all TSUSA numbers except those in footnotes 1/, 2/ and 3/ above.

PERU:
The following new combined categories will be valid:
226/313
338/339 (for products in 338/339 other than 338-S 1/ and 339-S 2/)
317/326 (for products in 317/326 other than 326)

1/ In Category 338-S, only TSUSA numbers 381.0240, 381.0425, 381.3516, 381.4020, 381.4130, 381.4337, 381.6610, 381.8506, 381.9924, 384.0216, 384.0223, 384.0229, 384.0232, 384.2818, 384.2930, 384.2970 and 384.3437.

2/ In Category 339-S, only TSUSA numbers 384.0212, 384.0214, 384.0217, 384.0225, 384.0227, 384.0230, 384.0231, 384.0233, 384.0235, 384.0330, 384.0461, 384.2704, 384.2815 384.2816, 384.2821, 384.2934, 384.2935, 384.2950, 384.2980, 384.3439, 384.3441, 384.3462, 384.5404, 384.7704 and 384.9517.

The following part categories will be required:
338-S
339-S

PHILIPPINES
Because 359-I will no longer be valid, 359-O will no longer be valid, and all products in 359 will require a whole category 359 visa. Because 659-I will no longer be valid, 659-O 1/ will become all TSUSA numbers in category 659 other than those in 659-H. Category 640-Y 2/ is amended.

1/ In Category 659-O, all TSUSA numbers except 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650.
2/ In Category 640-Y only TSUSA numbers 381.3132, 381.3142, 381.3152, 381.9535, 381.9547, 381.550 and 384.2306.

ROMANIA:
The following new combined categories will be valid:
335/835
341/840

SINGAPORE:
The following new combined categories will be valid:
300/301
333/633
351/651
352/652
353/354/653/654
445/446
645/646

Because category 659-I will no longer be valid, category 659-O 1/ becomes all TSUSA numbers in category 659 except those in 659-S and 659-V.

1/ In Category 659-O, all TSUSA numbers except 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353 in Category 659-S; and 381.2836, 381.3332, 381.9224, 381.9837, 384.2250, 384.2251, 384.2663, 384.2664, 384.8677, 384.9472 and 384.9473 in Category 659-V.

TAIWAN:
The following new combined categories will be valid:
225/317/326
613/614/615/617
619/620
625/626/627/628/629

The following new part categories will be required:
229-F 1/
229-O 2/

The following part categories, in addition to those in the General Section, will no longer be valid:
670-U
670-A
670-T

Because 359-I will no longer be valid, 359-O 3/ becomes all TSUSA numbers in category 359 except those in part categories 359-C, 359-H and 359-V.

Because 614-P will no longer be valid, 614-O will no longer be valid, and all products in category 614 must have a whole category 614 visa.

Because 659-I will no longer be valid, 659-O 4/ becomes all TSUSA numbers in category 659 except those in part categories 659-B, 659-C, 659-H, and 659-S.

Because 669-P will no longer be valid, 669-O 5/ becomes all TSUSA numbers in category 669 except those in part categories 669-P and 669-T.

Because 670-A will no longer be valid, 670-H 6/ becomes all handbags in category 670.

Because 670-T will no longer be valid, 670-F 7/ becomes all flatgoods in category 670.

Because 670-U will no longer be valid, 670-L 8/ becomes all luggage in category 670.

Part Categories 640-Y 9/, 640-O 10/, 641-Y 11/ and 641-O 12/ are amended.

1/ In Category 229-F only TSUSA numbers 355.4520 and 355.4530.
2/ In Category 229-O, all TSUSA numbers except 355.4520 and 355.4530.

3/ In Category 359-O, all TSUSA numbers except 702.0600 and 702.1200 in Category 359-H; 381.0258, 381.0554, 381.3949, 381.5800, 381.5920, 384.0451, 384.4300, 384.4421, 384.4422, 384.0648, 384.0650, 384.0651, 384.3449 and 384.3450 in Category 359-V; and 381.0822, 381.6510, 384.0928 and 384.5222 in Category 359-C.
4/ In Category 659-O, all TSUSA numbers except 384.1815 and 384.8022 in Category 659-B; 381.3325, 381.9805, 384.2205, 384.2530, 384.8606, 384.8607 and 384.9310 in Category 659-C; 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650 in Category 659-H; and 381.2340, 381.3170, 381.9100, 381.9570, 384.1700, 384.2339, 384.8300, 384.8400 and 384.9353 in Category 659-C.
5/ In Category 669-O, all TSUSA numbers except 386.1105 and 389.6210 in Category 669-T; and 385.5300 in Category 669-P
6/ In Category 670-H, only TSUSA numbers 706.4125 and 706.3405.
7/ In Category 670-F, only TSUSA numbers 706.3900 and 706.3425.
8/ In Category 670-L, only TSUSA numbers 706.3415, 706.4130 and 706.4135.
9/ In Category 640-Y, only TSUSA numbers 381.3132, 381.3142, 381.3152, 381.9535, 381.9547, 381.550 and 384.2306.
10/ In Category 640-O, all TSUSA numbers except 381.3132, 381.3142, 381.3152, 381.9535, 381.9547, 381.550 and 384.2306.
11/ In Category 641-Y, only TSUSA numbers 384.2302, 384.2304, 384.2307, 384.9110 and 384.9120.
12/ In Category 641-O, all TSUSA numbers except 384.2302, 384.2304, 384.2307, 384.9110 and 384.9120.

THAILAND:
The following new combined categories will be valid:
334/335
342/642

Combined category 333/334 shall no longer be valid:

The following new part categories shall be required:
301-P 1/
301-O 2/
669-P 3/

1/ In Category 301-P, only TSUSA numbers 300.6025, 300.6027 and 300.6028.
2/ In Category 301-O, all TSUSA numbers except 300.6025, 300.6027 and 300.6028.
3/ In Category 669-P, only TSUSA number 385.5300.

Products in category 669 other than those in 669-P shall be visaed as category 669.

TURKEY:
The complete list of whole, combined and part categories, which shall be subject to the visa system with Turkey, for goods exported on and after January 1, 1988, is as follows:

200, 219, 300/301, 313, 317/326 (for products in 317/326 other than 326), 326, 335, 337, 339, 340/640 (for products in 340/640 other than those in 340-Y/640-Y 1/), 340-Y/640-Y, 341 (for products in 341 other than those in 341-Y), 341-Y, 347 (for products in 347 other than those in 347-T 2/), 347-T, 348 (for products in 348 other than those in 348-T 3/), 348-T, 350, 361, 369-S 4/ and 604.

Part Category 341-Y 5/ is amended.

1/ In Category 340-Y/640-Y, only TSUSA numbers 381.0522, 381.5637, 381.5610, 381.5625, 381.5660 and 381.5500 in Category 340; and 381.3132, 381.3142, 381.3152, 381.9535, 381.9547, 381.9550 and 384.2306 in Category 640.
2/ In Category 347-T, all TSUSA numbers except 381.0530, 381.6210, 384.0738, 384.3122 and 384.4720.
3/ In Category 348-T, all TSUSA numbers except 384.0739, 384.0741, 384.3123, 384.3125, 384.4723, 384.4724.
4/ In Category 369-S, only TSUSA number 366.2840.
5/ In Category 341-Y, only TSUSA numbers 384.0505, 384.0511, 384.0512, 384.4608, 384.4610, 384.4612 and 384.4788.
Of the categories above, 200, 219, 337, 347 and whole category 604 are new to coverage under the visa arrangement with Turkey.

No longer valid will be categories 604-A, 604-O, 605-H, 317-S, 319

YUGOSLAVIA:
The complete list of whole, combined and part categories will be subject to the visa system with Yugoslavia, for goods exported on and after January 1, 1988, is as follows:
340/640, 341/641, 433, 434, 435, 442, 443/643, 444, 447/448, 604-A 1/, 645/646 and 666

1/ In Category 604-A, only TSUSA numbers 310.5049 and 310.6045.

A description of the textile categories in terms of T.S.U.S.A. numbers is provided in the 1988 TSUSA CORRELATION, available, at a cost of $30.00, from the Office of Textiles and Apparel, Room 3110, U.S. Department of Commerce, Washington, D.C. 20230.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Customs territory of the United States (i.e., the 50 states, the District of Columbia, and the Commonwealth of Puerto Rico).

The actions taken with respect to the Governments of the exporting countries affected by this directive have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

William J. Dulka

William J. Dulka
Acting Chairman, Committee for the Implementation of Textile Agreements

BILLING CODE 3510-DR-C

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

December 22, 1987.

The USAF Scientific Advisory Board Ad Hoc Committee on Software Expertise and the Ada Language will meet on January 21, 1988, from 8:00 a.m. to 5:00 p.m. and on January 22, 1988, from 8:00 a.m. to 4:00 p.m. at Headquarters, Aeronautical Systems Division, Building 14, Area B, Wright Patterson Air Force Base, Ohio.

The purpose of this meeting is to receive briefings on and to discuss implementation of the Ada language in current and future Air Force weapon systems.

This meeting will involve discussions of classified defense matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public

For further information, contact the Scientific Advisory Board Secretariat at (202) 697-4648.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

DEPARTMENT OF EDUCATION

Education Appeal Board; Applications for Review

AGENCY: Department of Education.

ACTION: Notice of applications for review accepted for hearing by the Education Appeal Board.

SUMMARY: This notice lists the applications for review accepted for hearing by the Education Appeal Board (the Board) between August 11, 1987 and December 2, 1987. The Chairman has prepared a summary of each appeal to help potential intervenors. In addition, the notice explains how interested third parties may intervene in proceedings before the Board.

FOR FURTHER INFORMATION CONTACT: The Honorable Ernest C. Canellos, Chairman, Education Appeal Board, 400 Maryland Avenue, SW. (Room 1065, FOB-6), Washington, DC 20202. Telephone (202) 732-1756.

SUPPLEMENTARY INFORMATION: Under sections 451 through 454 of the General Education Provisions Act (20 U.S.C. 1234 *et seq.*), the Board has authority to conduct (1) audit appeal hearings, (2) withholding, termination, and cease and desist hearings initiated by the Secretary of Education (the Secretary), and (3) other proceedings designated by the Secretary as being within the jurisdiction of the Board.

The Secretary has designated the Board as having jurisdiction over appeal proceedings related to final audit determinations, the withholding or termination of funds, and cease and desist actions for most grant programs administered by the Department of Education (the Department). The Secretary also has designated the Board as having jurisdiction to conduct hearings concerning most Department-administered programs that involve (a) a determination that a grant is void, (b) the disapproval of a request for permission to incur an expenditure during the term of a grant, or (c) determinations regarding cost allocation plans or special rates negotiated with specified grantees.

Regulations governing Board jurisdiction and procedures are set forth in 34 CFR Part 78.

Applications Accepted

Appeal of the State of Alabama, Docket No. 16(252)87, ACN: 04-53027.

The State appealed a final letter of determination issued by the Assistant Secretary for Special Education and Rehabilitative Services. The underlying audit reviewed programs conducted under Part B of the Education of the Handicapped Act (EHA-B) during fiscal year 1984.

The Assistant Secretary concluded that twelve (12) Local Education Associations budgeted less State and local funds for special education during fiscal year 1984 than had been spent for the same programs during fiscal year 1983, thus violating the non-supplanting provisions of EHA-B.

The Department seeks a refund of $197,650. The State disputes all liability.

Appeal of the State of New York, Docket No. 17(253)87, ACN: 02-50286.

The State appealed a final letter of determination issued by the Acting Assistant Secretary for Elementary and Secondary Education. The underlying audit reviewed portions of the Promotional Gates program funded under Chapter 1 of the Education Consolidation and Improvement Act of 1981 administered by the New York State Education Department and implemented by the New York City Board of Education (BOE) during fiscal year 1983.

The Acting Assistant Secretary concluded that the BOE violated the non-supplanting provisions of Chapter 1 and used those funds for programs that were neither described nor included in its funding application to the New York State Education Department.

The Department seeks a refund of $20,643,510. The State disputes all liability.

Appeal of the National League of Cuban American Community-Based Centers (IN), Docket No. 18(254)87, ACN: 05-60307.

The League appealed a final letter of determination issued by the Grants and Contracts Service (GCS). The underlying audit reviewed costs attributed to the operation of its Educational Opportunity Center between July 1, 1982 and June 30, 1985.

GCS determined that the League reported costs that exceeded the actual incurred costs, and failed to maintain appropriate records that would support salary expenditures.

The Department seeks a refund of $69,333. The League disputes all liability.

Appeal of the National League of Cuban American Community-Based Centers (IN), Docket No. 19(255)87, ACN: 05-60308.

The League appealed a final letter of determination issued by the Grants and Contracts Service (GCS). The underlying audit reviewed the Bilingual Vocational Training program conducted between September 1, 1984 and December 31, 1985.

GCS disallowed expenditures attributable to excessive or unapproved salary/fringe benefits, undocumented student training costs and costs reported in excess of costs incurred.

The Department seeks a refund of $16,724. The League disputes all liability.

Appeal of the State of Connecticut, Docket No. 20(256)87, ACN: 01-40107.

The State appealed a final letter of determination issued by the Assistant Secretary for Special Education and Rehabilitative Services. The underlying audit reviewed expenditures under part B of the Education of the Handicapped Act (EHA-B) during the fiscal year ending June 30, 1983.

The Assistant Secretary concluded that the State awarded two contracts to the Capitol Region Education Council for services that did not constitute a direct or support service as defined by EHA-B. Additionally, discretionary funds were used for unauthorized equipment purchases and excess indirect costs.

The Department seeks a refund of $161,330. The State concedes $1,200 and disputes liability for the remainder.

Appeal of Glenpool School District (OK), Docket No. 21(257)87, ACN: 06-00500.

The District appealed a final letter of determination issued by the Assistant Secretary for Elementary and Secondary Education. The underlying audit reviewed programs conducted under Part A of the Indian Education Act between July 1, 1982 and May 8, 1986.

The Assistant Secretary disallowed salary and fringe benefits for two counselors because they constituted a general expense. Costs for printing also were determined to be an unapproved budget expense.

The Department seeks a refund of $164,630. The District disputes all liability.

Appeal of Louisiana State Department of Education, Docket No. 22(258)87, ACN: 06-50070.

The State appealed a final letter of determination issued by the Assistant Secretary for Special Education and Rehabilitative Services. The underlying audit reviewed programs funded under Part B of the Education of the Handicapped Act (EHA-B) and Chapter 1 of the Education Consolidation and Improvement Act of 1981 during fiscal years 1981 and 1982.

The Assistant Secretary concluded that the State improperly used EHA-B funds to finance the operating costs of Special School District #1 rather than distributing the funds to eligible local educational agencies in proportion to their respective child counts. Chapter 1 Handicapped Children Program funds were also used to finance a Statewide Regional Review Project that directly benefited children who were ineligible for the use of Chapter 1 funds.

The Department seeks a refund of $1,897,970. The State disputes all liability.

Appeal of the State of Louisiana, Docket No. 23(259)87, ACN: 05-50280.

The State appealed a final letter of determination issued by the Assistant Secretary for Special Education and Rehabilitative Service. The underlying audit reviewed programs funded under Part B of the Education of the Handicapped Act between fiscal years 1982 and 1985.

The Assistant Secretary concluded that the State conducted programs that did not directly benefit the handicapped children for whom the funds were granted.

The Department seeks a refund of $912,678. The State disputes all liability.

Appeal of the State of Kentucky, Docket No. 24(260)87, ACN: 04-40070.

The State appealed a final letter of determination issued by the Assistant Secretary for Special Education and Rehabilitative Service. As pertinent, the underlying audit reviewed programs conducted under Part B of the Education of the Handicapped Act (EHA-B) during fiscal years 1980, 1981 and 1983.

The Assistant Secretary concluded that the State failed to obligate EHA-B grant funds within the statutory period of availability, thus violating the provisions of the Tydings Amendment.

The Department seeks a refund of $1,252,959. The State disputes all liability.

Appeal of the State of New York, Docket No. 25(261)87, ACN: 02-60301.

The State appealed a final letter of determination issued by the Assistant Secretary for Elementary and Secondary Education. The underlying audit reviewed programs conducted under Chapter 1 of the Education Consolidation and Improvement Act of 1981 for the period October 1, 1982 through September 30, 1985.

The Assistant Secretary concluded that the State supplanted non-federal funds and violated other provisions of Chapter 1 in providing bilingual and English as a second language programs to students who had limited English speaking skills.

The Department seeks a refund of $1,326,760. The State disputes all liability.

Appeal of the Kickapoo Nation School, Docket No. 26(262)87.

Kickapoo Nation School (Kickapoo) appealed a fiscal year 1987 funding decision of the Office of Bilingual Education and Minority Language Affairs (OBEMLA) to deny a second-year continuation grant under the Bilingual Education Act. The Secretary has designated the Board as the forum for this appeal.

The principal basis for the funding decision was that Kickapoo's second year continuation application failed to meet the applicable statutory and regulatory requirements of a transitional bilingual education program designed to serve Limited English Proficient (LEP) students.

Intervention

Regulations in 34 CFR 78.43 provide that an interested person, group, or agency may file an application to the Board Chairman to intervene in an appeal before the Board.

An application to intervene must indicate to the satisfction of the Board Chairman or, as appropriate, the Panel Chairperson, that the potential intervenor has an interest in, and information relevant to, the specific issues raised in the appeal. If an application to intervene is approved, the intervenor becomes a party to the proceedings.

Applications to intervene, or questions, should be addressed to the Board Chairman at the address provided above.

(Catalog of Federal Domestic Assistance No. not applicable).

(20 U.S.C. 1234)

Dated: December 23, 1987.

Peter P. Greer,

Deputy Under Secretary, Intergovernmental and Interagency Affairs.

BILLING CODE 4000-01-M

Extention of Deadline for Transmittal of Applications for State-Wide Systems Change Projects (CFDA 84.086J) Under Program for Severely Handicapped Children for Fiscal Year 1988

Purpose: On November 18, 1987, the Office of Special Education Programs (OSEP), published a notice in the **Federal Register** at 52 FR 44330 establishing January 22, 1988 as the deadline for the transmittal of applications for FY 1988 awards under the Program for Severely Handicapped Children. One of the announced priorities, Priority 3: State-Wide Systems Change (CFDA) No. 84.086J, provides funding through grants or cooperative agreements to public or private, nonprofit or profit, organizations or institutions, to conduct programs that meet the specifications published in the **Federal Register** on November 18, 1987 (52 FR 44331).

Because the State-Wide Systems Change priority requires extensive coordination within any given State prior to the submission of an application for competition, the Secretary is extending the deadline date for transmittal of applications to permit potential applicants who are addressing this Priority 3 more time to prepare their applications. Only the deadline date for this Priority 3: State-Wide Systems Change has been changed through this announcement.

Deadline for Transmittal of Applications: March 11, 1988

Applications available: November 18, 1987

Available funds: $950,000

Applicable Regulations: (a) The regulations for the Program for Severely Handicapped Children, 34 CFR Part 315, as amended August 24, 1987 (52 FR 31958); (b) the Education Department General Administrative Regulations, (EDGAR), 34 CFR Parts 74, 75, 77 and 78; and (c) when adopted in final form, the annual funding priority for this program.

For Applications or Information: Severely Handicapped Branch, Division of Educational Services, Office of Special Education Programs, Department of Education, 400 Maryland

Avenue, SW., (Switzer Building, Room 3511–M/S 3409), Washington, DC 20202. Telephone (202) 732–1177.

Program authority: 20 U.S.C. 1424.

Dated: December 24, 1987.

Madeleine Will,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Receipt and Financial Settlement Provisions for Nuclear Research Reactor Fuels

AGENCY: Department of Energy.

ACTION: Notice.

SUMMARY: The Department of Energy is amending the provisions of its current policy providing for the receipt and financial settlement of U.S.-origin spent research reactor fuels by extending the date by which it will receive highly enriched uranium (HEU) fuels to December 31, 1988.

FOR FURTHER INFORMATION CONTACT: Louis R. Willett, Office of Nuclear Materials Production, DP–133.2–GTN, U.S. Department of Energy, Washington, DC 20545, 301/353–3968.

SUPPLEMENTARY INFORMATION: On November 9, 1982, the Department of Energy announced in the **Federal Register** that it was extending until December 31, 1987, its policy for the receipt and financial settlement of U.S.-origin spent research reactor fuels (47 FR 50737). It was determined at that time that there was a continued need in the research reactor community for a fuel return capability and that the U.S. interests in limiting worldwide inventories of HEU were served by an extension of the policy. This extension was restated, without change, in a February 1986 **Federal Register** notice that expanded DOE's fuel receipt and financial settlement provisions to include low enriched uranium research reactor fuels (51 FR 5754).

DOE has determined that this need still exists and that once again it is in the best interest of the United States to extend the effective date for the receipt and finanical settlement for HEU research reactor fuels of U.S. origin. The Department has reviewed the policy extension under the National Environmental Policy Act (NEPA) and has found that the extension itself clearly has no significant impact. Exports of or subsequent arrangements involving nuclear materials are reviewed by DOE on a case-by-case basis in accordance with the Guidelines for Implementing Executive Order 12114, Environmental Effects Abroad of Major Federal Actions, and NEPA. In 1987, DOE initiated studies, including a study of the potential cummulative environmental effects, to determine the impact of a 10-year extension of this policy on DOE programs. These studies are ongoing and have identified a number of important issues that must be resolved prior to extending the provisions of this policy for the long term.

To provide for continuation of beneficial research reactor programs and to permit the additional time required for DOE to complete its review of a 10-year extension of this policy, DOE is amending its fuel receipt and financial settlement provisions by extending the effective date for receipt of U.S.-origin HEU research reactor fuels to December 31, 1988. To provide for this extension, the following amendment to the **Federal Register** notice entitled "Receipt and Financial Settlement Provisions for Nuclear Research Reactor Fuels," 51 FR 5754, published February 18, 1986, and as corrected on March 4, 1986 [51 FR 7487], is made:

1. Delete paragraph 6.a. and substitute in its place:

"a. For research reactor fuels described in 4.a. and 4.c.—December 31, 1988."

Troy E. Wade II,

Acting Assistant Secretary for Defense Programs.

[FR Doc. 87–29910 Filed 12–29–87; 8:45 am]

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3309–4]

Science Advisory Board, Environmental Health Committee, Metals Subcommittee; Open Meeting

Under Public Law 92–463, notice is hereby given that a two day meeting of the Science Advisory Board's Metals Subcommittee of the Environmental Health Committee will be held on January 14–15, 1988 at the St. James Hotel, 950 24th St. NW., Washington, DC 20037. The meeting will begin at 8:30 a.m. on January 14 and adjourn no later than Noon on January 15.

The Metals Subcommittee of the Environmental Health Committee will review the health criteria documents for mercury, selenium, barium and copper.

An agenda for the meeting is available from Ms. Renee Butler, Staff Secretary, Science Advisory Board (A–101F); U.S. Environmental Protection Agency, Washington, DC, 20460, (202) 382–2552. The health criteria documents are available from the Health Effects Branch, Office of Drinking Water, USEPA, Washington, DC, 20460, (202) 382–7571.

The meeting will be open to the public. Any member of the public wishing to attend, obtain information or otherwise participate in these meetings must contact Dr. C. Richard Cothern, Executive Secretary, Environmental Health Committee by telephone at (202) 382–2552 or by mail to: Science Advisory Board (A–101–F), 401 M Street, SW., Washington, DC, 20460 no later than c.o.b. on January 4, 1988.

Terry F. Yosie,

Director, Science Advisory Board.

[FR Doc. 87–29886 Filed 12–29–87; 8:45 am]

BILLING CODE 6560–50–M

[OPP–36152; FRL 3309–1]

Availability of Position Documents Concerning Pesticide Test Protocols

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of two position documents concerning pesticide test protocols. The two documents address residue storage stability data, and the use of the Maximum Tolerated Dose in oncogenicity studies. The Agency has made arrangements with the National Technical Information Service (NTIS) to process and distribute these two documents.

ADDRESS: The documents may be purchased from NTIS at the following address: National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161, (703–487–4650). Orders may be placed by telephone to the NTIS order desk and charged against a deposit account or American Express, VISA, or MasterCard, or sent by mail with check, money order, or deposit account number.

FOR FURTHER INFORMATION CONTACT: For information on the storage stability document, contact by mail:

Francis D. Griffith, Jr., Residue Chemistry Branch, Hazard Evaluation Division (TS–769C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 810, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–7484).

For information on the maximum tolerated dose document, contact, by mail, Dr. Theodore M. Farber, Toxicology Branch, Hazard Evaluation Division, at the Agency address given above. Office location and telephone number: Rm. 821, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–7351).

SUPLEMENTARY INFORMATION: Under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the Agency requires that applicants and registrants of pesticides submit various types of data on the health and environmental effects of a pesticide. The Agency describes protocols for these studies in its Pesticide Assessment Guidelines, available from the NTIS. As necessary, the Agency updates or issues revisions or clarifications to those Guidelines. The Office of Pesticide Programs (OPP) is making available through the NTIS two position documents concerning test methods:

1. Effects of Storage (Storage Stability) on Validity of Pesticide Residue Data. This document supplements information provided in the Pesticide Assessment Guidelines, Subdivision O: Residue Chemistry, concerning the requirements for residue storage stability data. The NTIS accession number for this document is PB88–112362.

2. Selection of a Maximum Tolerated Dose (MTD) in Oncogenicity Studies. This document supplements information provided in the Pesticide Assessment Guidelines, Subdivision F: Toxicology, concerning oncogenicity studies. The NTIS accession number for this document is PB88–116736/AS.

In ordering either document from NTIS, specify the accession number and whether paper copy or microfiche is desired. Paper copies vary in price, but microfiche copies uniformly cost $9.95.

Dated: December 17, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

[FR Doc. 87–29878 Filed 12–29–87; 8:45 am]

BILLING CODE 6560–50–M

[OPP–30263; FRL 3309–2]

Certain Companies; Applications To Register Pesticide Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing active ingredients not included in any previously registered products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comments by January 29, 1988.

ADDRESS: By mail, submit written comments identified by the document control number [OPP–30283] and the registration/file number, attention Product Manager (PM) named in each application at the following address:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: Registration Division (TS–767C), Attn: (Product Manager (PM) named in each registration), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460.

In person: Contact the PM named in each registration at the following office location/telephone number:

Product Manager	Office location/ telephone number	Address
Phil Hutton (PM 17).	Rm. 207, CM #2 (703–557–2690).	EPA, 1921 Jefferson Davis Hwy, Arlington, VA
Lois Rossi (PM 21).	Rm. 229, CM#2 (703–557–1900).	Do.

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered products pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

I. Products Containing Active Ingredients Not Included In Any Previously Registered Products

1. *File Symbol:* 56984–R *Applicant:* California Dept. of Health Services, Vector Biology and Control Branch, 714/744 "P" Street, Sacramento, CA 95814. *Product name:* Lagenidium Giganteum Mycelium. Insecticide. *Active Ingredient: Lagenidium giganteum* (California strain) mycelium 20%. *Proposed classification/Use:* General. For control of mosquito larvae in unpolluted freshwater. (PM 17)

2. *File Symbol:* 56984–E. *Applicant:* California Dept. of Health Services. *Product name:* Lagenidium Giganteum Mycelium. Insecticide. *Active Ingredient: Lagenidium giganteum* (California strain) mycelium 20%. *Proposed classification/Use:* General. For control of mosquito larvae in unpolluted freshwater. (PM 17)

3. *File Symbol:* 56984–G. *Applicant:* California Dept. of Health Services, Vector Biology and Control Branch, 714/744 "P" Street, Sacramento, CA 95814. *Product name:* Lagenidium Giganteum Mycelium. Insecticide. *Active Ingredient: Lagenidium giganteum* (California strain) mycelium 20%. *Proposed classification/Use:* General. For control of mosquito larvae in unpolluted freshwater. (PM 17)

4. *File Symbol:* 53219–R. *Applicant:* Mycogen Corp., 5451 Oberlin Drive, San Diego, CA 92121. *Product name:* M-One™ Insecticide. Insecticide. *Active Ingredient: Bacillus thuringiensis* var. san diego 4.5%. *Active Proposed classification/Use:* General. For control of Colorado Potato Beetle larvae and Elm Leaf Beetle larvae on potatoes, tomatoes, and eggplants. (PM 17)

5. *File Symbol:* 51456–G. *Applicant:* MicroGeneSys, Inc., 400 Frontage Road, West Haven, CT 06516. *Product name:* MGS 400 AcMNPV. A biological Insecticide. *Active Ingredient:* Polyhedral inclusion bodies of *autographa californica* nuclear-polyhedrosis virus 5.0%. *Proposed classification/Use:* General. For control of alfalfa looper, cabbage looper, diamond moth, and beet armyworm on cabbage, lettuce, soybeans, and cotton. (PM 17)

6. *File Symbol:* 58246–R. *Applicant:* Bob McBrayer, 4350 E Acampo St., CA 85220. *Product name:* Nematrol™. Nematicide. *Active Ingredient:* Ground sesame plant 100%. *Proposed classification/Use:* General. For controlling soil nematodes on terrestrial food and non-food products. (PM 21)

Notice of approval or denial of an application to register a pesticide

product will be announced in the Federal Register. The procedure for requesting data will be given in the Federal Register if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the Program Management and Support Division (PMSD) office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the PMSD Office (703–557–3262), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

Dated: December 18, 1987.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 87–29677 Filed 12–29–87; 8:45 am]

BILLING CODE 6560–50–M

[PP 5G3283/T552; FRL 3308–9]

Oxyfluorfen; Extension of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has extended a temporary tolerance for the combined residues of the herbicide oxyfluorfen and its metabolites in or on the raw agricultural commodity alfalfa.

DATE: This temporary tolerance expires December 31, 1988.

FOR FURTHER INFORMATION CONTACT:

By mail:
Richard Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 237, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–1830).

SUPPLEMENTARY INFORMATION: EPA issued a notice, which was published in the Federal Register of December 10, 1986 (51 FR 44517), stating that a temporary tolerance had been established for the combined residues of the herbicide oxyfluorfen, 2-chloro-1-(3-ethoxy-4-nitrophenoxy)-4-(trifluoromethyl)benzene and its metabolites containing the diphenyl ether linkage in or on the raw agricultural commodity alfalfa at 0.1 part per million (ppm). This tolerance was issued in response to pesticide petition PP 5G3283, submitted by Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105. This temporary tolerance has been extended to permit the continued marketing of the raw agricultural commodity named above when treated in accordance with the provisions of experimental use permit 707–EUP–110, which is being extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95–396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that the extension of this temporary tolerance will protect the public health. Therefore, the temporary tolerance has been extended on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active herbicide to be used must not exceed the quantity authorized by the experimental use permit.

2. Rohm and Haas Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires December 31, 1988. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Authority: 21 U.S.C. 346a(j).

Dated: December 12, 1987.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–M

[FRL–3308–3]

Underground Injection Control Program; Establishment of Maximum Allowable Injection Pressure For Rule Authorized Wells in State of Montana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice with request for comment.

SUMMARY: EPA Region VIII has, after extensive investigation, developed and is publishing, for public comment today, sand-face fracture gradients and a maximum allowable surface injection pressure formula for oil and gas-bearing formations in the State of Montana where enhanced recovery injection wells operate under the Underground Injection Control (UIC) program's rule authorization. EPA is providing this notice in accordance with 40 CFR 144.22(b), 144.28(f)(3)(i) and 147.1354(a).

DATES: Anyone wishing to make comments may do so until February 16, 1988. If no significant public comments are received which warrant changes to this proposal, including public comment which may be received if a public hearing is held, this proposal will become final on March 14, 1988. A public hearing to discuss this proposal has been scheduled for 1:00 p.m. on January 29, 1988. However, if sufficient public interest is not expressed for a public hearing by January 20, 1988, EPA reserves the right to cancel this hearing.

ADDRESS: Comments should be submitted to Debra G. Ehlert, Section Chief, Ground Water Section, U.S. EPA, Region VIII, 999–18th Street, Suite 500, Denver, Colorado 80202–2405. The public hearing will be on the 5th Floor, U.S. EPA Region VIII Offices at the above address.

FOR FURTHER INFORMATION CONTACT: Debra G. Ehlert, (303) 293–1417.

SUPPLEMENTARY INFORMATION:

Background

Section 147.1354(a)(1)(i) of the UIC program regulations for Montana states ". . . the owner or operator shall use an injection pressure no greater than the pressure established by the Regional Administrator for the field or formation in which the well is located. The Regional Administrator shall establish such a maximum pressure after notice, opportunity for comment, and opportunity for a public hearing . . ."

EPA Region VIII has developed sand-face fracture gradients and a maximum allowable surface injection pressure (Pmax) formula for oil and gas-bearing geologic formations in those portions of the State of Montana where enhanced recovery operations occur under the UIC program's rule authorization and for which the operators have submitted definitive reservoir fracture data. The resultant calculations address approximately 1200 enhanced recovery injection wells and were developed using 41 separate field-specific determinations for 60 operating units.

Basis for Proposal

The proposed sand-face fracture gradients and the maximum allowable surface injection pressure formula set forth today were developed from information submitted to EPA during the promulgation process of the Montana UIC program in 1984 as well as from additional information supplied to EPA by owners and operators during the first year of program implementation.

Table I provides the sand-face fracture gradient of the geologic formations and the fields where definitive data were available. These sand-face fracture gradients were determined by analyzing instantaneous shut-in pressures, step-rate tests, operating data, and other relevant geological data from wells drilled into these oil and gas-bearing strata. In determining each sand-face fracture gradient, the hydrostatic pressure gradient was calculated as the product of the fresh water hydrostatic gradient in pounds per square inch per foot (psi/ft), Specific Gravity (Sp. Gr.) of the specific fluid injected, and the average depth in feet to the top of the injection (or producing) formation. The pressure loss caused by friction was purposely not considered in determining the listed sand-face fracture gradients, thus providing a reasonable safety margin in the protection of underground sources of drinking water.

TABLE I.—PROPOSED SAND-FACE FRACTURE GRADIENTS (MONTANA)—Continued

Oil field/unit/operator	Producing formation	Fracture gradient, psi/ft
S. Little Wall/Tyler Sand Unit/Union-Texas	Tyler Sandstone	0.700

The maximum allowable surface injection pressure (Pmax) formula to be used for each field unit with wells authorized by rule is as follows:

Pmax = [Fracture Gradient - (0.433) (Sp.Gr.)] × [Well Depth, shallowest in project]

When the operator calculates the (Pmax) values, the fresh water hydrostatic pressure gradient (0.433 psi/ft) must be multiplied by the Specific Gravity of the appropriate injection fluid (Sp.Gr., unitless) before being subtracted from the established sand-face fracture gradient (psi/ft). The well depth to be used in the calculation of the maximum allowable surface injection pressure shall be that depth to the top of the injection perforations of the shallowest well in the injection formation in a rule authorized project. The value shall then apply to all injection wells in that field and/or unit. This procedure provides a safety margin because the use of a well depth with a deeper injection formation for these calculations could lead to significantly higher, possibly excessive, injection pressures in projects with highly dipping beds.

If a sufficient data base was not available to determine an appropriate sand-face fracture gradient for an injection formation/field as a part of this notice, EPA Region VIII has not herein listed a specific fracture gradient. In this case, EPA Region VIII will require the use of the previously established fracture gradient value of 0.733 psi/ft, as identified in the UIC Rules promulgated in 49 FR 20181 on May 11, 1984, and the attendant state-specific preamble. Therefore, for all of those geologic formations/fields not listed in Table I, but being used for the enhanced recovery of oil or gas, the formula for determining the maximum allowable surface injection pressure is as follows:

Pmax = [0.733-(0.433)(Sp.Gr.)] × [Well Depth, shallowest in project]

Written request for modifications of the above specifications may be made during the public comment period and shall be sent to the address provided at the beginning of this notice. EPA Region VIII will consider such requests which are accompanied by new data appropriate to the determination of a revised sand-face fracture gradient for a formation/field in the above list. The operator of a specific rule authorized enhanced recovery well(s) not included in the above list may also request a Pmax determination by EPA during the public comment period. Appropriate evidence of formation fracture pressure data shall accompany such requests.

Subsequent to final promulgation of today's proposed fracture gradients and maximum allowable injection pressures (as may be modified during the comment period), as operator may obtain authority to inject at a pressure greater than these established herein only be submitting a written request to EPA. Any such request must be addressed to the Regional Administrator and must demonstrate that the requested injection pressure will not initiate new fractures or propagate existing fractures in the confining zone, or cause movement of fluids into an USDW. Any such request will be approved only after notice, opportunity for comment and opportunity for a public hearing, in accordance with Part 124 of Subpart A of this chapter (Ch. 1).

Anyone wishing to review the supporting information which led to the development of this proposal may do so by visiting the EPA Region VIII office.

Dated: October 7, 1987.

Alexandra B. Smith,

Acting Regional Administrator, EPA Region VIII.

Petitions for Reconsideration and Clarification of Actions in Rulemaking Proceedings; Correction

On December 22, 1987, at 52 FR 48458, the Commission published a public notice (Report No. 1699) announcing the filing of petitions for reconsideration in the proceeding concerning the separation of costs of regulated telephone service from costs of nonregulated activities, CC Docket No. 86-111. The due date for oppositions was inadvertently omitted. That date is January 7, 1988.

William J. Tricarico,

Secretary.

VOL 52 ISS 250 DEC 30 1987 UMI

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-805-DR]

Major Disaster and Related Determinations; Puerto Rico

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the Commonwealth of Puerto Rico (FEMA-805-DR), dated December 17, 1987, and related determinations.

DATED: December 17, 1987.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

Notice: Notice is hereby given that, in a letter dated December 17, 1987, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288), as follows:

I have determined that the damage in certain areas of the Commonwealth of Puerto Rico from severe storms and flooding beginning on November 24, 1987, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I, therefore, declare that such a major disaster exists in the Commonwealth of Puerto Rico.

You are authorized to provide Individual Assistance in the affected areas. You are also authorized to provide Public Assistance in the affected areas, if warranted, and an acceptable Commonwealth commitment for these purposes is provided. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Public Law 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated areas.

Pursuant to section 408(b) of Public Law 93-288, you are authorized to advance to the Commonwealth its 25 percent share of the Individual and Family Grant program, to be repaid to the United States by the Commonwealth when it is able to do so.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Jose A. Bravo of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the Commonwealth of Puerto Rico to have been affected adversely by this declared major disaster:

The Municipalities of Adjuntas, Aibonito, Canovanas, Carolina, Coamo, Fajardo, Gurabo, Humacao, Juana Diaz, Juncos, Las Piedras, Loiza, Maunabo, Naguabo, Patillas, Ponce, Rio Grande, Sabana Grande, Salinas, San Lorenzo, Yabucoa, and Yauco for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-002813-006.

Title: San Francisco Terminal Agreement.

Parties: Port of San Francisco, California Stevedore and Ballast Co. (CS&B)

Synopsis: The proposed amendment enlarges the premises and imposes promotional and reporting obligations on CS&B.

Agreement No.: 224-003945-010.

Title: Port of Oakland Terminal Agreement.

Parties: City of Oakland, Maersk Line Pacific, Ltd.

Synopsis: The proposed amendment amends the basic agreement to provide for the proration of the minimum annual compensation and annual breakpoint levels for the final partial contract year. The agreement also provides for the possible extension of the basic agreement and the related container crane nonexclusive preferential assignment agreement.

Dated: December 23, 1987.

By order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 212-010027-019.

Title: Brazil/U.S. Atlantic Coast Agreement.

Parties:

Companhia de Navegacao Lloyd Brasileiro

Companhia de Navegacao Maritima Netumar

American Transport Lines, Inc.

Empresa Lineas Maritimas Argentinas S.A.

A. Bottacchi S.A. de Navegacion C.F.I.I.

A/S Ivarans Rederi

Van Nievelet, Goudriaan & Co., B.V.

Synopsis: The proposed modification creates three accountings for pool period ending December 31, 1987: (1) The period U.S. Lines (S.A.) Inc., participated in the pool; (2) the period no U.S. carrier participated in the pool; and 3 the period American Transport Lines ("AmTrans") began its participation in the pool.

Agreement No.: 212-010746-003.

Title: Columbus/PACE/SCNZ/PAD Space Charter and Sailing Agreement.

Parties:

Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck

Associated Container Transportation (Australia). Ltd.

The Shipping Corporation of New Zealand Limited

Blue Star Line, Ltd.

Pacific Australia Direct Line

Synopsis: The proposed amendment (1) removes Blue Star Line, Ltd. from the agreement; (2) adds the Australia-New Zealand Direct Line; (3) modifies vessel capacities for certain parties; (4) provides further detail on existing authority to pool certain revenue; (5) extendes the commencement date from January 1, 1988, to February 1, 1988; and (6) makes other changes in the agreement generally reflecting the change in parties.

By Order of the Federal Maritime Commission

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

Practices of Ocean Common Carriers Regarding Effective Date of Rate Changes; Filing of Petition for Rulemaking

Notice is given that a petition has been filed by the Transpacific Westbound Rate Agreement ("TWRA") requesting the Federal Maritime Commission to adopt a rule in 46 CFR Part 580 which would state that "tariff rates and rules may not be applicable to cargo that is received by the carrier or its agent (including a connecting inland carrier in the case of an intermodal movement) prior to the effective date of the tariff provision." According to TWRA, the purpose of the requested rule is to preclude carriers from utilizing secret rates under tariff rules allowing rate changes to be applied retroactively to cargo which has already been received by the carrier and has started its transportation move.

In order for the Commission to make a thorough evaluation of the petition, interested persons are requested to submit views, arguments or data on the petition no later than February 5, 1988. Responses shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573-0001, in an original and 15 copies. Responses shall also be served on counsel for TWRA: R. Frederic Fisher, Esq., Lillick, McHose & Charles, Two Embarcadero Center, San Francisco, California 94111.

Copies of the petition are available for examination at the Washington, DC Office of the Commission, 1100 L Street NW., Room 11101.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies; Winston C. Brown, Jr. et al.

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the officers of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the Offices of the Board of

Governors. Comments must be received not later than January 21, 1988.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Winston C. Brown, Jr.*, Fraziers Bottom, West Virginia; to acquire an additional 24.0 percent of the voting shares of First Bancorp of Wayne, Inc., Sprague, West Virginia, and thereby indirectly acquire The First National Bank of Kenova, Kenova, West Virginia.

2. *David Lee*, Fraziers Bottom, West Virginia; to acquire an additional 24.0 percent of the voting shares of First Bancorp of Wayne, Inc., Sprague, West Virginia, and thereby indirectly acquire The First National Bank of Kenova, Kenova, West Virginia.

3. *R. Wade Caskey*, Charleston, West Virginia; to acquire an additional 24.0 percent of the voting shares of First Bancorp of Wayne, Inc., Sprague, West Virginia, and thereby indirectly acquire The First National Bank of Kenova, Kenova, West Virginia.

B. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Michael J. Brennan and Patricia R. Brennan*, St. Paul, Minnesota, to acquire an additional 3.1 percent of the voting shares of Minnesota State Bancorporation, Inc., St. Paul, Minnesota, and thereby indirectly acquire Minnesota State Bank of St. Paul, St. Paul, Minnesota.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Ronald L. Moore*, Englewood, Colorado, to acquire an additional 10.13 percent of the voting shares of Rice Insurance Agency, Strasburg, Colorado, and thereby indirectly acquire The First National Bank of Strasburg, Strasburg, Colorado.

2. *Leo Payne*, Lakewood, Colorado, to acquire an additional 31.5 percent of the voting shares of Jefferson Bank & Trust Company, Lakewood, Colorado.

Board of Governors of the Federal Reserve System, December 23, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Respiratory Disease Intervention Peer Review and Control of Anesthetic Gases in Dental Operatories; Open Meetings

The following meetings will be convened by the National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control (CDC) and will be open to the public for observation and participation, limited only by the space available:

Respiratory Disease Intervention Peer Review

Date: January 13, 1988.
Time: 9 a.m.–4:30 p.m.
Place: Conference Room C, Alice Hamilton Laboratory, 5555 Ridge Avenue, Cincinnati, Ohio 45213.

Purpose: To conduct a review of medical intervention for workers at risk of developing respiratory disease. Questions to be considered: (1) What are the medical benefits of informing workers at risk of (a) malignant respiratory disease, (b) non-malignant respiratory disease, (c) pleural mesothelioma; (2) Are any of the following interventions (screening, counseling for recognition of early signs and symptoms, risk factor modification; e.g., smoking cessation) useful for workers exposed to known lung carcinogens?

Additional information may be obtained from: Paul A. Schulte, Ph.D., Division of Surveillance, Hazard Evaluations and Field Studies, NIOSH, CDC, 4676 Columbia Parkway, R–13, Cincinnati, Ohio 45226, Telephones: FTS: 684–4203, Commercial: 513/841–4203.

Control of Anesthetic Gases in Dental Operatories

Date: January 20, 1988.
Time: 9 a.m.–11:30 a.m.
Place: Conference Room A, Alice Hamilton Laboratory, 5555 Ridge Avenue, Cincinnati, Ohio 45213.

Purpose: To conduct a meeting for the review of a project which will seek methods to consistently achieve the NIOSH recommended limit of 50 parts per million parts air for nitrous oxide exposure among dental personnel.

Additional information may be obtained from: James D. McGlothlin, Division of Physical Sciences and Engineering NIOSH, CDC, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephones: FTS: 684–4368, Commercial: 513/841–4368.

Viewpoints and suggestions from industry, organized labor, academia, other governmental agencies, and the public are invited.

Dated: December 22, 1987.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-19-M

Collection of Fees for Sanitation Inspections of Passenger Cruise Ships

AGENCY: Centers for Disease Control (CDC), Public Health Service, HHS.

ACTION: Notice of collection of fees for sanitation inspections of passenger cruise ships.

SUMMARY: Collection of fees for sanitation inspections of passenger cruise ships currently inspected under the Vessel Sanitation Program, CDC, will commence on March 1, 1988.

EFFECTIVE DATE: March 1, 1988.

FOR FURTHER INFORMATION CONTACT: Vernon N. Houk, M.D., Director, Center for Environmental Health and Injury Control, CDC, Atlanta, Georgia, 30333. Telephone: FTS: 236–4111, Commercial: (404) 488–4111.

SUPPLEMENTARY INFORMATION: A notice of the collection of fees for sanitation inspections of passenger cruise ships currently inspected under the Vessel Sanitation Program, CDC, was published in the Federal Register on Tuesday, Novembr 24, 1987 (52 FR 45019). The January 1, 1988, effective starting date has been changed to March 1, 1988.

Dated: December 22, 1987.

Glenda S. Cowart,

Director, Office of Program Support, Centers for Disease Control.

[FR Doc. 87-29844 Filed 12-29-87; 8:45 am]

BILLING CODE 4160-18-M

Cooperative Agreements for Hepatitis B Vaccine Trial Follow-Up Program Announcement and Availability of Funds for Fiscal Year 1988

Introduction

The Centers for Disease Control (CDC) announces the availability of funds for Fiscal Year 1988 for continuation of existing cooperative agreements for Hepatitis B Vaccine Trial Follow-up.

Plans are for renewal of existing cooperative agreements to the San Francisco Department of Health, San Francisco, CA; Howard Brown Memorial Clinic, Chicago, IL; and Denver Department of Health and Hospitals, Denver, CO who were participants in the original CDC multicenter Hepatitis B Virus (HBV) vaccine trial in homosexual men. The objectives relate specifically to follow-up of recipients of vaccine in the original multicenter trial. Each of these centers has followed 100 or more HB vaccine recipients on a six-month basis for more than five years, and has obtained information necessary to further assess the duration and nature of long-term protection by this vaccine. Therefore this is not a request for new applications.

Authority

This program is authorized under section 318(b) of the Public Health Service Act (42 U.S.C. 247c(b)), as amended. The Catalog of Federal Domestic Assistance Number is 13.978.

Objectives

The objectives of these cooperative agreements are to provide assistance to participating clinics to:

1. Contact vaccine trial participants who are eligible for follow-up and re-enroll those who wish to be part of the follow-up study.

2. For participants whose immunity to hepatitis B has waned to very low levels during the trial, offer a single booster dose of vaccine, and monitor response to this booster dose at intervals specified in the study protocol.

3. Administer a questionnaire, with informed consent, and perform venipuncture at intervals established by the study protocol and the cooperative agreement.

4. Separate and ship serum to CDC for testing for makers of hepatitis B infection.

5. Maintain a system for accurately matching participating vaccinees with serologic status, locating information, consent forms, follow-up visit scheduling and other necessary record keeping.

6. Inform study participants as to their HBW serologic status, based upon blood test results; and refer carriers and those who develop acute HBV for appropriate medical follow-up.

Availability of funds

Approximately $104,000 will be available for the first year. Three awards will be made for renewal applications for hepatitis B vaccine trial follow-up ranging from approximately $28,000 to $39,000 with the average award being $35,000.

The cooperative agreements will begin on January 1, 1988, and will be funded in 12-month budget periods within a 2-year project period. Continuation awards will be made on the basis of satisfactory progress in meeting project objectives and the availability of funds. The funding estimate outlined above may vary and is subject to change.

Information

Information may be obtained from the individuals listed below:

Technical:

BILLING CODE 4160-18-M

Hospital and Regional Monitoring of Trauma Outcomes; Meeting

Action: Notice of meeting—data sets for monitoring trauma outcomes.

Time and date:

4:00 pm–6:30 pm—January 20, 1988
8:30 am–8:00 pm—January 21, 1988
8:30 am–8:00 pm—January 22, 1988
8:30 am–12:30 pm—January 23, 1988

Place: Hotel Tower Place, 3340 Peachtree Road, Atlanta, Georgia 30021.

Status: Open to public, limited only by the space available.

Matters to be discussed: The Centers for Disease Control (CDC) is convening a public meeting of biomedical investigators, clinicians, health planners, other professionals with expertise in injury control, and other interested parties to discuss data requirements for hospital and regional monitoring of trauma outcomes. The purpose of this meeting is to present information on data sets for hospital and regional monitoring of trauma outcomes. Input from attendees will be used to assist CDC in developing recommendations for minimum and optimum data sets to monitor trauma outcomes.

For further information contact: Stuart T. Brown, M.D., Director, Division of Injury Epidemiology and Control, Center for Environmental Health and Injury Control, CDC, Atlanta, Georgia, 30333, Telephones: FTS: 236–4690, Commercial (404) 488–4690.

Dated: December 22, 1987.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-660-07-4133-02]

Information Collection Submitted to Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone (202) 395–7340.

Title: Solid Minerals (Other than Coal) Exploration and Mining Operations Reporting (43 CFR Part 3590)

Abstract: Requirements are given in this part for exploration and mining plans, including surface and underground maps. These maps are required to be furnished to the authorized officer annually or as otherwise specified. Other information required in this part include records of all core or test holes made on the leased or permit lands, mining methods, and changes to exploration and/or mining plans. Normally this information is received on an "on occasion" basis and does not require formal or routine reporting. Production maps which show the extent of mining activities are required on a routine basis (usually quarterly) to enable the authorized officer to verify production.

The information contained in 43 CFR Part 3590 is being collected to permit the authorized officer to determine whether proposed and existing exploration and mining operations for leasable minerals, other than coal and oil and gas, on the

Federal lands are in compliance with the applicable statutory and regulatory requirements, and to ensure that production reported for royalty purposes is accurate.

Frequency: On occasion, quarterly.

Description of Respondents: Solid Mineral (other than coal) lessees, permittees and operators.

Annual Reponses: 3,240.

Annual Burden Hours: 6,480.

Bureau Clearance Officer: Rick Iovaine, (202) 653–8853.

Date: December 11, 1987.

Adam A. Sokoloski,

DAD, Energy & Mineral Resources.

BILLING CODE 4310–HC–M

[NM 010–3110–10–6201, NM 68472]

New Mexico; Realty Action Designating Public Lands for Transfer Out of Federal Ownership in Exchange for State Lands To Be Acquired Within De-na-zin Wilderness Area

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice.

SUMMARY: The following described Federal surface and subsurface has been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716 and section 104 of the San Juan Basin Wilderness Protection Act of 1984, 98 Stat. 3156.

New Mexico Principal Meridian

T. 17N., R. 2W.
Section 9, E½ (surface and subsurface), W½ (subsurface)
Section 10, SW¼ (surface and subsurface), NW¼ (subsurface)

containing 480 acres of surface estate and 960 acres of subsurface estate within Sandoval County.

In exchange for this Federal surface and subsurface estate, the United States has selected approximately 1,282.36 acres of State of New Mexico mineral estate within McKinley County De-na-zin Wilderness Area listed below:

New Mexico Principal Meridian

T. 24N., R. 12W.
Section 2, Lots 1–4, S½N½, S½
Section 16, All.

Containing 1,282.36 acres

Upon competition of the final appraisal, the actual acreage exchanges will be adjusted to reflect equal values as much as possible.

The lands to be transferred from the United States will be subject to:

1. All valid and existing right including any right-of-way, easement, or lease of record. The State of New Mexico will assume all of the administrative responsibilities for rights-of-way granted by the United States.

2. A reservation to the United States for rights-of-way ditches and canals under the Act of August 30, 1890.

3. Existing Federal grazing authorizations for a 2 year period, from the date of receipt of this notice, if other negotiated arrangements cannot be agreed on.

Existing Federal grazing lessees or permittees will be offered up to the legal maximum of a 5 year State Land Office grazing lease with the preferential right of renewal.

The purpose of this exchange is to complete subsurface estate acquisition by the Federal government within De-na-zin Wilderness Area.

The purpose of this Notice of Realty Action is two-fold. First, this notice will provide a response period during which public comments will be accepted regarding this exchange proposal. Secondly, this action as provided in 43 CFR 2201.01(b) should segregate the public lands described in this notice from the operation of the public land laws, including the mining and mineral leasing laws subject to prior existing rights. The segregation shall terminate upon issuance of a conveyance document or the expiration of two years from the date of this publication, whichever occurs first.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange is available at the Albuquerque District Office, 435 Montano NE, Albuquerque, NM 87107.

For a period of forty-five (45) days after publication of this notice interested parties may submit comments to the District Manager at the above address.

Dated: December 21, 1987.

Michael F. Reitz,

Associate District Manager.

BILLING CODE 4310–FB–M

Bureau of Reclamation

[FES 87–72]

Newlands Project Operating Criteria and Procedures, Churchill and Storey Counties, NV

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of final environmental impact statement, Newlands Project Operating Criteria and Procedures.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a Final Environmental Impact Statement (FEIS) addressing alternative diversions for the Newlands Project Operating Criteria and Procedures (OCAP). The FEIS was prepared by the Bureau of Reclamation, Mid-Pacific Region, Sacramento, California. The FEIS has been filed with the Environmental Protection Agency and is available to the public.

DATES: Following the 30-day waiting period, which starts when the Environmental Protection Agency notice of availability of this FEIS appears in the **Federal Register**, a decision will be made on adoption of the proposed OCAP.

ADDRESSES: Copies of the FEIS are available for inspection at the following locations:

Director, Office of Environmental Affairs, Room 7425, Bureau of Reclamation, Washington, DC 20240, Telephone: (202) 343–4991

Regional Director, Bureau of Reclamation, Mid-Pacific Region, 2800 Cottage Way, Sacramento, California 95825–1898, Telephone: (916) 978–5049

Division of Acquisition and Property Management, Document Systems Management Branch, Library Section, Code 823, Engineering and Research Center, Denver Federal Center, Denver, Colorado 80225, Telephone: (303) 236–6463

FOR FURTHER INFORMATION CONTACT: John C. Brooks, Environmental Specialist, Mid-Pacific Region, Bureau of Reclamation, MP–410, 2800 Cottage Way, Sacramento, California 95825–1898, telephone No. (916) 978–5049.

SUPPLEMENTARY INFORMATION: The FEIS describes the environmental consquences of adopting long-term OCAP for the Newlands Project. OCAP consists of criteria defining the amount and timing of diversions from the Carson and Truckee Rivers to meet the decreed water rights requirements for Newlands Project water use and insuring the criteria are met. The FEIS confines the analysis to the No Action Alternative; Alternaitve C, which was the proposed action in the DEIS; and Alternative E, the new proposed action. The FEIS analyzes the impacts of phasing in diversion levels of 338,000 acre-feet in 1988 to 320,000 acre-feet or less by 1992.

The FEIS complies with the requirements of the Endangered Species Act, Fish and Wildlife Coordination Act, National Historic Preservation Act, Executive Order 11988 (Floodplain Management) and Executive Order 11990 (Protection of Wetlands). Single copies of the statement may be obtained on request to the Director, Office of Environmental Affairs or the Regional Director at the above addresses. Copies will also be available for inspection in libraries in the project vicinity. Questions or any comments on the FEIS should be sent within 30 days to the Regional Director at the above address.

Date: December 24, 1987.

Bruce Blanchard,

Director, Office of Environmental Project Review.

BILLING CODE 7020–02–M

[Investigations Nos. 731–TA–367 through 370 (Final)]

Color Picture Tubes From Canada, Japan, Republic of Korea, and Singapore

Determination

On the basis of the record [1] developed in the subject investigations, the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is materially injured by reason of imports from Canada, Japan, the Republic of Korea (Korea), and Singapore of color picture tubes,[3] provided for in items 684.96 and 687.35 of the Tariff Schedules of the United States (TSUS), that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted these investigations effective June 30, 1987, following preliminary determinations by the Department of Commerce that imports of color picture tubes from Canada, Japan, Korea, and Singapore were being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C. 1673). Notice of the institution of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of July 29, 1987 (52 FR 28353). The hearing was held in Washington, DC, on November 19, 1987, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in these investigations to the Secretary of Commerce on December 22, 1987. The views of the Commission are contained in USITC Publication 2046 (December 1987), entitled "Color Picture Tubes from Canada, Japan, the Republic of Korea, and Singapore: Determinations of the Commission in Investigations Nos. 731–TA–367 through 370 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigations."

By order of the Commission:

Kenneth R. Mason,

Secretary.

Issued: December 23, 1987.

BILLING CODE 7020–02–M

[Investigations Nos. 731–TA–385 and 386 (Preliminary)]

Granular Polytetrafluoroethylene Resin From Italy and Japan

Determination

On the basis of the record [1] developed in the subject investigations, the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Italy and Japan of granular polytetrafluoroethylene resin, whether filled or unfilled, provided for in item 445.54 of the Tariff Schedules of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).

Background

On November 6, 1987, a petition was filed with the Commission and the Department of Commerce by E. I. Du Pont De Nemours & Co., Wilmington, DE, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of granular polytetrafluoroethylene resin from Italy and Japan. Accordingly, effective November 6, 1987, the Commission instituted preliminary antidumping investigations Nos. 731–TA–385 and 386 (Preliminary).

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Chairman Liebeler determines that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of LTFV imports from Canada, Japan, the Republic of Korea, and Singapore.

[3] Color picutre tubes are defined as cathode ray tubes suitable for use in the manufacture of color television receivers or other color entertainment display devices intended for television viewing.

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the Federal Register of November 17, 1987 (52 FR 43952). The conference was held in Washington, DC, on December 1, 1987, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in these investigations to the Secretary of Commerce on December 21, 1987. The views of the Commission are contained in USITC Publication 2043 (December 1987), entitled "Granular Polytetrafluoroethylene Resin from Italy and Japan: Determination of the Commission in Investigations Nos. 731-TA-385 and 386 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigations."

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-262]

Certain Hard-Sided Molded Luggage Cases; Decision Not To Review Initial Determination of No Violation of Section 337 of the Tariff Act of 1930; Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: (1) Decision not to review the presiding administrative law judge's initial determination finding no violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the above-captioned investigation; and (2) termination of the investigation.

FOR FURTHER INFORMATION CONTACT: George Thompson, Esq., Office of the General Counsel, U.S. International Trade Commission; telephone 202-523-1683.

SUPPLEMENTARY INFORMATION: The authority for the Commission's action is contained in 19 U.S.C. 1337 and 19 CFR 210.53.

On November 4, 1987, the presiding administrative law judge (ALJ) issued an initial determination (ID) that there is no violation of section 337 in the above-captioned investigation. On November 16, 1987, a petition for review of the ID was filed by complainant Samsonite Corporation. On November 23, 1987 the active respondents and the Commission investigative attorney filed oppositions to the petition for review. No government agency comments were received.

On December 21, 1987, the Commission determined not to review the ID. By virtue of the Commission's decision not to review the ID, the ID has become the final Commission determination in this investigation. 19 CFR 210.53(h).

Copies of the public version of ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, Docket Section, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission TDD terminal on 202-724-0002.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-270]

Certain Noncontact Tonometers; Commission Determination Not To Review Initial Determination Denying Motion for Temporary Relief

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of an initial determination (ID) denying a motion for temporary relief in the above-captioned investigation.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an ID denying the motion of complainant Cambridge Instruments, Inc., for temporary relief in the investigation.

FOR FURTHER INFORMATION CONTACT: Timothy M. Reif, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-5937.

SUPPLEMENTARY INFORMATION: On July 18, 1987, Cambridge Instruments, Inc., of Buffalo, New York, a domestic manufacturer of noncontact tonometers, filed a complaint and a motion for temporary relief, alleging a violation of section 337 of the Tariff Act of 1930 in the unlawful importation and sale of certain noncontact tonometers, manufactured abroad by a process that, if practiced in the United States, would infringe claims 3 and 4 of U.S. Letters Patent 3,585,849, claim 1 of U.S. Letter Patent 3, 756,073, and claim 1 of U.S. Letters Patent 4, 386,611, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The Commission instituted an investigation of Cambridge Instrument, Inc.'s complaint and published a notice of investigation in the Federal Register on July 22, 1987 (52 F.R. 27595). The respondents named in the notice of investigation were Tokyo Optical Co., Ltd; Topcon Instrument Corporation of America; Keeler Instruments, Inc.; Keeler Holdings, Ltd.; Keeler Ltd; and PA Consulting Services, Ltd.

On November 24, 1987, the presiding administrative law judge (ALJ) issued an ID denying complainant's motion for temporary relief under subsections (e) and (f) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337 (e) and (f)). No petitions for review or government agency comments were received.

Having examined the record, including the submissions of the parties, the Commission has decided not to review the ID and, therefore, adopts the conclusion of the ID that there is no reason to believe that there is a violation of section 337 of the Tariff Act of 1930. The Commission further adopts the conclusion of the ID that temporary relief should not be issued.

The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 U.S.C. 1337a, and in section 210.53 of the Commission's Rules of Practice and Procedure (19 CFR 210.53).

Copies of the nonconfidential version of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-248]

In the Matter of Certain Plastic Fasteners and Processes for Manufacture Thereof; Decision Terminating Investigation Based on Finding No Violation of Section 337

AGENCY: U.S. International Trade Commission.

ACTION: Termination of the above-captioned investigation based on a finding of no violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337).

Authority: The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in § 210.56 of the Commission's Rules of Practice and Procedure (19 CFR 210.56).

FOR FURTHER INFORMATION CONTACT: Stephen A. McLaughlin, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0421.

SUPPLEMENTARY INFORMATION: On June 18, 1986, the Commission instituted this investigation under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) pursuant to a complaint filed by Dennison Manufacturing Company (Dennison) of Framingham, Massachusetts, to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain plastic fasteners into the United States, or in their sale, by reason of alleged manufacture abroad by a process which, if practiced in the United States, would infringe certain claims of three patents owned by Dennison and infringement of a fourth patent owned by Dennison. The complaint also alleged that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States. 51 FR 22144 (June 18, 1986). Prior to the evidentiary hearing in this investigation, the complainant withdrew two of the patents as bases for a violation of section 337.

On June 19, 1987, the presiding administrative law judge (the ALJ) issued an Initial Determination (ID) finding no violation of section 337 with regard to the importation and sale of the subject fasteners. Petitions for review were filed by the complainant and two groups of respondents. Responses to the petitions for review were filed by those same parties, as well as the Commission investigative attorney. On July 30, 1987, the Commission extended the deadline for a decision on whether to review the ID until August 14, 1987. On August 14, 1987, the Commission again extended the deadline for a decision on whether to review and ID until September 18, 1987 and extended the deadline for completion of the investigation until November 17, 1987. On September 18, 1987, the Commission determined to review the ID in its entirety and extended the deadline for completion of the investigation to December 18, 1987.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-248]

Certain Plastic Fasteners and Processes for the Manufacture Thereof; Commission Action and Order

On June 18, 1986, the Commission instituted this investigation under section 337 of the Tariff Act of 1930, 19 U.S.C. 1337, pursuant to a complaint filed by Dennison Manufacturing Company (Dennison) of Framingham, Massachusetts, to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain plastic fasteners into the United States, or in their sale, by reason of alleged manufacture abroad by a process which, if practiced in the United States, would infringe certain claims of (1) U.S. Letters Patent 4,183,894 (the '894 patent); (2) U.S. Letters Patent 4,416,838 (the '838 patent); and (3) U.S. Letters Patent 4,304,743 (the '743 patent); and (4) by reason of alleged infringement of certain claims of U.S. Letters Patent 4,429,437 (the '437 patent), the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States. 51 F.R. 22144 (June 18, 1986). Prior to the hearing in this investigation, the complainant withdrew the '743 and '437 patents as bases for a violation of section 337, leaving only the '894 and '838 patents in issue.

On June 19, 1987, the presiding Administrative Law Judge Sidney Harris (the ALJ) issued an Initial Determination (ID) in the above-referenced investigation finding no violation of section 337 with regard to the importation and sale of plastic fasteners alleged to be made by a process which, if practiced in the United States, would infringe certain claims of the '894 patent and the '838 patent. Petitions for review were filed by the complainant and two groups of respondents. Responses to the petitions for review were filed by those same parties, as well as the Commission investigative attorney (IA). On July 30, 1987, the Commission extended the deadline for a decision on whether to review the ID until August 14, 1987. On August 14, 1987, the Commission again extended the deadline for a decision on whether to review the ID until September 18, 1987 and extended the deadline for completion of the investigation until November 17, 1987. On September 18, 1987, the Commission determined to review the ID in its entirety and extended the deadline for completion of the investigation to December 18, 1987.

ACTION

Having reviewed the ID, the submissions of the parties, and the record in this investigation, the Commission has determined that there is no violation of section 337. More specifically, the Commission has reached the following conclusions:

1. Claims 1, 2, 6, and 10-12 of the '894 patent and claim 12 of '838 patent are

invalid under 35 U.S.C. 112 for indefiniteness.

2. Claim 9 of the '894 patent is invalid under 35 U.S.C. 132 as drawn to new matter.

3. All of the allegedly infringed claims of the '894 and '838 patent are invalid under 35 U.S.C. 112 for failure to disclose the best mode.

4. All of the allegedly infringed claims of the '894 patent are invalid under 35 U.S.C. 112 for lack of an enabling disclosure.

5. All of the allegedly infringed claims of the '894 patent are invalid as anticipated under 35 U.S.C. 102 or for obviousness under 35 U.S.C. 103 in view of the prior art.

6. All of the allegedly infringed claims of the '838 patent are invalid for obviousness under 35 U.S.C. 103 in view of the prior art.

7. If the patents were valid, the Dai Won process would infringe the asserted claims of the '894 patent, but would not infringe the '838 patent.

8. If the patents were valid, the manufacturing processes of Kyung-Won and Dong Hwa by evidentiary inferences would infringe the asserted claims of the '894 and '838 patents.

9. There is a domestic industry in the exploitation by the complainant of the '894 patent, which is efficiently and economically operated.

10. If the '894 patent were valid, the respondents have imported and sold plastic fasteners in the United States and such importation and sale would have the effect or tendency to destroy or substantially injure the domestic industry based upon the '894 patent.

11. There is no domestic industry exploiting the '838 patent nor is there prevention of establishment of such an industry by the accused imports.

Additionally, the Commission has specifically determined not to adopt the ALJ's determination with respect to the enforceability of the '894 and '838 patents. The Commission has also determined to adopt those portions of the Initial Determination that are not inconsistent with this Action and Order or the Commission's supplemental opinion, which will be issued shortly.

Order

Accordingly, it is hereby Ordered that—

1. This investigation is terminated with a finding of no violation of section 337; and

2. The Secretary shall serve copies of this Commission Action and Order upon each party of record to this investigation and publish notice thereof in the **Federal Register**.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: December 21, 1987.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-266]

Certain Reclosesble Plastic Bags and Tubing; Determination Not To Review Initial Determination Finding Respondents in Default

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of initial determination (ID) finding eight respondents in default.

SUMMARY: Notice is hereby given that the Commission has determined not to review the presiding administrative law judge's (ALJ's) ID finding respondents Hogn Ter Product Co., Ltd. (Hogn Ter), Insertion Advertising Corp. (Insertion), Ka Shing Corp. (Ka Shing), Nina Plastic Bags, Inc. (Nina Plastic), Siam Import-Export Ltd. (Siam Import), Ta Sen Plastic Industrial Co., Ltd. (Ta Sen), Teck Keung Manufacturing Ltd. (Teck Keung), and Tracon Industries Corp. (Tracon) in default in the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Paul R. Bardos, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0350.

SUPPLEMENTARY INFORMATION: This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rule 210.53 (19 CFR 210.53).

On October 9, 1987, the ALJ ordered (Order No. 29) respondents Hogn Ter, Insertion, Ka Shing, Nina Plastic, Siam Import, Ta Sen, Teck Keung, and Tracon to show cause why each should not be held in default for failure to properly respond to the complaint and notice of investigation. No proper responses were received.

On November 19, 1987, the ALJ issued an ID (Order No. 44) finding respondents Hogn Ter, Insertion, Ka Shing, Nina Plastic, Siam Import, Ta Sen, Teck Keung, and Tracon in default pursuant to Commission rule 210.25 (19 CFR 210.25). No petitions for review of the ID were received nor were any Government agency comments received.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: December 21, 1987.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Section 5a Application No. 69]

Perishables Tariff Bureau-Agreement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of institution of show-cause proceeding.

SUMMARY: The Commission has made preliminary findings relating to the application of Perishables Tariff Bureau (PTB) for approval of its collective ratemaking agreement and directed PTB to show cause: (1) Why it and its member carriers should not be directed to cease and desist from engaging in certain collective ratemaking activity; and (2) why any claimed antitrust immunity should not be revoked. This action is taken to update the record in this proceeding in light of statutory changes made by the Motor Carrier Act of 1980 and to ensure compliance with all requirements for rate bureaus continuing to receive antitrust immunity for collective activity.

DATES: PTB's response to the show cause order is due January 29, 1988. Comments from other parties are due February 29, 1988. PTB's rebuttal is due March 21, 1988.

FOR FURTHER INFORMATION CONTACT: J.R. Hodge, (202) 275-7890. [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To obtain a copy contract Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission, Washington, DC 20423, or call (202) 289-4357, (assistance for the hearing impaired is available through TDD Services (202) 275-1721 or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters).

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Authority: 49 U.S.C. 11701, 10706, and 10321.

Decided: December 18, 1987.

By the Commission, Chairman Gardison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

Motor Carrier Applications To Consolidate, Merge or Acquire Control; Red and Tan Enterprises

Decided: December 22, 1987.

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1. Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. If the protest includes a request for oral hearing, the request shall meet the requirements of 49 CFR 1182.3 and shall include the required certification. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding.

In the absence of legally sufficient protests as to the finance application or to any application directly related hereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notification of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Findings

The findings for these applications are set forth at 49 CFR 1182.6.

Noreta R. McGee,

Secretary.

MC-F-18857, filed November 23, 1987. RED & TAN ENTERPRISES (Enterprises) (126 North Washington Ave., Bergenfield, NJ 07621)—CONTINUANCE IN CONTROL—RED & TAN CHARTER, INC. (Charter) (126 North Washington Ave., Bergenfield, NJ 07621). Representative: Michael J. Marzano, 99 Kinderkamack Road, Westwood, NJ 07675. Enterprises, a noncarrier, seeks to continue in control of Charter, which has an application pending in No. MC-204842 for common carrier authority to transport passengers in charter and special operations between points in the United States (except Hawaii). Enterprises currently controls, with Commission approval, Rockland Coaches, Inc. (No. MC-29890), The Hudson Bus Transportation Co., Inc. (No. MC-29854), North Boulevard Transportation Co. (No. MC-13492), and Red & Tan Tours (No. 162174), all of which are common carriers. Enterprises is controlled by Ernest A. Capitani, Jr., Amelia Capitani Gerace, Richard A. Capitani, Ronald Gerace, Janis Gerace, Lori Finley, Arleen Schmidt, and Mildred Capitani.

BILLING CODE 7035-01-M

[Finance Docket No. 31177]

Maryland Midland Railway, Inc.; Exemption Operation; Lines of Western Maryland Railway Co.

Maryland Midland Railway, Inc. (MMR) filed a notice of exemption to operate approximately 8 miles of rail line which the State of Maryland purchased from Western Maryland Railway Co. (WM), extending from milepost 24.30 near Cedarhurst, MD to milepost 32.28 near Westminster MD, in Carroll County, MD. Comments must be filed with the Commission and served on Henry E. Seaton, 525 McLachlen Bank Building, 11th and G Streets NW., Washington, DC 20001; (202) 347-8862.

This notice is related to Finance Docket No. 31188 in which MMR has filed a petition pursuant to 49 U.S.C. 10505 for exemption from the prior approval requirements of 49 U.S.C. 11343 to acquire from WM approximately 4.42 miles of rail line between Emery Grove, MD (milepost 19.88) and Cedarhurst, MD (milepost 24.3), together with an isolated 10-foot section near Westminster, MD. MMR intends to resume local and through service from points on its system to the new resulting interchange point with CSX Transportation Inc. at Emery Grove.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 17, 1987

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree; City of Auburn

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on August 7, 1987, a proposed Consent Decree in *United States* v. *City of Auburn*, was lodged with the United States District Court for the Northern District of New York. The Consent Decree concerns the City's failure to timely develop and implement a pretreatment program pursuant to its State Pollutant Discharge Elimination System permit in connection with the operation of its publicly owned treatment works.

Under the terms of the Consent Decree, the City will implement the pretreatment program that has been approved by EPA. Further, the city will pay a civil penalty in the amount of $43,000, for past violations, half of which is to be paid to the State of New York, and half of which is to be paid to the United States.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *United States* v. *City of Auburn*, D.J. Reference 90-5-1-1-2553.

The proposed Consent Decree can be examined at the office of the United States Attorney, 369 Federal Building, Syracuse, New York 13260 and at the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278. Copies of the proposed Consent Decree may also

be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. Any request for a copy of the Consent Decree should be accompanied by a check in the amount of $1.50 ($0.10 per page) payable to "United States Treasurer."

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 87-29859 Filed 12-29-87; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on December 14, 1987 a proposed Consent Decree in *United States v. Kansas City Board of Public Utilities et al.*, Civil Action No. 87-2043-S, was lodged with the United States District Court for the District of Kansas. The proposed Consent Decree concerns violations of the New Source Performance Standards ("NSPS") 40 CFR Part 60, Subparts A and D. The proposed Consent Decree requires defendants, Kansas City Board of Public Utilities and the city of Kansas City, Kansas, to comply with the provisions of the NSPS and to install new air pollution control equipment at a cost of about $8.0 million Further, the defendants will pay a civil penalty of $168,519.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC. 20530, and should refer to *United States v. Kansas City Board of Public Utilities et al.*, D.J. Ref. No. 90-5-2-1-1016.

The proposed Consent Decree may be examined at the office of the United States Attorney for the District of Kansas, 812 North Seventh Street, Room 412, Kansas City, Kansas 66101 and at the Region VII, office of the United States Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas 66101.

The Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.20 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATE: Requests for copies must be received in writing on or before February 16, 1988. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESS: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION:

Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of the Air Force, Directorate of Administration, Records Management Branch (N1-AFU-87-2). Records relating to internal audits.

2. Department of the Air Force (N1-AFU-88-10). Records relating to non-appointed Air Force Academy candidates.

3. Department of the Air Force (N1-AFU-88-12). Records of the Air Force Academy pertaining to graduate scholarships and fellowships offered by foundations and universities.

4. Office of the Secretary of Defense, Department of Defense Dependent Schools (N1-330-88-1). Records relating to students attending Department of Defense dependent schools, including transcripts, health records, cards, test results, and attendance records.

5. General Services Administration, Federal Supply Service (N1-137-88-1). Subject file relating to land grant railroads, 1920-55. Includes copies of correspondence, agreements, legislation, publications, and related reference materials.

6. War Assets Administration, abolished and functions transferred to the General Services Administration for liquidation in 1949 (N1-270-88-1). Non-permanent records of the War Assets Administration and its predecessor agencies, 1943-50. Records documenting the functions and activities of these agencies have been identified and designated for permanent retention in the National Archives.

7. Small Business Administration, Office of Administrative Services (N1-309-87-3). Field office general subject correspondence files and reduced retention period for sets of agency notices maintained by filed offices.

8. Department of State, Office of Foreign Missions (N1-59-87-9). Comprehensive schedule providing for the destruction of facilitative records and the permanent retention of policy documentation.

9. Department of Transportation, Maritime Administration (N1-357-88-1). Mobilization ship design records.

10. Department of the Treasury, Internal Revenue Service (N1-58-87-6). Revisions to Records Control Schedule 206, Service Centers.

11. Veterans Administration, Department of Medicine and Surgery (N1-15-88-1). Health Professional Scholarship Program administrative housekeeping records.

Dated: December 23, 1987.

James C. Megronigle,

Acting Archivist of the United States.

BILLING CODE 7537-01-M

NATIONAL SCIENCE FOUNDATION

Statement of Organization, Functions, and Delegations of Authority

AGENCY: National Science Foundation.

ACTION: Notice of amendment to statement of organization, functions, and delegations of authority.

SUMMARY: In accordance with the Administrative Procedures Act (5 U.S.C. 551 et seq.), this notice amends the Statement of Organization that was published on January 14, 1987 (Federal Register, Volume 52, No. 9, Pages 1540-1549). This statement reflects the current organization of the National Science Foundation and is intended to advise the public of recent changes.

EFFECTIVE DATE: December 18, 1987.

FOR FURTHER INFORMATION CONTACT: M. Rebecca Winkler, National Science Foundation, Division of Personnel and Management, Room 208, Washington, DC 20550, telephone 202-357-9520.

I. Creation and Authority

The National Science Foundation (NSF) is an independent agency of the U.S. Government, established by the National Science Foundation Act of 1950, as amended, and related legislation, 42 U.S.C. 1861 et seq., and was given additional authority by the Science and Engineering Equal Opportunities Act (41 U.S.C. 1985), and Title I of the Education for Economic Security Act (99 Stat. 893; 20 U.S.C. 3911-3922).

A. Staff Offices

The Office of Science and Technology Centers Development (STC) was established in the Office of the Director to provide leadership and internal coordination during the development of the Foundation's new Science and Technology Centers Program. The Office provides a focal point for general inquiries about the S&T Centers Program; helps stimulate other sectors (industry, the States) to support and participate in S&T Centers; manages budget and planning activities related to the Program; develops relevant program announcements and proposal solicitations; coordinates the review of S&T Centers proposals; coordinates the management of Center awards; and tracks center and group research support activities across the Foundation.

B. Directorates

Directorate for Computer and Information Science and Engineering (CISE). The networking and communications research activities of the Division of Advanced Scientific Computing (ASC) were moved into a newly established Division of Networking and Communications Research and Infrastructure. The functional statement for ASC now reads:

The Division of Advanced Scientific Computing (ASC) provides researchers access to advanced computational facilities located at several centers, provides a variety of services and training opportunities to new users, supports research on new algorithms, peripheral devices, and innovative supercomputing systems. The Centers program is devoted to delivering needed advanced computational services to the academic research community and to maintaining and improving supercomputer performance at the facilities. The New Technologies program is responsible for research and development and implementation of novel systems for increasing the future power and expanding the horizon of computational capabilities for frontier scientific and engineering research.

The Division of Networking and Communications Research and Infrastructure (NCRI) has a three-fold responsibility. NSFNET's mission is improving scientific networking infrastructure for both supercomputing and general research productivity improvement. EXPRES is charged with experimenting with and developing a system for exchanging compound documents among academic researchers. The Networking and Communications Research Program supports research in networking and communication theory including such topics as digital communications networks, communications and information theory, network architectures, distributed systems, and digital encryption and data security.

Directorate for Engineering (ENG)

The Division of Foundamental Research in Emerging and Critical Engineering Systems was reorganized into two Divisions: the Division of Fundamental Research in Emerging Engineering Technologies (EET) and the Division of Fundamental Research in Critical Engineering Systems (CES).

The Division of Fundamental Research in Emerging Engineering Systems (EET) supports fundamental research to increase the knowledge and human resources base in emerging engineering systems, which encompass technical areas that cut across traditional engineering disciplinary lines. Emerging Engineering Systems are those that show great promise for enhancing the Nation's economy, employment base, security and international competitiveness, and for which the Nation's universities do not yet have an adequate research and human resources base. Major research areas within this Division include Biotechnology, Lightwave Technology, Bioengineering and Research to Aid the Handicapped, Computational Engineering and Neuroengineering.

The Division of Fundamental Research in Critical Engineering Systems (CES) supports fundamental research to expand the knowledge base in critical engineering systems which encompass technical areas that cut across traditional engineering disciplinary lines. Critical Engineering Systems are those that are essential, either because they significantly affect the economic viability and security needs of the Nation, or because they are required in maintaining the public infrastructure. Major research areas within this Division include Earthquake Hazard Mitigation, Natural and Man-made Hazard Mitigation, Environmental Engineering, and Systems Engineering for Large Structures.

Date: December 24, 1987.

Jeff Fenstermacher,

Assistant Director for Administration.

[FR Doc. 87-29895 Filed 12-29-87; 8:45 am]

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-416]

Mississippi Power and Light Co., System Energy Resources, Inc., and South Mississippi Electric Power Association

Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.55a(c)(1) to Mississippi Power and Light Company, et al. (the licensee), for the Grand Gulf Nuclear Station, Unit No. 1, (the facility) located in Claiborne County, Mississippi.

Environmental Assessment

Identification of Proposed Action:

The Commission's rules at 10 CFR 50.2 and 10 CFR 50.55a(c)(1) require that reactor coolant pressure boundary (RCPB) piping extend out to the outboard containment isolation valve and that RCPB piping meet the requirements for Class 1 components in Section III of the ASME Boiler and Pressure Vessel Code (ASME Code). By letter dated November 25, 1987, as revised December 10, 1987, the licensee requested an exemption from 10 CFR 50.55a(c)(1) to permit continued use of a section of RCPB piping in the reactor water cleanup (RWCU) system, although it is classified as ASME Code, Class 2, provided an ASME Code, Section III, Class 1, stress analysis is performed and provided this piping is included in the ASME Code, Section XI, Class 1, inservice inspection program.

The Need for the Proposed Action

In order to meet all ASME Code, Class 1, criteria required by the regulation, the affected section of piping would need to be replaced. The plant is currently in a refueling outage and the replacement of this piping is estimated by the licensee to add about 10 days to the outage with consequent significant fuel replacement costs, in addition to significant engineering and construction costs. The alternative proposed by the licensee is to demonstrate by a stress analysis that the piping meets ASME Code, Section III, Class 1, allowable stress criteria and to inspect the piping in accordance with ASME Code, Section XI, Class 1, inservice inspection criteria. The licensee contends that this proposal achieves the underlying purpose of § 50.55a(c)(1) without imposing an undue delay in startup from the present refueling outage.

Environmental Impacts of the Proposed Action

The proposed exemption involves a change in the installation or use of the facility's components located entirely within the restricted area as defined in 10 CFR Part 20. Our evaluation of the proposed exemption from 10 CFR 50.55a(c)(1) indicated that the proposed exemption involves no significant increase in the amounts, and no significant change in the types of any radioactive effluents that may be released offsite because there is no change to the piping or operation. Our evaluation also indicated that there is no significant effect of the proposed exemption on the probability or consequences of an accident because this section of piping would be essentially equivalent to ASME Code, Class 1, piping. Therefore, this section of piping would have essentially the same margin to pipe failure. The pipe materials, valves and welding meet ASME Code, Class 1, criteria and the piping will be stress analyzed and inspected to ASME Code, Class 1, criteria. The piping cannot be re-stamped as ASME Code, Class 1, because it was procured to ASME Code, Class 2, requirements. The ASME Code, Class 1, inservice inspection would result in an increase in occupational radiation exposures because this inspection is more extensive than inspection to ASME Code, Class 2, criteria; however, personnel exposures would not be significantly increased because this section of RWCU piping is a small fraction of the reactor coolant pressure boundary that is inspected to ASME Code, Class 1, criteria. The proposed exemption does not affect any other occupational radiation exposures because no change in system equipment or operation is involved. The exemption does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action

Since the staff has concluded there are no significant environmental impacts from the proposed action, any alternatives would have equal or greater environmental impacts.

The principal alternative would be to deny the requested exemption. Such an action would not reduce environmental imapcts of plant operation.

Alternative Use of Resources

This action involves no use of resources not previously considered in the Final Environmental Statement for the Grand Gulf Nuclear Station, Unit 1, dated September 1981.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did no consult with any other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for exemption dated November 25, 1987, as revised December 10, 1987, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Dated at Bethesda, Maryland, this 23rd day of December 1987.

For the Nuclear Regulatory Commission.

Elinor Adensam,

Director, Project Directorate II-1, Division of Reactor Projects-1/II, Office of Nuclear Reactor Regulation.

[FR Doc. 87-29887 Filed 12-29-87; 8:45 am]

BILLING CODE 7590-01-M

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

VOL 52 ISS 250 DEC 30 1987 UMI

This biweekly notice includes all notices of amendments issued, or proposed to be issued from December 7, 1987 through December 18, 1987. The last biweekly notice was published on December 16, 1987 (52 FR 47775).

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resource Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 29, 1988 the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama

Date of amendments request: December 9, 1987

Description of amendments request: The proposed change would change the Radioactive Effluent Release Report requirements of Technical Specification (TS) 6.9.1.9 to allow the use of historical annual average meteorological data to determine the doses due to the routine release of radioactive gaseous effluents. In addition, the spelling of the word "or" would be corrected in the same paragraph of the TS.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed amendment against the standards in 10 CFR 50.92 and has determined:

(1) The proposed change will not increase the probability or consequences of an accident previously evaluated. The gaseous pathway doses that are reported in the routine radioactive effluent release reports are the result of routine normal operation of the plant. The methodology used to calculate these doses is not related to any accident analyses. Therefore, the proposed change, which would allow the use of historical annual average meteorological conditions in calculating gaseous pathway doses, is administrative in nature and will not increase the probability or consequences of an accident previously evaluated.

(2)The proposed change will not increase the possibility of a new or different kind of accident from any previously evaluated because neither the plant design nor plant operation will be changed. The proposed change only affects the meteorological input used in calculating the gaseous pathway doses due to routine radioactive effluent releases. Therefore, the proposed change cannot create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The proposed change will not involve a reduction in a margin of safety because the proposed change is consistent with the guidance provided in NUREG-0311, Regulatory Guide 1.111, and the Standard Review Plan. As stated above, the proposed change only involves a change in the meteorological input (i.e., annual average as opposed to real time) used in calculating gaseous pathway doses. An annual summary of hourly meteorological data will still be provided as required by Specification 6.9.1.9. Therefore, this change will not involve a reduction in a margin of safety.

Based on the above, the licensee has determined that the proposed amendment does not involve a significant hazards consideration. The NRC staff has reviewed the licensee's no significant hazards consideration. determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303

Attorney for licensee: Ernest L. Blake, Esquire, 2300 N Street, NW., Washington, DC 20037

NRC Project Director: Elinor G. Adensam

Arizona Public Service Company, et al., Docket Nos. STN 50-529 and STN 50-530, Palo Verde Nuclear Generating Station (PVNGS), Units 2 and 3, Maricopa County, Arizona

Date of amendment request: September 14, 1987 as revised by letter dated October 1, 1987.

Description of amendment request: The proposed amendments would revise Technical Specification 5.3.1 in each of the two licenses (NPF-51 and NPF-74 for Palo Verde, Units 2 and 3, respectively) by changing the maximum enrichment for reload fuel from 4.0 to 4.05 weight percent U-235.

Basis for Proposed No Significant Hazards Consideration Determination: The Commission has provided guidance for determining whether a proposed amendment involves a significant hazards consideration and has provided examples of amendments that are not likely to involve a significant hazards consideration (51 FR 7751). Example (iii) in 51 FR 7751 is as follows: (iii) For a nuclear power reactor, a change resulting from a nuclear reactor core reloading, if no fuel assemblies significantly different from those found previously acceptable to the NRC for a previous core at the facility in question are involved. This assumes that no significant changes are made to the acceptance criteria for the technical specifications, that the analytical methods used to demonstrate conformance with the technical specifications and regulations are not significantly changed, and that NRC has previously found such methods acceptable.

The staff considers the proposed amendments to be similar to example (iii) since they are directly related to a reactor core reloading and the fuel assemblies are not significantly different than those previously found acceptable for the initial core reloading at Palo Verde. The only difference is the proposed increase for maximum fuel enrichment from 4.0 to 4.05%. In addition, no significant changes are being made to the previously approved acceptance criteria for the technical specifications or to the analytical methods used to demonstrate conformance with the specifications and regulations.

Accordingly, the Commission has proposed to determine that the above chnage does not involve a significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, Business, Science and Technology

Department, 12 East McDowell Road, Phoenix, Arizona 85004.

Attorney for licensees: Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

NRC Project Director: George W. Knighton

Arizona Public Service Company, et al., Docket Nos. STN 50-528, STN 50-529, and STN 50-530, Palo Verde Nuclear Generating Station (PVNGS), Units 1 and 2, Maricopa County, Arizona

Date of amendment request: November 20, 1987

Description of amendment request: The proposed amendments would revise Table 3.3-6 in Technical Specification 3.3.3.1, "Radiation Monitoring Instrumentation," for each of the three licenses (NPF-41, NPF-51 and NPF-74 for Palo Verde Units 1,2 and 3, respectively) by replacing the present detectable range of the two main steam line effluent monitors from 10^{-3} - 10^{4} R per hour (i.e., 10^{10} - 10^{7} mR per hour) with the appropriate measurement range of 10^{10} - 10^{5} mR per hour, consistent with Regulatory Guide 1.97.

Basis for Proposed No Significant Hazards Consideration Determination: The Commission has provided guidance for determining whether a proposed amendment involves a significant hazards consideration and has provided examples of amendments that are not likely to involve a significant hazards consideration (51 FR 7751). Example (i) in 51 FR 7751 is as follows: (i) A purely administrative change to technical specification: for example, a change to achieve consistency throughout the technical specifications, correction of an error or a change to nomenclature.

The staff considers the proposed amendments to be similar to example (i) since they involve a correction to the range of accurately measured detectable radiation for the two main steam line effluent monitors.

Accordingly, the Commission has proposed to determine that the above change does not involve a significant hazards consideration.

Local Public Document Room location: Phoenix Public Library, Business, Science and Technology Department, 12 East McDowell Road, Phoenix, Arizona 85004.

Attorney for licensees: Mr. Arthur C. Gehr, Snell & Wilmer, 3100 Valley Center, Phoenix, Arizona 85007.

NRC Project Director: George W. Knighton

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, LaSalle County Station Unit Nos. 1 and 2, LaSalle County, Illinois

Date of amendment request: August 24, 1987

Description of amendments request: The proposed amendments to Operating License No. NPF-11 and Operating License No. NPF-18 would revise the LaSalle Units 1 and 2 Technical Specifications to revise the wording of the Jet Pump Operability Technical Specification Surveillance to require balanced drive flow rather than equal flow control valve position. The changes are administrative in nature to perform the surveillance with what the licensee believes to be the intent of the specifications. The wording of Technical Specification 4.4.1.2.1 is based on the assumption that given pumps of equal pumping capacity and identically calibrated control systems, equal indicated FCV positions should produce equal drive loop flows. Therefore, Commonwealth Edison believes the intent of the specification is to balance loop drive flows before performing the jet pump operability surveillance. This interpretation is consistent with the requirements of Technical Specification 3.4.1.3, which limits drive flow mismatch to less than 5% (with core flow greater than 70% of rated core flow), and intends to enforce balanced loop flows.

Using specification 3.4.1.3 as a guide, the criteria for balanced drive flows for performance of surveillance 4.4.1.2.1 shall be that the indicated drive flow difference be within 5% of rated recirculation flow. In this manner, system differences or changes throughout plant life which affect the FCV position versus drive flow relationship will not impede the successful performance of the surveillance.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined, and the NRC staff agrees, that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because this proposed change of the Technical Specifications is an administrative change to clarify the conditions necessary to perform the jet pump operability surveillance and correct typographical errors.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because this proposed change of the Technical Specifications is an administrative change to clarify the conditions necessary to perform the jet pump operability surveillance and correct typographical errors.

3. Involve a significant reduction in the margin of safety because this proposed change of the Technical Specifications is an administrative change to clarify the conditions necessary to perform the jet pump operability surveillance and correct typographical errors. Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specifications involve no significant hazards consideration.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Attorney to licensee: Joseph Gallo, Esq., Isham, Lincoln and Beale, Suite 1100, 1150 Connecticut Avenue, NW., Washington, DC 20036.

NRC Project Director: Daniel R. Muller

Commonwealth Edison Company, Docket No. 50-373, LaSalle County Station, Unit No. 1, LaSalle County, Illinois

Date of amendment request: August 25 and November 17, 1987

Description of amendment request: The proposed amendment to Operating License No. NPF-11 would revise the LaSalle Unit 1 Technical Specifications to change the identification of the compartment in which the normal and emergency supply breakers for the Shutdown Cooling Isolation Valve (1E12 F0009) are located. This change was required because the licensee has replaced the motor operator with a larger capacity motor operator to increase the reliability of the valve. The new, larger capacity operator requires the use of larger capacity breakers which will not fit into the existing cubicles. The replacement breakers will be installed in larger compartments within the same Motor Control Center (MCC's) as the originals. This change is purely administrative in nature to correct the identification of these new cubicle locations.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples of actions not likely to involve a significant hazards consideration (48 FR 14870). One of the examples (i) relates to purely administrative changes to technical specifications; for example, a change to achieve consistency throughout the technical specifications, correct errors, or change nomenclature. The proposed change is purely administrative and corrects the identification of new cubicle locations. Based on the above, since the proposed change involves actions that conform to example (i), the staff proposes to determine that this application for amendment involves no significant hazards consideration.

Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specifications involve no significant hazards considerations.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Attorney to licensee: Joseph Gallo, Esq., Isham, Lincoln and Beale, Suite 1100, 1150 Connecticut Avenue, NW., Washington, DC 20036.

NRC Project Director: Daniel R. Muller

Commonwealth Edison Company, Docket No. 50-373 , and 50-374 LaSalle County Station, Unit Nos. 1 and 2, LaSalle County, Illinois

Date of amendment request: November 9, 1987

Description of amendment request: The proposed amendment to Operating License No. NPF-11 and Operating License No. NPF-18 would revise the LaSalle Units 1 and 2 Technical Specifications to conform with the LER Rule, 10 CFR 50.73. The proposed amendments will change the wording in Technical Specification 6.1.G.1.7 from "Reportable occurrences requiring 24-hour notification to the NRC" to "All Reportable Events."

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples of actions not likely to involve a significant hazards consideration (48 FR 14870). One of the examples (i) relates to purely administrative changes to technical specifications; for example, a change to achieve consistency throughout the technical specifications, correct errors, or change nomenclature. The proposed change is administrative and would change wording to allow the Technical Specification to conform to 10 CFR 50.73. Based on the above, since the proposed change involves actions that conform to example (i), the staff proposes to determine that this application for amendment involves no significant hazards consideration.

Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specifications involve no significant hazards considerations.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Attorney to licensee: Joseph Gallo, Esq., Isham, Lincoln and Beale, Suite 1100, 1150 Connecticut Avenue, NW., Washington, DC 20036.

NRC Project Director: Daniel R. Muller

Commonwealth Edison Company, Docket No. 50-254, Quad Cities Nuclear Power Station, Unit 1, Rock Island County, Illinois

Date of application for amendment: November 17, 1987

Description of amendment request: Commonwealth Edison Company (CECo, the licensee) submitted an amendment request to revise Appendix A of DPR-29, Technical Specifications (TS), because of modifications to the Standby Liquid Control System (SBLC) accomplished in accordance with the requirements of 10 CFR 50.62. Consistent with SBLC system modifications, TS 3.4.A, 4.4.A and Figure 3.4-1 would be revised to reflect new system flow rates, boron concentration and volume, two pump operation, and surveillance requirements. Associated TS bases would also be revised.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.62(c)(4) requires a SBLC system with a minimum flow capacity and boron content equivalent to 86 gpm of 13 weight percent sodium pentaborate solution. For Quad Cities Unit 1, this is being accomplished by modifying the SBLC system to allow dual pump operation (80 gpm combined flow rate) and revising TS to require a 14% minimum concentration. The original amount of total boron injection has not been altered, just the injection rate.

The Commission has provided standards for determining whether a significant hazards consideration exists as stated in (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequence of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. In accordance with 10 CFR 91(a), the licensee has provided the following analysis in their amendment application addressing these three standards.

CECo has analyzed this proposed amendment and determined that operation of the facility, in accordance with the proposed amendment, would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because TS changes do not alter the total amount of boron injection previously required by TS, thereby maintaining the previous shutdown reactivity capability. This amendment is needed to implement the requirements of 10 CFR 50.62 and has no impact on systems or equipment that could potentially initiate or impact the probability of an accident. The boron injection rate was increased by modifications to the SBLC system in order to improve accident initiation capabilities and reduce potential consequences of an accident.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated, because the only function of the SBLC system is to provide backup shutdown capability. System modifications and TS revisions do not affect any other systems or equipment which could initiate an accident. Although dual pump operation will increase total boron flow rate, the system continues to be isolated from inadvertent actuation and injection into the reactor vessel by fail safe explosive squib valves (provide high assurance of opening, and extra protection against undesired admission).

3. Involve a significant reduction in the margin of safety, because overall shutdown reactivity capability (i.e. total boron injection) of the SBLC system was not reduced. The proposed amendment supports required modifications which will increase the SBLC system injection rate, thereby increasing not reducing, the margin of safety for Anticipated Transient Without Scram (ATWS) events.

Based on the proceeding analysis and a preliminary review of the license amendment request the Commission has determined that the proposed TS changes would not involve Significant Hazards Considerations.

NRC Project Director: Daniel R. Muller

Commonwealth Edison Company, Docket Nos. 50-295, Zion Nuclear Power Station, Unit No. 1, Lake County, Illinois

Date of application for amendment: September 22, 1987, modified by letter dated October 27, 1987.

Description of amendment request: During the last Unit 1 outage, two inaccessible snubbers were found with the hydraulic fluid supply ports uncovered. In accordance with Section 4.22.2.A.1, these snubbers are to be considered inoperable for the purpose of establishing the next visual inspection interval. A subsequent visual inspection is required by Section 4.22.2.A.1 to be conducted within 12 months (plus or minus 3 months). The snubbers that would be required to be inspected are inaccessible with the Unit above hot shutdown (Mode 3). The Unit 1 inaccessible snubber visual inspection was completed on November 20, 1986. This would require the next inspection to be conducted on November 20, 1987 plus or minus three months. The Unit is scheduled to be at power for the duration of this time period and a Unit shutdown would be required to perform this inspection. Therefore, to prevent the shutdown of Unit 1 solely to perform the snubber inspection, that inspection must be delayed until the beginning of the next scheduled Unit 1 refueling outage, tentatively scheduled for February/March, 1988.

In summary, this proposed change involves the one-time alteration of the allowable snubber inspection periods. Unit 1's inspection will be delayed by approximately 30 days. This alteration will prevent a forced shutdown of Zion Unit 1.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequence of an accident previously evaluated; (2) create the possibility of a new or different kind of accident of from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The license provided the following discussion regarding the above three criteria:

Criterion 1

An amendment to the Zion facility operating license is proposed to allow the performance of required visual snubber inspections to take place during scheduled refueling outages. This will preclude a forced shutdown of the Zion Unit 1. This proposed change will involve an approximate 30 day delay in the performance of Unit 1 snubber inspection.

The alteration of the inaccessible snubber inspection intervals on a one-time basis has no relationship to the probability of any of the accidents previously evaluated. The initiating events associated with the accidents contained in Zion's FSAR have been reviewed. None of these events are adversely affected by the one-time alteration of inaccessible snubber inspections.

As discussed on page 295AA8 of the Zion Technical Specifications, the "inspection frequency is based upon maintaining a constant level of snubber protection". The approximate 30-day delay in the performance of Unit 1's snubber exam corresponds to an 8% increase in the allowed inspection period beyond the existing requirements. This small delay will not adversely affect the level of snubber protection afforded Unit 1.

Thus, the proposed one-time alteration of the allowable inaccessible snubber visual inspection periods will not significantly alter the level of snubber protection at Zion Station. The snubbers' performance will not be altered by this proposed amendment.

Therefore, based upon the above discussion, the proposed amendment will not involve a significant increase in the probability or consequences of any previously evaluated accidents.

Criterion 2

The one-time alteration of the allowable inspection periods for the inaccessible snubbers will have no effect on the performance of any of Zion's systems or structures. The snubber inspection frequency likewise has no interaction with any external events such as tornadoes or floods.

Since the allowable snubber inspection periods hold no potential for any adverse interaction, no new or different kind of accident is feasible. Therefore, this proposed amendment will not create the possibility of a new or different kind of accident.

Criterion 3

As discussed, above the one-time alteration of the allowable inspection period for inaccessible snubbers will have no effect on the overall level of snubber protection at Zion Station. As a result, this proposed amendment will not involve a significant reduction in the margin of safety.

Therefore, since the application for amendment satisfies the criteria specified in 10 CFR 50.92, Commonwealth Edison Company has made a determination that the application involves no significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis.

Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specification involve no significant hazards consideration.

Local Public Document Room location: Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60055.

Attorney to licensee: P. Steptoe, Esq., Isham, Lincoln and Beale, Counselors at Law, Three First National Plaza, 51st Floor, Chicago, Illinois 60602.

NRC Project Director: Daniel R. Muller

Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: July 23, 1987

Description of amendment request: The proposed amendment would revise Facility Operating License No. DPR-6 to make administrative changes to the Big Rock Point Plant Technical Specifications. The proposed changes would: correct accumulated editorial and typographical errors; capitalize defined terms consistent with the practice in the Standard Technical Specifications; correct references to the revised Code of Federal Regulations; correct titles of senior onsite managers and other organizational elements; and delete the Technical Specification and Order for Modification of License associated with environmental qualification of electrical equipment.

Basis for proposed no significant hazards consideration determination: The Commission has provided examples of amendments that are considered not likely to involve significant hazards considerations (51 FR 7751, March 6, 1986). Example (i) relates to a purely administrative change to Technical Specifications, such as a change to achieve consistency throughout the

Technical Specifications, correction of an error, or a change in nomenclature. Most of the proposed changes fit this category, as they include capitalizing defined terms in accordance with standard format, correcting typographical and editorial errors overlooked in previous amendments and changing references for certain reporting requirements in accordance with recent changes to the Code of Federal Regulations.

Example (i) also applies to the proposed organizational changes, that involve changes to titles. The proposed changes to Figure 6.2-1 of the Big Rock Point Technical Specifications would modify the title of "Plant Superintendent" to "Plant Manager," with no change in that individual's responsibility. Several existing corporate positions would be added to the figure for completeness and for consistency with the Palisades Technical Specifications. Additionally, the Director of Nuclear Safety would be designated as Chairman of the Nuclear Safety Board (NSB), replacing the Executive Director of Nuclear Assurance in that capacity. However, both individuals would still serve as Board members; this change would merely formalize current practice, in which, as Vice Chairman of the NSB, the Director of Nuclear Safety effectively presides over NSB activities. This change would also be consistent with a recent amendment to the Palisades Technical Specifications.

An additional organizational change would reassign the corporate responsibility for the overall fire protection program to the Manager of Information and Operations from the Director of Property Protection. This transfer of responsibility is not significant in that both positions report to the Vice President of General Services. Further, the responsibility for the site fire protection program remains with the Plant Manager. Consequently, this proposed change does not involve a significant increase in the probability or consequences of any accident previously evaluated, nor does it create the possibility of a new or different accident, nor involve a significant reduction in a margin of safety; as the fire protection program itself, the corporate oversight of the program, and the independent control over implementation at the site would remain unchanged.

Example (vii) of amendments not likely to involve significant hazards considerations relates to changes to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations, clearly in keeping with the regulations. The remaining proposed changes would delete the Order for Modification of License, dated October 24, 1980, and Technical Specification Section 6.13, which relate to environmental qualification of electrical equipment. These requirements have been superseded by Title 10, Part 50.49 of the Code of Federal Regulations. The proposed change would not affect facility operations and would conform to changes in the regulations.

On these bases, the Commission's staff proposes to determine that the requested amendment does not involve a significant hazards consideration. The proposed changes are administrative in nature and do not involve changes to existing plant equipment, procedures or administrative controls. Therefore, the proposed changes do not involve a significant increase in probability or consequences of a previously evaluated accident; they do not create the possibility of a new or different kind of accident from any accident previously evaluated; nor do they involve a significant reduction in a margin of safety.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Martin J. Virgilio

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Caroline

Date of amendment request: June 29, 1987, as supplemented December 4, 1987

Description of amendment request: The proposed amendments would revise Technical Specification (TS) Table 4.3-1, "Reactor Trip Systems Instrumentation Surveillance Requirements" to delete the requirement to test the reactor coolant flow rates in the bypass loops in which Resistance Temperature Detectors (RTDs) are installed to measure the hot leg and cold leg temperatures. The flow rates affect the time response of the temperature signals which are needed for reactor controls and protection. The licensee proposes to remove the RTD bypass manifolds and to place the RTDs directly in the hot leg and cold leg pipes, thereby eliminating the need for bypass flow testing requirements. The proposed station modifications are scheduled to be made during outages in January 1988 for Unit 2 and in January 1989 for Unit 1.

For Unit 2, the proposed modifications will begin before the next flow rate verification tests are required by the TS. For Unit 1, however, the next flow rate verification tests are due in May 1988 according to the TS requirement for flow rate verification tests every 18 months. The proposed amendments would exempt the licensee from the requirement to perform these tests just a few months before the Unit 1 bypass loop will be removed.

In its letters of June 29 and December 4, 1987, the licensee provided the following justifications for the proposed change:

1. The performance of the RTD Bypass Loop flow rate test involves four people (two Nuclear Equipment Operators, one Performance Technician and one Health Physics Technician) spending four hours each in lower containment, which results in a significant dose to those involved.

2. There is minimal potential for flow blockage in the 2-inch and 3-inch diameter bypass lines.

3. Individual low flow alarms with individual status lights for each reactor coolant loop bypass flow are provided on the main control board. The alarm and status lights provide the operator with immediate indication of low flow condition in the bypass loops associated with any reactor coolant loop. If the RTD Bypass Loop flow rate for Loop A, B, C or D decreases to 90% of its initial measured value, an annunciator alarms in the control room. Since the initial measured values for all of the loop flows are well above the minimum acceptable flow rates, the control room annunciator will alarm well in advance of any loop flow rate dropping below the acceptance criterion flow rate.

4. Local indicators are provided to monitor total flow through the RTD bypass manifolds for each loop. The indicators are located inside containment but are accessible during power operations. These indicators will be monitored quarterly, as well as following any bypass low flow alarm or following a period when a bypass loop has been out of service.

5. The deletion of the flow rate verification tests will have no effect upon the ability of the RTDs to perform their intended safety functions.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a

BEST COPY AVAILABLE

VOL 52 ISS 250 DEC 30 1987 UMI

facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed amendments will not (1) involve a significant increase in the probability or consequences of an accident previously evaluated because the deletion of the bypass flow rate verification tests will not degrade the safety aspects of the RTD temperature measurement capability. Low bypass flow rates will continue to be alarmed in the control room, and the flow rates will continue to be measured quarterly on the local flow rate indicators.

The proposed amendments will not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the design and operation of the plant will be unaffected and no new plant configurations are introduced.

The proposed amendment will not (3) involve a significant reduction in a margin of safety because of the continued availability of the local flow rate indicators and of the low flow alarms in the control room.

Based on the above considerations, the Commission proposes to determine that the proposed amendment involves no significant hazards considerations.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: Kahtan N. Jabbour, Acting Director

Duke Power Company, et al., Docket No. 50-414, Catawba Nuclear Station, Unit 2, York County, South Carolina

Date of amendment request: December 4, 1987

Description of amendment request: The proposed amendment would revise License Condition 2.C.(8)(b) of Catawba Unit 2 Facility Operating License NPF-52 to: (1) make it consistent with the NRC staff's conclusions contained in a September 4, 1987, letter to the licensee (from J. H. Sniezek, NRC, to H. B. Tucker, Duke), and (2) allow an extension of time for the resolution of the Safety Parameter Display System (SPDS) issue. The extension would be for one complete cycle of operation. Thus, the license condition proposed by the licensee would read:

Prior to startup following the second refueling outage, Duke Power Company shall add to the existing SPDS and have operational the following SPDS parameters: (a) residual heat removal flow, (b) containment isolation status, (c) stack radiation measurements, and (d) steam generator or steamline radiation. The actual value of these and all other SPDS variables should be displayed for operator viewing in easily and rapidly accessible display formats.

Basis for proposed no significant hazards consideration determination: Supplement 1 to NUREG-0737 required licensees to install an SPDS which provides a concise display of critical plant variables to control room operators to aid them in rapidly and reliably determining the safety status of the plant.

In February 1986, the NRC staff issued the low-power Facility Operating License, NPF-48, for Catawba Unit 2 along with Supplement 5 to the Safety Evaluation Report. Supplement 5 concluded that the Catawba SPDS does not fully meet the applicable requirements of Supplement 1 to NUREG-0737. However, since the staff did not identify any serious safety concerns with the existing system, the Catawba SPDS may be operated as an interim implementation until startup following the first refueling outage.

The SER identified five parameters and the backup display as modifications needing to be made to the Catawba SPDS. These requirements were imposed as License Condition 2.C.(9)(b) of the low-power Facility Operating License, NPF-48, and later as License Condition 2.C.(8)(b) in the full-power Facility Operating License, NPF-52.

On March 25, 1986, the licensee identified the requested changes as a plant-specific backfit and requested that the NRC staff prepare a backfit analysis. By letter dated June 13, 1986, the staff denied the licensee's backfit claim. On March 26, 1987, the licensee appealed the staff's denial of the backfit claim. By letter dated September 4, 1987, the staff concluded that 4 of the 5 parameters identified in Supplement 5 along with the backup displays should be added. One of the five parameters previously required, hot leg temperature, was already included as an input into SPDS.

The licensee stated that a proposed resolution of the SPDS issue is in preparation, and that the four additional parameters would be added along with changes to the backup display. With NRC staff acceptance of this proposed resolution, modifications to the SPDS, including operator training and procedure revision, could be completed within six months. As currently scheduled, the Catawba Unit 2 first refueling outage should be completed by late February 1988.

The SPDS is not a safety-grade system and is not intended to fulfill the post-accident monitoring requirements of Regulatory Guide 1.97. All parameters, including the additional parameters, are already provided in the control room. It is therefore the licensee's conclusion that extension of the date for modification of the Catawba Unit 2 SPDS until startup following the second refueling outage does not involve any adverse safety considerations. The staff agrees with the licensee's evaluation for extending the implementation date by one complete cycle of operation.

The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed amendment would not involve a significant increase in the probability of an accident previously evaluated because the SPDS is provided as an aid to the operator, all parameters displayed on the SPDS are provided separately in the control room, and the SPDS is not used for control functions.

The proposed amendment would not create the possibility of a new or different kind of accident than previously evaluated because the design and operation of Catawba Unit 2 will not be affected.

The proposed amendment would not cause a significant reduction in a margin of safety. The extension of time in which to resolve the SPDS issue and perform required modifications would have no impact on safety margins because the SPDS is intended to aid the operators and is not relied upon as a safety system.

Based on the above considerations, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: Kahtan N. Jabbour, Acting Director

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: November 13, 1987 as supplemented December 11, 1987

Description of amendment request: The proposed amendments would modify the Technical Specifications (TSs) for Catawba Units 1 and 2 with the following changes:

Change 1 would revise the TSs to ensure that plant operation is consistent with the design and safety evaluation conclusions made in the Reload Safety evaluation (RSE) for Catawba Unit 2, Cycle 2. Most of the changes affect Unit 2 only. Unit 1 is included because the TSs are combined in one document applicable to both units. These changes are already in place for Unit 1.

Change 2 deals with the addition of the Boron Dilution Mitigation System (BDMS) for Unit 2. In particular, TSs 4.1.1.1.3; 4.1.1.1.4; 4.1.1.2.2; Table 3.3-1, item 6.b; Table 3.3-1, Action 5; Table 4.3-1, Note (9); 3/4.3.3.12; 4.9.1.3; and 3/4.9.2 reflect the addition of this system to Unit 2. These TSs would not apply to Unit 2 until prior to startup (Mode 2) to allow calibration and testing of the system so that it can be declared operable. In the interim between issuance of the License Amendments and Unit 2 entering Mode 2 following the first refueling outage, the requirements of the deleted TSs concerning the source range monitors will be administratively imposed by the licensee to ensure that there will always be adequate protection in the event of a boron dilution accident. The BDMS is already installed and operable for Unit 1.

Change 3 would delete Surveillance Requirement 4.3.3.12.1(b) because this surveillance is required only prior to startup (Mode 2) but the TS associated with this Surveillance Requirement is applicable in hot standby, hot shutdown and cold shutdown (Modes 3, 4, and 5, respectively).

Change 4 to TS 3.9.2.1, Action (a)(2), would delete the phrase "and control room" from the sixth line because it is a repeat of the same phrase in line 5. Thus, it is an editorial correction.

Change 5 regarding the addition of Action (d) to TS 3.9.2.1 would allow the plant to change modes if the Boron Dilution Mitigation System is inoperable. This statement already appears in TS 3.3.3.12 which covers all other applicable modes.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee, in its December 11, 1987 submittal, provided evaluations of the proposed changes with regard to these three standards:

Proposed Change 1 for Catawba Unit 2 does not involve a significant hazards consideration because it would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because the Westinghouse RSE (Attachment 3 to the licensee's letter of November 13, 1987) provides a discussion of each affected accident analysis and demonstrates that the changes required as a result of this reload will not result in a significant increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the RSE concludes that the amendment will not introduce any changes that will fall outside of the previously evaluated accidents. Operation in accordance with the proposed reload related changes will ensure that the plant is operated within the current design limits as discussed in the RSE.

3. Involve a significant reduction in a margin of safety because the RSE concludes that operation with the proposed amendments in place will not result in a plant condition outside of the already established safety analysis. Incorporation of the reload related changes will ensure that the plant is operated in accordance with the requirements as discussed in the RSE.

This change is applicable to Unit 2 only. Regarding proposed Change 1 for Catawba Unit 1, the Commission has provided standards for the determination that an amendment request involves no significant hazards consideration (51 FR 7744). One example of actions not likely to involve a significant hazards consideration is example (i) which relates to a purely administrative change to TSs to achieve consistency throughout the TSs, correction of an error, or a change in nomenclature. Proposed Change 1 for Catawba Unit 1 is a purely administrative change which matches example (i) because the TSs for both Units are combined in a single document.

Proposed Change 2 for Catawba Unit 2 does not involve a significant hazards consideration because it would not:

1. Involve a significant increase in the probability or consequences of any previously evaluated accident because as long as Unit 2 is operated within the parameters specified, the previously accepted safety analyses for Unit 1 (which already has the BDMS installed and operable) discussed in the Final Safety Analysis Report (FSAR), Section 15.4.6, would be applicable to Unit 2. Therefore, the addition of the BDMS TSs for Unit 2 will ensure that Unit 2 will meet the requirements and assumptions of a previously evaluated accident.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the incorporation of the changes to reflect the addition of the BDMS will ensure that the plant is operated in accordance with the current boron dilution accident analysis as presented in FSAR Section 15.4.6. This analysis assumes that the BDMS is installed and operable and functions to mitigate the consequences of a boron dilution event. The addition of the BDMS TS requirements will not result in the possibility of a new or different kind of accident than any previously evaluated.

3. Involve a significant reduction in a margin of safety because the incorporation of the BDMS TS changes will add additional restrictions in that there will be new Limiting Conditions for Operation, Action Statements and Surveillance Requirements in place applicable to Unit 2. These requirements will ensure that the BDMS is maintained operable or that appropriate alternative actions were taken.

This change is applicable to Unit 2 only. Proposed Change 2 for Catawba Unit 1, is a purely administrative change which matches example (i) because the TSs for both Units are combined in a single document.

Proposed Change 3 for Catawba Units 1 and 2 does not involve a significant hazards consideration because it would not:

1. Involve a significant increase in the probability or consequences of any previously evaluated accident because deletion of Surveillance Requirement 4.3.3.12.1(b) will have no effect on the BDMS. Since this TS is applicable in

Modes 3, 4 and 5, deletion of this Surveillance (which is required to be performed prior to entering Mode 2) will have no impact on the operability of the BDMS in those modes. The BDMS will still be demonstrated operable in the appropriate modes via other existing surveillances. Therefore, deletion of this surveillance requirement will not decrease the reliability of the BDMS and will not increase the probability or consequences of any previously evaluated accident.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the deletion of the Surveillance Requirement will not change the requirements for operability of the BDMS and will not result in the plant being operated in any new configuration not already allowed. This surveillance is not necessary because it is required to be performed prior to the plant entering Mode 2, yet the BDMS is not required to be operable in Mode 2. Therefore, its deletion will have no effect on the operability of the BDMS in Modes 3, 4 and 5 for which it is required to be operable.

3. Involve a significant reduction in a margin of safety because this Surveillance Requirement is to be performed just prior to entering a mode where the BDMS is not required. The net outcome is that the surveillance will demonstrate the operability of the BDMS just prior to its not being needed for accident mitigation. Thus, its deletion will not affect the probability that the BDMS will be operable in Modes 3, 4 or 5 because other applicable surveillances will still be required to be performed. Thus, there is no significant reduction in the safety margin because of the deletion of this surveillance requirement.

Proposed Change 4 for Catawba Units 1 and 2 regarding deleting the phrase "and control room" from the sixth line of TS 3.9.2.1, Action (a)(2), is an editorial correction which matches example (i) because this phrase is a repeat of the same phrase in line 5.

Proposed Change 5 for Catawba Units 1 and 2 does not involve a significant hazards consideration because it would not:

1. Involve a significant increase in the probability or consequences of any previously evaluated accident because TS 3.9.2.1, Action Statements (a), (b) or (c), do not allow mode changes if appropriate backup to the BDMS cannot be established. Allowing mode changes with appropriate backup in place will not increase the probability or consequences of any previously evaluated accident because the backup to the BDMS will be at least as reliable and/or conservative as the existing BDMS.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the Action Statements which are currently in place call for verification of an acceptable backup systems to the BDMS or the halt of core alterations (and, in effect, mode changes). Thus, the plant will not be allowed to change modes unless an acceptable backup to the BDMS (if it is inoperable) is operable. Therefore adequate assurance is maintained that the plant will have the capability to detect and to mitigate the consequences of a boron dilution event.

3. Involve a significant reduction in a margin of safety because other applicable Action Statements require the establishment of adequate backup systems to the BDMS in case the BDMS is inoperable. If these backup systems cannot be established, these Action Statements will not allow mode changes.

The staff has considered the proposed amendments and agrees with the licensee's evaluation of proposed changes 1, 2, 3 and 5 with respect to the three standards. For proposed change 4 the staff considers that example (i) is a more appropriate standard.

Accordingly, the Commission proposes to determine that the requested changes do not involve a significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: Kahtan N. Jabbour, Acting Director

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of amendment request: November 20, 1987

Description of amendment request: The amendment would revise the Technical Specifications regarding radioactive effluent to reflect the staff's position as expressed in the Standard Technical Specifications, (STS) and a letter to the licensee dated May 7, 1987. The changes are as follows:

Replacing "from the site" with "from each reactor unit from the site" in applicable specifications reflects Draft Revision 5 of the STS and is in accordance with 10 CFR 50 Appendix I.

Replacing reference to Figure 5.1-2 with Figure 5.1-1 reflects the change to Figure 5.1-1 which would be editorially combined with Figure 5.1-2. Clarification of the * note in Section 3.11.1.2 is provided to reflect the qualification specified in Draft Revision 5 of the STS so that the required Special Report will address the radiological impact on the drinking water sources within 3 miles downstream of the plant. An * note would be added to Section 3.11.2.1 for clarification purposes to specify the time applicable when determining the dose rate for comparison to the limits. Table 4.11-2 note c would be revised to clearly specify that the tritium grab samples are to be taken from the ventilation system in use and that not all ventilation systems must be sampled. Section 3.11.2.6 would be revised to correct the Action statements to provide the correct action requirements when the oxygen concentration exceeds 2% in the waste gas holdup system.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed changes would either clarify certain points, make the technical specifications consistent with the regulation, or make them consistent with each other. None of these changes affects any analysis in the FSAR and none of the changes is caused by or would cause a hardware change. Thus, there is no increase in the probability of occurrence or the consequences of any accident previously analyzed. These changes are administrative in nature and do not affect the operating procedures of the plant; therefore, these changes will not create the possibility of a new or different kind of accident from those described in the FSAR. Furthermore, no safety margin will be affected or reduced as a result of these changes.

NRC Project Director: John F. Stolz

Florida Power and Light Company, et al., Docket No. 50-389, St. Lucie Plant, Unit No. 2, St. Lucie County, Florida

Date of amendment request: November 16, 1987

Description of amendment request: The proposed amendment would revise St. Lucie Unit 2 Technical Specifications (TS) Sections 4.7.1.5 and 4.7.1.6, which specify the surveillance requirements for the main steam isolation valves (MSIVs) and main feedwater isolation valves (MFIVs), respectively. The proposed amendment consists of the following changes: (1) it shows the correct value for the MSIV response time, 6.75 seconds, consistent with Section 3/4.3.2 of the TS, and (2) it adopts the wording of the Combustion Engineering Standard Technical Specifications (STS) for the MSIV and the MFIV surveillance frequency requirements.

Basis for proposed no significant hazards consideration determination: The standards used to arrive at a determination that a request for amendment in volves no significant hazards considerations are included in the Commission's regulations, 10 CFR 50.92(c), which states that no significant hazards considerations are involved if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Based on all of the above, the proposed changes do not involve significant hazards considerations because operation of St. Lucie Unit 2 in accordance with the proposed changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The MSIV response time does not affect the probability of an accident previously evaluated, but it does affect the consequences of such an accident. However, since the St. Lucie Unit 2 "stretch" power accident analysis, previously reviewed and accepted by the NRC staff, assumes a 6.75 second MSIV response time, and this value is not being changed by this amendment, the proposed insertion of the correct response time in Section 4.7.1.5 of the TS would not increase the probability or consequences of an accident previously evaluated. Furthermore, since the proposed wording of both surveillance requirements, except for the addition of the definition of response time, is identical to that in the NRC-approved Combustion Engineering STS, with plant-specific response times inserted, the proposed wording would not affect the probability or consequences of an accident previously evaluated.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated. With respect to the MSIV response time limit, the creation of the possibility of a new or different kind of accident from any accident previously evaluated was considered as part of the "stretch" power safety analysis and it was determined that such a possibility was not created with this limit. The requirements on surveillance test types and frequencies remain unchanged in adopting the STS wording. The mode of operation of the MSIVs and MFIVs would not be affected by the proposed changes.

(3) Involve a significant reduction in a margin of safety. The "stretch" power safety analysis assumes an MSIV response time of 6.75 seconds; therefore, this proposed change does not alter the margin of safety with respect to limiting containment peak pressures or positive reactivity effects due to reactor coolant system cooldown during a postulated main steam line break accident. The requirements associated with ASME Boiler and Pressure Vessel Code Article IWV-3410 and applicable addenda are maintained with the proposed wording revisions to Specifications 4.7.1.5 and 4.7.1.6, hence, the margin of safety is not changed.

Therefore, the proposed changes meet the criteria specified in 10 CFR 50.92(c) and, thus, the NRC staff proposes to determine that the proposed license amendment does not involve any significant hazards considerations.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450.

NRC Project Director: Herbert N. Berkow

Indiana and Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendments request: January 16, 1987, as supplemented June 25, 1987 and November 25, 1987.

Description of amendments request: The proposed amendments would revise the Technical Specifications for the emergency diesel generators to improve and maintain reliability (per Generic Letter 84-15 issued July 2, 1984), change a number of related Technical Specifications to improve clarity and correct errors, and revise the emergency battery loads testing to allow simulated connected loads during tests. This application was originally noticed on February 26, 1987 (52 FR 5857) and renoticed on July 29, 1987 (52 FR 28380).

Basis for proposed no significant hazards consideration determination: The Commission's standard for determining whether a significant hazards consideration exists is as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Generic Letter 84-15 on the subject "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability," established new requirements that would reduce the risk of core damage from station blackout events by, among other things, changes to the technical specifications which support a desired diesel generator reliability goal. The licensee proposes to adopt many of the technical specification changes which were determined by the NRR as risk reduction actions. The additional proposal dated June 25, 1987 adds surveillances for water removal, oil sampling and storage tank sampling. The proposal dated November 25, 1987 modifies the fuel oil surveillances and further addresses the tank cleaning requirements. The proposed changes, therefore, should reduce the probabilities and consequences of accidents previously analyzed and should increase the margin of safety. The proposed changes will not place the plant in a new or unanalyzed condition, therefore, the changes will not create a new or different kind of accident from any previously analyzed.

The licensee also proposes to change a number of related Technical Specifications to improve clarity and correct errors. Several changes were made to reflect plant design and to make the two Units' Technical Specification alike. There are also a number of

VOL 52 ISS 250 DEC 30 1987 UMI

editorial changes and error corrections. All of these changes are administrative in nature and do not change the probabilities or consequences of any previously analyzed accidents. The changes reflect plant design similarities and correct errors; therefore, there is no change The corrections and clarifications will not result in a reduction in any margin of safety.

In amendments 86 and 72 for Unit Nos. 1 and 2, respectively, the licensee was granted approval to test the battery capacities with simulated loads using a load bank in place of the actual loads using the static inverters. The surveillance requirement being changed is to determine the condition of the battery; a separate surveillance test is required for determining the performance discharge through actual battery loads. The use of a load bank which simulates actual loads should not affect the test nor would it significantly increase the probabilities or consequences of any previously analyzed accident. While the battery is connected to the load bank during testing, the battery cannot affect other systems or components which are required to be operable. Therefore, the change would not create a new or different kind of accident from any previously analyzed.

The batteries will continue to be capacity tested on the same frequency; only the method of loading the batteries is changed. Since the change will not impact the batteries in the modes when the batteries are required to be operable, the change will not affect the ability of the batteries to perform their safety function. Therefore, the proposed change will not involve a significant reduction in a margin of safety.

On the basis of the above consideration, the staff proposes to find that the changes do not involve a significant hazards consideration.

Local Public Document Room location: Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Kenneth E. Perkins.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: August 31, 1987

Description of amendment request: The proposed license amendment would revise the Duane Arnold Energy Center (DAEC) Facility Operating License No. DPR-49 by revising the Technical Specifications to (1) delete the requirement that emergency diesel generators (EDGs) must be operable before the Standby Gas Treatment and Standby Filter Unit Systems are considered operable, (2) modify the requirement from one year to once per operating cycle for EDG inspections, and (3) add a requirement that certain auxiliary AC power sources and emergency filtration systems be available during core alterations.

This notice relates to item (2) only. The other items will be noticed separately.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards (10 CFR 50.92(c)) for determining whether a significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has provided an analysis of each of the above criteria for the amendment request as follows:

(1) Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Surveillance Requirement 4.8.A.1.e requires that the EDGs be given an annual inspection. The licensee previously requested a license amendment to accommodate an 18-month rather than a 12-month operating cycle for the DAEC. NRC approval was granted by the issuance of License Amendment No. 143. he licensee did not then seek approval to extend the annual EDG inspection to 18 months. The licensee has subsequently reviewed the reliability data on the EDGs, in accordance with Generic Letter 84-15 and Regulatory Guide 1.108, "Periodic Testing of Diesel Generator Units Used as Onsite Electrical Power Systems at Nuclear Power Plants." An engineering review has shown that in three years (January 1984 to June 1987) the "A" EDG (1G-31) has a start reliability of 100% (over 120 successful starts) and a load reliability of 98.6% (1 failure in 75 loading tests). In the same timefram, the "B" EDG (1G-21) has a start reliability of 100% (over 121 successful starts) and a load reliability of 100% (no failures in 78 loading tests). The licensee's proposed extension is consistent with both the Standard Technical Specifications (STSs) Surveillance Requirement and the manufacturer's recommendations.

Because both EDGs have demonstrated a high degree of reliability, extending the inspection interval to 18 months, during shutdown, will not affect their reliability, and therefore, there will be no increase in the probability or consequences of previously evaluated accidents.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

The existing EDG systems, setpoints, or overall plant design will not be changed by extending the EDG surveillances from annually to once per operating cycle; and therefore, this change will not create the possibility of a new or different kind of accident.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

The licensee has conducted an engineering evaluation of EDG reliability data which demonstrates that the EDGs are highly reliable. In addition, the extension is consistent with the STSs and the manufacturer's recommendations. Therefore, there will not be a significant reduction in the margins of safety for the EDGs.

Based on an evaluation of the above licensee analysis, the Commission's staff has made a proposed determination that the requested amendment involves no significant hazards consideration.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S.E., Cedar Rapids, Iowa 52401.

Attorney for licensee: Jack Newman, Esquire, Kathleen H. Shea, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036.

NRC Project Director: Martin J. Virgilio.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: December 1, 1987.

Description of amendment request: The amendment would modify the Technical Specifications to (A) revise the Source Range Monitor (SRM) and Intermediate Range Monitor (IRM) neutron monitoring systems operability requirements to clarify that negative power supply voltage is required in order for the instruments to be operable, (B) delete operability and surveillance requirements for certain post-accident monitoring systems during shutdown and refueling conditions, and (C) revise an incorrect statement regarding the main steamline (MSL) high flow isolation instrumentation setpoint.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of criteria for no significant hazards consideration determination by providing examples of amendments that are considered not likely to involve significant hazards considerations (51 FR 7751). These examples include:

(1) A purely administrative change to Technical Specifications: for example, a change to achieve consistency throughout the Technical Specifications, correction of an error, or a change in nomenclature.

(2) A change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: for example a more stringent surveillance requirement.

(3) A change which either may result in some increase to the probability or consequences of a previously-analyzed accident or reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan (SRP): for example, a change resulting from the application of a small refinement of a previously used calculational model or design method.

Table 3.2.C of the Technical Specifications presently states that an SRM or IRM is inoperable when (a) the mode switch is not in Operate, (b) power supple voltage is low, or (c) circuit boards are not installed. Change A would add an additional statement that the instruments are inoper able when negative supply voltage is lost. This change constitutes an addi tional limitation not presently included and is therefore encompassed by example (2).

Section 3.2.H of the Technical Specifications requires that the minimum number of operable channels for the High Range Noble Gas Monitor on the Elevated Release Point, the Turbine Building Ventilation Exhaust High Range Noble Gas Monitor, the Radwaste/Augmented Radwaste/High Range Noble Gas Monitor, and the Primary containment Gross Radiation Monitor be operable at all times. Change B would revise 3.2.H to suspend these operability requirements during cold shutdown and refueling conditions. Inoperability of the instruments may in some way increase the probability or consequences of a refueling accident, however, the change is consistent with staff guidance and acceptance criteria relating to Post Accident Monitoring Instrumentation contained in Generic Letter 83-36 and Standard Review Plan Section 7.5. The change is therefore encompassed by example (3).

In Amendment 96 to the staff revised the MSL high flow isolation instrument setpoint from 140% of rated flow to 150% of rated flow. Due to oversight, not all pages of the Technical Specifications which specify the setpoint were reissued with the revised value. Change C would correct Page 52 to make it consistent with pages 50 and 84 of Amendment 96. This change corrects and error and is therefore encompassed by example (1).

Since the application for amendment involves proposed changes that are encompassed by examples for which no significant hazards consideration exists, the staff has made a proposed determination that the application involves no significant hazards consideration.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 88305.

NRC Project Director: Jose A. Calvo

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: December 22, 1987

Description of amendment request: The proposed amendment would modify the Technical Specifications to permit use of the Banked Position Withdrawal System (BWPS), as enforced by the Rod Worth Minimizer (RWM), for control of rod patterns between 100% and 50% rod density.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of criteria for no significant hazards consideration determination by providing examples of amendments that are considered not likely to involve significant hazards considerations (51 FR 7751). These examples include: "A change which either may result in some increase to the probability or consequences of a previously-analyzed accident or reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan (SRP): for example, a change resulting from the application of a small refinement of a previously used calculational model or design method.

The proposed amendment would delete the requirement for the rod sequence control system (RSCS) to be operable between 100% and 50% control rod density. With the RSCS inoperable during this period it would be possible to use the BPWS resulting in lower rod worths and elimination of the need to perform a control rod drop accident (CRDA) analysis for each core configuration. The elimination of the CRDA analysis for each reload, and the elimination of RSCS operability requirements between 100% and 50% rod density may result in an increase of the probability or consequences of a CRDA due to reduced control over rod worth. However, the rod worth controls resulting from the proposed amendment are within the acceptance criteria of Section 15.4.1 of the Standard Review Plan which requires stringent controls to preclude the possibility of single operator error or equipment failure resulting in a core configuration such that fuel peak enthalphy could exceed 280 calories per gram during a CRDA. The proposed amendment is thus within the scope of the Commission example cited above.

Since the application for amendment involves proposed changes that are encompassed by an example for which no significant hazards consideration exists, the staff has made a proposed determination that the application involves no significant hazards consideration.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 88305.

Attorney for licensee: Mr. G.D. Watson, Nebraska Public Power District, Post Office Box 499, Columbus, Nebraska 68601.

NRC Project Director: Jose A. Calvo

Northeast Nuclear Energy Company, et al., Docket No. 50-423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of amendment request: November 19, 1987, as supplemented November 24, and December 11, 1987

Description of amendment request: The proposed amendment would revise Technical Specification 4.8.4.1.a.2 to permit surveillance testing of molded case circuit breakers and unitized starters instantaneous trip elements at -25% to +40% of instantaneous trip current range rather than the ±20% value in the present Technical Specifications. These instantaneous trip elements provide overcurrent protection for containment electrical penetrations.

The plant is presently in a scheduled refueling outage. The licensee stated in a submittal dated November 19, 1987, that restart is scheduled for December 17, 1987; however, the licensee informed the staff by telephone on December 4, 1987, and by letter dated December 11, 1987, that the outage would be extended with restart to be sometime in late February 1988.

Basis for proposed no significant hazards consideration determination: In accordance with 10 CFR 50.92, the licensee has reviewed the proposed changes and has concluded that the amendment does not involve a

significant hazards consideration because the change would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed test current values are in accordance with manufacturer's recommendations for field testing of molded case circuit breakers and unitized starters and are within the thermal capability of the containment electrical penetrations. Therefore, the proposed change does not involve an increase in the probability or consequences of an accident previously evaluated.

2. Create the possibility of a new or different kind of accident from any previously evaluated. There is no new failure mode associated with the proposed change. The proposed change does not modify plant response. Therefore, the proposed change does not create the possibility of an accident or malfunction of a different type than any evaluated previously in the safety analysis report.

3. Involve a significant reduction in a margin of safety. The revised test current values remain well within the electrical penetration's thermal limits. There is no significant reduction in the margin of safety for the containment electrical penetrations. The staff has reviewed the licensee's submittal and concurs with its no significant hazards determination.

Local Public Document Room Location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385

NRC Project Director: John F. Stolz

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: October 7, 1987

Description of amendment request: The proposed amendment would revise the Susquehanna Steam Electric Station (SSES) Units 1 and 2 Technical Specifications in response to the Commission's Generic Letter 87-09. The requested changes are as follows:

(1) Section 3.0.4 is to be revised to define that this Specification's provisions will apply in those cases where the affected action statement permits continued operation for an unlimited period of time;

(2) Section 4.0.3 is to be revised to include a 24-hour delay in implementing action requirements due to a missed surveillance for those cases where the action requirements provide a restoration time that is less than 24 hours; and

(3) Section 4.0.4 is to be revised to assure that the provisions of this section do not prevent the plant's passage through or to operational conditions required to comply with action requirements.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and concurs with the following basis and conclusions provided by the licensee in its October 7, 1987 application.

The following three questions are addressed below for each of the proposed Technical Specification changes:

I. Does the proposed changed involve a significant increase in the probability or consequences of an accident previously evaluated?

II. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

III. Does the proposed change involve a significant reduction in a margin of safety?

3.0.4:

I. No. In each case where relief from Operational Condition change restrictions will now be available, it was either available before or it is being proposed in recognition that taking the prescribed remedial action upon entry into a given specified condition as opposed to having already been in that condition is not adverse to safety. This is a valid statement because such relief is only allowed when the prescribed action has no time limits, which signifies that unlimited operation under the action has already been determined by the (Nuclear Regulatory Commission) to be an acceptably safe alternative means of meeting the LCO requirements. Based on the above, the proposed change to Specification 3.0.4 (and the editorial changes to the attached marked-up specifications where the provision of 3.0.4 were previously stated to be not applicable) do not adversely affect the probability or consequences of any previously evaluated accident.

II. No. As stated in I above, the unlimited nature of the actions associated with this proposal ensure a level of safety commensurate with that which is normally required. Therefore these conditions (do not create a possibility of a new or different kind of accident from any previously evaluated and) will not require analysis of potentially new or different accidents.

III. No. Again, the premise upon which these changes are proposed is that the difference in safety margin between taking a timeindependent action upon entry into a given operational condition and taking the same action while in that condition is insignificant.

4.0.3:

I. No. Although it is conceivable under this proposal that additional time could be provided for restoration of inoperable components, this occurs only when the component affected by the missed surveillance is found to be inoperable once the test is actually performed. Therefore, the effect of this change is to only allow entry into action statements when the component is known to be inoperable or when adequate (24 hours) test performance time is provided. This has an insignificant effect on previous analyses because the potential for an untested component to be inoperable is low and because the action (which must be within 24 hours) is entered as soon as the test is failed. Furthermore, very few missed surveillances are anticipated and of these few cases, a smaller number will involve inoperable components.

Based on the above, this change has no significant effect on the probability or consequences of previously analyzed accidents.

II. No. The revised provisions of 4.0.3. modify existing constraints on previously analyzed conditions, as was analyzed in I above. They do not create the possibility for new or different accident scenarios.

III. No. The margin of safety is affected by this change, but the (e)ffect is insignificant at worst and subjectively improved at best for the following reasons:

1. Based on experience, the proposed change will minimize the potential for shutdowns due to the inability to perform a missed surveillance on components that are, in all probability, operable. Therefore, unwarranted plant transients will be avoided and safety is improved.

2. The provision does not provide additional time when the situation does not warrant it. When greater than 24 hours exists, or when the component is known to be operable, the normal action applies.

3. The potential for misinterpretation of the new wording was reviewed, and it is believed that the improved Bases section for the proposed change (as well as the guidance in the Generic Letter, if needed) will mitigate any potential for problems in this area.

4.0.4:

I. No. As stated in Generic Letter 87-09, "It is not the intent of Specification 4.0.4 to prevent passage through or to operational modes to comply with action requirements and it should not apply when mode changes are imposed by "Action Requirements."" Therefore, this change can be interpreted as editorial clarification. Regardless, ensuring that performance of surveillance tests will not be required during shutdowns to comply with actions will reduce the probability of previously analyzed transients and accidents by minimizing activities which could challenge safety systems during a shutdown evolution.

II. No. This change will lessen the probability of known events as described in I above. It has no features which could create the possibility of new or different scenarios.

III. No. As inferred in I above, the margin of safety is improved due to this change by minimizing challenges to safety systems when they are not warranted. Therefore, this clarification cannot adversely affect safe operation.

Based on the above considerations, the Commission proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street NW., Washington, DC 20036

NRC Project Director: Walter R. Butler

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of amendment requests: May 15, 1987 (TS 230)

Description of amendment requests: Tennessee Valley Authority proposes to modify the Browns Ferry Nuclear Plant, Units 1, 2, and 3 Technical Specifications to delete references to a reduced pressure test method for the integrated leakage rate test (ILRT) denoted in Surveillance Requirements 4.7.A.2.a, 4.7.A.2.b, 4.7.A.2.f.1, 4.7.A.2.f.3 and bases section 4.7.A. The reduced pressure test is allowed in accordance with 10 CFR Part 50, Appendix J for periodic integrated leakage rate testing and is based upon a performance test correlation between that of a reduce pressure test (25 psig) and a full pressure test (49.6 psig). As no clear correlation can be established between the measured leakage at reduced pressure and full pressure, the proposed change would delete references to the reduced pressure test and would require a more stringent full pressure test on the periodic containment ILRT.

The proposed change also contains a correction of an error for the leak rate limit of drywell atmosphere to suppression chamber with a one psi differential pressure denoted in Surveillance Requirement 4.7.A.4.d and bases section 4.7.A. The current technical specification limits of 0.38 inch of water per minute pressure change and 0.14 pound per second of containment air are in error and would be changed to 0.25 inch of water per minute pressure and 0.09 pound per second of containment air.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee addressed the above three standards in the amendment application and has determined that the proposed changes: (1) Would not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change to delete the reduced pressure test methods for ILRT will simply remove an option that exists in the current technical specifications. The limiting conditions for operation will continue to be verified by the implementation of a more stringent full pressure test rather than a reduced pressure test. The proposed change to correct the error for the leak rate limit of drywell atmosphere to suppression chamber with a one psi differential pressure would actually reduce the allowable leakage limit and could therefore further mitigate the consequences of an accident. Neither of these changes result in any modifications to the plant or system operation and no safety-related equipment or function would be altered. (2) Would not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change to delete the reduced pressure test method for ILRT and to correct the allowable leak rate limit would actually require more stringent testing requirements and specify more restrictive leakage limits, respectively. In addition, these changes do not result in any modification to the plant design or system operation and would continue to provide the appropriate surveillance testing to demonstrate compliance with 10 CFR Part 50, Appendix J. (3) Would not involve a significant reduction in a margin of safety. The proposed change to delete the reduced pressure test methods for ILRT and to correct the allowable leak rate limit would in fact increase the margin of safety. As stated above, the reduced pressure test would be replaced by the more stringent full pressure test and the allowable leak rate limit would specify more restrictive leakage limits.

In addition, the Commission has provided guidance concerning the application of standards for determining whether a significant hazards consideration exists by providing certain examples (51 FR 7751) of amendments that are considered not likely to involve significant hazards considerations.

One of the examples (ii) of actions not likely to involve a significant hazards consideration relates to changes that constitute additional restrictions or controls not presently included in the Technical Specifications. The proposed changes discussed above actually require more stringent testing requirements or specify more restrictive leakage limits.

The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based on the review and the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

NRC Assistant Director: Gary G. Zech

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of amendment requests: May 20, 1987 (TS 231)

Description of amendment requests: Tennessee Valley Authority proposes to modify the Browns Ferry Nuclear Plant, Unit 1, 2, and 3 Technical Specifications to prevent excessive testing of the diesel generators. The technical specifications currently contain requirements that have been determined by Generic Letter 84-15 to be detrimental to the performance of the onsite emergency electrical power system. Therefore, the proposed changes to the technical specifications would provide the improvements which are recommended by Generic Letter 84-15 to enhance the reliability of the diesel generators and include the following:

1. Delete the requirements for diesel generator testing whenever an emergency core cooling system (ECCS) train becomes inoperable.

2. Change the requirements for testing the diesel generators to allow 24 hours for testing remaining diesels and other equipment in the event of inoperable electrical equipment.

3. Administrative changes to add Table 4.9.A which specifies diesel generator testing frequencies and reliability program.

4. Restrict the requirement for diesel generator fast starts to once per 184 days.

5. Require a log book to record diesel generator starts.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The licensee addressed the above three standards in the amendment application and has determined that the proposed changes: (1) would not involve a significant increase in the probability or consequences of an accident previously evaluated. Reducing the test frequency and modifying the starting requirements to be consistent with the recommendations of Generic Letter 84-15 enhances diesel generator reliability by minimizing severe test conditions that can lead to premature failures. Therefore, the probability of a malfunction of equipment important to safety has not changed since the new surveillance requirements would enhance the reliability and operation of the diesel generators; (2) would not create the possibility of a new or different kind of accident from any accident previously evaluated. The changes affect only the frequency of the starting and the loading practices during testing of the diesel generators. Operation of the diesel generators cannot create a new type of accident; and (3) would not involve a significant reduction in a margin of safety. These proposed testing requirements do not affect the ability of the diesel generators to perform their function but rather enhance the reliability of the diesel generators by revising the testing frequency and starting requirements and, therefore, there is no reduction in safety margins.

The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based on the review and the fact that the diesel generator reliability changes resulted from Generic Letter 84-15, the staff proposes to determine that the requested amendments do not involve a significant hazards consideration.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

NRC Assistant Director: Gary G. Zech

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of amendment requests: June 4, 1987 (TS 233)

Description of amendment requests: Tennessee Valley Authority proposes to modify the Browns Ferry Nuclear Plant, Units 1, 2, and 3 Technical Specifications to impose a limit on reactor operation when nitrogen is not being used to supply the pneumatic control system inside containment.

The proposed amendments would add new technical specification requirements in response to Generic Letter 84-09, Hydrogen Recombiner Capability. The purpose of these technical specifications is to limit the possibility of the pneumatic control system being an oxygen source inside primary containment during reactor power operation and includes the following:

1. Technical specification 3.7.A.5.a would be revised to delete the first phrase which is obsolete.

2. Technical specification 3.7.A.5.c would be renumbered to be technical specification 3.7.A.5.d.

3. A new specification, technical specification 3.7.A.4.c, would be added to limit reactor operation when air, instead of nitrogen, is being used to supply the pneumatic control systems inside the primary containment.

4. A new surveillance requirement would be added as technical specification 4.7.A.5.c to verify that the air supply valve for the pneumatic control system inside the drywell and torus is closed prior to startup and during reactor power operation.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92 (c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The licensee addressed the above three standards in the amendment application and has determined that the proposed changes: (1) would not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed changes to impose a limit on reactor operation when nitrogen is not being used to supply the pneumatic control system inside containment do not change any operational conditions on normal valve alignment and does not affect any safety-related equipment. The consequences of an accident could be reduced since the proposed change would decrease the likelihood of having oxygen concentration exceed four percent in the containment atmosphere after an accident; (2) would not create the possibility of a new or different kind of accident previously evaluated. The changes do not result in any modification to the plant or system operation and no safety-related equipment or functions would be altered. Imposing a limit on reactor operation when nitrogen is not being used to supply the pneumatic control system inside containment reduces the possibility of the containment becoming deinerted in post-accident situations while at the same time allowing for a more orderly shutdown on loss of normal pneumatic supply to motive power for equipment important to safety. The requested changes do not create any new accident modes; and (3) would not involve a significant reduction in a margin of safety. The proposed changes to impose a limit on reactor operation when nitrogen is not being used to supply the pneumatic control system inside containment actually increases the margin of safety since the likelihood of attaining a combustible hydrogen and oxygen mixture in containment has been reduced.

In addition, the Commission has provided guidance concerning the application of standards for determining whether a significant hazards consideration exists by providing certain examples (51 FR 7751) of amendments that are considered not likely to involve significant hazards considerations. One of the examples (ii) of actions not likely to involve a significant hazards consideration relates to a change that consitutes an additional limitation, restriction, or control not presently included in the technical specifications. The proposed change provides additional limitations and improvements in response to Generic Letter 84-09 to preclude the likelihood of attaining a combustible hydrogen and oxygen mixture in containment.

Another example (i) of actions not likely to involve a significant hazards consideration relates to changes which are purely administrative. For example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. The proposed change in Technical Specification 3.7.A.5.a to delete the phrase "After completion of the fire-related startup retesting program, containment atmosphere shall be..." is purely administrative and removes extraneous information. The retesting program has been completed and the requirement is effective.

The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based on the review and the fact that the additional limitations were in response to Generic Letter 84-09, the staff proposes to determine that the requested amendments do not involve a significant hazards consideration.

Local Public Document Room location: Athens Public Library, South Street, Athens, Alabama 35611.

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

NRC Assistant Director: Gary G. Zech

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of amendment requests: August 5, 1987 (TS 87-27)

Description of amendment requests: The proposed change would revise surveillance requirement 4.5.2.d.1 by changing the reactor coolant system (RCS) pressure from 750 psig to 700 psig for the purpose of verifying automatic isolation of the residual heat removal (RHR) system.

Basis for proposed no significant hazards consideration determination: The Commission has provided Standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). 10 CFR 50.91 requires that at the time a licensee requests an amendment, it must provide to the Commission its analyses, using the standards in Section 50.92, on the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the licensee has performed and provided the following analysis:

The Sequoyah Nuclear Plant (SQN) design criteria for the RHR System valves requires the suction valves from the RCS to automatically close at an RCS pressure of 700 psig. The Final Safety Analysis Report (FSAR) and current testing practice also agree with the design criteria. The proposed change simply makes the technical specifications consistent with the design criteria, the FSAR, and current instrument setpoint.

1. Is the probability of an occurrence or the consequences of an accident previously evaluated in the safety analysis report significantly increased?

No. The suction isolation valves from the RCS are interlocked for automatic closure at an RCS pressure of 700 psig. This function is to protect the system from overpressurization. The proposed change only revises the technical specifications to be consistent with the design criteria and the FSAR.

2. Is the possibility for an accident of a new or different type than evaluated previously in the safety analysis report created?

No. The capability for RHR system isolation has not been changed. The proposed change simply makes the technical specifications consistent with the design and as-built configuration of the plant. No hardware changes or changes in testing requirements have been made.

3. Is the margin of safety significantly reduced?

No. The proposed change is editorial in nature and does not effect changes to plant equipment, operating setpoints or limits, or operating procedures. Therefore, the margin of safety has not been reduced.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendments involves no significant hazards considerations.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402.

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

NRC Assistant Director: Gary G. Zech

Union Electric Company, Docket No. 50-483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of amendment request: December 15, 1987.

Description of amendment request: The proposed amendment would revise Technical Specification Figure 6.2-1, Figure 6.6-2 and Section 6.5.1 to reflect nuclear function organizational changes associated with the establishment of the positions of Manager, Licensing and Fuels, and Assistant Manager, Work Control and the elimination of the Assistant Manager, Support Services position and the resulting changes in the operating organization, engineering organization and On-Site Review Committee.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The licensee has provided the following analysis of no significant hazards considerations using the Commission's standards.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. This is based on the fact that the organization changes improve the interdepartmental responsiveness and efficiency by providing better coordination and communication. The changes do not

reduce the overall experience base nor reduce commitments to minimum qualifications.

The proposed amendment does not create the possibility of a new or different kind of accident than previously evaluated because the proposed change is administrative in nature, and no physical alterations of plant configuration or changes to setpoints or operating parameters are proposed.

The proposed amendment does not involve significant reduction in a margin of safety. Through Union Electric's strong Quality Assurance programs and its commitment to maintain only qualified personnel in positions of responsibility, it is assured that safety functions performed by the On-Site and the Corporate organizations will continue to be performed at a high level of competence.

Based on the previous discussions, the licensee concluded that the proposed amendment request does not involve a significant increase in the probability or consequences of an accident previously evaluated; does not create the possibility of a new or different kind of accident from any accident previously evaluated; or does not involve a reduction in the required margin of safety. The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. The staff, therefore, proposes to determine that the licensee's request does not involve a significant hazards consideration.

Local Public Document Room location: Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251 and the John M. Olin Library, Washington University, Skinker and Lindell Boulevards, St. Louis, Missouri 63130.

NRC Project Director: Kenneth E. Perkins.

Virginia Electric and Power Company, Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and No. 2 (NA-1&2), Louisa County, Virginia

Date of amendment request: December 4, 1987

Description of amendment request: The proposed change would implement more stringent primary-to-secondary coolant system leakage limits and establish surveillance requirements to assure operability of the existing and new N-16 instrumentation used to assure compliance with the revised leakage limits. The more stringent leakage limits and increased instrumentation requirements were put in place for both NA-1&2 by the licensee's Standing Order No. 155 following the Steam Generator (SG) tube rupture event at NA-1 on July 15, 1987. The failure mechanism was determined to be fatigue induced by limited displacement fluidelastic instability. A number of corrective actions were taken in both NA-1&2 to minimize the probability of recurrence. These measures included installation of downcomer flow resistance plates to reduce the source of loads associated with the fatigue mechanism in the U-bend area and the preventive plugging of potentially susceptible tubes. Even though these measures are considered to be very conservative and highly effective in reducing the probability of fatigue-induced tube rupture, enhanced leakage monitoring and more conservative leakage limits were also established. In the low probability event that the downcomer modification and preventive plugging are unsuccessful in preventing occurrence of a similar fatigue failure, the enhanced monitoring system should provide sufficient notification to permit orderly shutdown prior to a tube rupture. The specific changes are described below.

Bases 3/4.4.5 and 3/4.4.6

The Bases would be revised to include a discussion of the bases for the new leakage limits. Bases 3/4.4.5, Steam Generators, would include the discussion that, under certain conditions, the SG may produce limited displacement fluidelastic instability in the tube bundle that may result in fatigue failure of a tube. Modifications have been accomplished in all SGs consisting of installation of downcomer resistance plates and preventive plugging of potentially susceptible tubes. Even though these measures are considered to have been conservative and highly effective in reducing the probability of fatigue-induced tube rupture, enhanced leakage monitoring and more stringent leak rate limits have been established. Leakage is now limited to 100 gallons per day (gpd) (rather than 500 gpd) per SG when operating at greater than 50% power. Cyclic life analysis of fatigue-induced tube cracks has shown that, assuming a post-modification maximum stress amplitude of 7 ksi, a leak rate of up to 500 gpd would be reached some 90 minutes prior to tube rupture. Therefore, the 100 gpd leak rate limit is bounding since: (a) the 100 gpd limit would be detected well in advance of reaching 500 gpd; (b) the time required for leak rate detection and power reduction to less than 50% is expected to be less than 90 minutes; and (c) the maximum stress amplitude is anticipated to lie in the 5 ksi range, which would allow for much earlier leak-before-break warning than would occur in the assumed 7 ksi case.

These assumptions also include an appropriate allowance for measurement uncertainty. (References: Virginia Electric and Power Co., "North Anna Unit 1, July 15, 1987 Steam Generator Tube Rupture Event Report, Revision 1, September 15, 1987," and Westinghouse WCAP-11601, "North Anna Unit 1 Steam Generator Tube Rupture and Remedial Actions Technical Evaluation, September 1987").

Bases 3.4.4.6.2, Operational Leakage, would include a discussion that when operating at greater than 50% power, more stringent primary-to-secondary leakage limits of 300 gpd total from all three SGs and 100 gpd from an individual SG would be imposed. These limits ensure that in the event that a fatigue-induced crack were to occur in one or more generators, the resulting leak would be detected in sufficient time to conduct an orderly shutdown prior to catastrophic tube failure. The limits on an increase in leakage of 60 gpd between surveillance intervals and for an increasing trend indicating that 100 gpd would be exceeded within 90 minutes ensure that, in the event of fatigue crack initiation, power can be reduced to a level below which propagation will not occur. In the latter case, the limit also provides for orderly shutdown, since the 100 gpd limit is being approached. These leakage rates are conservative with regard to dosage contribution in that they are less than the previously analyzed total amount of 1 gallon per minute (gpm) and 500 gpd for any single SG.

Specification 3.4.6.2

The Limiting Condition for Operation (LCO) specifying primary-to-secondary SG leakage limits would be footnoted to refer to Specification 3.4.6.3 when operating at greater than 50% power. The purpose of this change is to impose more stringent leakage limits when operating at greater than 50% power as explained in Bases 3/4.4.6.2, Operational Leakage, and as discussed above.

Specification 3.4.6.3

A new LCO and action would be added which imposes more stringent leakage limits and trends when operating at greater than 50% power. The purpose of these more stringent limits is to provide sufficient notification of leakage to permit orderly shutdown prior to potential tube rupture. The more stringent primary-to-secondary leakage limits would specify: (a) total leakage from all SGs to be 300 gpd; (b) leakage from an individual SG to be 100 gpd; (c) total leakage increase of 60 gpd between surveillance intervals; and (d) an increasing trend based on the latest surveillance that indicates 100 gpd would not be exceeded on an individual SG within 90 minutes. Once the LCO would be exceeded, the corresponding action must be followed to completion as specified below:

(a) If the total leakage limit from all SGs or the leakage limit from any individual SG is exceeded, be in hot standby within the next 6 hours and cold shutdown within the following 30 hours.

(b) If the increase in total leakage from all SGs exceeds 60 gpd between surveillance intervals, reduce power below 50% rated thermal power within 90 minutes.

(c) If an increasing trend indicates that the limit of 100 gpd per SG is going to be exceeded within 90 minutes, reduce power to below 50% rated thermal power within 90 minutes, be in hot standby within the next 6 hours and cold shutdown within the following 30 hours.

Specification 4.4.6.3

New surveillance requirements would be added to assure that the more stringent leakage limits described above (Specification 3.4.6.3) are properly monitored and trended. Primary-to-secondary leakage would be demonstrated to be within each of the limits specified in 3.4.6.3 by stating:

(a) Primary-to-secondary leakage would be recorded and trended at least every 4 hours from each operable N-16 continuous readout and alarm radiation monitoring system and the condenser air ejector exhaust continuous readout and alarm radiation monitor.

(b) Primary-to-secondary leakage would be determined from a condenser air ejector grab sample at least every 24 hours.

(c) Primary-to-secondary leakage would be determined from SG and reactor coolant liquid samples at least every 72 hours.

(d) If the above surveillance operations cannot be performed as specified, the LCO and associated action statements of Specification 3.4.6.4 (described below) would apply.

Specification 3.4.6.4

A new LCO and action would be added which defines operability of the primary-to-secondary leakage detection systems when operating at greater than 50% power. The purpose of this specification is to assure adequate capability for monitoring and trending of leakage in order to comply with the limits of Specification 3.4.6.3 as discussed above. Operability would be defined as: (a) one of the two N-16 radiation monitoring systems (either the N-16 continuous readout and alarm radiation monitors on each steam line, or the N-16 continuous readout and alarm radiation monitor on the main steam header); (b) the condenser air ejector exhaust continuous readout and alarm radiation monitor; (c) the capability to obtain and analyze a condenser air ejector exhaust grab sample; and (d) the capability to obtain and analyze a liquid sample from each SG and from the RCS.

The corresponding actions for the LCOs stated above for Mode 1 at greater than 50% power would specify:

(a) If both the N-16 radiation monitoring system on each steam line and the N-16 radiation monitoring system on the main steam header are inoperable, increase the frequency of the condenser air ejector grab sample required by Specification 4.4.6.3b to at least once every 4 hours and return at least one of the systems to operation within 7 days or reduce power to less than 50% within the next 4 hours.

(b) If the condenser air ejector exhaust continuous readout and alarm radiation monitor is inoperable, provided at least one of the N-16 monitoring systems is operable, increase the frequency of the condenser air ejector grab sample required by Specification 4.4.6.3b to at least once every 4 hours and return the system to operation within 7 days or reduce power to less than 50% within the next 4 hours.

(c) If the capability to obtain and analyze a condenser air ejector grab sample is lost, provided at least one of the N-16 monitoring systems is operable and the condenser air ejector exhaust continuous readout and alarm radiation monitor is operable, restore the capability within 7 days or reduce power to less than 50% within 4 hours.

(d) If both N-16 monitoring systems are inoperable and either the condenser air ejector exhaust continuous readout and alarm radiation monitor is inoperable or the capability to obtain and analyze a condenser air ejector exhaust grab sample is lost, reduce power to less than 50% within the next 90 minutes.

(e) If the condenser air ejector exhaust continuous readout and alarm radiation monitor is inoperable and the capability to obtain and analyze a condenser air ejector exhaust grab sample is lost, reduce power to less than 50% within the next 90 minutes.

(f) If the capability to obtain and analyze a liquid sample from each SG and the RCS is lost, increase the frequency of performance of the RCS water inventory balance in TS 4.4.6.2.1d to once every 24 hours.

Specification 4.6.6.4

A new surveillance requirement would be added to assure operability of the detection systems addressed in Specification 3.4.6.4 (discussed above). The N-16 monitors and air ejector exhaust radiation monitoring instrumentation channels would be demonstrated operable by the performance of the channel check, channel calibration and channel functional test during the modes and at the frequencies shown in Tables 4.4-2a and 4.3-14 for NA-1 and Tables 4.4-2a and 4.3-13 for NA-2. Table 4.4-2a has been added to address the surveillance requirements for the newly installed N-16 radiation monitors.

Table 3.3-14 (NA-1) and Table 3.3-13 (NA-2)

The action statement in Tables 3.3-14 and 3.3-13 would be revised to require more frequent sampling of the air ejector exhaust (every 4 hours instead of 12 hours) when the condenser air ejector system gross activity monitoring system is inoperable.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples (51 FR 7741). Example (ii) states that a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: for example, a more stringent surveillance requirement, is explicitly considered not likely to involve significant hazards. The proposed changes create more stringent primary-to-secondary leakage limits and increased surveillance requirements. Accordingly, the Commission proposes to determine the changes involve no significant hazards considerations.

Local Public Document Room location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Herbert N. Berkow

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendments request: October 13, 1987.

Description of amendments request: Technical Specification 15.5.3.A.8 specifies limits on the mass of enriched fissionable material which may be used in the core, or available on the plant

VOL 52 ISS 250 DEC 30 1987 UMI

VOL 52 ISS 250 DEC 30 1987 UMI

site, in the form of fabricated neutron flux detectors. The proposed amendments would delete Technical Specification 15.5.3.A.8. The licensee states that failure to delete this specification on a previous amendment was an oversight. Specifically, on March 17, 1976, the Commission issued Amendment 15 to DPR-24 and Amendment 20 to DPR-27. Those amendments revised Paragraph 2.C of the Operating Licenses to permit the licensee to receive, possess and use at any time any source and special nuclear materials as fission detectors in the amounts as required. Continuing to specify a limiting quantity of fissionable material in the form of fabricated neutron flux detectors in Technical Specification 15.5.3.A.8 is inconsistent with Amendments 15 and 20.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The licensee has examined the proposed Technical Specification change request with respect to the criteria of 10 CFR 50.92 and has determined that the proposed amendments would not result in a significant hazards consideration. The licensee used the following to reach this determination:

The first criterion concerns changes involving a significant increase in the probability or consequences of an accident previously evaluated. This change request is a deletion of a requirement which is consistent with Commission guidance and provisions of the operating licenses. As no physical plant alterations result from this change, and requirements are not relaxed, there can be no change in the probability or consequences of an accident previously evaluated. The second criterion involves creating the possibility of a new or different kind of accident from any accident previously evaluated. Again, as stated above, since no physical change has been made, nor has any requirement been relaxed, this possibility is precluded. The third criterion concerns a significant reduction in a margin of safety. Margin of safety is not reduced by this deletion as Operating License Paragraph 2.C has been, and will continue to be, the condition to which we conform.

The staff has reviewed the licensee's no significant hazards consideration and agrees with the licensee's analysis. The staff, therefore, proposes to determine that the licensee's request does not involve a significant hazards consideration.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this biweekly notice. They are repeated here because the biweekly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: October 27, 1987

Description of amendment request: The amendment would revise the Millstone Unit No. 1 Technical Specifications to reflect the deletion of the low reactor pressure permissive switches from the emergency core cooling system pump start logic during the 1987 refueling outage. The removal of the low reactor pressure permissive switches from the ECCS pump start logic results in the sending of a start signal to the ECCS pumps upon indication of either high drywell pressure or low-low reactor water level. Previously, low-low reactor water level alone would not have initiated the ECCS pumps without the presence of a low reactor pressure signal. The changes are conservative in that given a low-low reactor water level condition, a start signal to the ECCS pumps will not be bypassed/delayed while waiting for receipt of indication of low reactor pressure.

Date of publication of individual notice in **Federal Register**: November 13, 1987 (52 FR 43694).

Expiration date of individual notice: December 14, 1987.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Cleveland Electric Illuminating Company, Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, Toledo Edison Company, Docket No. 50-440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of application for amendment: September 22, 1987

Brief description of amendment: The amendment made various changes to the organization charts, Figures 6.2.1-1 and 6.2.2-1 of the Technical Specifications, to revise titles and delete non-key positions.

Date of issuance: December 11, 1987

Effective date: December 11, 1987

Amendment No. 9

Facility Operating License No. NPF-58. This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 22, 1987 (52 FR 39576). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 11, 1987.

Date of Application for amendments: September 30, 1987, supplemented October 30, 1987

Brief description of amendments: These amendments revise the Technical Specifications to allow deletion of the reactor trip on turbine trip below 30 percent power.

Date of issuance: December 8, 1987

Effective date: December 8, 1987

Amendment Nos.: 13 for Byron, 3 for Braidwood

Facility Operating License Nos. NPF-37, NPF-66 and NPF-72. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1987 (52 FR 42359) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 8, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101; and Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, La Salle County Station Unit Nos. 1 and 2, La Salle County, Illinois

Date of application for amendments: June 16, 1987

Brief description of amendments: The amendments revise the La Salle County Station, Units 1 and 2 Operating Licenses to permit the fuel pool of each unit to receive and store spent fuel from either unit.

Date of issuance: December 8, 1987

Effective date: Thirty-days following date of issuance.

Amendment Nos.: 52 and 34

Facility Operating License Nos. NPF-11 and NPF-18. Amendments revised the license.

Date of initial notice in **Federal Register:** August 26, 1987 (52 FR 32196). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 8, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, La Salle County Station Unit Nos. 1 and 2, La Salle County, Illinois

Date of application for amendments: June 16, 1987

Brief description of amendments: The amendments revise the La Salle County Station, Units 1 and 2 Operating Licenses to permit the fuel pool of each unit to receive and store spent fuel from either unit.

Date of issuance: December 8, 1987

Effective date: Thirty-days following date of issuance.

Amendment Nos.: 52 and 34

Facility Operating License Nos. NPF-11 and NPF-18. Amendments revised the license.

Date of initial notice in **Federal Register:** August 26, 1987 (52 FR 32196). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 8, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of application for amendment: January 28, 1987, as superseded May 26, 1987

Brief description of amendment: This amendment revised the Fermi-2 Facility Operating License No. NPF-43, License Condition 2.C.(10), to: (1) incorporate the requirement for periodic gap checks of the Emergency Diesel Generator (EDG) engine main bearings; and (2) delete the requirement for the disassembly and removal of engine oil filters and substitute the requirement for the monthly analysis of EDG engine lube oil samples. The inspections and analyses required by the revised license condition will supplement the action and surveillance requirements pertaining to the EDG in Section 3/4.8.1 of the Fermi-2 Plant Technical Specifications.

Date of Issuance: December 16, 1987

Effective Date: December 16, 1987

Amendment No.: 12

Facility Operating License No. NPF-43: Amendment revised the license.

Date of initial notice in **Federal Register:** July 1, 1987 (52 FR 24547) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 16, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: October 14, 1987, and supplemented November 18, 1987

Brief description of amendments: The amendments modified the Technical Specifications to increase the limit placed on the amount of time the 4-inch Containment Air Release and Addition system valves may be open from 2000 hours per calendar year to 3000.

Date of issuance: December 11, 1987

Effective date: December 11, 1987

Amendment Nos.: 36 and 28

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1986 (52 FR 42360) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 11, 1987

No significant hazards consideration comments received: No

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: March 7, 1986, as supplemented June 12 and July 1, 1987

Brief description of amendments: The amendments modified the Technical Specifications primarily to eliminate typographical errors, provide additional clarification and improve consistency.

Date of issuance: December 14, 1987

Effective date: December 14, 1987

Amendment Nos.: 37 and 29

Facility Operating License Nos. NPF-35 and NPF-52. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 27, 1986 (51 FR 30585) The June 12 and July 1, 1987 supplements did not significantly alter the substance of the changes noticed in the **Federal Register** on August 27, 1986, and did not affect the proposed no significant hazards consideration determination. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 14, 1987

No significant hazards consideration comments received: No

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

No significant hazards consideration comments received: No

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Duke Power Company, Docket Nos. 50-269, 50-270, and 50-287, Oconee Nuclear Station, Units 1, 2, and 3, Oconee County, South Carolina

Date of application for amendments: August 13, 1986, as supplemented May 14, 1987

Brief description of amendments: The amendments modified the Technical Specifications to raise the reactor protection system high reactor coolant system pressure trip setpoint from 2300 psig to 2355 psig.

Date of Issuance: December 7, 1987

Effective date: December 7, 1987

Amendment Nos.: 164, 164, and 161

Facility Operating Licenses Nos. DPR-38, DPR-47, and DPR-55. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 26, 1987 (52 FR 5853) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 7, 1987

No significant hazards consideration comments received: No

Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina 29691

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2, and 3, Oconee County, South Carolina

Date of application for amendments: August 15, 1985

Brief description of amendments: The amendments revise the TSs to correct typographical errors in several sections; correct a section title in the Table of Contents; address a change in nomenclature; update Final Safety Analysis Report (FSAR) references; delete out-of-date footnotes; delete an unnecessary section; change wording for clarification; and also, update organizational charts that appear in the TSs. Proposed revisions to TS page 6.1-5 are denied because the licensee did not provide any technical justification or no significant hazards consideration determination.

Date of Issuance: December 11, 1987

Effective date: December 11, 1987

Amendment Nos.: 165, 165, and 162

Facility Operating License Nos. DPR-38, DPR-47, and DPR-55. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 23, 1985 (50 FR 43025) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 11, 1987

No significant hazards consideration comments received: No

Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina 29691

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of application for amendment: February 24, 1987

Brief description of amendment: The amendment, which is a partial response to the above submittal, changes the Technical Specifications for Beaver Valley Unit No. 1 to incorporate a number of changes in the areas of instrumentation and administrative controls.

Date of issuance: December 7, 1987

Effective date: December 7, 1987

Amendment No. 120

Facility Operating License No. DPR-66. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** May 6, 1987 (52 FR 16844) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 7, 1987

No significant hazards consideration comments received: No

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001

Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of application for amendment: May 20, 1987

Brief description of amendment: This amendment reflects the installation of a dedicated emergency feedwater (EFW) tank which will serve as the primary source of water for the emergency feedwater system, and updates the Bases to reflect the installation of the dedicated emergency feedwater tank and the analysis clarifications which are based on improved understanding of the length of time and amount of feedwater required for cooldown following a postulated loss of offsite power.

Date of issuance: December 14, 1987

Effective date: December 14, 1987

Amendment No.: 102

Facility Operating License No. DPR-72. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 12, 1987 (52 FR 29916) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 14, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Crystal River Public Library, 668 NW. First Avenue, Crystal River, Florida 32629

Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of application for amendment: April 15, 1987, as supplemented July 17, 1987, September 16, 1987, and October 27, 1987.

Brief description of amendment: This amendment provides revised Technical Specifications (TS) to support operation of Crystal River Unit 3 for Fuel Cycle 7.

Date of issuance: December 14, 1987

Effective date: December 14, 1987

Amendment No.: 103

Facility Operating License No. DPR-72. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1987 (52 FR 43261) The October 27, 1987 letter provided supplemental information which did not alter the staff's initial determination of no significant hazards consideration published in the **Federal Register.** The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 14, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Crystal River Public Library, 668 NW. First Avenue, Crystal River, Florida 32629

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-321 and 50-366, Edwin I. Hatch Nuclear Plant, Units 1 and 2, Appling County, Georgia

Date of application for amendments: February 13, 1987

Brief description of amendments: The amendments modify the Technical Specifications to incorporate the revised reporting requirements of 10 CFR 50.72 and 50.73 and the revised reporting requirements for primary coolant iodine spiking and remove existing requirements for plant shutdown if primary coolant iodine activity limits are exceeded for 800 hours within a 12-month period.

Date of issuance: December 1, 1987

Effective date: December 1, 1987

Amendment Nos.: 149 and 86

Facility Operating License Nos. DPR-57 and NPF-5. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 15, 1987 (52 FR 26587) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 1, 1987

No significant hazards consideration comments received: No

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: June 18, 1987 as supplemented July 31, 1987 and revised October 8, 1987.

Brief description of amendment: The amendment revised Section 6.0, Administrative Controls, of the Technical Specifications. The changes include revisions to the River Bend Nuclear Group Organization, the River Bend Station Organization, and the composition of both the Facility Review Committee and the Nuclear Review Board. In addition, the Technical Specifications have been changed to meet the Commission Policy Statement on Engineering Expertise on Shift.

Date of issuance: December 9, 1987.

Effective date: December 9, 1987.

Amendment No.: 17

Facility Operating License No. NPF-47. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 9, 1987 (52 FR 34007). The licensee's October 8, 1987 submittal provided organizational figures which originally had been proposed be deleted, clarified the organizational changes and the qualifications of the shift technical advisor, and increased the membership of the Nuclear Review Board to 12 from the 11 proposed originally. This submittal did not alter the NRC staff's determination of no significant hazards as published in the **Federal Register.** The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 9, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Indiana and Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: May 19, 1986 as revised July 16, 1987

Brief description of amendments: The amendments revised the Technical Specifications by adding requirements for the containment sump level and flow monitoring system for both units and by correcting a duplication of surveillance requirements on the reactor coolant leakage detection system for Unit 1.

Date of issuance: December 10, 1987

Effective date: December 10, 1987

Amendment Nos.: 112 and 95.

Facility Operating License Nos. DPR-58 and DPR-74. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 26, 1987 (52 FR 32203) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 10, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085

Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of application for amendment: October 9, 1987

Brief description of amendment: The amendment adds two maximum planar linear heat generation rate (MAPLHGR) curves for two new types of fuel assemblies being loaded into the core for fuel cycle 3 and remove one MAPLHGR curve for a type fuel assembly being unloaded. In addition, the average planar exposure limit is increased from 25,000 megawatt days per short ton (MWD/ST) to 28,500 MWD/ST. Administrative changes were made to reflect the new fuel types and to correct an error in one figure.

Date of issuance: December 15, 1987

Effective date: December 15, 1987

Amendment No. 39

Facility Operating License No. NPF-29. This amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** November 4, 1987 (52 FR 42365) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 15, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154

Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Dates of application for amendment: July 31, 1987, September 10, 1987 and December 11, 1987.

Brief description of amendment: This amendment changes Technical Specifications Section 6, "Administrative Controls," to reflect changes in the offsite organization in several areas. Changes in the quality assurance organization provide a two-manager system that more clearly separates the in-line quality control functions of inspection and deficiency control from the independent quality assurance functions of audits, implementation observations and assessments. Changes in the projects organization provide a more equal distribution of workload and a more effective management chain. Changes in the administrative support area

consolidate support functions of word processing and other office support services within a new Support Services group that is not included in the Technical Specifications. Other changes involve title changes to more accurately reflect present responsibilities.

Date of issuance: December 15, 1987
Effective date: December 15, 1987
Amendment No. 40
Facility Operating License No. NPF-29. This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 9, 1987 (52FR 34013) and October 7, 1987 (52FR 37548) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 15, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of application for amendment: June 22, 1987.

Brief description of amendment: The amendment changed Sections 3.4 and 4.4 of the Technical Specifications in order to accomplish the purpose of 10 CFR Part 50, Section 50.62(c)(4), related to the standby liquid control system (SLCS). A related exemption was also issued at the same time.

Date of issuance: December 11, 1987
Effective date: December 11, 1987
Amendment No.: 56.
Facility Operating License No. DPR-22. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 29, 1987 (52 FR 28369 at 28381) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 11, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Minneapolis Public Library, Technology and Science Department, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Pacific Gas and Electric Company, Docket Nos. 50-275 and 50-323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of application for amendments: June 10, 1986, as supplemented December 1, 1986.

Brief description of amendments: The amendments add the laundry and solid waste storage facility to Figure 5.1-3 of the Technical Specifications to identify this facility as a routine radioactive gaseous release point.

Date of Issuance: December 16, 1987
Effective date: December 16, 1987
Amendment Nos: 24 and 23
Facility Operating Licenses Nos. DPR-80 and DPR-82: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** April 22, 1987 (52 FR 13342) The letter of December 1, 1986 provided supplemental information which did not change the initial proposed determination of no significant hazards consideration. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 16, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: California Polytechnic State University Library, Government Documents and Maps Department, San Luis Obispo, California 93407

Pacific Gas and Electric Company, Docket Nos. 50-275 and 50-323, Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2, San Luis Obispo County, California

Date of application for amendments: May 14, 1987, as supplemented September 10, 1987.

Brief description of amendments: The amendments change the control sample (background) location for radioactivity sampling in fish from a location one-quarter of a mile from Diablo Cove to a new location three miles to the South of Diablo Cove. The amendments also correct a typographical error found in the environmental sampling program table.

Date of Issuance: December 16, 1987
Effective date: December 16, 1987
Amendment Nos: 25 and 24
Facility Operating Licenses Nos. DPR-80 and DPR-82: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 12, 1987 (52 FR 29927). The September 10, 1987 letter provided supplemental information which clarified the reason for the change in location of the fish sampling. The clarification did not change the initial proposed determination of no significant hazards consideration nor the subject of the amendment described in the August **Federal Register** notice. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 16, 1987

No significant hazards consideration comments received: No

Wolf Creek Nuclear Operating Corporation, Kansas Gas and Electric Company, Kansas City Power & Light Company, Kansas Electric Power Cooperative, Inc., Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: May 14, 1987 and a supplement dated August 31, 1987.

Brief description of amendment: The amendment revises Wolf Creek Generating Station (WCGS) Technical Specification Section 6.5.2 to replace the table of qualified personnel who are designated as members of the Nuclear Safety Review Committee (NSRC). This table will consist of eight members, including the Chairman, from Wolf Creek Nuclear Operating Corporation (WCNOW) organization or from outside organizations. These members shall meet or exceed the requirements of ANSI/ANS 3.3-1981. A specific list of NSRC members similar to Technical Specification Section 6.5.2.2 will be maintained in a WCNOC procedure.

Date of issuance: December 10, 1987
Effective date: December 10, 1987
Amendment No.: 14

Facility Operating License No. NPF-42. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 3, 1987 (52 FR 20806) he licensee's August 31, 1987 supplement clarified the May 14, 1987 application to indicate that the NSRC members would meet the requirements of the 1981 revision of ANSI/ANS 3.3 rather than an earlier version. This additional clarification is acceptable to the staff and does not alter the NRC staff's conclusion regarding a no significant hazards consideration, nor does it change the subject of the amendment as previously described in the **Federal Register.** The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 10, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Emporia State University, William Allen White Library, 1200 Commercial Street, Emporia, Kansas 66801 and Washburn University School of Law Library, Topeka Kansas.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communi-cation for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may

provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By January 29, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Project Director):* petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Florida Power Corporation, et al., Docket No. 50-302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of application for amendment: April 15, 1987

Brief description of amendment: This amendment (1) changes the current Technical Specification (TS) Section 4.5.1.d by deleting the requirement to verify each core flooding tank isolation valve closed alarm by an actuation test and replacing it with a requirement to perform a channel calibration of each alarm; and (2) adds to TS Bases 3/4.5.1 a description of the actuation of the core flooding tank isolation valve closed alarm.

Date of issuance: December 14, 1987

Effective date: December 14, 1987

Amendment No.: 101

Facility Operating License No. DPR-72. Amendment revised the Technical Specifications. Public comments requested as to proposed no significant hazards consideration: Yes. A notice requesting public comments and opportunity for a hearing was published in the **Federal Register** on November 25, 1987 (52 FR 45260). Comments or request for a hearing received: No. The notice published on November 25, 1987 allowed the public 15 days to comment and until December 10, 1987 to file a petition for leave to intervene on the proposed amendment. The public should have been allowed 30 days to file a petition. This notice, which will be published in the **Federal Register** as part of the Biweekly Sholly Report on December 30, 1987, correctly provides a 30 day period for the public to file a petition for leave to intervene with respect to this amendment. The Commission's related evaluation of the amendment, consultation with the State and final determination of no significant hazards consideration is contained in a Safety Evaluation dated December 14, 1987.

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20037

Local Public Document Room Location: Crystal River Public Library, 668 NW. First Avenue, Crystal River, Florida 32629

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area No. 2300]

Arkansas; Declaration of Disaster Loan Area

As a result of the President's major disaster declaration on December 17, 1987, I find that Crittenden County in the State of Arkansas constitutes a disaster area because of damage from tornadoes which occurred on December 14, 1987. Eligible persons, firms, and organizations may file applications for physical damage until the close of business on February 16, 1988, and for economic injury until the close of business on September 19, 1988, at:

Disaster Area 3 Office, Small Business Administration, 2306 Oak Lane, Suite 110, Grand Prairie, Texas 75051.

or other locally announced locations.

The interest rates are:

	Percent
Homeowners with credit available elsewhere	8.000
Homeowners without credit available elsewhere	4.000
Businesses with credit available elsewhere	8.000
Businesses without credit available elsewhere	4.000
Businesses (EIDL) without credit available elsewhere	4.000
Other (non-profit) organizations including charitable and religious organizations)	9.000

The number assigned to this disaster is 230012 for physical damage and for economic injury the number is 658300.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008)

Date: December 21, 1987.

Bernard Kulik,

Deputy Associate Administrator for Disaster Assistance.

DEPARTMENT OF STATE

Advisory Committee on International Intellectual Property; Meeting

The International Copyright Panel of the Department of State's Advisory Committee on International Intellectual Property will meet in open session on Tuesday, January 26, 1988, in Room 1107 of the Department of State. The meeting will begin at 10:00 a.m. and will conclude at 1:00 p.m.

The meeting will be open to the general public. This meeting of the International Copyright Panel is being convened to present reports on major international copyright developments in 1987 and to obtain private sector views on certain upcoming events in 1988.

The public attending may, as time permits and subject to the instructions of the Chairperson, participate in the discussions or may submit their views in writing to the chairperson prior to, or at the meeting, for later consideration by the Committee.

Members of the public who plan to attend the meeting will be admitted up to the limits of the conference room's capacity. Members of the general public who plan to attend the meeting are requested to provide their name, affiliation, address and phone number to Ms. Bobbi Tinsley, Office of Business Practices, Department of State, telephone (202) 647-1825, prior to January 26, 1988. All attendees to the meeting should use the Main Entrance (2201 C Street, NW.) of the Department of State Building.

Date: December 18, 1987.

Harvey J. Winter,
Executive Secretary.

BILLING CODE 4710-07-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

List in Compliance With Section 135(c) of Pub. L. 100-202

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: The Office of the United States Trade Representative ("USTR") is publishing the list below in compliance with the requirements of section 135(a) of the continuing resolution on the Fiscal Year 1988 budget, H.J. Res. 395 (Pub. L. 100-202, 101 Stat. 1329).

EFFECTIVE DATE: December 30, 1987.

FOR FURTHER INFORMATION CONTACT: Beverly Vaughan, Director for Procurement Trade Policy, Office of the United States Trade Representative ("USTR"), 600 17th St. NW., Washington, DC 20506, (202) 395-3063 (procurement issues); Amelia Porges, Associate General Counsel, USTR, (202) 395-7305 (legal issues); Glen Fukushima, Director of Japan Affairs, USTR, (202) 395-5070 (Japanese issues).

Discussion: The continuing resolution on the Fiscal Year 1988 Budget, H.J. Res. 395, was signed and enacted as Pub. L. 100-202, on December 22, 1987. Section 135(a) of Pub. L. 100-202 provides certain requirements and prohibitions applicable to Federal public works procurement. Section 135(c) requires the USTR to maintain a list of certain foreign countries. The legislative history specifies that the list shall be created on the date of enactment and shall include initially "the country of Japan and any other country which has expressed a policy of denying [fair and equitable] market opportunities" for products and services of the United States, in bidding or procurement for certain construction projects. The relevant construction projects are those that cost over $500,000 each and are funded (in whole or in part) by the government of such foreign country or by an entity controlled directly or indirectly by such foreign country. Not later than 30 days after enactment of Pub. L. 100-202, the USTR is required to determine whether other foreign countries deny such market opportunities. If a foreign country is found to deny such opportunities, the USTR must then include that country on this list.

The attached list implements this statutory mandate, on the basis of the requirements in Pub. L. 100-202 and the information presently available to me.

Michael B. Smith,
Acting United States Trade Representative.

BILLING CODE 4910-62-M

Maritime Administration

[Docket S-821]

Farrell Lines Inc.; Application

In the matter of a notice of application pursuant to section 605(c) of the Merchant Marine Act, 1936, as amended, to remove subsidized sailing restrictions on TR 13.

Notice is hereby given that Farrell Lines Incorporated (Farrell) by application dated December 9, 1987, has applied pursuant to section 605(c) of the Merchant Marine Act, 1936, as amended (Act), to remove a restriction in its Operating-Differential Subsidy (ODS) Contract imposed in December 1980, which limits Farrell to a maximum of 15 subsidized sailings annually from U.S. South Atlantic ports to ports in North Africa.

Farrell operates, *inter alia*, subsidized liner service on Trade Route (TR) 10 (U.S. North Atlantic/Mediterranean) with the privilege of calling at TR 13 ports (U.S. South Atlantic/Mediterranean) on all TR 10 voyages. Farrell's ODS Contract MA/MSB-482 requires Farrell to make a minimum of 44 and a maximum of 66 voyages on TR 10.

Farrell has served a wide range of ports in the Mediterranean on TR 10 and TR 13, including ports in North Africa (Morocco, Algeria, Tunisia, and Egypt) and has provided regular containership service on TR 10/13 from Charleston, South Carolina, to North Africa, particularly Egypt, since late June of 1986, on approximately half its sailings. Its first 15 sailings per year from Charleston to North Africa has been subsidized. The remainder have been subject to a reduction of subsidy resulting from the TR 13 North Africa limitation.

Farrell believes that section 605(c) is not a bar to an amendment to its ODS Contract which would authorize payment of subsidy, without limitation, for all Farrell's sailings serving TR 10 and South Atlantic portion of TR 13. This is because, in Farrell's view, (a) Farrell has an existing fortnightly service from U.S. South Atlantic ports to North Africa and payment of full subsidy for this segment of Farrell's voyages would not give undue advantage or be unduly prejudicial to any U.S.-flag carrier which may now operate in the trade, and (b) existing U.S.-flag service, other than that provided by Farrell, is grossly inadequate and, in the accomplishment of the purposes and policies of the Act, additional U.S.-flag subsidized sailings should be operated between U.S. South Atlantic ports and North African ports.

This application may be inspected in the Office of the Secretary, Maritime Administration. Any person, firm, or corporation having any interest in such request and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, Room 7300, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Comments must be received no later than 5:00 p.m. on January 15, 1988. The Maritime Subsidy Board will consider any comments submitted and take such action with respect thereto as may be deemed appropriate

(Catalog of Federal Domestic Assistance Program No. 20.804 Operating-Differential Subsidies))

By Order of the Maritime Subsidy Board.

Date: December 23, 1987.

Joel C. Richard
Assistant Secretary.

BILLING CODE 4910-81-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco, and Firearms

[Notice No. 651]

Commerce in Explosives; List of Explosive Materials

Pursuant to the provisions of section 841(d) of Title 18, United States Code, and 27 CFR 55.23, the Director, Bureau of Alcohol, Tobacco, and Firearms, must publish and revise at least annually in the **Federal Register** a list of explosives determined to be within the coverage of 18 U.S.C. Chapter 40, Importation, Manufacture, Distribution and Storage of Explosive Materials. This Chapter covers not only explosives, but also blasting agents and detonators, all of which are defined as explosive materials in section 841(c) of Title 18, United States Code.

Accordingly, the following is the 1988 List of Explosive Materials subject to regulation under 18 U.S.C. Chapter 40, which includes both the list of explosives (including detonators) required to be published in the **Federal Register** and blasting agents. The list is intended to also include any and all mixtures containing any of the materials in the list. Materials constituting blasting agents are marked by an asterisk. While the list is comprehensive, it is *not* all inclusive. The fact that an explosive material may not be on the list does not mean that it is not within the coverage of the law if it otherwise meets the statutory definitions in section 841 of Title 18, United States Code. Explosive materials are listed alphabetically by their common names followed by chemical names and synonyms in brackets. This revised list supersedes the List of Explosive Materials dated December 29, 1986 (50 FR 50578) and will be effective as of January 1, 1988).

List of Explosive Materials

A

Acetylides of heavy metals.
Aluminum containing polymeric propellant.
Aluminum ophorite explosive.
Amatex.
Amatol.
Ammonal.
Ammonium nitrate explosive mixtures (cap sensitive).
*Ammonium nitrate explosive mixtures (non cap sensitive).
Aromatic nitro-compound explosive mixtures.
Ammonium perchlorate having particle size less than 15 microns.
Ammonium perchlorate composite propellant.
Ammonium picrate [picrate of ammonia, Explosive D].
Ammonium salt lattice with isomorphously substituted inorganic salts.
*ANFO [ammonium nitrate-fuel oil].

B

Baratol.
Baronol.
BEAF [1, 2-bis (2, 2-difluoro-2-nitroacetoxyethane)].
Black powder.
Black powder based explosive mixtures.
*Blasting agents, nitro-carbo-nitrates, including non cap sensitive slurry and water-gel explosives.
Blasting caps.
Blasting gelatin.
Blasting powder.
BTNEC [bis(trinitroethyl) carbonate].
BTNEN [bis(trinitroethyl) nitramine].
BTTN [1,2,4 butanetriol trinitrate].
Butyl tetryl.

C

Calcium nitrate explosive mixture.
Cellulose hexanitrate explosive mixture.
Chlorate explosive mixtures.
Composition A and variations.
Composition B and variations.
Composition C and variations.
Copper acetylide.
Cyanuric triazide.
Cyclotrimethylenetrinitramine [RDX].
Cyclotetramethylenetetranitramine [HMX].
Cyclotol.

D

DATB [diaminotrinitrobenzene].
DDNP [diazodinitrophenol].
DEGDN [diethyleneglycol dinitrate].
Detonating cord.
Detonators.
Dimethylol dimethyl methane dinitrate composition.
Dinitroethyleneurea.
Dinitroglycerine [glycerol dinitrate].
Dinitrophenol.
Dinitrophenolates.
Dinitrophenyl hydrazine.
Dinitroresorcinol.
Dinitrotoluene-sodium nitrate explosive mixtures.
DIPAM.
Dipicryl sulfone.
Dipicrylamine.
DNDP [dinitropentano nitrile].
DNPA [2,2-dinitropropyl acrylate].
Dynamite.

E

EDDN [ethylene diamine dinitrate].
EDNA.
Ednatol.
EDNP [ethyl 4,4-dinitropentanoate].
Erythritol tetranitrate explosives.
Esters of nitro-substituted alcohols.
EGDN [ethylene glycol dinitrate].
Ethyl-tetryl.
Explosive conitrates.
Explosive gelatins.
Explosive mixtures containing oxygen releasing inorganic salts and hydrocarbons.
Explosive mixtures containing oxygen releasing inorganic salts and nitro bodies.
Explosive mixtures containing oxygen releasing inorganic salts and water insoluble fuels.
Explosive mixtures containing oxygen releasing inorganic salts and water soluble fuels.
Explosive mixtures containing sensitized nitromethane.
Explosive mixtures containing tetranitromethane (nitro form).
Explosive nitro compounds of aromatic hydrocarbons.
Explosive organic nitrate mixtures.
Explosive liquids.
Explosive powders

F

Fulminate of mercury.
Fulminate of silver.
Fulminating gold.
Fulminating mercury.
Fulminating platinum.
Fulminating silver.

G

Gelatinized nitrocellulose.
Gem-dinitro aliphatic explosive mixtures.
Guanyl nitrosamino guanyl tetrazene.
Guanyl nitrosamino guenylidene hydrazine.
Guncotton.

H

Heavy metal azides.
Hexanite.

Hexanitrodiphenylamine.
Hexanitrostilbene.
Hexogene or octogene and a nitrated N-methylaniline.
Hexolites.
HMX [cyclo-1,3,5,7-tetramethylene-2,4,6,8-tetranitramine; Octogen].
Hydrazinium nitrate/hydrazine/aluminum explosive system.
Hydrazoic acid.

I

Igniter cord.
Igniters.
Initiating tube systems.

K

KDNBF [potassium dinitrobenzo-furoxane].

L

Lead azide.
Lead mannite.
Lead mononitroresorcinate.
Lead picrate.
Lead salts, explosive.
Lead styphnate [styphnate of lead, lead trinitroresorcinate].
Liquid nitrated polyol and trimethylolethane.
Liquid oxygen explosives.

M

Magnesium ophorite explosives.
Mannitol hexanitrate.
MDNP [methyl 4,4-dinitropentanoate].
MEAN [monoethanolamine nitrate].
Mercuric fulminate.
Mercury oxalate.
Mercury tartrate.
Metriol trinitrate.
Minol-2 [40% TNT, 40% ammonium nitrate, 20% aluminum].
MMAN [monomethylamine nitrate; methylamine nitrate.
Mononitrotoluene-nitroglycerin mixture.
Monopropellants.

N

NIBTN [nitroisobutametriol trinitrate].
Nitrate sensitized with gelled nitroparaffin.
Nitrated carbohydrate explosive.
Nitrated glucoside explosive.
Nitrated polyhydric alcohol explosives.
Nitrates of soda explosive mixtures.
Nitric acid and a nitro aromatic compound explosive.
Nitric acid and carboxylic fuel explosive.
Nitric acid explosive mixtures.
Nitro aromatic explosive mixtures.
Nitro compounds of furane explosive mixtures.
Nitrocellulose explosive.
Nitroderivative of urea explosive mixture.
Nitrogelatin explosive.
Nitrogen trichloride.
Nitrogen tri-iodide.
Nitroglycerine [NG, RNG, nitro, glyceryl trinitrate, trinitroglycerine].
Nitroglycide.
Nitroglycol (ethylene glycol dinitrate, EGDN)
Nitroguanidine explosives.
Nitroparaffins Explosive Grade and ammonium nitrate mixtures.
Nitronium perchlorate propellant mixtures.
Nitrostarch.
Nitro-substituted carboxylic acids.
Nitroureas.

O

Octogen [HMX].
Octol [75 percent HMX, 25 percent TNT].
Organic amine nitrates.
Organic nitramines.

P

PBX [RDX and plasticizer].
Pellet powder.
Penthrinite composition.
Pentolite.
PYX [2,6-bis(picrylamino)-3,5-dinitropyridine
Perchlorate explosive mixtures.
Peroxide based explosive mixtures.
PETN [nitropentaerythrite, pentaerythrite, tetranitrate, pentaerythritol tetranitrate].
Picramic acid and its salts.
Picramide.
Picrate of potassium explosive mixtures.
Picratol.
Picric acid (explosive grade).
Picryl chloride.
Picryl fluoride.
PLX [95% nitromethane, 5% ethylenediamine].
Polynitro aliphatic compounds.
Polyolpolynitrate-nitrocellulose explosive gels.
Potassium chlorate and lead sulfocyanate explosive.
Potassium nitrate explosive mixtures.
Potassium nitroaminotetrazole.

R

RDX [cyclonite, hexogen, T4, cyclo-1,3,5,-trimethylene-2,4,6,-trinitramine; hexahydro-1,3,5-trinitro-S-triazine].

S

Safety fuse.
Salts of organic amino sulfonic acid explosive mixture.
Silver acetylide.
Silver azide.
Silver fulminate.
Silver oxalate explosive mixtures.
Silver styphnate.
Silver tartrate explosive mixtures.
Silver tetrazene.
Slurried explosive mixtures of water, inorganic oxidizing salt, gelling agent, fuel and sensitizer (cap sensitive).
Smokeless powder.
Sodatol.
Sodium amatol.
Sodium azide.
Sodium dinitro-ortho-cresolate.
Sodium nitrate-potassium nitrate explosive mixture.
Sodium picramate.
Squibs.
Styphnic acid.

T

Tacot [tetranitro-2,3,5,6-dibenzo-1,3a,4,6a-tetrazapentalene].
TATB [triaminotrinitrobenzene].
TEGDN [triethylene glycol dinitrate].
Tetrazene [tetracene, tetrazine, 1(5-tetrazolyl)-4-guanyl tetrazene hydrate].
Tetranitrocarbazole.
Tetryl [2,4,6 tetranitro-N-methylaniline].
Tetrytol.
Thickened inorganic oxidizer salt slurried explosive mixture.
TMETN (trimethylolethane trinitrate).
TNEF [trinitroethyl formal].
TNEOC [trinitroethylorthocarbonate].
TNEOF [trinitroethyl orthoformate].
TNT [trinitrotoluene, trotyl, trilite, triton].
Torpex.
Tridite.
Trimethylol ethyl methane trinitrate composition.
Trimethylolthane trinitrate-nitrocellulose.
Trimonite.
Trinitroanisole.

BILLING CODE 4810-31-M

Fiscal Service

[4-00236]

Renegotiation Board Interest Rate; Prompt Payment Interest Rate; and Contracts Disputes Act

Although the Renegotiation Board is no longer in existence, other Federal Agencies are required to use interest rates computed under the criteria established by the Renegotiation Act of 1971 (Pub. L. 92–41). For example, the Contracts Disputes Act of 1978 (Pub. L. 95–563) and the Prompt Payment Act (Pub. L. 97–177) are required to calculate interest due on claims "* * * at a rate established by the Secretary of the Treasury pursuant to Pub. L. 92–41 (85 Stat. 97) for the Renegotiation Board."

Therefore, notice is hereby given that, pursuant to the above mentioned sections, the Secretary of the Treasury has determined that the rate of interest

applicable for the purpose of said sections, for the period beginning January 1, 1988 and ending on June 30, 1988, is 9⅜% per centum per annum.

Gerald Murphy,

Fiscal Assistant Secretary.

VETERANS ADMINISTRATION

Scientific Review and Evaluation Board for Health Services Research and Development; Meeting

The Veterans Administration gives notice under Pub. L. 92–463 that an advisory committee meeting of the Scientific Review and Evaluation Board for Health Services Research and Development will be held at the Radisson Park Terrace Hotel, 1515 Rhode Island Avenue, NW., Washington, DC, on January 12 and 13, 1988. The meeting will be open at 8 a.m. on January 12 and 13 and adjourn at 5 p.m. on January 12 and 3:30 p.m. on January 13, 1988. The purpose of the meeting will be to review research and development applications concerned with the measurement and evaluation of health care systems and with testing new methods of health care delivery and management. Applications are reviewed for scientific and technical merit and recommendations regarding their funding are prepared for the Assistant Chief Medical Director for Research and Development.

The meeting will be open to the public (to the seating capacity of the room) at the start of the January 12th session for approximately one hour to cover administrative matters and to discuss the general status of the program.

The closed portion of the meeting involves: Discussion, examination, reference to, and oral review of staff and consultant critiques of research protocols, and similar documents. During this portion of the meeting, discussion and recommendations will deal with qualifications of personnel conducting the studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, as well as research information, the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action regarding such research projects. As provided by subsection 10(d) of Pub. L. 92–463, as amended by Pub. L. 94–409, closing portions of these meetings is in accordance with 5 U.S.C., 552b (c)(6) and (9)(B).

Due to the limited seating capacity of the room, those who plan to attend the open session should contact Mrs. Carolyn Smith, Program Analyst, Health Services Research and Development Service, 810 Vermont Avenue, NW., Washington, DC 20420, (phone: 202/233–5365) at least 5 days before the meeting.

Dated: December 23, 1987.

By direction of the Administrator:

Dennis R. Boxx,

Deputy Associate Deputy Administrator for Public Affairs.

Corrections

Federal Register
Vol. 52, No. 250
Wednesday, December 30, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF COMMERCE

International Trade Administration

United States Department of Energy et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

Correction

In notice document 87-26018 beginning on page 43221 in the issue of Tuesday, November 10, 1987, make the following corrections:

1. On page 43221, in the second column, in the second paragraph from the bottom, in the last two lines, the date should read "October 2, 1987".

2. On the same page, in the same column, after the second paragraph from the bottom insert the following:

Docket Number: 87-259. *Applicant:* University of Wisconsin, Madison, WI 53706-1572. *Instrument:* Demonstration Model of Measuring Machine. *Manufacturer:* Institut fur Werkzeugmaschinenbau und Fertigungstechnik, Switzerland. *Intended Use:* See notice at 52 FR 32824, August 31, 1987. *Reasons for This Decision:* The foreign article provides three axis, adjustable non-perpendicularities, roll, pitch and yaw movements and adjustable scales for linearity and non-linearity. *Advice Submitted by:* National Bureau of Standards, September 29, 1987.

Docket Number: 87-257. *Applicant:* University of Miami, Coral Gables, FL 33124. *Instrument:* Digital Controllers. *Manufacturer:* GDS Instruments, Ltd., United Kingdom. *Intended use:* See notice at 52 FR 32823, August 31, 1987. *Reasons for This Decision:* The foreign article is a programmable source of pressure generation, strain and displacement applications providing consistently precise and accurate measurements. *Advice Submitted by:* National Bureau of Standards, September 29, 1987.

Department of Health and Human Services

Office of Human Development Services

FY 1988 Coordinated Discretionary Funds Program; Availability of Funds and Request for Applications; and Request for Public Comment on Fiscal Year 1988 Developmental Disabilities Proposed Projects of National Significance; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

[Program Announcement No. HDS-88-2]

FY 1988 Coordinated Discretionary Funds Program; Availability of Funds and Request for Applications; and Request for Public Comment on Fiscal Year 1988 Developmental Disabilities Proposed Projects of National Significance

AGENCY: Administration on Aging, Administration for Children, Youth and Families, Administration on Developmental Disabilities, Administration for Native Americans, Office of Human Development Services, HHS.

ACTION: Announcement of availability of funds and request for applications under the Office of Human Development Services' Coordinated Discretionary Funds Program; and request for public comment on proposed topics for research and demonstration for the developmental disabilities Projects of National Significance.

SUMMARY: The Office of Human Development Services (HDS) announces the beginning of its Coordinated Discretionary Funds Program for Fiscal Year 1988 and proposes, for public comment, topics for research and development for Projects of National Significance under the developmental disabilities program.

Funding for HDS grants and cooperative agreements is authorized by legislation governing the discretionary programs of the three Program Administrations within HDS—the Administration on Aging (AoA); the Administration for Children, Youth and Families (ACYF); and the Administration for Native Americans (ANA).

Unlike previous years, the Administration on Developmental Disabilities (ADD) will not be funding applications under this announcement. Instead, it is requesting comments on proposed Projects of National Significance.

This program announcement consists of four parts. Part I, the Preamble, discusses the purpose of the HDS Coordinated Discretionary Funds Program, and lists the statutory funding authorities.

In addition, section C of Part I lists ADD's proposed priority areas for future funding of Projects of National Significance. Public comments on these and other suggested research and demonstration projects are invited. *No applications should be submitted at this time based on these ADD priorities.* Part II describes the programmatic priorities under which HDS solicits applications for funding of projects. Part III provides the necessary background information for applicants. Part IV describes in detail how to prepare and submit an application. All of the forms and instructions necessary to submit an application are published as part of this announcement following Part IV.

No separate application kit is either necessary or available for submitting an application. If you have a copy of this announcement, you have all the information and forms required to submit an application.

Grants will be made under this program announcement subject to the availability of funds for support of these activities.

DATES: The closing date for receipt of applications under this announcement is March 18, 1988. The closing date for receipt of comments on the ADD priorities is February 29, 1988. Comments received after this date may not be considered.

ADDRESSES: Application receipt point: Department of Health and Human Services, HDS/Grants and Contracts Management Division, 200 Independence Avenue, SW., Room 724–F, Washington, DC 20201, Attn: HDS–88–2.

Comments on ADD priority areas: Commissioner, Administration on Developmental Disabilities, Department of Health and Human Services, 200 Independence Avenue, SW., Room 351–D, Washington, DC 20201.

This program announcement is available as an electronic document through the HDS Computer Bulletin Board. Organizations equipped with computers and modems may link to the bulletin board by calling (202) 755–1642. Most popular communications programs will work. The correct settings are 8 data bits, one stop bit, no parity, 1,200 bits per second (BAUD).

FOR FURTHER INFORMATION CONTACT: Department of Health and Human Services, HDS/Office of Policy, Planning and Legislation, Division of Research and Demonstration, 200 Independence Avenue, SW., Room 724–F, Washington, DC 20201. Telephone (202) 755–4633. To provide 24 hour coverage, calls to this number may be answered by an answering machine. Only information related to applications will be provided through this contact.

SUPPLEMENTARY INFORMATION:

Part I—Preamble

Executive Order 12606: The Family

In developing the goals of the Office of Human Development Services (HDS) and the specific priority areas listed in this program announcement, HDS has applied the Family Policy making Criteria established by the President in Executive Order 12606. These criteria are in the form of questions used to assess policies and regulations that may have a significant impact on family formation, maintenance, and general well-being:

(a) Does this action by government strengthen or erode the stability of the family and, particularly, the marital commitment?

(b) Does this action strengthen or erode the authority and rights of parents in the education, nature, and supervision of their children?

(c) Does this action help the family perform its functions, or does it substitute governmental activity for the function?

(d) Does this action by government increase or decrease family earnings? Do the proposed benefits of this action justify the impact on the family budget?

(e) Can this activity be carried out by a lower level of government or by the family itself?

(f) What message, intended or otherwise, does this program send to the public concerning the status of the family?

(g) What message does it send to young people concerning the relationship between their behavior, their personal responsibility, and the norms of our society?

A. Goals of the Office of Human Development Services (HDS)

The four Program Administrations within the Office of Human Development Services (HDS), although different from one another in the specific populations they serve, share a common mission: to reduce dependency and increase self-sufficiency among our most vulnerable citizens. Emphasis on this mission, and progress toward it, will help more Americans live independent lives, and in the end it will reduce demand for services.

Public resources are no longer being expended at a rapid pace without considerable forethought. We have left an era when the trend was to assign to the Federal government an ever-increasing responsibility for identifying the needs for social services and for designing programs to meet those needs. Public policy now articulates that decisions are best made at the level of government closest to the target populations served—by elected State and local officials, by those who manage at the State and local levels, including government officials, private organizations, voluntary organizations, schools or religious organizations.

Therefore, specific HDS goals have been adopted which reflect the policy that social service needs are more effectively and efficiently defined and addressed at the State and local community level—all to the end that families and individuals are helped to achieve self-sufficiency and independence. These goals are:

- To increase family and individual self-sufficiency and independence through social and economic development strategies;
- To target Federal assistance to those most in need; and,
- To improve the effectiveness and efficiency of State, local and tribally-administered human services.

In order to be considered for funding under the Coordinated Discretionary Funds Program (CDP), each applicant must describe activities that are in harmony with the goals of HDS.

B. The HDS Program Administrations

1. Administration on Aging

The Administration on Aging (AoA) was established in 1965 by the Older Americans Act (Pub. L. 89–73). AoA is mandated to serve as the focal point and advocate for the elderly, within the Department of Health and Human Services and with other Federal departments and agencies, and to provide guidance and assistance to States and communities in the development and implementation of comprehensive and coordinated service systems for older persons.

AoA has established the following long-range objectives which are reflected in the announcement:

- Stimulating systems change to enhance family and community-based care;
- Promoting the adoption of healthy lifestyles among the elderly;
- Providing services to the elderly in greatest need;
- Promoting preparation for an aging society; and
- Assisting State and Area Agencies on Aging and Tribal organizations in carrying out their leadership roles in planning, coordinating and assuring the availability of services for the elderly.

Title IV of the Older Americans Act is the major research, demonstration, training and development effort of the Administration on Aging. Title IV authorizes a program of discretionary grants and contracts to support training and education, research and demonstration, and other activities.

A primary purpose of these activities is to assist AoA and the State and Area Agencies on Aging to carry out the goals and objectives set forth in the Act. This is accomplished by AoA, together with State and Area Agencies on Aging, nonprofit, voluntary and philanthropic organizations and local communities, through analyzing trends and anticipating social issues that will become paramount in the future; improving the effectiveness and efficiency of services to the elderly by developing new techniques and approaches to deal with social issues; and by developing alternatives to traditional social service approaches.

AoA expects the discretionary projects which it supports to demonstrate the critical leadership roles that State and Area Agencies on Aging can play—as catalysts, brokers, coordinators—in developing systems of family and community-based care for older persons throughout the United States. AoA discretionary funds are not intended to provide for ongoing social services (including case management services), the construction and renovation of buildings, or to supplement funds for local activities which need operating subsidies.

AoA encourages applicants to include an emphasis on addressing the special needs of minority elderly by including minority concerns as part of the larger problem to be addressed by the application. Applicants must be able to show how minority needs will be met as part of a comprehensive delivery system and how community resources will be mobilized. Projects are expected to involve a high degree of collaboration among State, area and local agencies as appropriate; and agencies representing minority concerns. Roles and responsibilities in the project must be delineated, and this delineation should be supported with letters of commitment for collaboration.

2. Administration for Children, Youth and Families

The Administration for Children, Youth and Families (ACYF) serves as the focal point within the Federal government for programs, activities and concerns designed to improve the quality of life for children, youth and families. It administers the following programs:

- Head Start provides comprehensive services primarily to low-income preschool children, age three to the age of school attendance, and their families. In order to aid enrolled children to obtain their full potential, Head Start programs provide comprehensive educational, health, nutrition, social and other services.
- Child Welfare Services assist State public welfare agencies to improve their child welfare services with the goal of keeping families together. State services include preventive intervention so that, if possible, children will not have to be removed from their homes; services to develop alternative placements such as Foster Care or Adoption if children cannot remain at home; and reunification services so that children can return home if at all possible.
- Foster Care provides funds to States to assist with the cost of foster care for eligible children, administrative costs to manage the programs and training for staff. The purpose of the program is to help States provide care for children who, because they are abused or neglected or are otherwise at-risk, need placement outside their homes in a foster family home or in a child care institution. The adoption assistance program provides funds to States to facilitate the placement of foster care children with special needs in adoptive homes and, therefore, to prevent long, inappropriate stays in foster care. Funds are used for the provision of subsidies to cover the extra maintenance costs (basic living expenses) that are associated with the adoption of a special needs child, based upon the individual child's needs; for the administrative costs of managing the program; and for the training of staff.
- Child Welfare Training discretionary grants are awarded to public and private nonprofit institutions of higher learning to develop and improve educational and training programs as well as resources for child welfare service providers by upgrading their skills and qualifications.
- Adoption Opportunities eliminates barriers to adoption and helps to find permanent homes for children who would benefit by adoption, particularly children with special needs. The three major program areas are: (1) The development and implementation of a national adoption and foster care data gathering and analysis system; (2) the development and implementation of a national adoption information exchange system; and (3) the development and implementation of an adoption training and technical assistance system.
- Child Abuse and Neglect programs, through State grants and research and evaluation grants, assist State, local, and volunteer agencies and organizations to strengthen their capacities to prevent, identify and treat

child abuse and neglect. Under the State grant program, grants are made directly to States meeting the legislative eligibility requirements to improve prevention and treatment services. The discretionary grant program provides support for research, demonstration, service improvement, information dissemination and technical assistance activities designed to improve and increase national, State, community and family efforts for the prevention, identification and treatment of child abuse and neglect.

• State Challenge Grants are provided to encourage States to establish and maintain trust funds, or other funding mechanisms, to support child abuse and neglect prevention activities.

• The Runaway and Homeless Youth program addresses the crisis needs of runaway and homeless youth and their families through the establishment or strengthening of community-based programs providing temporary shelter, counseling, and aftercare services. Additionally, this program provides support to networking grants designed to share information, expertise, and resources among service providers; and to a toll-free, 24-hour National Runaway Switchboard which serves as a neutral channel of communication between young people and their families as well as a source of referral to needed services.

• Dependent Care provides grants to States for the planning, development, establishment, expansion, or improvement of (1) State and local dependent care resource and referral systems; and (2) school-age child care services before and after school hours.

3. Administration on Developmental Disabilities

The overall purpose of the Administration on Developmental Disabilities (ADD), as specified by the Developmental Disabilities Assistance and Bill of Rights Act of 1987 (Pub. L. 100–146), is to provide assistance to States and public and private nonprofit agencies and organizations to ensure that all persons with developmental disabilities can receive the services and other assistance and opportunities necessary to enable such persons to achieve their maximum potential through increased independence and productivity and integration in the community. ADD also seeks to enhance the role of the family in assisting persons with developmental disabilities to achieve their maximum potential as well as ensuring the protection of their legal and human rights.

The specific purposes of the program are:

• To assist States in the development of a comprehensive system and a coordinated array of services and other assistance for persons with developmental disabilities through the conduct of, and appropriate planning and coordination of, administrative activities, Federal priority activities, and a State priority activity.

• To make grants and contracts to States and public and private, nonprofit agencies for Projects of National Significance relating to persons with developmental disabilities, including projects to educate policymakers, develop an ongoing data collection system, determine the feasibility and desirability of developing a nationwide information and referral system, pursue Federal interagency initiatives, and other projects of expanding or otherwise improving opportunities for persons with developmental disabilities.

• To make grants to university affiliated programs to assist in the provision of interdisciplinary training, the demonstration of exemplary services and technical assistance, and the dissemination of information which will increase and support the independence, productivity and integration into the community of persons with developmental disabilities.

• To make grants to support a system in each State to protect the legal and human rights of all persons with developmental disabilities.

This information is provided as background information for individuals and organizations interested in commenting on the ADD priorities in Section C which follows. No applications should be submitted in response to these priorities.

4. Administration for Native Americans

The mission of the Administration for Native Americans (ANA) is to promote the goal of social and economic self-sufficiency for American Indians, Native Hawaiians and Alaska Natives. ANA defines self-sufficiency as the level of development at which a Native American community can control and internally generate resources to provide for the needs of its members and meet its own short and long range social and economic goals.

Social and economic underdevelopment is the paramount obstacle to the self-sufficiency of Native American communities and families. Underdevelopment contributes to high unemployment and school dropout rates, poor health and other problems which affect Native Americans to a greater degree than almost any other population group. Underdevelopment, and the resulting lack of a strong diversified economic base, has made Native American communities especially dependent on Federally-designed, Federally-funded and Federally-operated programs.

Native American programs and policies foster a balanced developmental approach at the community level through three major goals: (1) Governance: to strengthen Tribal governments, Native American institutions and local leadership, to assure local control over all resources; (2) economic development: to foster the development of stable, diversified local economies in order to provide jobs and reduce dependency on welfare services; and (3) social development: to support local access to, and coordination of, services and programs which safeguard the health and well-being of Native Americans. These goals are based on the premise that the local Native American community has the primary responsibility for determining its own needs, for planning and implementing its own programs, and for building an economic base from its own natural, physical, and human resources.

C. Notice of Proposed FY 1988 Developmental Disabilities Priorities for Projects of National Significance and Request for Public Comments

On October 29, 1987, Congress enacted the Developmental Disabilities Assistance and Bill of Rights Act of 1987 (Pub. L. 100–146). A new provision of this Act in section 162(c) requires that the Office of Human Development Services (HDS) publish in the **Federal Register**, not later than January 1 of each year, proposed priorities for grants and contracts to carry out Projects of National Significance. The Act also requires a period of 60 days for public comment and suggestions. After analyzing and considering such comments, HDS must publish in the **Federal Register** the priorities for such grants and contracts.

We welcome specific comments and suggestions concerning the following priorities for Projects of National Significance. We are also interested in receiving suggestions on topics not covered in this announcement, but which are timely and relate to specific needs in the field of developmental disabilities.

The actual solicitation of applications will be published in the **Federal Register** at a later date. *No proposals, concept papers or other forms of application should be submitted at this time.* Any such submission will be discarded.

No acknowledgments will be made of the comments in response to this notice, but all comments will be considered in preparing the priorities for developmental disabilities activities to be included in the Fiscal Year 1988 HDS Projects of National Significance Program Announcement. A copy of the program announcement will be sent to all persons who comment on this Notice. We anticipate that the program announcement for Projects of National Significance will be published in the spring of 1988.

Comments should be addressed to: Commissioner, Administration on Developmental Disabilities, HHH Building, Room 351–D, 200 Independence Avenue SW., Washington, DC 20201.

Proposed FY 1988 Priority Areas for Projects of National Significance

I. Projects to Educate Policymakers

There is a need to provide information to policymakers on critical issues pertaining to developmental disabilities.

We propose:

A. To conduct a study to evaluate and identify policies which have proven successful in removing barriers for persons with developmental disabilities to access specialized and generic services at the State, county, and local levels;

B. To conduct a study to evaluate and identify existing planning and policy practices which have lead to the effective combination of services provided by the DD and Aging networks for elderly persons with developmental disabilities; and

C. To conduct a study to identify policies which enable disabled individuals to work more productively in integrated settings in the community.

The results from the above proposed studies would be used to provide training and technical assistance to policymakers at the State, county, and local levels to enhance the ability of persons with developmental disabilities to obtain and maintain full integration within their communities.

II. Projects To Develop an Ongoing Data Collection System

There is a need for an ongoing data collection system that will meet ADD's legislative reporting requirements and document progress made to improve the independence, productivity and integration into the community of persons with developmental disabilities.

We propose:

A. To assess the extent, scope, and effectiveness of services provided and activities performed by all State agencies whose services impact on persons with developmental disabilities (including education, vocational rehabilitation, public assistance, medical assistance, social services, maternal and child health, aging, children with special health care needs, housing, and comprehensive health and mental health);

B. To conduct a survey of a representative sample of consumers with developmental disabilities regarding their satisfaction with those services;

C. To assess eligibility criteria and the extent to which such criteria tend to exclude persons with developmental disabilities;

D. To assess need for changes in Federal and State policies which have a negative impact on the ability of persons with developmental disabilities to benefit from such programs; and

E. To assess approaches for the incorporation of data from this analysis in ongoing planning and policy analysis activities.

The ongoing data collection system should build on the several existing national data sets currently maintained on residential services, expenditures, vocational services, and program impact. The data generated by the system will be used by the State Planning Councils, Protection and Advocacy Program, University Affiliated Facilities, researchers and the Federal government to develop reports on the nation's ability to coordinate service delivery systems which meet the needs of persons with developmental disabilities.

III. Projects To Determine the Feasibility and Desirability of Developing a Nationwide Information and Referral System

Section 163 of the Act requires the Secretary to fund not more than three projects to determine the feasibility and desirability of developing a nationwide information and referral system for persons with developmental disabilities within six months after the date of enactment of the Act. ADD has, therefore, published a separate **Federal Register** announcement to solicit applications for these projects.

Grantees will make recommendations related to the feasibility and desirability of establishing information and referral systems at the national and regional levels for the purpose of effectively linking persons with developmental disabilities and their families to service providers.

IV. Other Projects of National Significance

In FY 1988, ADD proposes to conduct studies which focus on two or more of the following topical areas:

A. AIDS and its potential impact on children with developmental disabilities;

B. Training of professionals in the mental health and mental retardation fields related to serving persons with dual impairments (MR/MH);

C. Identification of best practices related to serving minority populations such as Blacks, Hispanics, Native Americans, Native Hawaiians, and Pacific Asians; and

D. Service needs and legal rights of criminal offenders with mental retardation.

D. Cross-Program Focus of the HDS Coordinated Discretionary Funds Program (CDP)

For the past seven years, the HDS Coordinated Discretionary Funds Program (CDP) has brought the major portion of the research and demonstration funding efforts of the four Program Administrations within HDS (AoA, ACYF, ADD, ANA) under one solicitation Announcement. Based on new legislative requirements, this year the Administration on Developmental Disabilities (ADD) is requesting only comments on its proposed priority areas.

Through the CDP, two or more Program Administrations within HDS in the past have addressed an important issue or need in which each has program and discretionary interest. For example: several social service needs or issues in the area of child welfare may be of program/discretionary interest not only to the Administration for Children, Youth and Families (ACYF), but also (Indian Child Welfare) to the Administration for Native Americans (ANA), and (children with developmental disabilities) to the Administration on Developmental Disabilities (ADD). More than a few such social service issues and needs fit into such a "Cross-Program" category. Other examples, where more than one Program Administration within HDS may generate research and demonstration discretionary activities, are: Elder Abuse (AoA, ANA, ACYF); Family Support/Caregiving (AoA, ANA, ACYF); Substance Abuse/Alcoholism (ACYF, ANA, AoA); Teen Pregnancy (ACYF, ANA); Intergenerational (ANA, ACYF, AoA); Data Systems (ACYF, ANA, AoA); etc.

The CDP allows HDS to expand the boundaries of human service knowledge

VOL 52 ISS 250 DEC 30 1987 UMI

by drawing on and testing new ideas, and then incorporating these new ideas in a "cross-program" approach within HDS. In this way, the CDP becomes an integral part of the policy making process within HDS, with the findings from its research and demonstration projects providing the basis for substantiating or modifying current policy and practice in addressing social service needs. The CDP allows HDS, together with nonprofit, voluntary and philanthropic organizations, and local communities, to analyze trends and anticipate social issues that will become paramount in the future; and to improve the effectiveness and efficiency of human services by developing innovative and alternate techniques and approaches to address social service needs.

Additionally, the CDP makes possible a coordinated use of information systems and related technologies in a more efficient and less costly grant making activity than would be possible if done independently by separate discretionary authorities.

In summary, the HDS Coordinated Discretionary Funds Program (CDP) is based on the principle that the well-being of a specific target population is the responsibility of individuals, families, and the communities in which the target populations live. The CDP is guided by the premise that human service needs are best defined, as well as more effectively and efficiently served, through institutions and organizations at the level closest to the individual—State, Tribal, and local governments, public agencies, businesses, private sector and voluntary organizations, religious institutions, communities, and families.

HDS is primarily interested in providing funds for projects offering immediate impact, or which can become self-sustaining in a short period of time. The CDP is not intended to provide funds for ongoing social services, or to serve as a supplemental source of funds for local activities which need operating subsidies.

E. Focus on Minority Populations Served by the HDS Coordinated Discretionary Funds Program

Because minority populations are frequently more vulnerable and at-risk regarding human service needs, the three Program Administrations (AoA, ACYF and ANA) of HDS, as well as special "Cross-program" initiatives (such as Youth 2000), have a significant interest in providing a focus on minority populations.

Organizations and institutions which especially serve at-risk minority populations are encouraged to apply and compete for funds available under the HDS Coordinated Discretionary Funds Program (CDP). HDS is interested in increasing the number and qualifications of applications received from such institutions and organizations. These organizations and institutions are also especially encouraged to participate in the Technical Assistance Workshops and the Dissemination Workshops discussed in Sections H and I of Part I in this announcement.

Organizations and institutions which especially serve minorities are encouraged to apply under all the priority areas—as they have done in the past. Additionally, such organizations and institutions, including Historically Black Colleges and Universities and Tribally Controlled Community Colleges, are encouraged to submit applications under those priority areas which singularly focus on their social service interests. The priority areas which singularly address the concerns of minority populations are priority areas 3.3, 4.3, 5.2, 6.4, 7.2, 8.1–8.3, 9.2D1, 9.2D2, 9.3A, 10.4, and 8.4.

F. Youth 2000 Initiative

Youth 2000 has been designated by the Secretary of the Department of Health and Human Services (HHS) as a special Departmental Initiative under his agenda for promoting the "Future of the Family." HDS has been delegated the responsibility for managing and coordinating this Initiative, among the various Operating Divisions within the Department.

Youth 2000 is a nationwide "call to action" between now and the year 2000 designed to enlist the involvement of all sectors of society in helping vulnerable and at-risk youth achieve social and economic self-sufficiency and fulfill their potential as viable, contributing members of society. The goals of Youth 2000 are: (1) To increase the employability and self-sufficiency of young people; (2) to improve their literacy and educational attainment; (3) to reduce the incidence of teenage pregnancy; (4) to promote lifestyles free from substance abuse; and (5) to reduce violent and accidental injuries and deaths among young people.

The need for the Youth 2000 campaign is clear and compelling: our Nation needs the productive energies of all of its young people to ensure its continued social and economic progress as we move into the 21st Century. While the majority of young people are adequately preparing to meet these challenges, 10–15 percent of the population aged 16 to 19 are at-risk of not making the transition from adolescence to a productive and responsible adulthood due to various, often interrelated, problems. For example:

- Nearly one million young people drop out of high school annually. Nationwide, approximately one out of every four ninth-graders will not graduate from high school and, in some urban areas, the dropout rate approaches 50 percent.
- One out of every eight 17 year-olds in this country is functionally illiterate.
- More than 573,000 babies are born to teenage mothers each year, and half of these young women will not complete high school. Moreover, teenage pregnancy is often associated with long-term poverty, health defects and other types of problems.
- An alarming number of young people use alcohol, and a high percentage are users of drugs such as marijuana and cocaine. A 1986 survey of high school seniors found that more than 65 percent of the youth surveyed were current users of alcohol; over 23 percent were current users of marijuana; and more than 6 percent were current users of cocaine.
- Automobile accidents, homicides and suicides, respectively, constitute the three leading causes of death among adolescents.

Despite these alarming statistics, anticipated demographic changes between now and the year 2000 offer a unique opportunity regarding employment. Between now and the year 2000, the number of young people will decrease dramatically while the number of new jobs will continue to grow. It is estimated that 16 million new jobs will be created over the next 13 years, but that only 14 million young people will be available to fill these positions.

Therefore, by the year 2000, a job will be available for every qualified young adult who wants one.

The key is, however, preparation. Young people must begin now to prepare and qualify themselves for these employment opportunities. Helping them to do so is a key element of the Department's Youth 2000 initiative. The jobs of the future will require higher skill levels than those of today. Over half of the jobs that will be created between now and the year 2000 will require education or training beyond high school, and almost one-third will be filled by college graduates.

The Youth 2000 Initiative is being jointly implemented by HHS and the Department of Labor (DOL). A variety of efforts have been undertaken by both Departments in support of Youth 2000, including a joint program of competitive grants to the States to assist them in addressing the issue of youth self-sufficiency. As the lead agency within HHS charged with overall management responsibility for the Youth 2000 Initiative, HDS has also supported a number of efforts designed to promote broad based State and community involvement in Youth 2000-related activities.

Since FY 1986, for example, HDS has used the CDP and other funding vehicles to support efforts designed to promote the social and economic self-sufficiency of various populations of at-risk youth such as older adolescents in foster care, runaway and homeless youth, drop outs, pregnant teenagers, young people with developmental disabilities, and Native American youth. In 1987 alone, through the CDP, HDS funded a total of 58 projects focused on youth-at-risk. Additionally, HDS has undertaken a series of activities designed to increase public awareness about youth issues, to provide assistance to public official's to address these problems, and to promote involvement in the Youth 2000 campaign at the grassroots level nationwide.

Other Operating Divisions within the Department are also significantly involved in Youth 2000. For example, the Public Health Service, which has the lead responsibility for the Youth 2000 objectives related to reducing the youth mortality rate due to intentional and unintentional injuries as well as youth substance abuse, is undertaking a wide variety of activities in support of Youth 2000.

These include the provision of financial support to projects focused on prevention/intervention as well as the conduct of public education and other informational efforts. Additionally, the Family Support Administration, the lead agency in HHS for the Youth 2000 objective related to reducing the incidence of teenage pregnancy, is undertaking a series of leadership activities in the area of adolescent pregnancy prevention. These efforts are designed to heighten public awareness about the issue and to assist States, communities and service providers in their efforts to address the problem.

The programs administered by ACYF, ADD and ANA address the issues encompassed by the Youth 2000 Initiative (e.g., substance abuse and youth self-sufficiency) as do the intergenerational projects supported by AoA. This "cross-program" interest is reflected in the priority areas included in this announcement which are supportive of the Initiative.

In addition to the Youth 2000-specific priority areas (1.1, 1.2 and 1.3), other priority areas in this CDP which are related to the Youth 2000 Initiative in a "cross-program" way include: 3.1, "Challenge Grants to Community Foundations: Mainstreaming Troubled Youth"; 3.2, "Challenge Grants to Foundations: Independent Living for Older Homeless Youth"; 3.4, "Develop An Urban Strategy for the Prevention of Youth Suicide"; 7.7, "Preparation for Independent Living in Foster Care Among Pre and Early Adolescent Youth"; 8.1, "Resolving Alcohol and Substance Abuse Within Native American Communities"; and 8.2, "Innovative Community Approaches to Entrepreneurial Activity With Native American Youth."

The reader should be alerted that, in addition to this announcement, Youth 2000-related grant solicitations will also be published by other Operating Divisions within the Department during FY 1988. For example, the Alcohol, Drug Abuse and Mental Health Administration of the Public Health Service (PHS) anticipates making FY 1988 awards under five grants programs that have relevance to the Youth 2000 initiative. Grants will be awarded in the following areas:

- Drug and Alcohol Abuse Prevention Research Grant Announcement. The focus is on (1) etiologic research to identify factors that might place individuals at-risk of drug and alcohol abuse and factors that mitigate such risk; and (2) clinical intervention research to develop and test strategies that will prevent the onset of drug and alcohol abuse.
- Cocaine Research to clarify (1) the nature and extent of cocaine use; (2) the impact of such use on individuals' performance and functioning; (3) neurobiological concomitants of cocaine use; and (4) effective methods of treating and preventing cocaine use.
- Research on Children of Alcoholics. Areas of special interest include research on biological markers; coping mechanisms of invulnerable children; family interaction and the influence of children on the drinking status of the alcoholic parent; and the relationship between excessive drinking and (1) sexual abuse and (2) violent behavior directed toward the children and spouse.
- Research Grants on Alcohol-Related Performance Effects and Traumatic Injury. One area of special interest is the conduct of controlled studies on the design, development and assessment of prevention and intervention programs which efficiently and effectively provide new techniques and strategies for reducing alcohol-related deaths and injuries for groups and individuals known to be at high risk.
- Community Prevention Research in Alcohol and Drug Abuse designed to encourage rigorous scientific study of substance abuse prevention techniques at multiple levels in the community (e.g., individual, small group, family, parent groups, and community boards) in order to determine their efficacy in preventing the onset of both alcohol and drug use and the patterns of abuse.

Grant programs administered by the Centers for Disease Control within the PHS dealing with injury prevention have not yet been scheduled, and are pending passage of the FY 1988 appropriation.

Additionally, the Family Support Administration will issue separate grant announcements for the following programs during FY 1988: the Office of Community Services, the Office of Family Assistance and the Office of Child Support Enforcement. These announcements will deal with at-risk youth and family-related issues based upon the purpose and legislative intent of each program.

G. Family Caregiving Initiative (Family Support Activities)

Family Caregiving has been designated by the Assistant Secretary for Human Development Services as a Special Initiative. Just as with Youth 2000, there is a "cross-program" interest among the Program Administrations within HDS.

The Family Caregiving Initiative is a pledge among public agencies, voluntary organizations and organizations representing the interests of our client populations to share information and provide better training for professionals, paraprofessionals, volunteers and the caregiving families with whom they are working. The Family Caregiving Initiative is also an effort to mobilize communities so that family support resources will be developed and coordinated where they are not currently available.

The need for The Family Caregiving Initiative is growing. Family members provide loved ones who have temporary or chronic illnesses or impairments with care that prevents unnecessary hospitalization or institutionalization. The growing need for care includes:

- Approximately five million older Americans living in their communities who need assistance to perform one or more personal care activities. By 2030, there will be about 65 million older people—and with advanced age comes increased risk of illness and impairment.
- Ninety percent of the nearly four million individuals with developmental disabilities live at home with their families; and the number of infants with

developmental disabilities is increasing as a result of the use of drugs and alcohol by pregnant teenagers.

• Many more of the estimated 29 million Americans that suffer from mental illness are remaining in their own homes and communities.

Despite the growing need, the availability of caregivers is decreasing because women, the traditional caregivers, are now working outside the home.

The key to meeting caregiving needs is a new level of awareness and a shifting of service priorities so that the caregiving family is supported as a unit, rather than providing the client with one set of services and the caregiver with another. Caregiving families need to understand that physical and emotional stress is common, and that resources are available and should be used.

Professionals, paraprofessionals and volunteers need to be educated to work with the family as a unit and to train family members in how to access services and provide needed care. Communities need to disseminate information about the needs of caregiving families and the resources that are available within their respective communities.

In addition to the crosscutting priority area in this announcement: 10.1, "Training Caregiving Families and Providing Practical Support," other family support priority areas include: 7.10, "Utilizing Family-Based Prevention Approaches for Reunification and Replicating Specialized Foster Care Programs," and 9.1A, "Field Initiated Research on Community Based Systems of Care."

More than 60 projects have been funded throughout the Department of Health and Human Services to address the needs of caregiving families. For more information about these projects, refer to the description under priority area 10.1.

G. Technical Assistance Workshops for Prospective CDP Applicants

HDS has tentative plans to conduct CDP workshops to provide guidance and technical assistance to prospective applicants, pending the availability of funds. *For information on the exact time and location of each workshop, you may call the contact persons listed below under each city or (202) 755–4633.* The proposed schedule for the three-hour workshops is as follows:

Albuquerque, New Mexico;
Contact Person: Ed Henderson
Telephone Number: (214) 767–4540
Atlanta, Georgia;
Contact Person: Sherrill Ritter, Jr.
Telephone Number: (404) 331–2287
Boston, Massachusetts;
Contact Person: John Thomas
Telephone Number: (617) 565–1101
Chicago, Illinois;
Contact Person: Robert Moman
Telephone Number: (312) 353–8322
Dallas, Texas;
Contact Person: Ed Henderson
Telephone Number: (214) 767–4540
Denver, Colorado;
Contact Person: Harry Frommer
Telephone Number: (303) 844–2622
Kansas City, Missouri;
Contact Person: Linda Carson
Telephone Number: (816) 374–3961
Los Angeles, California;
Contact Person: Richard Silva
Telephone Number: (415) 556–7800
Miami, Florida;
Contact Person: Sherrill Ritter, Jr.
Telephone Number: (404) 331–2287
New York, New York;
Contact Person: Junius Scott
Telephone Number: (212) 264–3472
Phoenix, Arizona;
Contact Person: Richard Silva
Telephone Number: (415) 556–7800
Portland, Oregon;
Contact Person: Ed Singler
Telephone Number: (206) 442–2430
Pueblo, Colorado;
Contact Person: Harry Frommer
Telephone Number: (303) 844–2622
San Antonio, Texas;
Contact Person: Ed Henderson
Telephone Number: (214) 767–4540
San Francisco, California;
Contact Person: Richard Silva
Telephone Number: (415) 556–7800
Seattle, Washington;
Contact Person: Ed Singler
Telephone Number: (206) 442–2430
Washington, DC, Tuesday, February 2, 1:00–4:00 p.m. HHS North Auditorium, 330 Independence Avenue, SW.
Contact Person: Richard Jakopic
Telephone Number: (202) 245–6233

I. Dissemination Workshops on CDP Projects

HDS annually sponsors Dissemination Conferences in Washington, D.C. and around the country to showcase the findings and products of funded projects in specific topical areas. In order to be placed on a mailing list for information about these Conferences, send a name and mailing address to Richard Jakopic, Division of Research and Demonstration/OPPL, Room 721B, Office of Human Development Services/HHS, 200 Independence Avenue, SW., Washington, DC 20201.

J. Continued Emphasis on Joint Funding With Other Federal Agencies

In order to avoid duplication and in order to maximize resources, HDS has joined with other Federal agencies in planning and coordinating efforts to deal with issues of national concern. During the past two years, several interagency agreements were established between HDS and other Federal agencies. Examples are as follows:

• In FY 1986, several interagency agreements between HDS and the Employment and Training Administration (ETA) within the Department of Labor (DOL) led to the solicitation of applications in the FYs 1986 and 1987 CDP announcements addressing youth issues of national concern. Subsequently, during FY 1987, the Secretary of each Department signed a Memorandum of Agreement between HHS and DOL related to cooperative activities in the Youth 2000 Initiative.

• HDS and the National Institute of Corrections plan to continue the effort begun in FY 1987 to strengthen families through demonstrations of parenting programs for incarcerated parents.

• HHS and the Department of Defense (DOD) have an Interagency Agreement designed to improve services to military families without the need for new Federal funds, reduce duplication of efforts, and increase the cooperation between HHS and DOD family support services.

• HDS and the National Institute of Mental Health plan to continue the effort begun in FY 1987 to strengthen linkages between the mental health service system and the child welfare system.

K. Statutory Authorities

The individual statutory authorities under which grants and cooperative agreements will be awarded through the HDS Coordinated Discretionary Funds Program are as follows:

• Head Start: Head Start Act, Subchapter B of the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 9831 et seq.);

• Child Welfare Services: Adoption Assistance and Child Welfare Act of 1980 (42 U.S.C. 626); section 426 of the Social Security Act, as amended;

• Runaway Youth Program: Runaway and Homeless Youth Act, as amended (42 U.S.C. 5701 et seq.);

• Child Abuse: Child Abuse Prevention and Treatment Act (42 U.S.C. 5101 et seq.);

• Adoption Opportunities: Title II of the Child Abuse Prevention and Treatment and Adoption Reform Act of 1978, as amended (42 U.S.C. 5111 et seq.);

• Native Americans: Native American Programs Act of 1974, as amended (42 U.S.C. 2991 et seq.);

• Older Americans: Training, Research and Discretionary Projects and Programs: Title IV of the Older Americans Act, as amended (42 U.S.C. 3001 et seq.);

• Social Services Research and Demonstrations: Section 1110 of the Social Security Act, as amended (42 U.S.C. 1310); and

• Family Violence Prevention and Services: Family Violence Prevention and Services Act (42 U.S.C 10401).

Part II—Priority Areas

Preceding the actual descriptions of each Priority Area for which applications are solicited through the announcement, two indexes are presented below for easy reference by potential applicants.

Index One is a reference of Priority Areas by an alphabetical listing of Key Words or Topics.

Index Two is a reference of Priority Areas by the HDS Programs or program Administrations.

Index One: Priority Areas Listed by Key Word

Abuse, 4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 4.9, 4.11, 4.12, 9.4C, 10.2
Adoption, 5.1, 5.2, 5.3, 5.4, 5.5
AIDS, 7.8
Alcoholism, 7.2, 8.1, 9.3A, 9.4B
American Samoans, 8.4
Caregiving, 9.4A, 9.4D, 10.1
Challenge Grants, 3.1, 3.2
Children, 4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 4.9, 4.12, 5.1, 5.2, 6.4, 7.8
Child Development, 2.2
Child Welfare, 7.3, 7.4, 7.9
Community-Based, 1.2, 1.3, 8.2, 9.5B
Curriculum, 2.3, 4.5
Elderly Persons, 9.1A, 9.1B., 9.2A, 9.2B, 9.2C, 9.3A, 9.3B, 9.4A, 9.4B, 9.4C, 9.4D, 9.4E
Employment, 8.2, 8.3
Evaluation, 7.3, 7.4, 7.5, 10.5
Family, 4.6, 4.8, 5.1, 5.2, 5.3, 7.5, 7.6, 7.9, 10.1, 10.2
Family Support, 7.10, 9.1A, 10.1
Family Violence, 10.2
Fatalities, 3.4, 4.9
Foster Care, 7.1, 7.6, 7.7, 7.10
Foundations, 3.1, 3.2
Head Start, 2.1, 2.2, 2.3, 2.4
Historically Black Colleges, 10.4
Homeless, 3.2, 3.3
Incarcerated, 3.5
Independent Living, 3.2, 7.7
International, 10.3
Local Government, 1.1, 4.4, 5.4, 6.3
Mental Health, 7.9
Migrant, 2.2
Minority, 2.2, 3.3, 4.3, 4.5, 5.2, 6.4, 7.2, 8.1, 8.2, 8.3, 9.1B, 9.2D1, 9.3A, 10.4, 8.4
Native Americans, 4.5, 6.4, 7.2, 8.1, 8.2, 8.3, 9.1B, 9.3A
Neglect, 4.1, 4.2, 4.3, 4.4, 4.7, 4.8, 4.9, 4.12
Older Persons, 9.1A, 9.1B, 9.2A, 9.2B, 9.2C, 9.3A, 9.3B, 9.4A, 9.4B, 9.4C, 9.4D, 9.4E
Parent, 2.4, 3.5, 5.3
Public/Private Partnership, 1.1, 4.4, 5.4
Recruit, 5.2, 7.1
Research, 4.8, 4.10, 4.12, 7.3, 7.4, 7.5, 9.1A, 9.1B
Runaway, 3.3
Sexual Abuse, 4.5, 4.6, 5.5
Special Needs, 5.1, 5.2, 5.5
Study, 4.8, 4.10, 4.12, 7.3, 7.4, 7.5, 9.1A
Substance Abuse, 8.1, 9.3A
Suicide, 3.4
Teen Pregnancy, 1.3, 4.11
Training, 2.2, 6.1, 6.2, 6.4, 9.2A, 9.2B, 9.2C, 9.2D1, 9.2D2, 9.2E, 9.3A, 9.3B, 9.3C, 9.4B, 10.2, 10.4
Treatment, 4.6, 4.7, 9.4A, 9.4D, 10.2
Tribally Controlled Community Colleges, 6.4, 9.2D2, 10.4
Urban, 3.4
Youth, 1.1, 1.2, 1.3, 3.1, 3.2, 3.3, 3.4, 4.11, 7.7, 8.2

Unique Cross-Program Priority Areas

10.1 Training Caregiving Families and Providing Practical Support
10.2 Training and Technical Assistance for Family Violence Prevention and Treatment Programs
10.3 Transfer of International Innovations
10.4 Increasing Minority Organizations' Participation in HDS Programs
10.5 Human Services Management Improvement through Information Technology, Data Application, and Evaluation

Youth 2000

An overview of the Youth 2000 initiative and its objectives is included in Part I of this announcement.

1.1 Support for the Development of City, County or Other Local Public/Private Sector Youth 2000 Partnerships

Increased efforts are needed at the city, county or other local levels to focus broad attention on, and to create awareness about, the issues that threaten to prevent a sizeable proportion of young people from successfully making the transition from adolescence into productive adulthood. Among others, these include the problems of illiteracy, dropping out of school, pregnancy, substance abuse, and accidents and violent behavior. Beyond awareness, sustained, collaborative action at these levels is also needed to identify, develop and implement strategies for addressing these youth problems based upon local perceptions of priorities and conditions.

The problems experienced by today's youth are complex and interrelated, cut across agency and institutional settings and impact upon all sectors of society. Broad based partnerships which draw upon the resources, expertise, energies, commitment and ideas of many different groups and individuals, therefore, are needed to begin to undertake concerted efforts at the community level to improve conditions for young people, particularly those who are especially at risk.

Grants under this priority area will be awarded for the development of broadly based public/private sector Youth 2000 partnerships or coalitions at the city, county or other local levels which will spearhead the conduct of community-based public education/awareness campaigns as well as the development and implementation of action plans designed to address local youth problems. Each partnership project will be expected to generate the financial, programmatic, political and other types of support and commitments that will be required for its continued operation beyond the period of Federal support and for the conduct of long-term efforts designed to improve the status of and conditions for youth who are at-risk of not successfully making the transition into adulthood.

The partnerships envisioned under this priority area are broad based confederations of public and private sector organizations and individuals within the locality which join together to pool their expertise and resources to improve conditions for youth, particularly at-risk youth. Such partnerships might be focused upon a specific youth problem or might choose to more broadly address a range of youth issues within the community. Depending upon the types of youth concerns to be addressed, membership in these partnerships or coalitions would vary, and would involve appropriate representatives of both the public and private sector entities—e.g., local education agencies, agencies of local government, businesses or corporations, voluntary organizations, foundations, religious organizations—as well as individuals that pledge to commit time, financial support, expertise, or other resources in support of the local Youth 2000 campaign. Similarly, the types of pledges that would be made by these members would also vary, depending upon the specific youth issues and problems that would be addressed by the local partnership.

The following examples of membership pledges that might be made to a local Youth 2000 campaign are illustrative only, and are provided solely to give an indication of the nature and scope of the commitments that would be expected of the members of the partnership projects to be supported under this priority area. None of these examples, by itself, constitutes a partnership. Rather, the individual pledges that are made by each member (or jointly by two or more members) must, collectively, constitute a multi-faceted approach to addressing the youth issue or set of problems which are the focus of the local Youth 2000 campaign.

As a member of a community partnership, for example, a local advertising firm might pledge to undertake a campaign designed to increase public awareness about the problems to be addressed by the local Youth 2000 campaign, the need to focus upon these youth issues and the partnership effort that has been established within the community to undertake efforts directed at these concerns.

Similarly, a business or corporation might pledge to adopt a junior or senior high school and provide orientation to students on the world of work and to the skills that will be required for various types of jobs in the future. It might also agree to employ a specific number of students on a full or part-time basis and/or provide release time to employees to serve as mentors or tutors to the students of the adopted school.

As their contribution to a community partnership, public and/or private sector agencies might pledge to provide young people with opportunities for leadership development and civic participation.

As other examples, a youth organization or program might pledge to expand its membership to include hard-to-reach youth populations who would benefit from such participation but who are currently underserved by the organization or program; and a local newspaper or a radio or television station might pledge to provide coverage on youth problems within the community and on the efforts that are being conducted by the partnership, including its various members, to address these problems.

Applications for partnership grants under this priority area must be submitted by an agency or organization, or by a consortium of two or more such agencies or organizations, with a demonstrated capacity to carry out the proposed effort and which, at least during the initial stages of the local Youth 2000 campaign, would serve as the nucleus of or the steering committee for the establishment, promotion and maintenance of the community partnership. Letters of intent or interest from public and private sector entities or individuals regarding potential membership in the partnership, including the types of commitments they might make to the local Youth 2000 campaign, must be included as evidence of broad support for the undertaking of such an effort and for its continuation following the period of Federal support.

An overview of youth problems in the city, county or community, supported by local data, must also be presented in the proposal, including the problem areas that the partnership would address as well as the initial activities and events that would be undertaken to address these problems, with appropriate rationale. Additionally, proposals must, at a minimum, address the following: how overall guidance and direction would be provided to the partnership relative both to its establishment and ongoing maintenance; how members would be recruited and the phasing, if any, of special recruitment drives to be conducted; the types of consultation that would be available to organizations or individuals interested in becoming members but requiring assistance regarding how they might most effectively participate; how members would be kept informed about the partnership's plans and activities; and the efforts that would be undertaken to provide for the continued operation of the partnership and its activities beyond the period of Federal support.

Federal funding for partnership grants under this priority area is limited to a maximum of $75,000 per project for a period not to exceed 17 months.

1.2. Involvement of Young People in Community-Based Efforts To Address Youth Needs and Problems

The vast majority of young people feel that they have access to meaningful social roles within their families, schools and communities which give them a sense of competence, make them feel that they are valued members of society and enable them to look forward to productive, responsible and rewarding adulthood. As such, most youth do not experience the severe alienation and frustration which can result in problems such as violence, dropping out of school, extensive substance abuse and other forms of acting out behavior. Other young people, lacking the sense that they have a stake in society and control over the direction of their futures, experience rejection and defeat and engage in counter-productive behavior because they feel that they have little to lose, either in the present or in the future, by doing so.

Many communities are already engaged in activities designed to provide young people with meaningful roles within the institutions which affect their lives and provide them with opportunities to identify, problem solve and take action around the issues which confront them and their peers. In many instances, however, the youth who are the hardest to reach are not involved in these efforts. Additional efforts, therefore, are needed which allow young people, particularly those who are at-risk of not making a successful transition into adulthood, to actively engage in such activities. Such efforts are important not only because they enable young people to develop skills, but also because they increase confidence and self-esteem and promote the feeling that young people have control over their present and future lives. Additionally, young people directly experience or observe the causes and consequences of youth problems such as substance abuse, dropping out of school and teenage pregnancy. As such, they have a unique perspective to offer in planning and implementing community efforts designed to address these problems.

The purpose of this priority area is to promote and stimulate the development or expansion of community-based efforts designed to involve youth as active, legitimate partners in efforts designed to focus upon local youth issues; to identify solutions to these problems; and to implement strategies, actions, programs and/or policies to address these concerns.

The youth issues to be addressed by these community-based efforts must relate to one or more of the concerns encompassed by the Youth 2000 initiative: preparation for social and economic self-sufficiency; and reductions in illiteracy, school drop out rates, substance abuse, intentional and unintentional injuries and death (automobile accidents, homicides and suicides) and teenage pregnancy. Depending upon local priorities and other considerations, applicants may propose to focus upon youth problems within one institutional setting impacting upon youth, such as a school or a local school system, or may be more broadly based and propose to focus on youth problems which cut across institutional settings.

Applications under this priority area must be submitted by a public or private agency or organization appropriate to the youth issue or issues to be addressed and which has the capacity to implement the programmatic and/or policy changes which might result from the planning efforts that are conducted. As appropriate, applicants may include Indian Tribal Organizations and other minority agencies. For example, a local school or school district might propose to undertake efforts to improve literacy rates, reduce high school drop out rates and/or enable pregnant or parenting teenagers to remain in or to return to school. In addition to youth who are themselves at-risk of or who have experienced these problems, other participants might include parents, members of the business community and others. Similarly, a broad based committee, composed of young people as well as adults, could be established by a private, nonprofit, youth-serving agency to address substance abuse or other pressing youth needs in the community. Letters of support relative to their participation in the planning for and implementation of strategies to deal with the problems to be addressed must be included from those agencies and organizations (e.g., local governmental agencies, members of the business community, private sector agencies) whose involvement would be pivotal to the proposed undertaking.

In order to avoid negative labelling of the youth participants, applicants must describe how a broad based mix of young people would be involved in the planning and action processes, including the recruitment efforts that would be conducted to secure the participation of both at-risk and not-at-risk youth in such an effort.

Applicants must also describe the key tasks that would be undertaken in implementing the project as well as how the youth members would be involved, including the training and/or other types of assistance that would be provided to enable them to actively participate in the process. Applicants must also provide an assurance that, if funded, the project's final report would include sufficient documentation and information on the implementation of the project, including problems and how they were overcome, so that the report would be useful to other communities interested in undertaking similar efforts. Finally, applicants must describe how the project supported by the grant would be continued following the period of Federal support.

Federal funding for projects under this priority area is limited to a maximum of $75,000 per project for a period not to exceed 17 months.

1.3 Support for the Planning, Development and Implementation of Community-Based Efforts to Reduce Teenage Pregnancy

Over one million teenage girls become pregnant each year and, in 1986, approximately 480,000 adolescents became mothers. The costs associated

with teenage pregnancy, both to the individuals themselves and to society, are enormous. Half of the teenagers who give birth do not complete high school, and the magnitude of the dropout rate increases the younger the age of the mother at her first birth. A 1983 survey conducted by the Charles Stewart Mott Foundation found that 71 percent of the mothers who had their first child at age 14 or younger dropped out of school, as did 50 percent of the mothers aged 15–17 and 33 percent of the mothers aged 18–19. The high school dropout rate among teenage fathers, similarly, is high: These young men are 40 percent more likely to drop out of school than are their peers.

The health costs associated with teenage pregnancy are also high. Twenty percent of all premature infants are born to teenagers. Due to various factors, including poor prenatal care, the infants of teenage mothers are more likely to have lower birthrates as well as other medical problems and deficits than do the children born to mothers who are over the age of 20.

In 1986, nearly $18 billion was expended in Aid to Families with Dependent Children (AFDC) benefits, Medicaid and food stamps for families formed as a result of a teenage birth. The average cost to the taxpayer for a teenager on public welfare is estimated to be $37,500 by the time her child is age 20. These costs would be considerably reduced, by about one-third, if these mothers had waited until age 20 to have their first child.

Many factors contribute to the problem of teenage pregnancy. These include poor self-image and low self-esteem; the absence of orientation toward future goals; limited (often negative) prospects regarding the future; poor decision-making skills; immaturity; and limited information about human sexuality. Lacking a sense of purpose and having limited expectations both educationally and occupationally leads many young people, both male and female, to feel that they have little to lose—either in the present or future—by having a child or by dropping out of school.

The purpose of this priority area is to provide support for the development and implementation of comprehensive, community-based efforts designed to reduce the incidence of teenage pregnancy. The efforts proposed must be broad based—involving, for example, schools, the business community, churches and synagogues, youth-serving organizations, local governmental officials, the media, health care providers, parents, youth themselves and others—and must be directed toward planning, developing and implementing community-specific strategies and activities which will retarget existing community resources and impact upon the problem of teenage pregnancy.

The activities to be implemented as part of the proposed project should provide opportunities for young people, both male and female, to obtain the information and experiences they require to make informed decisions about their lives, including not becoming a teenage parent and staying in school; to view themselves and their futures more positively; and to increase their sense of purpose and their appreciation of the range of options that are available to them. Elements of such projects might include mentoring, tutorials, life skills training and innovative approaches to working with at-risk youth.

The efforts that are supported under this priority area may focus upon a specific neighborhood with a high incidence of teenage pregnancy or may be community-wide. Data on the incidence and extent of teenage pregnancy and related problems (e.g., school dropout and youth unemployment rates) in the area to be impacted as well as a brief description of existing programs or activities within the community which focus on the problem must be included in the application.

Letters of commitment from at least three organizations that would participate in the planning and implementation of the proposed project must be included as part of the application. Additionally, the application must contain assurances that those agencies and organizations that would be involved in implementing the activities in the plan would participate in the planning phase. The identification and commitment of resources to support the implementation of the planned programs and activities must be addressed as one task of the planning phase of the project.

Eligible applicants are community agencies or local organizations which are affiliated with national organizations. This restriction is designed to increase the likelihood of the replication of the efforts supported under this priority area in additional communities across the country in future years without additional HDS resources.

Federal funding for projects under this priority area is limited to a maximum of $50,000 per project for a period not to exceed 12 months.

Administration for Children, Youth and Families

Head Start

2.1 Head Start Cultural Enrichment Modules

Over the past several years, the Head Start Bureau in conjunction with the early childhood field has developed and widely disseminated four curriculum models as part of its strategy for Spanish-speaking children. These curricula, as well as others, can be enriched or modified to serve the children and their families of the diverse cultures represented in the Head Start program.

In order to augment the previously developed curricula and in response to requests from Head Start programs for enrichment materials across a wide variety of cultures, HDS seeks applications which address the needs of a wide variety of families of diverse cultures and backgrounds enrolled in Head Start. These families include all minorities traditionally served by Head Start as well as new immigrants to this country such as Asians, smaller groups of refugees, and culturally different groups which have been in this country for some time but whose uniqueness is not yet adequately reflected in Head Start's educational program.

The goal is to develop printed and/or audio visual materials for the Head Start staff to enhance cross-cultural understanding among staff and families in Head Start. This will augment the on-going curriculum by providing pertinent information about the backgrounds, cultures, beliefs and behaviors of children and families from cultures represented in Head Start programs.

Because language and culture are so interrelated, it is expected that grantees under this priority area will develop modules which will foster the use of English as a second language and will address one or more of the following topics: cultural mores, food preferences, child rearing practices, health and mental health attitudes, rules of expected conduct in that culture and the roles of parents and elders within the family unit and wider circle of friends.

Grantees under this priority must involve members of the particular cultural group in the development of the modules. Therefore applications should include a description of the population for whom the materials are being developed as well as a description of their role in the development of the materials. In order to ensure that the materials reflect a cultural consensus, a minimum of 20 families of the targeted cultural group must participate in the development. This group may consist of presently enrolled Head Start families or a mix of Head Start families and other families drawn from the larger community. Applicants must also provide a plan for securing at least 50 Head Start families or families from other child care programs and 50 families from at least one other cultural group or a mix of other cultural groups for the second year. These families will be in the pool used to field test the materials, to provide adequate critique of the materials and approaches, and to assess their ability to enhance the understanding and appreciation of that culture by other cultural groups.

As a requirement of the grant, applicants must propose a process by which the newly developed Head Start cultural enrichment modules could be incorporated by other grantees into the curriculum they are using.

Grantees funded under this priority area will be required to cooperate with a third party evaluator to be identified and paid for by ACYF.

Based on a careful review of the outcomes of the various grants funded under this priority area, HDS will determine which specific products and approaches will be reproduced and disseminated to Head Start programs nationwide. These materials will be disseminated to other Head Start programs which need more information and tools with which to work with various cultural groups. Dissemination will take place through a network of ten Head Start Resource Centers and a Multicultural Resource Support System established in 1986, consisting of 25 Head Start grantees.

HDS intends to fund projects of 24 months duration with the Federal share not to exceed $40,000 per project per year. The budget should include the expenses for one individual to participate in an annual meeting each year in Washington, DC of all successful applicants under this priority area. Eligible applicants are Head Start grantees and delegate agencies.

2.2 CDA Training-Instream Migrants/ Geographically Isolated Programs

The number of infants, toddlers and 4 and 5-year old children in group programs has multiplied dramatically in recent years in public school kindergartens, pre-kindergartens, Head Start programs, day care, and many other privately and publicly-funded settings. Families place great trust in the staff of these programs, and it is the daily performance of the teacher or caregiver that determines the quality of the children's preschool experiences. The Child Development Associate (CDA) competency standards and assessment system have been developed to support quality programs for preschool children by providing standards for training, evaluation and recognition of teachers and caregivers based on their ability to meet the unique needs of this age group.

Although formal training is not a requirement for the CDA assessment, the majority of candidates enroll in child development courses to increase their knowledge and understanding and, in part, to prepare for CDA assessment.

Initiated in 1971, the CDA National Credentialing program is a major national effort to evaluate and improve the skills of caregivers in center-based, family day care, and home visitor programs. A Child Development Associate is a person who has demonstrated competence in caring for young children during an assessment conducted by the CDA National Credentialing Program. Competent caregivers are awarded the Child Development Associate credential. An optional bilingual specialization is available to candidates working in bilingual (Spanish/English) programs. Nearly 20,000 child care providers have earned the CDA credential since 1975, and more than half of the States have incorporated the credential in child care licensing requirements.

However, the majority of those credentialed to date have been individuals located in geographic areas where access to the community college system is relatively easy.

Therefore, HDS wants to stimulate two-year community colleges to develop ways to deliver training based on the CDA competencies to child care providers who are located in hard-to-reach areas and to prepare up to twenty candidates for the successful completion of the assessment process and award of the credential by the CDA national body. Such individuals may be hard-to-reach because they are located in remote rural areas, working with instream migrants or are isolated due to geography, such as the Atlantic and Pacific Island areas, Indian Reservations and Alaskan Villages.

Applicants will be expected to initiate new or adapt their current curriculum for center-based caregivers of infants and toddlers (0–3 years) and/or of preschool age children (3–5 years); and/or family day care providers; and/or home visitors to meet specific requirements for CDA assessments in these settings.

It is expected that candidates will be awarded appropriate college credit for work successfully completed. In developing delivery systems for hard-to-reach locations, it is anticipated that applicants will propose the use of a variety of technologies. Among them, for example, might be the use of telecommunication and/or video instruction in conjunction with itinerant instructors and periodic cluster sessions for participating candidates. Experience has shown that some CDA candidates may need considerable tutoring relative to basic academic skills.

The outreach and recruitment endeavors of applicants under this priority area should include soliciting the participation of Head Start parents who have shown interest in entry level positions in child care programs, including family day care providers; as well as current Head Start educational staff who do not have a CDA credential.

Applicants must include documentation which confirms that the individuals to be served are, in fact, in hard-to-reach locations, or isolated by other factors and have no other means of participating in CDA training.

Information about the CDA requirements is available from the Council for Early Childhood Professional Recognition, 1718 Connecticut Avenue, NW., Suite Fifth Floor, Washington, DC 20009. The toll-free telephone number is 800–424–4310.

Applicants should describe proposed efforts to disseminate findings at local and State levels and participate in two meetings in Washington, DC of all successful applicants under this priority area.

Eligibility under this priority area is restricted to two-year community colleges.

HDS anticipates funding 17-month projects having a Federal share not to exceed $80,000 per project. The budget should include the expenses for one individual to participate in two meetings in Washington, DC and the cost of CDA application, assessment and credential award for a minimum of 15 successful candidates.

2.3 Head Start Curriculum Models for National Dissemination

Head Start programs are required to develop a written education plan which includes a developmentally appropriate curriculum. It is the responsibility of staff and parents to determine which curriculum best meets the needs of the children and families to be served.

It is the intent of this priority area to work with a small group of selected grantees or delegate agencies which have a locally developed curriculum that meets requirements of the Head Start Program Performance Standards, and an

BEST COPY AVAILABLE

VOL 52 ISS 250 DEC 30 1987 UMI

accompanying staff training plan in the use of the curriculum. The programs funded under this priority area would be part of a national effort to field test their material and, based on its suitability, prepare it for dissemination for other Head Start programs nationwide.

It would be expected that the locally developed curricula would be piloted in as many classes as possible in order to provide adequate critique and refinement of the materials and approaches. In addition, it is recommended that grantees draw on the expertise of early childhood education faculty in a local college or university and that a résumé for this individual(s) be included in the grant application.

In year one grantees will concentrate on refinement and/or review of their curriculum by using the materials in no less than five classrooms and make changes based on staff, parent and child evaluations. In year two the curriculum models will be formally assessed as to their effectiveness and general applicability through the use of a third party evaluator. In order to accomplish the second year assessment, the applicants must demonstrate that they have a minimum of ten classrooms within a second Head Start program which serves a different population in terms of racial/ethnic groups and/or urban/rural location and which is willing to participate in the assessment phase.

Head Start applicants under this priority area are requested to describe the curriculum content and provide a brief overview of the process that was followed in developing their curriculum for the Head Start center-based option which, within a philosophical framework, includes developmentally appropriate activities, i.e., stories, games, foods, play accessories, field trips, and parent activities which although unique to their communities, would be appropriate for use by other Head Start grantees. A copy of their curriculum should be enclosed with each copy of the application.

In addition to meeting the Head Start Program Performance Standards, it is expected that the locally developed curricula would also compare favorably with the following three documents: Developmentally Appropriate Practices, National Association for the Education of Young Children (NAEYC); National Accreditation Criteria and Procedures of the National Academy of Early Childhood Programs (NAECP); and A Guide for Education Coordinators in Head Start (ACYF).

Because of the two year timeframe, only grantees and delegate agencies who have curricula which are in keeping with the various elements described above and which contain the following elements are encouraged to apply.

1. A discussion of the theoretical or philosophical developmental framework on which the curriculum is based.
2. A description of the population for whom the curriculum was developed.
3. Clearly stated goals and objectives for children and/parents.
4. Activities and materials which are logically related to those objectives.
5. Training materials on the use of the curriculum for staff.

Upon completion of the grant work in this priority area, HDS will disseminate a compendium of Head Start developed curricula and training approaches as part of a nationwide effort to stimulate Head Start grantees to enhance their educational components.

HDS anticipates funding projects of 24 months duration with a Federal share not to exceed $28,000 per project per year. The budgets should include the expenses for one individual to participate in three meetings in Washington, DC. Year two funding will be based on successful completion of year one grant activities and requirements. Eligible applicants are Head Start grantees and delegate agencies.

2.4 Parent Involvement in Head Start Activities

Head Start history indicates, and research evidence continues to support the premise that when parents become more involved in Head Start programs they experience greater feelings of mastery and greater current life satisfaction. This meaningful participation by parents in Head Start program activities leads to their feeling more skillful in dealing with life's problems, and feeling more satisfied with the current quality of their lives. Some parents report that Head Start changes their lives, expands their world, and improves their perceptions of themselves and their children. Additionally, some claim to feel more competent as parents, and understand better what quality education means for their children. Parents who have been actively involved in Head Start decision-making and policy-making activities (such as provided through the policy groups), report they have a better understanding of the political process; a greater sensitivity for how governments work; and feel more powerful and skilled in approaching bureaucratic organizations and institutions when attempting to have their family or community needs met.

In an attempt to capitalize on these positive causes and effective powerful outcomes, HDS will fund selected Head Start grantees to expand and build upon their already existing parent involvement component by focusing on demonstrations that will increase the number of parents participating in the program and that will further enhance the quality of this vital component. Such demonstrations should address one or more of the following areas:

1. *Working With Community Colleges:* Parents are their children's primary and most influential educators. Parents, through their participation in Head Start, become more skilled parents who are better able to assist their children in all aspects of their development. They learn about child growth and development by participating in various parenting education courses. Grantees should provide opportunities for parents and staff to receive academic credit for participating in the parenting education courses, such as LOOKING AT LIFE and EXPLORING PARENTING in order to encourage more parents to become involved in the program and with their children's education. Applicants focusing on this activity should indicate how they will work with the local college or junior college to increase parents' participation through offering college credit, or CEUs (Continuing Education Units) for the classes they take with Head Start. It is anticipated that each grantee will include at least twelve parents in the program each year. The goal of this option is to demonstrate to parents the value of education.

2. *Economic Self-Sufficiency:* A few parents through participation in the various aspects of Head Start as observers, volunteers and paid staff become able to lift their families from poverty and move towards greater economic self-sufficiency. To systematically assist more parents to become economically self-sufficient, grantees should (1) develop unique activities that cut across components and provide parents the opportunity to learn more about Head Start and the functions of different staff members in order to expose them to more career choices, and to gain work experience, and/or (2) work closely with other community organizations or agencies to provide experience and job training for Head Start parents. Grantees choosing this option may use the unpublished EXPLORING SELF-SUFFICIENCY(ESS) booklets that were developed by Head Start as resource material. ESS is designed to explore areas that can affect the financial security of the family in a supportive, non-judgmental atmosphere.

3. *Parent Initiated Projects:* Head Start has always emphasized the importance of parents as participants and decision makers in the program. Parents bring to Head Start a tremendous amount of information and insight related to the importance of Head Start as a comprehensive child development program. They know and understand the needs of their local communities. Under this option grantees are invited to submit projects to be designed by parents that serve their unique needs as Head Start decision makers; i.e., developing special training courses that enhance their skills as decision makers and/or developing projects that will increase the overall number of parents who actively participate in Head Start. These activities may be targeted to particular parent groups such as fathers, single parents, teen parents, and working parents.

4. *Project Literacy:* Illiteracy in the United States has been of concern to many persons at all levels of society. In 1983 the President announced a campaign to combat illiteracy among adults. Head Start programs have been involved in the fight against adult illiteracy almost from their inception. In addition, HDS initiated an effort in 1984 which was designed to encourage several Head Start grantees to develop their own models for improving functional illiteracy among adults in the communities where the programs operated. Sixteen grantees participated in the pilot literacy effort. The experience of each grantee in starting an adult literacy program, recruiting volunteer teachers, securing training materials, conducting outreach for trainees, soliciting support from other community organizations, working out transportation arrangements where necessary, and all other aspects of program activity has been compiled in a descriptive evaluation report. Using the "Head Start Adult Literacy Activity Evaluation: Final Report" (April 27, 1986) grantees can replicate some aspects of the literacy project that seem promising for their local community. Each project must minimally include: interagency cooperation, needs assessment, identification of the target population (including Head Start parents, other family members or community residents) to be served and recruitment strategies to be used.

Applicants applying for these grants should indicate how they will implement the program i.e., expectations, targets, recruitment procedures, number of parents involved in these activities and the program's accomplishments.

HDS anticipates funding 24-month projects having a Federal share not to exceed $25,000 annually per project per year. The budgets should include the expenses for one individual to participate in two meetings in Washington, DC during the 24-month funding.

Runaway and Homeless Youth and Families

3.1 Challenge Grants to Community Foundations: Mainstreaming Troubled Youth

The purpose of this priority area 3.1 and the following priority area 3.2 is to stimulate community strategies that address critical issues involved in meeting the needs of at risk adolescent youth:

- An estimated 2.4 million youth are failing in school or work or are being failed by their families.
- Approximately one million youth, some as young as seven years old, are running away from home—often from life threatening situations.
- In 1984 there were 276,000 youth in foster care in the United States. Twenty four percent of these were between the ages of 16–20 and 50% were between the ages of 6–15.
- Of the number of youth seen in the runaway shelters, HDS estimates that approximately 35.5% are homeless.

Using the concept of challenge grants HDS hopes to stimulate both short and long term activity to address these problems.

Grants to local or State foundations will be made for three years for specific project activity described below and with the submission of a yearly application.

The long term purpose of challenge grants to foundations is to stimulate the development of endowed restricted funds for the support of small and medium sized human service organizations which work with the target population.

Eligible applicants are those which:

(1) Meet the legal requirements which qualify them as a foundation;

(2) Are an already established foundation;

(3) Have an endowment or are actively working towards building one; and

(4) Have a giving program which addresses a broad range of community needs.

Non-Federal funds: For every Federal dollar provided each year of the grant, the foundation must provide two dollars in cash, cash equities, bonds or commercial papers (representing new private funds). Other similar instruments must be approved by HDS.

The non-Federal funds must be deposited in an endowed, restricted fund. The future income of this fund must be used to support small and medium sized human service organizations which address the needs of at-risk adolescent youth.

Emphasis shall be placed on increased human services to youth at-risk such as runaways, homeless youth, older adolescents in foster care and unemployed, low-income youth. At the end of the third year, the foundation shall begin to use the income from the endowed restricted fund to fund subgrantees. The grants would continue to focus on the needs of the youth target population, but different project designs could be used after the three-year period.

Federal funds: Federal funding for challenge grants to foundations will be $50,000 per project per year for three years and will contain a requirement for submission of annual applications for approval by HDS. During the first three years, foundations will use Federal funds to address the needs of the target population including grants to subgrantees, as appropriate.

Foundations shall propose selection criteria for any subgrantees in the applications and upon approval from HDS, select subgrantees which will provide the services or shall propose subgrantees in their application and provide the selection criteria used. The use of subgrantees is mandatory for the Mainstreaming priority area and optional for the Independent Living priority area.

In FY 1988, HDS will fund projects in two topical areas: Mainstreaming Troubled Youth; and Independent Living for Older Homeless Youth. The programmatic concepts for Mainstreaming Troubled Youth are discussed below.

This priority area addresses the idea of brokering new pathways for low income youth and youth at-risk in the social/human services system to enter or reenter the mainstream life of their community.

The degree to which different age groups are underserved varies. Therefore, mainstreaming activities could feasibly address a broad age range of adolescent youth.

Generically, HDS programs offer shelter care; intervention; protection and rehabilitation. There is, however, another dimension to be addressed, that of additional motivation, socialization and support at the point where social

VOL 52 ISS 250 DEC 30 1987 UMI

service programs leave off and self-sufficiency begins.

Traditional organizations in the community (Girl Scouts, Police Boys and Girls Clubs, fraternities, sororities, etc.) that do not usually deal with these subpopulations have much to offer in this area. Their programs already include constructive use of leisure time, reinforcement of positive decision-making, strengthening self-esteem and self-awareness, adult role models, peer support, skills building, community service, conflict management and mediation. The target population of this priority area are the hidden clientele of numbers of such organizations which presently perceive working with at-risk youth as outside their general program efforts.

HDS seeks to continue the effort begun last year to develop community models for mainstreaming troubled youth through the use of challenge grants to foundations. In 1987, six grants were awarded which proposed a variety of strategies.

Two of these are described below.

(a) Involving youth who are currently in foster care in Girl/Boy Scouts on an ongoing basis; provision of support to these youth by furnishing them with required uniforms; transportation to meetings; working with scout leaders to facilitate the entry of these youth into the program; involving foster parents in scouting activities and in the Foster Parent's Association.

(b) Developing a collaborative community effort to better respond to the needs of adolescent females, ages 12–14, using trained volunteers as mentors who share activities and relate to these youth on a one-to-one basis; developing working agreements among several traditional youth organizations with which this target population will become involved; developing a training curriculum for volunteers and youth service providers.

What appears to be a key factor in implementing grants of this nature is the involvement of a local advocate group as a broker. The broker works with one or more local organizations each year of the grant providing technical assistance in developing programs to aid in the mainstreaming of at-risk youth.

The broker role may be carried out by a single subgrantee or by several subgrantees. The broker subcontracted for by the foundation should be prepared to work with at least one new traditional organization each year.

Runaway and homeless youth shelters and coordinated youth networks not only provide short term shelter care and counseling for troubled youth, but they also spend a major portion of their time and resources brokering the youth and their families into the appropriate service system for addressing their longer term needs. In this capacity and in their education/prevention efforts, shelters have become strong youth advocates in their communities. This priority area would like to involve foundations and runaway youth shelters or coordinated networks in a partnership to develop the concept described above. If a shelter is not available, other local youth advocate groups may be proposed as "brokers."

HDS anticipates funding projects for 36 months each at a Federal funding level not to exceed $50,000 per project per year.

3.2 Challenge Grants to Foundations: Independent Living For Older Homeless Youth

See introduction under Priority Area 3.1 above.

Statistics show a continuing increase in the numbers of older adolescents who are homeless and unprepared to live independently. This population of youth too often lacks the basic skills necessary to obtain employment and housing, manage money and time, seek acute and preventive health care, practice proper nutrition, and avoid substance abuse and sexual exploitation. Moreover, they are at-risk of becoming long-term dependents of local, State, and Federal social service systems.

Recent studies, including HDS funded demonstrations, have reflected the accumulated program experiences of States, cities, foundations and national organizations that comprehensive programs *can* be effective in reconnecting youth to society and developing needed competencies for productive self-sufficient lives.

In the last three years, HDS has funded projects that have demonstrated innovative models for developing independent living skills and transitional living arrangements for older homeless youth for whom returning home or state custody is not an option.

Many different social service agencies are attempting to deal with these problems. Transitional living, however, is a community-wide problem that requires community leadership and coordination of services. Three key criteria for successful program models have emerged from recent HDS funded demonstrations: residential facilities where youth are housed; full community acceptance of the residence and program; and financial and other supportive services for youth not in State custody and for whom Federal and State grant funds do not exist. These youth stand at a crossroad. If they do not grow to independence and full productive adult lives, they are at risk of becoming long-term dependents of the social service system.

Foundations are invited to submit proposals in which effective partnerships are established with youth-serving agencies; e.g., runaway and homeless youth shelters or networks of shelters and youth service organizations to provide independent living skills to older homeless youth or youth in need of alternative living. With the assistance of Federal funds and the establishment of endowed funds, foundations are encouraged to provide a leadership role in developing options for local independent living programs. The foundation can play a major role in the development of specific plans for gaining community support for a transitional living residence through meeting zoning requirements, providing public awareness, and involving business and community leaders and residents in selected phases of program operations. Many older homeless youth who are not in State custody have no mechanism for financial and personal support. Applicants are encouraged to develop funds to provide for such special needs as clothing, medical and dental care, and other needs that would not normally be covered under a Federal grant or State contract, perhaps as seed money or local challenge grants.

Applicants should provide leadership in the development of comprehensive programs and support networks; i.e., job training and assistance services, volunteer mentors, and training in life skills designed to prepare these youth for self-sufficiency. Socialization services as well as educational and health services should be included.

HDS anticipates funding projects for 36 months each at a Federal funding level of approximately $50,000 per year per project.

3.3 Improving Minority Participation in Runaway and Homeless Youth Centers

In most instances, minority youth are underrepresented as self referred clients in the runaway and homeless youth centers compared to their numbers in the target population being served. The Runaway and Homeless Program which serves runaway and homeless youth and their families is seeking ways to increase runaway shelter capacity to more effectively serve minority youth and their families.

The purpose of this priority area is to develop and test methods and model practices for increasing the capacity of runaway and homeless youth shelters to

serve at risk minority youth through such mechanisms as outreach activities and public education campaigns. Specifically, there is a need to increase the awareness in the minority community about available runaway and homeless youth services; to increase minority representation on the runaway shelter staff and boards of directors; and to develop and test program models which will improve the centers' capacity to serve minority runaway and homeless youth, particularly the 16–18 year olds.

Cultural and service-oriented minority organizations have a great deal to offer in helping to respond to the needs of minority runaway and homeless youth and their families and to improve the center's capacities to serve minority populations. National organizations such as the NAACP, COSSMHO, the Urban League and the National Congress of American Indians have affiliates and/or chapters in most cities which could be instrumental in increasing shelter visibility and viability as a prevention-oriented, community-based resource for minority youth and their families.

HDS is soliciting proposals from runaway and homeless youth centers and coordinated runaway and homeless youth networks which will develop formal linkages with minority organizations such as those mentioned above to develop and test innovative approaches and strategies to provide services to at risk minority youth and their families. The eligible applicants should consist of a partnership between the following: (a) A runaway and homeless youth center; or (b) a local, State or regional coordinated network as defined by Title III regulations; and (c) a local or State-wide minority service and/or cultural organization. Through a joint planning and program approach, the runaway and homeless youth programs and minority organizations should develop applications that provide statistics and describe the scope of the problem and the needs in their community; identify the specific minority target population or populations to be served; and indicate how the applicant proposes to address the problem. On-going substantive involvement of minority youth should be a key element in the development of these strategies on the assumption that the participating youth will provide valuable insights about the minority youth community's attitudes concerning the accessibility and appropriateness of available services.

Project outcomes should include successful models for increasing the number of minority youth and families served. Models should include culturally and ethnically effective service approaches to serving the target population. Non-traditional as well as traditional ways to serve the target population may be called for. Models should be replicable for use by other runaway and homeless youth shelters.

The applicants shall indicate in the application ways to determine the project's accomplishments, whether the project has reached its goals and objectives, and how it will assess the effectiveness of the project.

Projects will be funded for 24 months. The level of Federal funding would be approximately $60,000 per year per project.

3.4 Developing An Urban Strategy for the Prevention of Youth Suicide

Youth suicide is the second largest cause of death among the age group 15–24 with indications that the rate is increasing. In addition, the number of suicide attempts is much greater than the actual number of suicides. These attempts are a particular problem among runaway youth. In fiscal year 1985, HDS funded a cluster of projects designed to identify or develop effective techniques for the intervention and provision of emergency services to seriously depressed and suicidal youths. Several effective tools and strategies have emerged from these demonstrations; e.g., a computerized training program for runaway shelter staff; an effective screen for detecting the degree of risk of adolescent suicidal behavior; a model of programmatic linkages between hospitals and runaway shelters and other youth serving agencies to better detect, diagnose and treat suicide behavior; and an innovative model involvement of youth themselves in reducing teenage suicides.

With the continued increase in teenage suicides, particularly in medium and large size metropolitan areas, and the complex nature of this phenomenon, HDS is interested in developing an effective urban strategy for addressing this issue. The focus of this strategy is youth suicide prevention, but the larger issue is meeting the health and mental health needs of adolescent youth at-risk through the development of a community-based treatment network.

One of the outcomes of the group of projects funded in 1985 was a successful model of a community based service network. HDS would like to test the replicability of this model which would also include the use of other effective tools developed by this cluster of projects.

This model, developed by Columbia University, consists of three agencies—runaway shelters, a comprehensive youth services program, and a hospital-based treatment and research facility. First, an effective screen for detecting the degree of risk of adolescent suicidal behavior was developed. The screen uses a scale that assists center staff in determining which level of service is needed. Imminent danger would call for hospitalization, risk or high risk would call for psychiatric evaluation and mental health services. Next, resources were put in place to meet these needs. This screen and triage model has already resulted in a reduction of suicide attempts in the shelters in the New York City area. Detailed information about the model design including the specific components of training, agency protocols and networking strategies for the model's implementation should be obtained from Dr. Mary Jane Rotherman or Mr. Jon Bradley at the Columbia University College of Physicians and Surgeons, Research Foundation for Mental Hygiene, Inc., 722 West 168th Street, New York, NY 10032 (telephone: (212) 960–2332 or 2565).

Applicants are invited to submit proposals designed to replicate the Columbia University model. Applicants should be a combination of runaway and homeless youth shelters and one or more hospital based research and treatment facilities. Either the hospital facility or the shelter may be the lead applicant. Specifically, proposals should show a good understanding of the model and discuss the needs of the community and how the model will address these needs. Project outcomes should specifically address the establishment of cost-effective models designed to reduce incidence of suicide, suicide attempts, and associated at-risk behavior. Projects should result in the establishment of a viable triage service system including intake, assessment, diagnosis and treatment and staff training. Applications should show evidence of commitment and partnership between a major hospital and a group of shelters. Applicants should also provide in their budgets for the costs of training for three project staff at a training workshop which will be provided by Dr. Rotherman and her staff on the implementation of this model. Information on the costs of training can be obtained from project staff at Columbia University.

HDS anticipates funding projects at a Federal funding level of $130,000 per year per project for each of two years.

3.5 Parenting Programs for Incarcerated Parents

There is little information about the stigmas that are attached to parents who are incarcerated and their children. Past experience, however, indicates that parenting skills and visitation programs for these parents are critical factors in promoting emotional stability for both parents and children.

Evidence suggests that parenting skills programs can and do have a positive impact on incarcerated parents' sense of self worth and confidence in dealing with their children.

The importance and need for further program development and documentation in this area is illustrated by the following data from three projects funded in this priority area in FY 1987:

1. An estimated 81% of the female population at one State correctional institution have an average of 2.5 children;

2. Another State correctional institution found that most inmate mothers (83.6%) will regain custody of their minor children; and

3. In some State correctional institutions, mothers (as many as 46.8% in one survey) report that they have not seen one or more of their children during incarceration.

Information from projects thus far seem to confirm that many incarcerated mothers themselves suffered abuse and/or neglect as a child.

HDS and the National Institute of Corrections (NIC) will fund parenting skill development demonstration programs, which include but are not limited to innovative visitation type programs. Applicants should address the impact of parenting programs on incarcerated parents and their children. Impacts may primarily be addressed in terms of:

First, as a possible preventive/intervention factor to break the cycle of abuse; or

Second, as a means of strengthening the motivation of incarcerated parents to develop more constructive coping skills through increased self-awareness, improved self-image, and parenting skill development.

Through these projects HDS expects information on what components—or mix of components—best improve parenting skills, increase self-worth, stimulate self improvement activity and/or reduce recidivism. HDS is particularly interested in knowing the circumstances in which such components are effective. In addition, State correctional institutions need information on how innovations in a State correctional institution can be implemented and maintained over time.

A number of incarcerated parents were themselves victims of physical, emotional, and sexual abuse. We are interested in learning more about what this factor may imply in developing a permanent and successful parenting program for incarcerated parents, specifically in the area of rehabilitation from the affects of abuse and intervention in the high risk cycle that an abused child is likely to become an abusive parent.

Proposals should include a well designed evaluation component that addresses the impact of the program on factors such as increased parenting skills, child-parent relationships, improved self-image, greater interest in self development, job skills, and participation in career counseling, taking into account the possible relationship of these factors to recidivism within given time frames and level of participation. Project applicants should be prepared to address not only the design and development of successful programs, their implementation and evaluation, but also the design and development of documentation which will provide both qualitative and quantitative indicators of impact.

Although credible data is needed to specify program outputs to parents and as base line information for possible future projects, this data *per se* will not be interpreted as necessarily success or failure of a particular program.

Eligibility in this area is limited to a partnership between a State correctional institution and one or more of the following types of organizations: Professional associations in the field with research capability; educational institutions which include universities and colleges; graduate schools of social work; and institutes or centers of child and family development. Applicants are strongly encouraged to include a volunteer component. Applicants should list the organization(s) that will work on the project along with a description of their specific contribution to the project. Written assurances should be included with the application, if available. The State correctional institution is the lead partner and should act as the grantee. Once funded, grantees, either through a conference call or during a meeting in Washington, will work together to establish common data collection terms and practices.

HDS and NIC anticipate funding 36 month projects having a Federal share not to exceed $65,000 per project, per year. Because of the way State correctional institutions are organized, applicants should focus separately on either incarcerated mothers or incarcerated fathers.

Child Abuse and Neglect

4.1 Advocates for Children in Criminal Court Proceedings

The purpose of the Children's Justice Act is to improve the handling of child abuse cases, particularly cases of child sexual abuse, in a manner that reduces additional trauma to the child victim. HDS seeks to extend the use of advocates for children from juvenile court proceedings to criminal court proceedings, in order to provide more support for the child victim in the court process.

Abused children, particularly those who are sexually abused, are often involved in criminal court proceedings as a victim/witness. The experience is often devastating to children and, unless special measures are taken to prepare and support these children when called upon to testify, additional abuse can occur. A child must attempt to cope with confronting the alleged perpetrator, the intimidating formality of the courtroom, a room full of strangers, and intensive questioning by attorneys. The immaturity of the child makes it difficult for him/her to cope with the complicated judicial proceedings, which even adults often find frightening.

HDS proposes to develop programs of trained volunteer advocates working with the courts and the criminal justice system to serve children involved in criminal court proceedings. Some of the tasks an advocate would perform include:

- Explaining the judicial system in terms children can understand. This should include explaining the roles and responsibilities of the various people in child protective services and law enforcement, as well as the courtroom setting;
- Walking the child through a court proceeding in advance of trial explaining what happens in the courtroom, where the different people will be seated and who will participate in the court hearing;
- Offering support to the child in court proceedings by explaining the next step in the process, preparing the child for the hearing, taking the child to the hearing, and sitting beside the child during a hearing or a trial;
- Monitoring the dockets, hearings and proceedings of all of the courts in which the child is involved; and
- Acting as an amicus curiae (friend of the court) regarding issues concerning the child. This role must be developed in a manner that ensures the alleged perpetrator's constitutional rights are protected.

HDS will support projects to assist court systems, public or nonprofit agencies or coalitions of agencies to recruit, train and use volunteer advocates in criminal court proceedings with special emphasis on: (1) Abused children, particularly sexually abused children, and (2) appointment of advocates at the earliest pre-trial stage.

Applicants are required to describe proposed evaluation procedures which include input from the applicant, the applicable court, the prosecuting attorney's office(s), child protective services, defense counsel, and the child. The joint evaluation process should address whether the project reduced additional trauma to the child victim/witness.

Applicants must provide written assurances of participation from the applicable court, prosecuting attorney's office, and child protective service agency.

Applicants must show that efforts will be made to enlist volunteers who represent the social or ethnic characteristics of the child population being served. The applicant must indicate how the program will continue after Federal assistance ends.

HDS anticipates funding 24-month projects having a Federal share not to exceed $50,000 per project per year.

4.2 Prevention of Serious or Fatal Maltreatment

It is estimated that at least 1,200 children died in 1986 due to child abuse and neglect—approximately half from neglect and half from abuse. An additional undetermined number suffered serious maltreatment due to child abuse and neglect, although they did not actually die.

In July 1987, the National Committee for Prevention of Child Abuse sponsored a national symposium on the issue of child fatalities, at which the available research and data were presented and discussed. Several basic conclusions were reached at this symposium:

1. The total number of child fatalities due to child abuse and neglect is too small to develop valid predictions of which individuals might fatally injure children.

2. It is possible to sort out some high risk child populations for serious or fatal abuse and neglect. For example, infants under the age of one are particularly vulnerable to serious and fatal abuse and neglect. For teenagers, violent deaths and sexual abuse are potential problems.

3. The most effective approach to reducing child fatalities, including those for child abuse and neglect, is the development of prevention programs which address high risk populations. A number of suggestions were made at the symposium for further development of effective prevention approaches, including community wide models to support families in which children are given responsibility for caring for their younger siblings and variations of home visitor programs.

The purpose of this priority area is to request field initiated demonstrations of prevention programs in child abuse and neglect, aimed at preventing serious and/or fatal child abuse and neglect.

The proposed demonstrations should clearly address what high risk populations will be serviced, specifically what measurable outcomes will be sought to achieve an overall reduction in serious or fatal child abuse neglect cases, and the specific prevention interventions which will be used. Applicants should propose a well developed third party evaluation to measure the results, as well as products and resources for dissemination of successful approaches.

HDS expects to fund projects with a 24-month project period having a Federal share not to exceed a maximum of $100,000 per year per project.

4.3 Minority Organizations Assisting in Combating Child Abuse and Neglect

National, regional and State minority organizations capable of focusing attention on child maltreatment issues through educational initiatives designed specifically for their constituent populations at the State, regional and local levels are asked to submit proposals for combating child abuse and neglect.

Child abuse and neglect is present in all races and cultures; it is found at all social and economic levels. The rise in reported cases over the past several years has increased public awareness and aroused considerable concern. That, in turn, has contributed to a heightened national focus which is reflected in the efforts of various agencies and organizations to work to protect the nation's children from abuse and neglect. HDS seeks the assistance of minority organizations which interact with minority groups at the regional or community level which have not been involved in the decision-making process for defining and seeking solutions to child abuse and neglect in the community.

It has been established that different minority groups have specific needs at the service delivery level; child abuse and neglect is no exception. Yet specific needs in a given constituent population are often overlooked. Therefore, HDS is soliciting applications from national, regional and State, minority organizations, associations, and fraternal orders with the capability of focusing attention on child maltreatment issues through educational and other initiatives developed specifically for their constituent populations.

Proposals should include strategies for:

- Defining the problem of child abuse and neglect for the constituent population;
- Developing and field testing public awareness campaigns to address the problems of child abuse and neglect among the constituent population;
- Ensuring that minority child maltreatment issues are addressed by State, county, and local child abuse and neglect agencies in all phases of the development and delivery of prevention, identification, treatment and training programs on child abuse and neglect. This could include (in addition to other strategies to ensure respresentation and participation) minority professionals on staff who reflect the makeup of the client population, and minority representation and participation on public and private Advisory Boards. Moreover, other strategies could be included that provide for the development of child abuse and neglect prevention, intervention, treatment and training programs utilizing the resources of the local community, such as churches, businesses, and professional and fraternal organizations. Such groups could be instrumental in obtaining suitable community volunteers.

There should be evidence of coordination with the appropriate State/county Child Abuse and Neglect agencies and organizations. Letters of support and commitment from participating organizations should be provided. Applications from coalitions of organizations are encouraged. HDS will fund projects having a Federal share not to exceed $100,000 per year per project for 24 months.

4.4 Public-Private Partnerships to Combat Child Abuse and Neglect

Child abuse is a multifaceted problem in our society and requires the combined resources of the public and private sectors to develop prevention and treatment programs. The business sector has in the past become involved in seeking solutions to human service problems, by lending their time, skills, and other resources to worthwhile efforts. They have come to realize they

VOL 52 ISS 250 DEC 30 1987 UMI

can enhance their public image, improve worker morale, and create a better community through these efforts. Corporate social responsibility has become a hallmark of many successful corporations. In this priority area HDS seeks proposals from nonprofit organizations which will develop and demonstrate innovative ways the business sector can join with public and private agencies to help combat child abuse and neglect.

Proposals are sought from nonprofit organizations such as national/state associations, fraternal organizations or foundations to develop projects which will collaborate with the business community to develop innovative and creative child abuse prevention projects. These projects will use the resources, commitment and expertise of the corporate sector to carry the child abuse and neglect prevention message to a broad sector of the population, which is larger than the traditional Child Protective System network. The applicant organization, for example, could propose to work with the business community to:

- Sponsor National campaigns to increase public awareness of child abuse and neglect and methods of prevention.
- Establish child abuse and neglect prevention and/or treatment programs within their organizational structure. This approach could include strategies to reduce working parents' stress on the job by such methods as: supporting the establishment of parent support groups, providing flexible work schedules, assisting with child care and developing employee assistance programs.
- Collaborate in a State or local community effort to combat child abuse and neglect. This approach is similar to those in which corporations support a social service program by providing financial, and managerial support, or volunteers, thus allowing the corporation and its employees to have a sense of responsibility and satisfaction for the success of the particular service program sponsored.

Applications should have letters of commitment from the organizations which will participate in a project. There should be evidence of coordination and cooperation with the state or local child abuse and neglect agency as well as expressions of intent on the part of the participating corporations or businesses.

HDS will fund projects with 24 month project periods having a Federal share not to exceed $100,000 per project per year.

4.5 Child Sexual Abuse Curricula Adapted To Native Americans

Child sexual abuse now is recognized as pervading modern society with estimates that by the age of eighteen 15–25% of girls and 3–10% of boys will be sexually abused. The Native American population is no exception.

Several curricula have been developed and used to train children, parents and teachers how: (1) to talk about and cope with past child sexual abuse, and (2) to prevent future child sexual abuse. The curricula has usually been taught in a school setting. Many experts believe that how and by whom the curriculum is implemented makes a difference in how a child accepts and incorporates the information. An appropriate educational setting is believed to be a familiar and nonthreatening environment to children, and a teacher is a responsible person that children often trust and to whom they will be open. It is also critical to involve school administration and parents to ensure that they fully support the program.

Some curricula which have been recognized in the field include the following:

Talking About Touching (1983) Ruth Harmes and Donna James. Seattle, Washington: Committee for Children. Grade level: K–4.

This curriculum is divided into four units: Personal safety and decision making, touching, assertiveness, and community support systems. Each lesson consists of a photograph with objectives, notes to the teacher, a story and discussion questions. Also included are physical indicators, handling disclosure, responsibilities for reporting and suggestions for addressing parents.

Personal Safety Curriculum: Prevention of Child Sexual Abuse (1983) Geraldine Crisci Hadley, Massachusetts Grade level: Preschool–6.

This curriculum resulted from one of six prevention projects funded by NCCAN in 1980. Curriculum components include the touch continuum, problem-solving skills, social support systems, and emphasizes safety without engendering fear.

Personal Safety: Curriculum for Prevention of Child Sexual Abuse (1982) Marlys Olson, Child Sexual Abuse Prevention Program, Tacoma, Washington Grade level: Preschool–12.

This curriculum contains comprehensive material including bibliographic information and complete lesson plans for Head Start, K–2, 3–4, 5–6, junior high school, and senior high school.

An annotated bibliography of curricula, selected model curricula materials, and support can be obtained from NCCAN and the Bureau of Indian Affairs.

We are requesting proposals for demonstration projects from national Indian organizations and Federally recognized Indian Tribes to adapt child sexual abuse prevention training curricula for children on Indian reservations, grades two through six. The proposals should address the following issues:

(1) All applicants must include plans for selecting and contracting with consultants who are experts in child sexual abuse prevention training. In addition selected Tribal members who are also parents should be included as members of the staff or in an advisory capacity. An applicant, with the assistance of a consultant, staff and parent advisors will review the state of the art curricula, select the curriculum most suitable for the Tribe, and adapt the curriculum for use in the Tribal community.

(2) The training curriculum will target Native American children grades two through six "on or near" the reservation. The program will include training for the teachers to implement the program as well as for the parents and children. The location and the setting where the training will take place is to be provided by the applicant.

Letters of commitment clearly detailing what will be provided are required from all schools, cooperative service providers and facility providers including volunteer organizations.

Applicants from national Indian organizations are required to provide a letter(s) of commitment from the Tribal council of one or more Federally recognized Indian Tribes which clearly details: (1) The participation of the Tribe in the development and implementation of the program; (2) how the Tribal council will be involved in the program; and (3) the Tribal council's agreement to accept the curriculum selected.

Applications from Indian Tribes must include a letter of commitment from the the Tribal council detailing clearly the proposed involvement in the program.

Eligibility for this priority area is limited to Federally recognized Indian Tribes and national Indian organizations.

HDS will fund projects with 24 month project periods having a Federal share not to exceed $100,000 per project per year.

4.6 Treatment Approaches for Intra-Familial Child Sexual Abuse

A variety of interventions to ameliorate the effects of child sexual abuse have been developed over the last decade. Often, of necessity, the primary and sometimes the only focus has been the protection of the child and services that minimize the trauma to the child.

Although the healthy functioning of the family where sexual abuse has occurred is recognized as necessary to the well-being of the victim, it has generally not been the primary focus of intervention. At this time what is needed are family based treatment and service provision models which define the family in which child sexual abuse has occurred as the primary client and which emphasize both of the following:

- Treatment of the family as a unit, including both the victim and, if available, the perpetrator in intra-familial cases; and
- Adaptation of an intensive family based services approach for work with these families. This approach seeks to enable families to assume greater responsibility for their own lives by providing intensive, goal oriented services with goals determined and prioritized by the families themselves.

The project should result in the adaptation of family based treatment and services, potentially replicable by other programs, which work with sexually abusive families. The desirability of treating the entire family involved in sexual abuse is supported by research which suggests that intra-familial sexual abuse is not based solely on the relationship between the perpetrator and the victim.

There is often a collaborative role on the part of the mother in father-daughter incest. More than one child victim and/or more than one perpetrator may be involved, although this may not be known initially. Thus, therapeutic interventions must focus on the entire family in order to improve family functioning by building on the strengths that exist within the family. If the victim has been removed, and the case plan is to return the child to the family, special efforts must be made to maintain and improve the ongoing relationship between child and family. If the perpetrator is enjoined from relating to the family, or is in jail, all family members need help in handling these circumstances.

HDS is interested in proposals for demonstrating family based treatment models for families where the sexually abused child is at home or where reunification with the family is the plan. Applicants must demonstrate proven ability in family treatment or family based services within a child welfare setting. Applicants should present an evaluation plan that an external evaluator can utilize in order to evaluate the outcome of the project. This evaluation plan should identify the type, quantity of data to be collected, possible instruments to be utilized and other relevant information. Applicants may wish to contact the NCCAN supported National Resource Center on Family-Based Services, University of Iowa school of Social Work, N240 Oakdale Hall, Iowa City, Iowa 52242 for additional information on family-based services involving sexual abuse.

Letters of commitment from agencies which will be involved in the project should address the specific level and type of commitment they are prepared to support.

HDS anticipates funding three-year projects having a Federal share not to exceed $125,000 per project per year. The first two years will focus on methods and approaches of providing short-term treatment; the third year will continue this with existing cases, but will focus on evaluating the various modes of intervention used with these families.

4.7 Diagnosing and Treating Chronic Neglect

Information gathered from surveys of reports and case records indicates that among neglectful families there is a core group (perhaps five to ten percent) which consumes a disproportionate amount of services over long periods of time. These are families who have become known to an array of agencies and courts over the years. Sustained service efforts made on behalf of these chronically neglectful families do not sufficiently improve their functioning to enable them to overcome their neglectful behavior, to remain intact and manage independently. The provision of intensive comprehensive social services over short periods of time has been relatively ineffective in improving the functioning of these particular families.

However, several program characteristics have been identified by practitioners and researchers as critical to successful intervention with chronically neglecting families: (a) alleviation of the family's distrust of social service agencies; (b) the critical need for an accurate and comprehensive differential diagnosis at intake or shortly thereafter; (c) special efforts to develop and utilize peer support groups; and (d) provision for an extended continuous period of time for working with these families.

HDS is soliciting proposals for demonstration projects which will address the problem of *chronic neglect*. The proposals must include the following:

1. Specific criteria for identifying the *chronically* neglecting families. These criteria should differentiate this subset of families based on characteristics of parental behavior/condition and should not include neglect by reason of poverty alone. It is anticipated that these families will comprise less than ten percent of incoming cases.

2. Development of a differential diagnosis or assessment of the family. Treatment and service plans must be tailored specifically to meet the needs of each family and family member. (It is important to note that recent studies indicate that many of these parents have been victims of child sexual abuse which has not been diagnosed and treated previously.)

3. Plans for developing peer support groups.

4. Description of the plan for case management. Each family must be assigned a case manager to work with the family and coordinate services. The case manager should be responsible for maintaining a regular schedule of dependable contact with the family, for establishing and continuing a supportive relationship and for providing a source of familiarity with the family's history.

5. Regularly scheduled meetings of service providers, use of special teams of consultants, and coordination with other community agencies.

6. Plans for the recruitment, training and use of paraprofessionals and lay volunteers.

7. Treatment of these families should be continuous, although the particular services provided may change as indicated by the family's needs. It is important that assessment of a family functioning be ongoing and that the applicant develop (a) criteria for determining the family's capacity to improve sufficiently to be an intact family, and (b) criteria for the determination of when alternate plans must be made for the children.

Applicants must agree to work collaboratively with other projects and a consortium leader (to be selected from the successful applicants) in order to collect a common core of data and measurements of outcome. Applicants will propose data to be collected: profile data, assessment instruments, diagnostic categories, services provided, and outcome measures. After funding decisions have been made, all grantees will meet with the designated consortium leader to agree on common data to be collected by all projects. Additional data may be collected by individual projects. Adequate time for at least one qualified person to be responsible for data collection management must be proposed by each applicant.

Letters of commitment are required from all cooperating service providers including volunteer organizations, and

VOL 52 ISS 250 DEC 30 1987 UMI

all must agree to collect data and provide it to the consortium leader.

It is expected that within the first six months the projects will identify the families to be included, and will, therefore, have two years for treatment, so that outcomes can be studied in the final six months.

An applicant should indicate if there is interest in serving as a consortium leader. Interested applicants should provide information about qualifications of staff available to carry out this evaluation function. An additional six months and additional funding will be provided to the consortium leader to allow for analysis of data from the five projects.

HDS will fund projects with 36 month project periods having a Federal share not to exceed $125,000 per project per year (30 months for implementation and treatment and six months for follow-up). The third year funding will be determined after receipt of each applicant's third year budget suggesting the amount needed.

4.8 Longitudinal Study for Child Abuse and Neglect

The National Center proposes to support a longitudinal life-course study of families at-risk of or involved with child maltreatment. It is anticipated that the study will help contribute to our knowledge of the etiological, and ecological understandings of child maltreatment. By focusing on child and family development and examining systems theories, the study will derive new insights into intervention, prevention, amelioration or treatment as experienced by the study sample. This developmental grant will be used to prepare a scientifically valid, comprehensive and feasible longitudinal study design including the following: a critical review of the pertinent literature; identification of specific study issues; design of a sampling framework, including sample attrition and retention; identification of instrumentation available or to be developed; and outline of a problem identification and resolution methodology.

Applicants should demonstrate an indepth understanding of the impact of child maltreatment on victims, families and the community at large as well as up-to-date knowledge of the extent of the problems, issues, research and treatment modalities on child maltreatment. The etiological, causal, and ecological problems and issues dealing with child maltreatment should be discussed.

In addition to a well-defined and carefully worked out study design and methodology, applications should include a discussion of the innovativeness of the design and uniqueness of the study. The evaluation component should be well-defined with data collection and analyses geared to measure the degree to which the goals and objectives of the study are achieved.

In the discussion of the proposed approach, applicants should include options which could be used to address contingencies which may occur during a longitudinal study, such as unavailable subjects.

In evaluating applications under this priority area, the dissemination and utilization criterion worth 15 points has been eliminated. Those 15 points have been added to the level of effort criterion for a total of 35 points.

HDS will fund projects in Phase I to develop a design of the study with a Federal share not to exceed $50,000 per project for 12 months. Upon completion of Phase I, HDS will evaluate the design of the study and make a decision as to which application to fund. In Phase II, HDS will fund one project for an indefinite period of up to 10 years with a Federal share not exceeding $200,000 per year. Non-Federal funds required of the applicant must comprise at least five percent of the total cost of this project.

4.9 Child Fatalities

One study has estimated that at least 1,200 children died in 1986 as the result of abuse and neglect. Another study suggests the number may be closer to 5,000. Half the number of children died of battering, single violent incidents or the cumulative result of repeated episodes. The remaining number died because of neglect.

Some studies indicate that it is difficult or impossible to predict a child abuse or neglect fatality. Consequently, in order to make advances in the prevention of child fatalities, it is necessary to examine the issue of prediction more closely.

Some studies indicate that in most cases the perpetrator of the child fatality is male. Statistics also indicate that the child is most often two years old or younger. However, while these factors have been recognized, precise indicators of the factors potentially leading to a child fatality have not been forthcoming.

Research is needed to determine if there are clear causes (e.g., personality attributes of the parent, specific child traits or conditions, precise environmental factors) for the child fatalities resulting from child neglect, for the child fatalities resulting from one incident of child abuse, or the cumulative impact of repeated incidents of child abuse.

HDS is interested in developing indicators which will assist protective service workers in the field in distinguishing those situations where children are at-risk of fatal injury.

HDS anticipates funding projects of up to 36 months duration having a Federal share not to exceed $150,000 per project per year. Non-Federal funds must comprise at least five percent of the total cost of the project under this priority area.

4.10 Impact of Investigations

The number of reports of suspected child abuse and neglect received by Child Protective Services agencies has escalated at a rate often beyond the agencies' capacity to respond fully to each report. In an effort to more effectively channel available resources, many States have implemented risk assessment systems to identify and investigate the most serious cases. These systems are utilized by intake workers to determine probable cause for further investigation of the report.

As a result of this process, increasing numbers of families are being "screened out." As a corollary to current study efforts on various risk assessment systems, we need to examine if these families come into the protective services system at a later date and with more serious implications. We need also to examine effective strategies for early intervention or warning to reduce the potential for subsequent family dysfunction.

Research is needed to answer some critical questions:

- What services, if any, are provided to these families?
- What is the impact on families screened out at intake?
- What is the return rate of these families?
- What is the degree of family dysfunction?
- What is the nature of the abuse and/or neglect at the later date?
- Do any of the above vary by the level of training of the intake worker?

Applications should list all the organizations that will work on the project, along with a description of the nature and extent of their collaboration. Written assurances should be included with the application if available. Applicants should show ability to gain access to necessary information.

HDS anticipates funding projects for up to 36 months in duration having a Federal share not to exceed $150,000 per project per year. Non-Federal funds must comprise at least 5 percent of the total cost of projects under this priority area.

4.11 Relationship Between Child Abuse and Teenage Pregnancy

In past years, the provision of parent support and educational services to teenage parents has been a primary focus of child maltreatment prevention efforts. The rationale for this focus has been the assumption that parents in this age group represent a high risk population as potential child abusers. While anecdotal evidence from numerous demonstration programs seems to bear out this assumption, contradictory findings have emerged from other research studies and reporting data.

Further research is needed in this area for two purposes: (1) To test the validity of the assumption that child maltreatment among teenage mothers is more prevalent than maltreatment among parents in other age groups; and (2) to explore the unique causal factors for maltreatment that may exist among these parents, including those that identify high risk sub-populations. Such factors may include situational stresses, level of emotional and psychological maturity, economic dependency, parental victimization as a child, and lack of parenting skills.

HDS will consider studies in this area and plans to fund projects for a 36 month duration at a Federal share not to exceed $150,000 per project per year. Non-Federal funds must comprise at least 5 percent of the total costs of project under this priority area.

4.12 Field Initiated Research for Child Abuse and Neglect

HDS is interested in supporting research initiated by researchers in the child abuse and neglect field to carry out the legislative responsibilities established for the National Center on Child Abuse and Neglect by the Child Abuse Prevention and Treatment Act, Pub. L. 93–247. One of these responsibilities is to:

> * * * conduct research on the causes, prevention, identification, and treatment of child abuse and neglect, and on appropriate and effective investigative, administrative and judicial procedures in cases of child abuse.

Basic research in the behavioral and social sciences which contributes to theory development is not within the purview of this announcement. Our particular interest is current issues having widespread impact on the field of child abuse and neglect, and on the target population.

Applications should list all organizations that will work on the project, along with a description of their contribution. Written assurances should be included with the application. Applications should show that applicants will have the ability to gain access to necessary information.

HDS will fund studies for up to 36 months duration at a Federal share not to exceed $150,000 per project per year depending on the questions to be answered, the intensity of the effort proposed, and the generalizability of the results which may be anticipated. Through this priority area HDS seeks to provide a comparative process for field generated topics. Non-Federal funds must comprise at least 5 percent of the total cost of projects under this priority area.

Applicants should clearly demonstrate an indepth understanding of the issues and problems associated with child abuse and neglect. In addition, the literature survey should be up-to-date and reflect evidence of familiarity with the various organizations that deal with child abuse and neglect at the macro and micro levels.

In evaluating applications under this priority area, the disseminiation and utilization criterion worth 15 points has been eliminated. Those 15 points have been added to the level of effort criterion for a total of 35 points.

For potential applicants seeking additional information on any of the above priority areas, a series of bibliographies related to NCCAN's *research* efforts are available, free of charge, from the Clearinghouse on Child Abuse and Neglect Information, P.O. Box 1182, Washington, DC 20013.

Bibliographies are available for the longitudinal study, including etiological and causal factors on child maltreatment, as well as intervention and prevention efforts; child fatalities; information on protective services intervention and investigatory procedures; and adolescent pregnancy and teenage mothers.

Adoption Opportunities

5.1 Post Adoption Services for Children With Special Needs and Their Families

In the past decade there have been many changes in adoption services, especially as they affect children with special needs and their adoptive families. It has become increasingly evident, that families formed by adoption are in some ways different from other families, have unique problems and need access to services from providers that are knowledgeable about these differences. Many adoption agencies understand the need for post-adoption services and most agree that post-adoption services are an essential component of adoption services. Current practice standards require that the availability of post-adoption services should be introduced during preparation of the family for adoption, be available throughout the time the child is growing up and be available as an integral part of agency service.
